From The Director

International experience and global perspective are critical components of a college education today. Recently, the University Honors Program sent seven students and two professors to Albania and several other locations in the Balkans. This site was chosen because it provides an excellent opportunity to examine the ways in which people address healing in post-conflict and post-communist societies. Like any post-conflict society, Albania grapples with how to approach its past. Our students explored that past with Albanian university students, NGOs and with people who experienced these troubled times.

There is a proud tradition of honors education at Georgia Southern University. For the past thirty years, hundreds of honors students have been challenged by their professors and by their talented peers as well. I am proud of this tradition of excellence. In recognition of this milestone, we will host the “Thirty Years of Honors” reunion event October 20 and 21, 2012. Details about the event are included in this issue and more details about how to register are on the honors website. I hope to see many of our students, our alumni, your families as well as our current and retired professors at this event. It promises to be a great occasion to renew old friendships and to start new ones.

As always, I hope you enjoy this issue of Honors @ Georgia Southern.

Sincerely yours,

Steve Engel
Director, University Honors Program

Mission Statement

The University Honors Program provides a small college atmosphere in the context of a large comprehensive university. The program is designed to foster the development of a critical sense of inquiry, a spirit of creativity, a global perspective and an ethic of civic responsibility. A hallmark of the program is the emphasis on bringing ideas to life through undergraduate research, experiential learning and service-learning opportunities. The University Honors Program at Georgia Southern University rests on a foundation of the following ideals that are inspired by the institution’s emphasis on engaged learning:

Critical Sense of Inquiry
Honors students will explore a variety of approaches to research designed to foster the pursuit of knowledge. Students will develop the ability to question with a healthy skepticism toward accepted opinion. The culmination of the undergraduate experience is an independent research or creative project designed to exemplify a critical approach to inquiry.

Civic Responsibility
Honors students will demonstrate an ethic of civic responsibility and exemplify the motto of the program, “Humility before Honor.” Students will be challenged to use their abilities and talents for the advancement of humanity and the pursuit of the greater good. The primary vehicle for the expression of civic responsibility is through service both to the university and the community.

Spirit of Creativity
Honors students will embrace the idea that creativity is a virtue that should be experienced by all students, regardless of discipline. This spirit involves a respect for different ways of knowing and an openness to intellectual discussion and challenge.

Global Perspective
Honors students will develop a perspective which involves the critical exploration of global concerns and generation of proposed solutions to international problems. Honors education provides this worldwide perspective through academic courses, study abroad opportunities and co-curricular experiences.

Global Perspective
Honors students will develop a perspective which involves the critical exploration of global concerns and generation of proposed solutions to international problems. Honors education provides this worldwide perspective through academic courses, study abroad opportunities and co-curricular experiences.
Multiple study abroad programs take thousands of American college students to Europe every summer, and rarely can a trip to Europe be described as going off the beaten path. However, in a European country less traveled is exactly where seven University Honors Program students journeyed on a three-week trip based out of Albania. It is believed to be the first program of its kind in the region. Students Elijah Anderson, Ashley Boyer, Cady Ennis, Kelsey Keane, Molly Laughlin, Chelsea Meador, and Feagin Oliver took two courses during their travels.

Politics of Ethnicity in Albania taught by Dr. Krista Wiegand with a Kosovar journalist Ashley Boyer and Molly Laughlin in Tirana at the Enver Hoxha mausoleum

While much of the trip was spent in official class related activities, the group also had a few opportunities to relax, including spending a luxurious two days on the Greek island of Corfu. This time was spent debriefing from the lecture topics and swimming in the icy waters of the Adriatic. The trip to Corfu also facilitated interesting class lectures by Dr. Wiegand concerning the nature of international borders and national identity.

Several days after the stop in Corfu, the group had traveled all the way to the Northern border of Albania and crossed into neighboring Kosovo. Having only gained independence in 2008, Kosovo is one of the youngest countries in the world and in some areas still exhibits the tensions that played out so violently during the ethnic genocide of the late 1990s.

The last impact of that era was especially evident in the city of Mitrovica when the students, accompanied by local Kosovar journalists, witnessed the illegal blockade of major roads. Dr. Wiegand’s class directly addressed relevant issues of nationalism and territorial boundaries as these blockades are used to separate ethnic Albanian populations from the Serbian ones that still reside in Kosovo. The case of Kosovo provides a perfect case study on nationalism and territory as it endured ethnic conflict over questions of sovereignty and self-determination.

The tour of the bunkers was particularly memorable because students were able to see the intersection of narrative, memory, and self-determination.

The stop in Gjirokaster, located in the southernmost region of Albania, was particularly memorable because students were able to see the intersection of politics, ideology, and urban development. Students met with the Gjirokaster Development Project staff, a group of professionals dedicated to the historical preservation of the “city of stone.” Students were able to see the community-era bunkers that run under the city's mountains. Exploration of these tunnels provided the entire group with tangible evidence of the mindset of those living in communist Albania from 1976 to 1991 during the time of Dictator Enver Hoxha. Rarely seen by even Albanians themselves, the tunnels are an eerie reminder of a traumatic history much of Albania struggles to forget. In addition to the tunnel networks, the entire country is peppered with several hundred thousand bunkers and tunnels serve as a living reminder of Albania’s communist era.

It is believed that the communist powers did not just tell people what to believe; can be argued that the communist powers also forced people to believe. The students realized the current effects and implications of this worldview as they discussed the past with Albanians during their visit.

During the tour of Tirana, the group's local Albanian contact offered not only invaluable insight but also fast friends for the entire group. One of these people was an Albanian artist named Arben Theodhosi, who was exiled for 15 years under the communist regime, yet no one remains a victim of their past. Their strength and commitment to facilitating future change are evident in all areas of their lives. The stories of the people from Kosovo will remain with me and forever have a place in my heart.

