National Cyber Security Awareness Month

About
National Cyber Security Awareness Month was created as a collaborative effort between government and industry to ensure every American has the resources they need to stay safer and more secure online.

We lead Web-based, digital lives. From personal computers, smartphones, and tablets, e-book readers, to working, shopping, and social networking, virtually every aspect of our lives touches the digital world. Even when we are not directly connected to the Internet, this vast worldwide connection of computers, data, and websites supports our everyday lives through financial transactions, transportation systems, healthcare records,

Our Shared Responsibility
Institutions spend thousands of dollars for virus protection, firewalls, intrusion detection, etc… Unfortunately, the weakest link in the defense of cyber crime is still you and me, the human. It is everyone’s responsibility to exercise and promote safe use of our technology resources.

More information can be found at:
www.Staysafeonline.org
STOP. THINK. CONNECT
Cyber security begins with STOP. THINK. CONNECT. These three simple words are the starting point for staying safer and more secure online.

- STOP: Before you use the Internet, take time to understand the risks and learn how to spot potential problems.
- THINK: Take a moment to be certain the path ahead is clear. Watch for warning signs and consider how your online actions could impact your safety or your family’s.
- CONNECT: Enjoy the Internet with greater confidence, knowing you’ve taken the right steps to safeguard yourself and your computer.

More info can be found at:
