WELCOME

This issue marks my eighth spring on Armstrong’s lush arboretum campus, which is currently in full bloom. As many of you know, this is also my final year as Armstrong’s president, as I will retire from the University System of Georgia on June 30. It has been an incredible privilege to lead a university with a rich history and a powerful sense of family. What an honor it has been to know so many hard-working students, devoted faculty, talented staff and proud alumni.

As I reflect upon my years at Armstrong, so many memories come to mind. Every spring and fall, I value my conversations with students at our Treasure Savannah day of service. I love learning about undergraduate research projects at the Student Scholarship Symposium and celebrating each student who crosses the stage at commencement. I am extremely proud of the work our students do both in the classroom and in the community and of the contributions our alumni make each and every day.

One of my favorite experiences at Armstrong has been cheering for our student-athletes from the sidelines, along with my husband Carl, at countless sporting events. For the past 50 years, Pirate athletic teams have earned 13 national championships, 96 Peach Belt Conference championships, 139 NCAA Championship appearances and 296 All-Americans. What a proud history—my heart will always remain maroon and gold.

In this issue of Armstrong magazine, we celebrate eight decades of Armstrong, from our early days in downtown Savannah to our current homes on the southside and in downtown Hinesville.

Through the years, Armstrong’s values of scholarship, leadership and stewardship have guided us. I am hopeful that our commitment to supporting student success will deepen and strengthen as we chart a brave new path for the future.

Always a Pirate,

Linda M. Bleicken
President

Dorothy Kempson Named Director of Armstrong Liberty Center

Dorothy “Dot” Kempson was named director of Armstrong Liberty Center. Kempson has worked at the Liberty Center for more than 15 years and served as interim director during the 2015-16 academic year. Overseeing the move to a state-of-the-art facility in downtown Hinesville, Kempson also drove a successful enrollment campaign, resulting in more than 20 percent growth for fall 2016. Her retention efforts included an expansion of student support services and serving as advisor to the newly formed Liberty Center Student Council, which promotes student engagement and inclusion in activities, events and student government.

Kempson holds four degrees from Armstrong, including a M.Ed. in Adult Education, a M.A. in Professional Communication and Leadership, a B.A. in Criminal Justice and an Associate of Arts.

Professors Awarded $330,000 Math & Science Partnerships Grant

The U.S. Department of Education recently awarded a $330,000 grant to Armstrong Senior Physics Lecturer Donna Mullenaux, Math Lecturer Janel Smith, Ph.D. and Childhood and Exceptional Student Education Lecturer Elizabeth Williams.

The two-year grant is funded by the Mathematics and Science Partnerships federal program and supports STEM education in the Savannah-Chatham County Public School System (SCCPS). Mullenaux, Smith and Williams are collaborating with SCCPSS personnel to provide professional development for elementary and middle school math and science teachers. Together, they will implement the Content and Instructional Practices Project, which focuses on content instruction and instructional training to strengthen the classroom experience for students.

Delana Gajdosik-Nivens Promoted to Dean of College of Science & Technology

Delana Gajdosik-Nivens, Ph.D., was promoted to the position of dean of the College of Science and Technology and began her new role Jan. 1, 2017. She acted as interim dean during the second half of 2016. In her new role, Gajdosik-Nivens serves as the chief academic and fiscal officer for the College of Science and Technology. She also lends support to faculty in teaching, scholarship, service and professional development, in addition to maintaining productive partnerships with sister University System of Georgia institutions.

Gajdosik-Nivens holds a Ph.D. in Analytical Chemistry from the University of South Carolina and a B.S. in Chemistry from the University of Pittsburgh. She completed a post-doctoral fellowship at the U.S. Naval Research Laboratory’s Center for Biomolecular Science and Engineering in Washington, D.C.

Tom Cato Receives Georgia Art Education Distinguished Service Award

Art, Music and Theatre Department Head Tom L. Cato, Ed.D., received the Georgia Art Education Association (GAEA) Distinguished Service within the Profession Award. This award recognizes an outstanding GAEA member for exemplary contributions, service and achievement at the state level and was presented at the annual convention in Gainesville, Ga.

Cato, who has been a professor at Armstrong since 2003, earned an Ed.D. in Art Education from the University of Georgia, as well as a M.Ed. in Administration/Supervision and a B.F.A. in Art from Valdosta State University.