The people of Kosovo are the most resilient and kind people I have ever met,” she said. “Every single person in Kosovo was affected by the Milosevic regime, yet no one remains a victim of their past. Their strength and commitment to facilitating future change are evident in all areas of their lives. The stories of the people from Kosovo will remain with me and forever have a place in my heart.’’

Not only were the places the group visited extraordinary, the people who shared their time and knowledge of the region also helped to create a more memorable and meaningful experience for the Georgia Southern students. From the very first day in Tirana, the group's local Albanian contacts offered not only invaluable insight but also fast friends for the entire group.

One of these people was an Albanian artist named Arben Theodhosi, whose father was assassinated when the communist leaders took over the government. Theodhosi was exiled for 15 years and forced to endure hardship in a work camp in the country's mountains. However, he was able to overcome the trauma

Dinner with Peers

Upon arrival in Albania, we were treated to outstanding food and hospitality. Albanian architect Tomor Luzati provided an insightful tour of Tirana. In the evening, we participated in a forum organized by the National Democratic Institute (NDI). “A Cross-Cultural Dialogue between Albanian and American Students about Education, Employment, and Prospects for a Better Tomorrow.” We shared a meal with students from various universities throughout Tirana pursuing degrees ranging from economics to public health. Our discussion was facilitated by NDI representatives and covered a wide range of topics including educational opportunities, family values, and the dreams of both Albania and the United States. It was a fascinating night.

Created Histories—Museums in Kruja

Accompanied by the Director of the United Nations Development Project Brain-Gain Program, Bernard Zenelli, our group visited several museums in the Kruja area. While the tours of the museums were interesting, it was particularly fascinating to learn more about the history of the museums themselves from Zenelli. Several museums were constructed during the communist era under Hoxha, and we were shocked to learn that one of the principal museums we had just visited contained essentially no original artifacts. The collection had been comprised primarily of replicated pieces that had been used by the communist party to create a common historical narrative of the country’s Illyrian heritage. The revelation facilitated much discussion about the power of narrative and helped us better understand the obstacles Albania must overcome in order to remove itself from the grips of communist thought.

May 20th

Visiting Ruins in Durres and Butrint

While visiting the city of Durres, we found our way to ancient Roman ruins located in the center of the busy town center. The ruins themselves were impossibly impressive, even more so considering that the archaeologists who discovered them have not yet unearthed the entire structure, despite working for decades on the project. The ruins at Butrint gave us a glimpse into life during the time of the Illyrians, complete with various military fortifications. The city has over 2500 years of history and once served as a trading city with its own baptistery, amphitheatre, and basilica. Although there was not a focus on conservation during the communist regime, the recent archaeological and preservation efforts in the ancient city have helped ensure its survival.

May 23rd

A World Under the Mountains—Gjirokastra

After a brief meeting with the Gjirokastra Development Project staff, one of the leading architects took us for a once in a lifetime opportunity. Walking just a few minutes up the mountain, we soon came to an entrance into the communist era tunnels that run under the city. We bundled up to keep warm and began our walk into the dark tunnels. The tunnels lead to many different cells, each one dedicated to specific government offices and workers. It was as if we had taken a step back in time and could feel the paranoia of the communist regime in the air around us. All of the offices were still fully furnished, ready to be used in the case of a foreign attack against the regime. Our time today in the tunnels was absolutely one of the most fascinating parts of this entire trip so far.

May 27th

Kosovo

In Kosovo we were able to witness the region’s tension firsthand in the city of Mitrovica. Accompanied by Kosovar journalists, we stopped in two locations of the city where the major roadways had been blocked by alleged Serbian gangs using piles of rubble. With foreign forces located throughout the area, we never felt threatened; however, we could sense the tensions that led to the ethnic genocides during the late 1990s and which are still very much a part of everyday life in the young country of Kosovo.
May 30th
**Traumatic Narratives**

In the Albanian city of Shkodra, we had the opportunity to visit with members of the Association of Ex-Political Prisoners and Persecuted Families. It was an emotional visit as hundreds of pictures of those imprisoned and killed under the communist regime lined the office’s walls. The men in the organization shared their personal stories of the atrocities committed in the name of communism and state control under Hoxha. We discussed how the country cannot ever truly heal if there is no one left to accept blame and apologize for the traumatization of the country’s population, the destruction of its infrastructure, and the corruption of its national identity.

June 1st
**A Day at the Dig**

Today we met with American students who are also spending their summer here in Albania. Their time has been spent primarily completing archeological field work in the Shkodra area. Their instructor, Michael Galaty of Millsaps College, invited us for a day at the dig site and we soon found ourselves working alongside both archeology experts and students. The site was far from what any of us might have expected as we were literally working in the middle of a local farmer’s fields, but the group was hoping to discover ancient grave sites. It was a great opportunity to learn about cultural preservation efforts in Albania, along with the various techniques that archaeologists use in the field.

---

**Families in Honors**

A college homecoming is an event usually reserved for alumni, but in the case of three University Honors Program students, attending Georgia Southern as an honors student has been a sort of homecoming as well. Three University Honors Program (UHP) students—Alicia Channell, Michaela Lariscy, and Kristen Tillman—have followed in the footsteps of their parents, all of whom were part of the Bell Honors Program (BHP) in its early years. Quite a bit has changed in honors education at Georgia Southern since their parents were students, but one constant remains: it is still a challenging atmosphere providing motivated students an intellectual home.

Honors education first began at Georgia Southern in 1982, when Dr. Hew Joiner led several faculty members in offering the first honors classes to a select group of outstanding students. The BHP would select only 18 exceptionally gifted, creative, and well-prepared students from among its pool of applicants. Outstanding test scores, exemplary high school academic records, and evidence of unusual academic potential and creativity were all requirements to be considered for the program. Classes were team-taught and emphasized discussion and independent activities. The last BHP cohort graduated in 2007.

