COE faculty and students present at National Association for Professional Development Schools in DC

APRIL 13, 2017

(Left to right) Howerter, Selber, Harbin, Mobley, Davis

Faculty and students from the College of Education (COE) attended the National Association for Professional Development Schools (NAPDS) conference in Washington, D.C., on March 9-11.

Graduate student Rachel Steinbrenner presented with faculty members Kathleen Tootle, Catherine Howerter, Ph.D., and Lisa Davis. Their session, titled "Partnerships Enhanced Through Yearlong Student Teaching Experience," detailed the three teacher preparation programs in the College that are implementing yearlong student teaching internships for pre-service teacher candidates. Presenters provided their perspectives of the yearlong internship process and benefits such as closer, proactive relationships between the College and schools, as well as a more integrated student-teaching experience for the teacher candidate in the school climate.

"It was incredible to see professionals from all over the country coming together to learn and grow from each other to make our future teachers stronger," said Steinbrenner, candidate in the M.Ed. Special Education program. "Continuing to do research is vital because the world of education is constantly changing, and we need to keep up."

Howerter also co-presented with fellow faculty member Amanda Wall, Ph.D., on a session titled "Learning Together: The Story of a New Faculty in Residence Program." Pat Parsons, Ed.S., director of field experiences and placement, assisted in developing the presentation.

During the session, Howerter and Wall discussed the efforts of the College to develop a Faculty in Residence (FIR) program. FIR allows faculty members from the COE to spend time "in residence" at a partnering P-12 school collaboratively supervising teacher candidates and addressing mutually agreed upon school initiatives based on the school's strategic plan. Both Howerter and Wall are actively participating in the College's first pilot of the FIR program this semester.

Undergraduate dual certification (special and early childhood education) majors Brittany Harbin, Julia Mobley and Allison Sebler also attended the conference and participated in a poster presentation. Their presentation, "Effects of Pre-Services Teachers Within the Classroom," included data collected from student teachers in the dual certification program and clinical supervisors at their field placement to determine the impact of pre-service teacher candidates on a local elementary school.

"I believe that having undergraduate students not only attend but present at national conferences gives them the opportunity to see education on a bigger scale," said Howerter. "It helps them grow professionally and gain confidence speaking in front of others. My hope is they will continue to be life long researchers and learners."

NAPDS serves as an advocate for the educational community in promoting continuous development of collaborative schools, higher education and community relationships.