Kathleen Platt Promoted to Registrar

Kathleen “Kathy” Platt has been promoted to the position of registrar, overseeing the operations of the Office of the Registrar, including curriculum, registration, transcripts and degree completion.

Platt has more than 12 years of experience having served in a variety of roles, including interim registrar during the 2015-16 academic year. During that time, she spearheaded a number of important process improvements, including the implementation of electronic transcripts and upgrades on student information systems. Prior to that, Platt served as assistant registrar and was responsible for organizing university commencement ceremonies and overseeing operational functions of the registrar’s office.

Platt earned a B.S. in Psychology and a M.Ed. in Adult Education and Community Leadership from Armstrong.
Otis S. Johnson to Speak at 2017 Spring Commencement

Former Savannah Mayor Otis S. Johnson, Ph.D., ’64 will serve as Armstrong’s 2017 Spring Commencement speaker. Johnson, the first African-American student admitted to Armstrong, became Savannah’s 64th mayor, serving two consecutive terms from 2004 to 2012. His newly released memoir, From the ‘N Word’ to Mr. Mayor: Experiencing the American Dream, recalls his life throughout the Civil Rights movement in Savannah and beyond.

Armstrong Ranks Fourth in the Nation in 2017 Military Times: Best for Vets

Military Times honored Armstrong, ranking the institution fourth in the nation on its Best for Vets: Four-Year Universities 2017 list. This year marks the third consecutive year Armstrong has been included on the prestigious list. The ranking is a result of Military Times’ comprehensive school-by-school survey of veteran and military student offerings and rates of academic achievement. Colleges and universities are asked to document the array of services, special rules, accommodations and financial incentives offered to students with military ties and to describe aspects of veteran culture on campus. Awarded institutions were evaluated in several categories, with university culture and academic outcomes bearing the most weight.

College of Education Earns National Rankings

The College of Education received two national rankings in 2016. GradSource.com named Armstrong seventh in the nation for Best Online Master’s Program in Education. In addition, Teacher.org reviewed 425 colleges and ranked Armstrong’s Early Childhood Education degree program the 17th best in the country.

Both GradSource.com and Teacher.org based rankings on factors such as affordability, student success and flexibility.

Great Dane’s Hammond for Hope Foundation Awards Two Scholarships

Armstrong received a three-year commitment from the Hammond for Hope Foundation—founded by Great Dane—to fund two scholarships, beginning in fall 2017. One $10,000 scholarship and one $5,000 scholarship will be awarded annually to students working toward graduate degrees in Armstrong’s Communication Sciences and Disorders program.

In addition to the scholarships, the foundation made a one-time $15,000 donation to Armstrong’s Communication Sciences and Disorders Department for a teaching-resources kit.
Online Criminal Justice Program Ranks #41 in U.S. News & World Report

Armstrong placed #41 on the U.S. News & World Report 2017 Best Online Criminal Justice Programs list. Armstrong is the only institution in Georgia to be included in the national rankings.

U.S. News analyzed universities using five categories, including student engagement, faculty credentials, student services and technology, admissions selectivity and peer reputation.

Armstrong Renews, Expands Study Abroad Partnership with Dante Alighieri University in Siena, Italy

Following the success of its spring 2017 semester-long residency program, Armstrong has expanded its longtime study abroad partnership with the Dante Alighieri Institute in Siena, Italy. Up to 25 students will now be able to study and live in Siena during the spring 2018 semester. The expanded opportunity will allow students to earn college credit, pursue potential internships with the City of Siena and enroll in classes at a partner institution, University of Siena. Immersion in the Italian language, access to the cities of Siena and Florence to study art, music and culture, and the opportunity to travel throughout Europe are all part of the curriculum.

"This partnership offers our students the opportunity to learn Italian, expand their horizons and gain insight into the culture of a fascinating country," said Armstrong President Linda M. Bleicken. "Students are able to broaden their worldview and to gain the confidence that results from living and learning in another culture."

Armstrong Recognized for Support of National Guard and Reserve Members

The ESGR advocates for working Guard members and Reservists and educates employers, particularly when service members are called upon to defend their country during deployments. Scott Scheidt, director of Armstrong’s Center for Applied Cyber Education and a lieutenant colonel in the Georgia Army National Guard, nominated Nivens and Willcox for demonstrating unwavering support and outstanding dedication to the military community at Armstrong.

Wexler also invited Armstrong President Linda M. Bleicken to sign an official Statement of Support for the Guard and Reserve, demonstrating the university’s continued advocacy for employee participation in the military.