Today’s current program for honors students, the University Honors Program, started in 1998. Founded by Dr. Fred Richter, the program was designed to create honors experiences for more students while still maintaining the rigor of the selection requirements. Now the program includes over 450 students in all disciplines across the university. Continuing to challenge and support hard-working and intellectually curious scholars, the program offers a research-focused curriculum complemented by experiential learning opportunities. All graduates of the program complete an Honors Thesis/Capstone Project, an intense research project mentored by a faculty member in their major discipline. Students emerge from the program ready for the challenge of a career, graduate school, or professional school and with both a sense of civic responsibility and a global perspective.

This year marks the thirtieth year of honors education at Georgia Southern. In honor of this anniversary, Honors @ Georgia Southern talks to three mothers and their daughters who have all shared in the tradition of honors education at Georgia Southern. The experience was transformative for the mothers, and their daughters continue the honors legacy.
Kelli Lariscy graduated in 1991 with a degree in education and an emphasis in Spanish. Little did she suspect that 20 years later her very own daughter, Michaela, would follow in her footsteps. Michaela is currently a sophomore early childhood education major and a member of the University Honors Program. While Kelli continues to apply the lessons she learned through the Bell Honors Program, Michaela is just getting started.

Originally from Pennsylvania, Kelli was raised nearby in Savannah, Georgia. When it came to decide on college Georgia Southern was her first choice. “It was at the top of my list and really was where I wanted to go,” Kelli said. “My parents thought a lot of Georgia Southern and they helped steer me to make the right decision.”

During one of her campus visits, she was interviewed by the Bell Honors Program selection committee. Once accepted, she was excited for the experiences that awaited her. “I was given the opportunity to really see how the professors interacted with their students,” Kelli said. “I could tell I wouldn’t be seen as just a number.”

Kelli can still remember the first day she moved into her freshmen dorm. “Two girls introduced themselves and said they were in the program. They told me about a little get together we would be having the night before classes,” Kelli said. “I remember it really made me feel welcome, and I knew I would have some people I would be able to connect with.”

Kelli remembers socializing as being a regular activity for the BHP, but not just with fellow classmates. “There was always something social going on with our professors,” Kelli said. “We were always happy to interact with them, and they were always there for us and were happy to listen to us if we had a problem or to offer advice.”

The interactions with her professors was favorite element of being part of the BHP, and Kelli remembers one professor in particular. “One class I had was with Dr. Charlene Black, and I just absolutely loved her,” Kelli said. “I admired her and looked at her as a real role model for me.”

Even after Kelli graduated, she and Black stayed in contact. “She told me she would always be there for me wherever I went,” Kelli said. “It just meant so much to me.”

Kelli stills views Black as a “hero.”

Today, Kelli teaches Spanish to grades nine through twelve at South Effingham High School in Guyton, Georgia. She believes her experiences in the BHP contributed to her success in her career today. “I think the program helped a lot to develop me into who I was at the time and who I am now,” Kelli said. “I hope my students feel like they can talk to me the way I felt like I could talk with my honors professors.”

Kelli also was one of the first student members of Georgia Southern’s chapter of Professional Association of Georgia Educators as well as a resident assistant in Winburn Hall. Kelli also met her husband, Jeff, while attending GSU. Now with Michaela studying at her parents Alma Mater, there is a family joke of GSU becoming a family tradition. “[Michaela] had her heart set on Georgia Southern so that’s where our traditions,” Kelli said. “It just meant so much to me.”

Kelli graduated, she and Black stayed in contact. “She told me she would always be there for me wherever I went,” Kelli said. “I admired her and looked at her as a real role model for me.”

Even after, Kelli feels this connection extends to all the staff of the University Honors Program. She encouraged Michaela to use Dr. Steven Engel, the director of the program, and Dr. Francis Desiderio, the associate director of the program, as resources in a time of need. “They are really there for you. That’s how I remember Dr. Joiner and my professors,” Kelli said. “They want to be used as a resource to make your experience more powerful.”

Now with Michaela attending Georgia Southern, Kelli has made it a priority to come and visit often. She has made an effort to volunteer a couple times a month with the university as well. “I see Michaela growing so much, and I’m so proud of the woman she is becoming,” Kelli said. “I feel like I owe so much to Georgia Southern and to the honors program for everything that she seems to be getting.”

2015, Education

systems in struggling countries.

Like Kelli, Michaela agrees the University Honors Program has provided many opportunities. In the coming months, she will be assuming several leadership positions on campus including the familiar role her mother held as assistant director (now known as community leader). Michaela will be a Southern Orientation, Advisement, and Registration (SOAR) leader this summer and a peer leader for a First-Year Experience class in the fall. “The Honors Program has just opened so many doors, including doors to the community as well,” Michaela said. It has been through the University Honors Program that Michaela has become involved with Keep Bulloch Beautiful and Statesboro’s Averitt Center of the Arts.

Michaela has already experienced the same positive interactions with professors her mother experienced years ago. Michaela agrees her favorite part of the program is the small class sizes that allow a one-on-one connection with professors. “The classes are so small that you really get to know the professors and have a great connection,” Michaela said. “I had Dr. [Alan] Downs for U.S. history, and he knew each and every one of us by name.”

Kelli feels this connection extends to all the staff of the University Honors Program. She encouraged Michaela to use Dr. Steven Engel, the director of the program, and Dr. Francis Desiderio, the associate director of the program, as resources in a time of need. “They are really there for you. That’s how I remember Dr. Joiner and my professors,” Kelli said. “They want to be used as a resource to make your experience more powerful.”

Kelli Lariscy and Kelli Lariscy, 1991 Bell Honors Program Graduates

Kelli Lariscy and Kelli Lariscy, 1991 Bell Honors Program Graduates
Molly (Barksdale) Channell
1988, Broadcasting
& Alicia Channell
2012, Nursing

When Molly Channell's high school guidance counselor told her about the Bell Honors Program, a then-new program at Georgia Southern, she took the chance and applied. Upon visiting campus, she said she “immediately fell in love with Georgia Southern.” She felt the doors were open for her in higher education, but little did she know how many more open doors would follow as a result.

Molly entered Georgia Southern College in the fall of 1984 to study broadcasting as a member of the third class of the Bell Honors Program. When she discusses her experience now, she can still remember “a lot of very good professors” that made her time in Statesboro so meaningful. That list begins with Dr. Hew Joiner, the list of people she met while in college.

When it came time for their oldest daughter to apply to colleges, they did not push Georgia Southern overtly. “My heart was Georgia Southern, and I did want to give her the opportunity to explore that, but I really tried hard not to limit her. She applied to lots of schools and didn’t want her to feel like she had to follow in mom’s program.”

Alicia said she originally agreed to interview for the 1906 Scholarship only to honor her mom. That was her plan right up until they returned to Statesboro, “Molly said. "Who knows where they will go? But odds are in GSU’s favor."

Whenver in town for a visit, Molly said there are the usual picnics at Sweetheart circle, reminiscent walks through campus by the lakes where Molly and her husband used to meet on dates, to Paulson Stadium, and to Snooky’s Restaurant before they toured the campus and she fell in love with the “friendly environment.”

The recent nursing graduate said she knew her calling since she was three. “Anatomy classes and biology classes solidified that I wanted to be in medical field.” said Alicia. She credits her aunt who works as a nurse in Statesboro as her role model. They remain close today by attending church together on the weekends (the same church Alicia was baptized in) and are currently both working at Statesboro Gastroenterology.

Although Alicia graduated in May 2012, the family legacy continues on. Alicia’s next sibling Drew is freshman. We went through same process with him, leaving all the doors open, and GSU was the one that out shone the others. The third child, Alex, begins at Georgia Southern this coming fall,” said their mom, and he, too, will join the University Honors Program.

This bonding over education is nothing new for their family. Molly home-schooled all of her five children and passed on her passion for knowledge. As for the two youngest, Molly said, “Who knows where they will go? But odds are in GSU’s favor."

Whenever in town for a visit, Molly said there are the usual picnics at Sweetheart circle, reminiscent walks through campus by the lakes where Molly and her husband used to meet on dates, to Paulson Stadium, and to Snooky’s Restaurant before they toured the campus and she fell in love with the “friendly environment.”

She recently reconected with some classmates thanks to social media. “Facebook has been amaz- ing because I hadn’t been in touch with them for 15 years. After graduation, we tried to hit the annual reunions, but everyone started having children. Since I joined Facebook, I have looked up those people, and I’m seeing where everyone is now.”

Molly currently lives in LaGrange, Georgia with her younger children and husband, Jim, who she met while in college.

Molly entered Georgia Southern College in the fall of 1984 to study broadcasting as a member of the third class of the Bell Honors Program. When she discusses her experience now, she can still remember “a lot of very good professors” that made her time in Statesboro so meaningful. That list begins with Dr. Hew Joiner, the founding director of the Bell Honors Program. “Dr. Joiner really had a vision for what he wanted to do with the group; making it top notch,” Molly said. Looking back, what still strikes her the most was “the commitment of the professors to really go out of their way to spend time with us as a group.”

Molly recalled many times when professors invited students into their homes for dinner, ordering pizza at the Honors house, or meeting a group at a restaurant. “They really wanted to give us a good experience and never had a closed door policy. I never went by any a professor’s office without three or four students hanging around. That’s the kind of people they were,” Molly said.

She also credits her fellow scholars for the close-knit community feel of the program. She graduated with 11 other Bell Scholars in 1987, although Molly was originally one of 18. “We went through first 2 years of core classes all together. We got to be really close. We had a little house right on Highway 301 that was the Honors House for studying and holding class sometimes,” Molly said.

“This bonding over education is nothing new for their family. Molly home-schooled all of her five children and passed on her passion for knowledge. As for the two youngest, Molly said, “Who knows where they will go? But odds are in GSU’s favor."

Whenever in town for a visit, Molly said there are the usual picnics at Sweetheart circle, reminiscent walks through campus by the lakes where Molly and her husband used to meet on dates, to Paulson Stadium, and to Snooky’s Restaurant before they toured the campus and she fell in love with the “friendly environment.”

Alicia has also experienced the sense of a tight-knit community through her fellow 1906 Scholars just as her mom did with the BHP students.

“At that time, it was great for building friendships because I didn’t know anyone coming into it. They were the first people I met. When we had the first meeting and stayed to- gether in dorms, we started friend- ships, and I am still friends with most of them now,” Alicia said.

Beyond her involvement with the UHP, Alicia has also served as president of the Student Nurses As- sociation and volunteered at a variety of places including the local Hearts and Hands Clinic. In other words, it has been challenging four years.

“Every time I heard Alicia would write a thesis, I thought, ‘Wow that is huge.’” Molly said. And the first time I heard Alicia would write a thesis, I thought, ‘Wow that is huge.’”

However, some things don’t change. For the Channells, that has been the relationships with profes- sors. Alicia’s favorite professor was for a subject outside of her major, be-cause it wasn’t the content but the pas- sion of the professor that inspired her.

“Amer-ican government with Dr. Sabia in the spring semester of my freshman year was great. She taught me about passion in my life, and that I need to be passionate about everything I do. It got me more in- volved in the community,” she said.

Kristen Tillman is another freshman who has followed her mother’s footsteps to Georgia Southern and an honors experience. In fact, both of her parents earned degrees from Georgia Southern, and her mom was also part of the Bell Honors Program.

“Both my parents went to GSU. That was an incentive to look here. I looked at other schools, but I felt most at home here and, just like the saying goes, I liked the small-feel,” Kristen said. “I didn’t want to go just because my parents did. I wanted to make it my decision.”

Her mother, Brenda Tillman, shares this opinion. It is just one of many things the two have in common. Brenda was a member of the second class of BHP scholars from 1983 to 1987. The women have bonded over many years at Wachovia before devoting many years at Wachovia before devoting her time to her family. Her daughter Kristen is now exploring a passion for educating children and spends her summers vacations as a camp counselor.

