Editor’s Note

It was with great pleasure that I was able to organize and put together the inaugural volume of the Proceedings of the Interdisciplinary STEM Teaching and Learning Conference. The opportunity to read the different studies and converse with authors from all over the region was rewarding and makes me proud of the good work being done in interdisciplinary STEM education.

The first volume of the Proceedings of the Interdisciplinary STEM Teaching and Learning Conference includes topics from special education, curricular integration, using primary resources, methods for using new technologies, and cellular testing. I was truly impressed with the scope of the work presented at the conference and articulated in these papers.

I want to acknowledge the Institute for Interdisciplinary STEM at Georgia Southern University and our fellows and affiliates who graciously and quickly assisted with the review process. Thank you to Lisa Stueve for leading this year’s conference and Marsha Pate, Kania Greer, and Robert Mayes for all their support along the way.

Cheers to this inaugural volume!

Best,
Lisa Millsaps

Volume 1, 2017

TABLE OF CONTENTS
Editor’s Note … 2

CONTRIBUTED PAPERS
The Importance of Extracurricular STEM Activities for Students with Disabilities
Karin Fisher … 4

Enhancing Interdisciplinary Attitudes and Achievement via Integrated Biology and Chemistry
Ying Guo, Pat Uelmen Huey, and David Pursell … 19

Assessing Student Progress and Performance across the Curriculum
Christopher Brown, Jennell Talley, Rebekah Ward, Christopher Brandon, Jill Penn, and Elisabeth Javazon … 34

The Correlation between Extracurricular STEM Activities and Students with Disabilities
Karin Fisher … 56

Using Primary Sources in STEM Education: An Example
Josh Pfiester … 73

The Progesterone Receptor – To Be or Not to Be: The Anti-Inflammatory Effects of Progesterone in RAW 264.7 Cells
Christopher Brandon and Bagie George … 86

Learning to Program in Python – by Teaching It!
Bryan Fagan and Bryson Payne … 99