Since 1935, Armstrong has inspired generations of students who have gone on to serve in a wide range of fields, from education and healthcare to business and academia. Pirates carry maroon and gold in their hearts for a lifetime, which is why we pulled photos from our archives celebrating Pirate spirit through the decades.

Many obstacles kept Betenia Nyangani from reaching her goals, but the Melaver Family Scholarship provided her with what she needed to overcome them.

“My family comes from Zimbabwe and my parents have worked hard from the time they were teenagers to ensure a decent life for themselves and their children,” she says. “My family is proof that an education can take you anywhere you want to go and enable you to be whoever you want to be.”

A first-generation college student, Nyangani began this year at Armstrong as a chemistry major with plans to follow through on a dream.

“I want to become a gastroenterologist,” she says. “I have been interested in the digestive system and medicine since the eighth grade.”

Nyangani is also eager to get involved with the Hispanic Outreach and Leadership at Armstrong program and aims to become a Navigate leader so she can introduce students to the university’s academic and social life that she cherishes.

“I think it’s wonderful that Armstrong strives to not only reach out to get students to come,” she notes, “but that they also encourage you to stay in school while making good grades, good friends and good life decisions.”

She credits the Melaver Family Scholarship with helping her succeed.

“I can worry less about how I am going to pay for college and more about how to get an A in calculus,” says Nyangani. “I am grateful and humbled to be selected for the scholarship. I hope the donors know they are helping to improve the lives of not just the individuals receiving the scholarships but their families and communities as well.”

JACOB BAXTER ‘18
Folkston, Georgia
HEALTH AND PHYSICAL EDUCATION
Recipient of a Beverly and Josephus Thomas Jr. Scholarship

The choice to study Physical Education at Armstrong was natural for Jacob Baxter, a rising senior who hails from a household of physical education teachers.

“Growing up, I wanted to be just like my parents,” he recalls. “I want to be around children in order to love and support them as much as my parents did for me.”

While Baxter’s affinity for fitness, health and competition grew into a lifelong goal of mentoring students, he has another milestone in sight first.

“I want to help educate students and serve our country at the same time,” he explains. “My goal is to become an officer in the Army and teach physical education after I complete my service.”

An active member of Armstrong’s Army Reserve Officers’ Training Corps, Baxter has learned how to be a strong leader and team player while fostering his love for fitness.

“I know that by completing the program here at Armstrong, I will build my dream of becoming a successful military officer while getting a quality education,” he notes.

Baxter is especially grateful for assistance from both the ROTC program and a Beverly and Josephus Thomas Jr. Scholarship fund for easing his financial burden.

“Armstrong has taught me how to become successful as a teacher, as a soldier and as a person,” he reveals. “There is no secret recipe. You must work hard.”
When Ryland P. Fox was accepted to Armstrong, he wasn’t sure which major would be right for him. His passion for music was met with an equal desire to study business. He decided to double-major and pursue both goals.

“I knew I wanted to play music for the remainder of my life and that a successful musician has to be business-savvy,” Fox notes. “After much consideration, I decided that I could take on the commitment and pursue both degrees.”

At Armstrong, Fox balances a full-course load, two part-time jobs and involvement in the Baptist Collegiate Ministry. He participates in five different bands and ensembles.

“I have been playing drums and percussion for eight years,” he says. “After I finish practicing or performing, my mind feels refreshed and relaxed. I also enjoy the community and companionships that music delivers.”

His rigorous schedule isn’t easy to maintain, but with strong time management skills and financial assistance, Fox continues to make strides towards his goals as a L. Pauline Gooch Scholarship recipient.

“This scholarship has made it possible for me to focus less on how to afford college and more on my studies,” Fox says. “I can now breathe a sigh of relief knowing that a large portion of tuition for the year has been covered.”

Fox also plans to attend graduate school and is still choosing which master’s degree to pursue. Whatever he decides, he’s confident Armstrong is the right place to prepare him for his future.

“Armstrong has the perfect blend of well-trained professors and small class sizes,” he notes. “In my opinion, Armstrong inspires and motivates its students to learn and excel in their career choice.”

When Shelby Ogden decided to return to school to pursue her dream of becoming a nurse, the university was easy to choose for Ogden. However, as a nontraditional student, the decision to return to school full-time presented financial challenges. As a recipient of a Bhatia Foundation Scholarship in Nursing, she can now focus on her studies and professional plans.