Brenda majored in finance with an emphasis in banking and said she “stuck out like a sore thumb” in the program as she was actually the first business major to graduate from it. She went on to work for Mr. Brasons. He challenged me to think far outside of any box I had thought of before,” she said. “And Dr. Joiner was not only one of our professors but a mentor to all of us, and I remember getting a hand written note from him every quarter when I made Dean’s List, just thanking me for my hard work.”

Such relationships are not just a thing of the past for the Tillmans. Brenda was able to catch up with many old friends during the various Homecoming celebrations last fall.

“I felt very lucky to look back up with Dr. Joiner and Dr. Richter, and I think it meant a lot to Kristen that 25 years later there were still great professors to reconnect with,” Brenda said.

Kristen describes this as watching her mom interact with her “little family.”

“It was fun to see mom get excited about it again. I’m looking forward to do those things too,” Kristen said. Although Kristen has been a student for only a year, she is experiencing the beginning of such connections for herself. Her favorite class through the Honors Program was her First-Year Seminar. She said she has enjoyed the small size of only about 15 students, a size which “is supposed to be the incentive and what the Honors Program is all about.”

Taught Dr. Padmini Shankar, the course introduced incoming students to college research with a themed seminar about the chemistry of food, nutrition, and healthy eating.

“We went to a food lab one day, and we each picked a different country and each made a different meal for a party,” Kristen said.

New this year was the course’s connection to a spring semester Global Citizens course which allowed the 15 students to stay together. Outside of the classroom, events like Homecoming and football games are a favorite memory for the Tillman women. However, Brenda remembers having a very different experience as a student.

“We got there at the beginning of the football program, so we were there for part of all the excitement with Erk Russell and the first two National Championships during my junior and senior years,” Brenda said.

“My freshman year, the team played at Statesboro High School because we didn’t have a stadium yet. My first date with my husband, Keith, was homecoming freshman year. The stadium was built during my sophomore year, and we were there for all the games. All of that is really important to all of us, and has been really exciting to watch the team come back again.”

Kristen enjoys hearing how things have changed while traditions have remained at her school. “My parents are very happy with how much Georgia Southern has grown and how campus has expanded. They are happy there are still traditions with the football games, like the yellow school buses,” she said.

When Brenda speaks about her college years and specifically as a BHP scholar, it is with true appreciation.

“I know without a shadow of a doubt that the experiences with the Honors Program helped prepare me for life after college,” Brenda said.

Meanwhile, Kristen said she is looking forward to the opportunities available to her, such as completing a capstone project. She especially hopes to go on an alternative break trip or study abroad - something neither of her parents did - and leave some footprints of her own.

By Colleen McNally and Natalie Demarks
Attending college for many students requires a move away from home. For four years, the campus becomes their new, if temporary, home. However there are some students who change locations again, and take the initiative to spend one of those years abroad. Modern languages major Jennifer Keyser is just such a student. She is spending her senior year away from Georgia Southern University.

"The Honors Program's encouragement of undergraduate research led me to become involved with my research early in my academic career, and I am thankful for that. Collaboration with my professors and the Honors Program allowed me to accomplish much during my time at Georgia Southern, primarily culminating in this award. I cannot thank the Honors Program and my advisers enough for all of the mentoring and guidance that they have provided me over the years." -Jennifer Keyser

Jennifer Keyser received support from the University Honors Program in her application process. Both Dr. Engl and Associate Director Dr. Francis Desiderio played important roles in assisting Keyser. It was Dr. Engel who informed me of the exchange program, and Dr. Desiderio's assistance with my essays gave me more confidence in my chances to win," Keyser said. "They helped me a lot through the process of applying, and I owe a great deal of thanks to the Honors Program.

As a part of the DAAD scholarship, Keyser receives a monthly stipend, a study subsidy, and subsidy towards travel expenses of all of which have helped make her experience even more memorable. "I have been able to travel all over Germany to cities like Frankfurt, Berlin, Eisenach, Gottingen and may others," Keyser said. "I have enjoyed the German architecture, food, and culture as a whole."

Keyser will spend a total of ten months studying in Germany. So far, she has vastly improved her German language skills and had the opportunity to meet all types of people. "My favorite experience so far was being able to go to Munich for the last day of Oktoberfest," Keyser said. "It was a great opportunity to witness a big part of German culture."

After graduation, Keyser plans to find work that will put her international business skills to use. "My experience in Germany will hopefully help me get a job in corporate communications because I have a very good working knowledge of the German language and will be able to communicate effectively between Germany and English speakers," Keyser said. "I also may go to graduate school where I would study linguistics or get my master's degree in German."

Stephen Crooke Selected for National Science Foundation Graduate Research Fellowship

Recently graduated Chemistry major Stephen Crooke has won the National Science Foundation Graduate Research Fellowship to support his pursuit of a Ph.D. in Biochemistry at the Georgia Institute of Technology. With this fellowship, Crooke will receive significant monetary support to fund three full years of study and research. This prestigious award is given in recognition of his outstanding academic and research accomplishments as an undergraduate at Georgia Southern University.

This is not the first time Crooke's work has been nationally recognized. Last year, he received an Honorable Mention from the Barry M. Goldwater Foundation. He also has co-authored an article in his field published in the peer-reviewed journal Molbank.

While at Georgia Southern, Crooke, who was a Paulson Scholar in addition to being an honors student, focused his research on developing a more efficient and cost effective way of creating certain chemical compounds in synthetic sponges that have the same properties as sea sponges. His research will be used in the fight against cancer.

"Over the past four years, I was able to synthetically develop five separate compounds. Our group is in the process of screening these compounds for antibacterial activity, and in the near future, we will be sending them to the National Cancer Institute for screening against cancer cells," Crooke said.