“My future goals are to become a family nurse practitioner and help people from young to old get back to health,” she explains. “I also plan to volunteer my skills by doing mission work.”

Once Ogden walks across the stage at commencement this spring, she will pursue her dream of serving in a critical care unit and emergency room before beginning graduate studies in nursing.

“My nursing professors at Armstrong have taken the time to get to know me,” she explains. “I feel very honored to say I will have graduated from Armstrong State University, where professors truly do care and guide you to do your very best.”

After earning an associate degree in dental hygiene and starting a career in health professions, Shelby Ogden decided to return to school to pursue her dream of becoming a nurse.

“I was drawn to nursing school to expand my abilities in helping people, which is my true passion,” she says. “I now have the opportunity to be a part of a career that impacts a person’s whole being. Bringing light into a person’s darkest day is my hope for my career in nursing.”

Armstrong’s stellar reputation in the medical field made the university an easy choice for Ogden. However, as a nontraditional student, the decision to return to school full-time presented financial challenges. As a recipient of a Bhatia Foundation Scholarship in Nursing, she can now focus on her studies and professional plans.

“My future goals are to become a family nurse practitioner and help people from young to old get back to health,” she explains. “I also plan to volunteer my skills by doing mission work.”

Once Ogden walks across the stage at commencement this spring, she will pursue her dream of serving in a critical care unit and emergency room before beginning graduate studies in nursing.

“My nursing professors at Armstrong have taken the time to get to know me,” she explains. “I feel very honored to say I will have graduated from Armstrong State University, where professors truly do care and guide you to do your very best.”
We saw this as an opportunity to engage with local students and to raise awareness about the types of careers that are possible at Gulfstream.”

— Drew Dixon, manager of Enterprise Mobile Solutions at Gulfstream
Jennifer Zettler, Ph.D.
Biology Professor and Entomology Curator
Teaching at Armstrong since: 2002

Best part of my job: “I love interaction with the students.”

A

mstrong Biology professor and Entomology Curator Jennifer Zettler, Ph.D., loves insects. Touting the role the six-legged creatures play in the food chain, pollination and decomposition, as well as their impact on human and animal medical studies, she takes pride in making the world of insects more accessible—and interesting—to sometimes squamish students.

“I like to turn a subject that might be considered dry and make it come alive,” notes Zettler. “A lot of students who’ve taken entomology were scared of insects, but they all come out of it really enjoying the experience.”

Armstrong’s size allows Zettler, who earned a B.S. in Entomology at the University of Florida and two graduate degrees at Clemson University, to interact with students in engaging ways.

“I enjoyed my experience at a larger university, but I really like the feel of the small campus,” she says. “When I was looking for a job, this was the type of school I was looking for.”

Access to year-round field sites in the coastal region is also an enormous plus for her coursework.

“Armstrong has an ideal location,” she says. “I can hop in a van and take a group of students down the road for field projects in the salt marsh. If you can get students outside and see what they’ve studied in textbooks, it’s a transformative experience.”

Zettler has also led students through the Ecuadorian Amazon Rainforest and Andes Mountains and co-hosts upper-level science class trips to the Florida Keys every other year.

This summer she’ll partner with Physics lecturer Donna Mullenax and Science Education professor Rebecca Wells to walk students through the North Georgia Mountains, coastal barrier islands and South Georgia’s Okefenokee Swamp.

“Some students have never left the Savannah area, so to sample for organisms in mountain streams and to actually see a waterfall, rather than just pictures of it, is important,” says Zettler. “We’ll look at all types of factors that might influence the different habitats we’re studying.”

However, nothing excites Zettler more than working with undergraduate research students. For years, she has taken students to South Florida’s Big Cypress eco-region to study invasive pests of rare orchids. Currently, students are classifying and organizing a teaching insect collection with the goal of creating permanent databases for public research use.

“Research is what students have to have in their pocket to go to graduate school,” she says. “Our department really encourages it. It’s a valuable resource.”

David Bringman, DPT
Rehabilitation Sciences Program Coordinator and Assistant Professor
Teaching at Armstrong since: 2009

Best part of my job: “I am fortunate to see in my students a moment of clarity when they encounter a patient and classroom content is solidified.”

In

spired since childhood to help those in need, Armstrong Assistant Professor of Rehabilitation Sciences David Bringman, DPT, finds joy in developing and guiding Armstrong’s budding physical therapists.

A proud Pirate alum, Bringman earned both a B.S. and M.S. in Physical Therapy from Armstrong, while working at St. Joseph’s/Candler for over eight years, where he provided acute care and in-patient rehabilitation. By then, returning to school to pursue teaching was a goal he thought was out of reach.

“I was a healthcare professional,” he says. “I didn’t really think about academia, but the faculty here knew that I had expressed an interest in wanting to teach at some point. I thought that ship had sailed, but a professor remembered and called me Saturday. That’s one of those awesome things about Armstrong. There are a lot of great professors on this campus.”

Bringman’s extensive field experience and familiarity with Armstrong made for a smooth transition from clinician to professor, which is a job he enjoys immensely.

“When students figure out that it’s better to understand the material and be able to use it, rather than just pass a test, that’s one of my favorite moments,” he explains.

“The idea that this program started on graduating the best clinician is, I think, paramount to what we do at Armstrong. You can graduate the smartest individual, but they might not be the best clinician. It’s refining those soft skills that’s important to me.”

A service-focused mantra helps Bringman shape passionate caregivers who emphasize the human side of healthcare, making graduates of Armstrong’s physical therapy program stand out next to their counterparts.

The ability to inspire different therapists who go on to do exemplary work is a big part of what makes teaching so rewarding for Bringman.

“I love every day of it,” he beams. “Just knowing that I can help create 36 or so physical therapists every year and that they can do a whole lot more to change people’s lives than I can just as one physical therapist is a neat way to look at it.”

Bringman is an enthusiastic advisor to a diverse body of students. He serves as the Rehabilitation Sciences program coordinator, is president-elect of Faculty Senate, volunteers with Armstrong’s orientation program, Navigate, and is a member of numerous committees in various departments.

“You can find your joy in everybody else’s success,” he says with a smile. “And I think that happens a lot on Armstrong’s campus.”
Armstrong’s Collegiate 100 chapter, which is affiliated with 100 Black Men of Savannah, supports male African-American college students with social, emotional and educational development. Members also “pay it forward” by mentoring area youth in support of the next generation of college students.

“Since coming to Armstrong and working with Collegiate 100, I have become the individual that I have always wanted to be,” says Collegiate 100 President Terelle Norman. “I have confronted the stereotypes and statistics of the black man, challenging myself each day to be a better version of myself than the previous day. With that, I have decided to bring more young men with me.”

In 2009, a group of students created Armstrong’s Collegiate 100 chapter to address the lack of programming for African-American men on campus.

“The model that we have is, ‘What they see is who they will be,’” explains Kwame Phillips, coordinator of Armstrong’s Department of Multicultural Affairs and Collegiate 100 chapter. “We translate that message through acts of mentoring, and then we break mentoring down into components of education, economic empowerment and health and wellness.”

With an induction of 33 members, the group received wide support from Chatham County Commissioner James “Jay” Jones and Armstrong administrators, particularly Armstrong President Linda M. Bleicken.

“Students find resources and individuals who do not look like them, but who support them, such as Dr. Bleicken and senior leadership,” explains Phillips. “They always come to pageants and galas. When African-American men see that, they feel supported and stay to graduate.”

Named National Chapter of the Year in 2012, the Collegiate 100 today holds a strong presence across campus, participating in Navigate, Housing and Residential Life, the Student Government Association and the Campus Union Board, among others. In addition, the chapter hosts scholarship fundraisers and provides financial support to the Men of Vision and Excellence (M.O.V.E.) program they founded, which is aimed at supporting first-year African-American students with mentorships from upperclassmen.

Armstrong’s College of Health Professions got a recent boost from Georgia Governor Nathan Deal, who earmarked $22 million in his proposed 2018 fiscal budget for construction funding of the new healthcare education center. The vibrant complex will combine a renovated Ashmore Hall with a new state-of-the-art interprofessional center.

“The College of Health Professions facility will serve as the model for healthcare leadership training in the region,” notes Armstrong President Linda M. Bleicken.

“The center will be designed to encourage collaboration and interdisciplinary learning, while addressing the community’s evolving health and wellness needs.”

The College of Health Professions, which graduates more undergraduate health professionals than any university in Georgia, offers a range of academic programs that prepare students for careers in nursing, public health, health administration and the allied health professions.

In the new center, students will make use of the latest technologies in the healthcare field through team learning, simulation, clinical practice, laboratories, research spaces and continuing professional education.