"Research of this nature is critical to the medical community due to the need for an effective treatment for cancer, and it also has important implications in the field of synthetic chemistry because of the new methodology introduced for the potential development of other therapeutic compounds," Crooke worked closely with both Dr. Christine Whitlock and Dr. Michele McGiboney. During the course of this research, Crooke spent a significant amount of time creating biologically-active compounds in Dr. Whitlock's lab and testing the compounds in the lab with Dr. McGiboney.

Dr. McGiboney encourages her students to participate in research experiences as undergraduates and said of her work with Crooke: "I was fortunate that Stephen chose me and my collaborator Dr. Christine Whitlock as his research mentors. Stephen is one of the most hardworking students I have ever met in my fourteen years of higher education."

"The Honors Program's encouragement of undergraduate research led me to become involved with my research early in my academic career, and I am thankful for that. Collaboration with my professors and the Honors Program allowed me to accomplish much during my time at Georgia Southern, primarily culminating in this award. I cannot thank the Honors Program and my advisers enough for all of the mentoring and guidance that they have provided me over the years." -Stephen Crooke in the Chemistry Laboratory

Jennifer Keyser Studies in University of Kassel

Jennifer Keyser in Germany

By Natalie Demarko

Keyser, now a sociology professor, was responsible for initiating the new partnership between Georgia Southern and the University of Kassel. While Keyser has been studying in Germany, Georgia Southern has been hosting three sociology students from the University of Kassel. This new program joins an already robust list of study abroad opportunities offered to Georgia Southern students.

Keyser received support from the University Honors Program in her application process. Both Dr. Engl and Associate Director Dr. Francis Desiderio played important roles in assisting Keyser. "It was Dr. Engel who informed me of the exchange program, and Dr. Desiderio's assistance with my essays gave me more confidence in my chances to win," Keyser said. Tiffany Simmons Spends a Year in Japan

Sophomore honors student Tiffany Simmons spent the 2011-2012 school year in an immersion study abroad exchange program in Nagoya, Japan. With the help of several prestigious awards, the talented art major was able to fulfill her lifelong dream of visiting the country that lies almost 10,000 miles away from the campus of Georgia Southern. Through this once-in-a-lifetime experience, Simmons explored the Japanese culture firsthand while studying at the Nagoya University of Foreign Studies.

Simmons is pursuing a double major in studio art and art history as well as a minor in Japanese, and while in Japan she worked on her Japanese minor as well as studied classical Japanese art forms. One of her favorite classical artists is Japanese ink artist Sesshu, but she interests range wide across various media.

Having only been a student at Georgia Southern for a year before setting off on her exciting journey, Simmons believes that her participation in the University Honors Program played a significant role both in her time in Statesboro and in making her time in Japan possible. Simmons was awarded a scholarship by the University Honors Program through funds set aside each year to help motivate students to pursue study abroad reality.

"As a sophomore, I’ve only had one year at Georgia Southern with the Honors program, however, it has already become a vital part of my education," Simmons said. "With a smaller class sizes, the Honors courses have allowed me to become familiar with the faculty and receive any additional academic and individual help that I needed. Besides from contributing a scholarship to aid me financially, the Honors Program supported me in other ways as well, particularly Dr. Steven Engel and Dr. Francis Desiderio, who took the time to meet with me and help me apply for additional scholarships for various other study programs. The Honors program definitely made my first year transition an easier process and helped to provide me with the tools to study abroad!"

Simmons not only received funding from the University Honors Program but was also honored in receiving prestigious and generous support from the Fund for Education Abroad, the Benjamin A. Gilman International Scholarship, as well as the Freeman Award for Study in Asia. The grand sum of these three awards will cover the expenses of the trip.

"With a smaller class sizes, the Honors Program played a significant role both in her time in Statesboro and in making her time in Japan possible. Simmons was recognized by the Freeman Award for Study in Asia as a student who shared the organization’s goal of developing “a greater appreciation of Asian cultures, histories, and economies in the United States and a better understanding of the American people and of American institutions and purposes by the peoples of East Asia.” As part of the program, Simmons will complete a service project to promote these ideals to her school and community.

Before beginning the incredible experience Simmons said of the study abroad program, “This time abroad is designed to deepen my knowledge of the Japanese language and culture while preparing me for my future academic and professional goals.”

Travelling to Japan has been an amazing experience, she said. “Every day one, there has been a million of cultural differences. Even my taxi ride from the airport was an ordeal. With lace on the seat backs, magazines and even fake flowers in the surprisingly clean cab, I realized then that I was in a completely new world, there are so many major and minor differences, such as the language, the fashion, the food, or even simply remembering to ride on the left side of the road.”

Through her blog Simmons shares of her daily adventures—finding local restaurants, conversing with native speakers, experiencing local holidays, studying for classes, coping with culture shock, and visiting significant historical sites among many other adventures.

Tiffany Simmons Spends a Year in Japan

Jessica Cain Studies Abroad in Finland

Recently graduated Biology major and 1906 Scholar Jessica Cain spent the fall 2011 semester studying abroad at Joensuu University, The University of Eastern Finland. Cain’s time abroad was funded in part through scholarships. After receiving a study abroad scholarship from the University Honors Program, Cain also earned a nationally competitive Benjamin A. Gilman International Scholarship.

While in Finland, Cain’s academic curriculum focused on the University’s Forestry Program so that she could diversify her knowledge of the many aspects of environmental resource management. For- esty is one of Finland’s largest industries, and Cain’s time there provided her with the incredible opportunity to both observe and study the Fins’ sustainable utilization and conservation of natural resources.

Every day in Finland was an adventure as she knew very little of the language. She laughs that buying groceries was especially challenging as she oftentimes had to rely on the help of locals to find the items on her translated shopping list. During the week Cain also took three day trips to see sights from her traditional student apartment, regardless of how much snow had fallen. These adventures all took place on the backdrop of scenery Cain can only compare with that of the Grimm Brother’s fairytales.