“This exciting new facility at Armstrong will serve to further advance the university’s commitment of improving the health and wellness of our communities,” says Paul Hinchey, president and CEO of St. Joseph’s/Candler.

“Such an advanced training and educational facility will enhance the healthcare quality of our citizens both locally and throughout our state.”

Design and planning for the 75,000-square-foot structure was approved by the Board of Regents and the State legislature, as recommended by Governor Deal in 2015.

“As Georgia’s population continues to grow and age, Georgia hospital leaders are concerned that our state’s healthcare delivery system will not have enough nurses and allied health professionals to meet the needs of our patients and communities,” says Georgia Hospital Association President and CEO Earl V. Rogers. “Investing in Armstrong’s College of Health Professions’ building will place our state in a much better position to meet these demands.”
CONSOLIDATION UPDATE

Learn more about major changes and potential opportunities affecting the Armstrong community.

On January 11, 2017, the Board of Regents of the University System of Georgia voted to consolidate Armstrong State University and Georgia Southern University, ultimately creating a new Georgia Southern University with three campus locations in Savannah, Hinesville and Statesboro. The consolidated university will be led by Georgia Southern President Jaimie L. Hebert.

The Consolidation Implementation Committee, Functional Area co-chairs and Operational Working Groups uniting Armstrong and Georgia Southern faculty and staff are currently in the process of examining and working through all aspects of the consolidation.

The timeline for a consolidation to be completed is usually 12 to 18 months. The prospectus for the new university will be submitted to the Commission on Colleges of the Southern Association of Colleges and Schools (SACSCOC) in early fall 2017. If approved at the SACSCOC meeting in December 2017, the prospectus will be submitted for final Board of Regents’ review. Should the consolidation follow this timeline, the effective date will likely be January 2018. The tentative timeline for the first entering class of the new Georgia Southern University will be in fall of 2018.

Learn more at consolidation.georgiasouthern.edu

ABOUT GEORGIA SOUTHERN UNIVERSITY

Georgia Southern University, a public Carnegie Doctoral/Research University founded in 1906, offers more than 119 degree programs serving 20,673 students. Through eight colleges, the university offers bachelor’s, master’s and doctoral degree programs built on more than a century of academic achievement. Georgia Southern is recognized for its student-centered and hands-on approach to education. Visit GeorgiaSouthern.edu.

DO YOU KNOW?

In November 2011, the Board of Regents of the University System of Georgia (USG) adopted six “Principles for Consolidation” that have been used by University System staff to assess the potential for campus consolidations.

Seven consolidations involving 14 USG institutions have been approved and completed to date. The USG’s consolidation of institutions has been focused on serving students better by expanding access, broadening programs and reinvesting savings into academic excellence to improve student success.

Consolidating Armstrong and Georgia Southern will create one institution with expanded regional presence and tailored degree programs for the coastal region.

Consolidating Armstrong and Georgia Southern:
- Creates an institution of more than 27,000 students, making it the fourth largest public university in Georgia.
- Develops a more comprehensive university that serves the needs of the region with a range of degree programs for high-demand careers, such as engineering and healthcare.
- Offers opportunities for raising graduation rates for students.
- Reinvests savings from administrative efficiencies into programs that support student success.

Q. What are the benefits of the consolidation between Armstrong and Georgia Southern?

A. Creating the new Georgia Southern University will combine the best of both institutions, which are located an hour apart and serve many of the same students.

Georgia Southern is already the #1 transfer choice for Armstrong students, and both institutions are among top destinations for students seeking public higher education.

Q. Will any faculty members at Armstrong lose their jobs? And what about staff layoffs?

A. Faculty members will be needed to provide quality instruction in Statesboro, Savannah and Hinesville.

Q. Will students accepted to Armstrong have the opportunity to complete their degrees at the campus of their choice?

A. A major responsibility of the Consolidation Implementation Committee is to determine the right mix of programs to best serve students and the region. However, all academic programs currently offered at campuses in Savannah, Hinesville and Statesboro will remain in place through the spring of 2022 at the earliest, allowing current students the opportunity to complete their degrees at the campuses of their choice.

Q. Which academic programs will be offered in Statesboro, Savannah and Hinesville?

A. A major responsibility of the Consolidation Implementation Committee is to determine the right mix of programs to best serve students and the region.

Q. Will the consolidation affect tuition and fees? Will there be an increase in tuition for current Armstrong students?

A. Absolutely not. Armstrong degrees will retain their value throughout the consolidation process and beyond. As an accredited university, Armstrong grants degrees to students who have met high academic standards.