Throughout her time as a student at Georgia Southern, Cain has been actively involved in the University Honors Program, participating as an Honors Community Leader this year. She said the program was one of the best parts of her college experience, and also said that the program’s atmosphere of inquiry and global concern and the personal faculty investment in each student helped her develop an interest for studying abroad and provided the tools necessary to compete for nationally competitive scholar- ships such as the Gilman Scholarship.

“One of the most important ways that the USIP has prepared me for the Gilman Scholarship is the value that the faculty connected with the Honors Program place on study abroad,” Cain said. “Since freshman year I have been encouraged by professors such as Dr. Engel and Dr. Sa- bia to engage in a study abroad program. Without hearing that they considered it an important part of a college education, I do not think I would have made the effort to go abroad. The assistance I received from Dr. Desiderio in putting together a well thought out and well executed application was invaluable as well.”

The experience showed Cain new ways of thinking about conservation which she will use as she pairs her passion for ser- vice with her academic interests. Next year, Cain will start a graduate program at the Nicholas School at Duke University to pursue a degree in environmental management.

By Kelsey Keane

Writing Recognition For Kayla and Chad

Honor alumna Kayla Whaley and honors student Chad Sanderson were recently recognized for their work in creative writing through the Roy F. Powell Award for Creative Writers, exhibiting their many talents in and out of the classroom. Kayla Whaley’s creative nonfiction piece, “More Than Green,” gained the first place prize in its category. Along with a $100 cash prize, her touching take on an unrequited love is featured in the most recent issue of Miscellany, Georgia Southern’s literary magazine. Kayla graduated from Georgia Southern last year with a bachelor’s in Political Science and is currently pursuing a Master’s in Public Administration.

Chad Sanderson is a senior Writing and Linguistics major; his poignant piece, entitled “Cold River,” netted him the runner-up position in the contest’s creative fiction category. The story was featured in Pegasus – Abraham Baldwin Agricultural College’s literary magazine – during spring 2012.
Members of the Honors Community Scholars (HCS) developed a second year of their college promotion and preparation program in a joint project with the Boys and Girls Club of Statesboro and Bulloch County. HCS participants Rachel Roston, Ashley Boyer, Christina Belge, and Feagin Oliver met at Edison House (home of the UHP) with a group of middle and high school students once a week and provided them with activities to build skills such as test-taking, resume-building, and decision-making. All in an effort to aid these students in creating opportunities for higher education and, eventually, prosperous, fulfilling careers.

Honors Community Scholars is a yearlong experience where honors students who want to learn more about community building organizations and university-community partnerships take on more intensive service projects in Statesboro and Bulloch County. They work as teams with specific organizations, and they meet as a group several times a month to discuss their projects and various topics related to service-learning, community partnerships, and community building.

The Boys and Girls Club College Promotion Program began the year with ice-breaker games and personality quizzes to help the students get to know each other and a sense of what they wanted out of the program. This lead to the introduction of Myers-Briggs Type Indicator (MBTI) and a sense of what they wanted out of the program. The mentors were able to bring in guest speakers and visit various offices on campus. One place they visited was the Career Advisement Center, where the students were able to think about potential careers and the college majors that might get them to their goal. The whole experience was designed to encourage the students to think more deeply about their skills, talents, and interests, and what they might want to do with them. “I really enjoyed you all,” one student said.

During the spring semester, the focus of the meetings was directed toward test-taking skills, and the group completed practice tests to help prepare them for important, upcoming standardized tests such as the SAT and the graduation test. In the last few meetings, mentors walked students through the resume-building process, aiding them in outlining their career objectives, previous work and volunteer experience, involvement in extracurricular activities and clubs, and personal work skills. Keyonna Whyte, an eighth-grader at Langston Chapel Middle School and student in the program, said, “Well, I have learned that college has very interesting aspects, and there are a variety of things you can pick to do.”

“I really learned that you reflect a message by the way you dress and carry yourself. You don’t want to give the wrong message,” Stidem said. “I was able to think about my skills, talents, and interests, and what I might want to do with them. I really enjoyed you all,” one student said.

University Honors Program student Leigh Sundem recently earned the outstanding score of a thirty-nine on the Medical College Admission Test (MCAT). The average score of each MCAT administration is twenty-four, and Sundem’s results place her in the 99.1-99.4 percentile range of all who participated in the testing sessions of August 2011. As a non-traditional student, Sundem returned to school to pursue her undergraduate degree in Chemistry several years after graduating high school. She believes that coming to Georgia Southern University with such a different perspective than the traditional student has made her especially grateful for every opportunity she has received and motivated to do her very best. Since beginning at GSU, Sundem has become highly involved academically, completing significant lab research, teaching as a Chemistry supplemental instructor, and shadowing five different professionals in the medical field. She has also volunteered her time to such organizations as the Hearts and Hands Clinic and Georgia Southern University’s Center for Addiction Recovery. Sundem participated in extensive academic lab research with Dr. Mohammed Shaikh of the Chemistry Department as they work to synthesize compounds they hope could one day be used as therapeutics for various types of cancers and Alzheimer’s disease.

“Leigh has strong convictions and an outstanding work ethic. I came to understand that, unlike countless other students, she did not consider her scientific course work just a stepping stone to her degree but an opportunity to explore a field she genuinely found interesting. I had the pleasure to meet a person who displayed such an interest for high-level work and an ability to grasp the intricacies of chemical concepts. She has a friendly personality and a positive attitude, which has certainly contributed to her being an excellent student,” Dr. Shaikh said. Sundem entered the University Honors Program as a sophomore student at Georgia Southern. She believes that her initial goal of gaining entrance to UHP motivated her to excel during her first year and that the program itself continues to encourage her academic growth. “It became very important to me that I get into the University Honors Program, stay in, and excel. The Program encourages me to do my best, providing me with resources and outlets that make me want to do my best academically and personally,” she said.