Q. What happens to Armstrong students who are residents of Alabama, Florida and South Carolina receiving out-of-state tuition waivers?

A. Students from Alabama, Florida and South Carolina who are currently receiving out-of-state tuition waivers to attend Armstrong will continue to receive those waivers.

Q. How will the history of Armstrong be preserved for future students after the consolidation?

A. On March 3, the Consolidation Implementation Committee supported a recommendation to name the Armstrong Campus in Savannah and the Liberty Campus in Hinesville. Additional recommendations will be made by Operational Working Groups in the coming months.

FREQUENTLY ASKED QUESTIONS

Q. How much money is expected to be saved by this consolidation?

A. The exact amount of money to be saved by this consolidation is unknown at this time, but any funds saved will be reallocated to support student success within the new university.

Q. Will the consolidation and the loss of the name make Armstrong State University’s degrees meaningless?

A. No. Armstrong and Georgia Southern will be a part of the new Georgia Southern. The acceptance status of students who have already applied to either institution will not change.

Q. What happens to Armstrong students who have met high academic standards?

A. No. Armstrong and Georgia Southern will be a part of the new Georgia Southern. The acceptance status of students who have already applied to either institution will not change.

Q. Will the professors and departmental offices change?

A. A major responsibility of the Consolidation Implementation Committee is to determine the right mix of programs to best serve students and the region.

Q. Will students accepted to Armstrong lose their jobs? And what about staff layoffs?

A. Faculty members will be needed to provide quality instruction in Statesboro, Savannah and Hinesville.

Q. Will the name make Armstrong State University’s degrees meaningless?

Q. What are the benefits of the consolidation between Armstrong and Georgia Southern?

A. Creating the new Georgia Southern University will combine the best of both institutions, which are located an hour apart and serve many of the same students.

Georgia Southern is already the #1 transfer choice for Armstrong students, and both institutions are among top destinations for students seeking public higher education from Bryan, Chatham,Effingham and Liberty counties. The principal goal is to create increased opportunities and expanded options for students, while increasing efficiency and boosting economic development in the region.

Q. While increasing efficiency and boosting economic development in the region.

A. A major responsibility of the Consolidation Implementation Committee is to determine the right mix of programs to best serve students and the region. However, all academic programs currently offered at campuses in Savannah, Hinesville and Statesboro will remain in place through the spring of 2022 at the earliest, allowing current students the opportunity to complete their degrees at the campuses of their choice.

Q. Which academic programs will be offered in Statesboro, Savannah and Hinesville?

A. A major responsibility of the Consolidation Implementation Committee is to determine the right mix of programs to best serve students and the region.

Q. Will the consolidation affect tuition and fees? Will there be an increase in tuition for current Armstrong students?

A. Absolutely not. Armstrong degrees will retain their value throughout the consolidation process and beyond. As an accredited university, Armstrong grants degrees to students who have met high academic standards.

Q. How much money is expected to be saved by this consolidation?

A. The exact amount of money to be saved by this consolidation is unknown at this time, but any funds saved will be reallocated to support student success within the new university.
Kelley Boyd ’99
Director of Savannah Yoga Center
B.A. in Art

A native of southside Savannah, Kelley Boyd, who is the founder and director of the Savannah Yoga Center, recalls fond memories of growing up in Armstrong’s backyard. As a child, she climbed campus trees and roamed throughout the natural beauty of the arboretum. “To me, that’s what southside,” says Boyd. “Armstrong has always been a part of my life.”

When it was time to choose a university, staying close to home was an easy decision. “My time at Armstrong was very positive experience,” she recalls. “I always loved going because it was one of the most peaceful parts of my life.”

After graduating with a B.A. in Art, Boyd worked as a muralist and faux finisher. However, after a VHS-tape introduction to yoga, she was hooked and soon rented a downtown space to start the Savannah Yoga Center. After graduating with a B.A. in Art, Boyd worked as a muralist and faux finisher. However, after a VHS-tape introduction to yoga, she was hooked and soon rented a downtown space to start the Savannah Yoga Center.