Sundem said, “Georgia Southern is where I belong. Our chemistry program is top-notch. I think I have gotten the best education possible. Each professor has helped me gain a deeper understanding of subject materials and of the hard sciences, which enabled me to be successful in the critical thinking necessary to succeed on the MCAT.”

After receiving her Chemistry degree from Georgia Southern, Sundem plans to attend medical school and to then practice primary care in a rural setting. She also dreams of serving with Doctors Without Borders in Africa. "Wherever I am most needed, that’s where I’ll go.” Through her accomplishments, Sundem has earned other significant recognition, being a Watson-Brown Scholar and a recipient of the John-Ping Hsu College of Public Health Service Award, as well as being named as an Outstanding Student in Organic Chemistry in 2011. This fall she will enter the University of Rochester’s School of Medicine & Dentistry.
This year 72 students completed the requirements of the University Honors Program. The most demanding element of those requirements is the Honors Thesis/Capstone Project. Each of this past year’s graduates is listed along with the title of the thesis and faculty mentor.

**Honors Conference Participation**

In February, five honors students, Paola Robelo, Kelsey Keane, Jordan Logue, Michelle Saucier, and Krystina Johnson, traveled with Program directors Dr. Steven Engel and Dr. Francis Desiderio to North Georgia College & State University in Dahlonega for the 2012 Georgia Collegiate Honors Council’s annual meeting. The two day event brought together honors programs and colleges from across the state to meet, present student research, and discuss approaches in honors education.

The first day’s events included panning for gold in the Dahlonega gold mines and hiking in the Blue Ridge Mountains, followed by dinner and a friendly game of intercollegiate trivia. The rest of the weekend was a little more formal, with research presentations ranging from alternative fuels to world hunger to modern music.

On the final day of the conference, Sophomore English major Kelsey Keane was elected Student Vice President of the Georgia Collegiate Honors Council, Dr. Engel was elected Faculty Vice President, and Sophomore Biology major Jordan Logue brought home first place in the poster presentations competition for his work in fiddler crab mating behavior. The three day conference showcased the research done by the honors programs and colleges from across the Southeast. The conference hosted hundreds of presentations on topics varying from cancer research and massage therapy techniques to designing roller coasters and American foreign policy.

Students were given the chance to interact with peers from other schools at student dances and dinners, as well as enjoy the city of Tampa and explore historic Ybor City.

Logue encourages all University Honors Program students to consider participating in next year’s conference, which will take place in Louisville. “This was quite an experience, and it was a lot of fun. I met so many people and learned so much in just a few days. These are the people that are going to change how the world works in our lifetime, and it was an honor to be there with them,” Logue said. By Jordan Logue and Kelsey Keane

---

**National Collegiate Honors Council**

The National Collegiate Honors Council (NCHC) met last fall in Phoenix, and Georgia honors students Cate Faulkner, Anna Rainio, and Meg Roberts attended and made presentations. Cate presented her research during the poster session, and she joined Anna and Meg and Dr. Desiderio on a panel to discuss Honors Community Scholars. Dr. Engel also presented on the University Honors Program with particular focus on our requirements and the Departmental Honors courses. Writing and Linguistics Interim Chair Dr. Phyllis Dallas accompanied the group.

The students had an opportunity to explore Phoenix through the “City as Text” program and met honors students from across the country. Cate had a good number of visitors to her poster and received very useful feedback. The Honors Community Scholars panel session was well attended.

---

**Southern Regional Honors Council**

This year’s Southern Regional Honors Conference was held in Tampa, Florida, and Georgia Southern honors student Jordan Logue travelled with the honors program of Armstrong Atlantic State University to Tampa to present his work on fiddler crab mating behavior. The three day conference showcased the research done by the honors programs and colleges from across the Southeast. The conference featured hundreds of presentations on topics ranging from cancer research and massage therapy techniques to designing roller coasters and American foreign policy.

Georgia Southern University is happy to celebrate the 30th anniversary of honors education at Georgia Southern. From the nationally innovative Bell Honors Program (1982-2007) to the current rigors of the University Honors Program (1998-present), Georgia Southern has for thirty years provided a welcoming home to motivated and high-performing students.

To celebrate this anniversary, the University Honors Program is planning the "30 Years of Honors" event to be held Saturday, October 20 and Sunday, October 21, 2012 on the campus of Georgia Southern University. This event will celebrate the achievements of our alumni and allow them to connect with our current students. Furthermore, current and retired faculty will be invited. This event is open to the families of all Bell Honors and University Honors alumni. The following page provides some of the details for the event. For more, see www.georgiasouthern.edu/honors/30years.
Saturday, October 20, 2012

5:00 pm - 6:00 pm
- Check-in: Nessmith-Lane Conference Center

6:00 pm - 8:00 pm
- Dinner: Nessmith-Lane Ballroom
  - Entertainment by Dr. Michael Braz
  - $35 per person/Business Attire
- Future Honors Scholars program (ages 4-14)
  - in Nessmith-Lane Conference Center
  - $10

8:30 pm - Late
- "Honors After Hours" Holiday Inn Statesboro
  - Cash Bar

Sunday, October 21, 2012

11:00 am - 12:30 pm
- Brunch at Eidson House
  - $15 per person

12:00 noon
- Dedication of "new" Bell Honors Oak

Lodging: Holiday Inn Statesboro
- $79 plus taxes
- reserve by September 20 to guarantee rates

For more details and link to registration go to:
www.georgiasouthern.edu/honors/30years
### Honors 2011-2012 Data

- **Honors Students:** 456 (37% Men, 63% Women, 80% Caucasian, 20% Non-white)
- **Georgia Residents (88%)**
- **States Represented:** 19
- **Countries Represented:** 17
- **91% Freshman Retention Rate**
- **Honors Courses Offered:** 99
- **Hours of Service and Leadership:** 6725
- **Faculty Teaching Honors Courses or Mentoring Honors Students:** 152