As such, Armstrong named Boyd a 2016 Notable Alumnus. Donor SPOTLIGHT
Bettye Anne Battiste Award for Excellence in Education Research

Armstrong’s former Early Childhood Education Department Head Bettye Anne Battiste, Ed.D., was known for her sharp mind, curiosity, quick wit and exceeding generosity. She also had the unique ability to bring people from different backgrounds together and inspire each of them. “She demanded excellence in faculty and friends,” notes Susan White, M.Ed., a retired Special Education professor who worked at Armstrong for almost four decades. “She always wanted you to be your best and she wasn’t afraid to debate about it. I think she mentored everyone she came into contact with. That’s what I most admired about her.”

Following a prolific career as a teacher, researcher, author and local leader in higher education and on the Savannah-Chatham County Public School Board, Battiste retired in 2007. Throughout her life, she was an active member of Leadership Georgia and the National Council of Negro Women, among many other groups.

“Dr. Battiste believed in setting the bar high, but she was always fair and willing to work with students to ensure their academic success,” remembers Joyce Bergin, Ed.D., a retired Special Education professor and assistant dean for Armstrong’s College of Education. “She expected students to grow intellectually. Dr. Battiste demonstrated this aspect of personal growth by continued study to develop her own mind and spirit.”

When Battiste unexpectedly passed away in 2012 at the age of 64, White, Bergin and Donna Brooks, Ph.D., Armstrong’s associate provost for Academic Affairs and Graduate Studies, established the Bettye Anne Battiste Award for Excellence in Education Research. “We wanted to honor her intellect and inspire students of the future,” says Bergin. “We thought this would be a wonderful way to keep her memory alive.”

The $500 scholarship is given to one student each academic year in the field of education research. As well, the professor whose student receives the award is honored with a letter of commendation from the dean of the College of Education. As a personal tribute, White, Bergin and Brooks meet for lunch once a month, just as they used to do with their dear friend. “Battie Ann was the one who kept us together,” says Brooks. “Once she passed we continued to do that. So again, it goes back to her bringing people together and helping people find their commorabilities.”

Armstrong’s Recreation and Wellness Associate Director Jason Salzer is an accomplished singer-songwriter who has released several albums and shared the stage with Lady Antebellum, Little Big Town and Steve Earle during a 15-year career in Nashville. To offset the chaos of the entertainment industry, he mentored underprivileged and special-needs youth at the YMCA. Unbeknownst to him, his time there would lead him down a different professional path. “That experience was very valuable,” says Salzer. “It’s an underserved population. You not only begin to understand the needs of the kids but of the parents too.”

One afternoon during rounds in the gym, he saw a wheelchair-bound boy shooting basketball hoops alone. Salzer joined in and later maneuvered into a wheelchair so that the two could play on even ground. The routine became a weekly one, and over time they invented their own passes, drills and games. This experience not only transformed the child, but Salzer as well.

“To see a kid who is underserved show up at a place just for this, it’s a magical feeling,” he remembers. “It’s one of the most satisfying things I’ve been a part of.”

YMCA Management took notice too. They approached Salzer and asked him to join as director of teen programming. Welcoming a break from the music scene, he accepted. Within two years, he was executive director of the Full Circle Program, which assists individuals with special needs, overseeing six YMCA centers throughout Middle Tennessee.

When his wife, Emily, was tapped to lead Savannah’s Whole Foods store in 2013, he looked to transfer within the YMCA family. However, after seeing an opening at Armstrong’s Recreation and Wellness Center, he visited the campus. “I’ve always liked college athletics and wellness,” he notes. “I quickly fell in love with Armstrong and saw growth potential.”

Salzer, who earned a B.A. in Mass Communication and a minor in Music at Western Kentucky University, was offered a job and jumped on board. Within six months he became assistant director. Last year he was promoted to associate director and completed a M.A. in Professional Leadership and Communication at Armstrong. An active member of Staff Council, Salzer also serves as the coordinator for Armstrong’s Emerging Leaders program.

But music has always stayed close to his heart. He’s passed the torch on to his three children and is a regular on the Savannah Songwriters Series circuit. And when prompted to whip up a jingle to promote the university’s fundraising campaign last year, he had a ball. “I wrote the song and recruited some fellow Pirate musicians to be in the video,” he says. “It was a lot of fun to work with so many talented Pirates.”
1960s
Joseph Lane ’64 retired in 2000 and is a Professor Emeritus in Armstrong’s Department of Psychology. He is enjoying retirement and traveling in the United States, Europe, and South America.

1970s
Jim Daniel ’70 was appointed director of Caribbean sales for Lanahan Lumber Company in 2016. He is also an associate broker with Cora Bett Thomas Realty and Associates where he has worked for four years.
