MISSION STATEMENT
The University Honors Program provides a small college atmosphere in the context of a large comprehensive university. The program is designed to foster the development of a critical sense of inquiry, a spirit of creativity, a global perspective, and an ethic of civic responsibility. A hallmark of the program is the emphasis on bringing ideas to life through undergraduate research, experiential learning, and service-learning opportunities. The University Honors Program at Georgia Southern University rests on a foundation of the following ideals that are inspired by the institution’s emphasis on engaged learning.

Critical Sense of Inquiry
Honors students will explore a variety of approaches to research designed to foster the pursuit of knowledge. Students will develop the ability to question with a healthy skepticism toward accepted opinion. The culmination of the undergraduate experience is an independent research or creative project designed to exemplify a critical approach to inquiry.

Civic Responsibility
Honors students will demonstrate an ethic of civic responsibility and exemplify the motto of the program, "Humility before Honor." Students will be challenged to use their abilities and talents for the advancement of human knowledge and the pursuit of a greater good. The primary vehicle for the expression of civic responsibility is through service both to the university and the community.

Spirit of Creativity
Honors students will embrace the idea that creativity is a virtue that should be experienced by all students, regardless of discipline. This spirit involves a respect for different ways of knowing and an openness to intellectual discussion and challenge.

Global Perspective
Honors students will develop a perspective which allows them to approach their chosen discipline from an international point of view. This outlook involves the critical exploration of global concerns and the generation of proposed solutions to international problems. Honors education provides this worldwide perspective through academic courses, study abroad opportunities, and co-curricular experiences.

Alumna updates
Tony Hudson Jr. Named Rangel Fellow

HONORS @ GEORGIA SOUTHERN

On the cover: Tony Hudson Jr., recipient of a Charles B. Rangel International Affairs Fellowship
While sightseeing in Washington, D.C., Tony Hudson, Jr. (international studies ‘17) received a phone call that would alter his future. He had come to city as one of sixty interviewees chosen from several hundred applicants for the Charles B. Rangel International Affairs Fellowship, a nationally competitive award that provides graduate students with funding for study, internships, and entry into the Foreign Service. The day after completing his interview, Hudson decided to explore the city, and it was while visiting the Smithsonian Post Office that the news was delivered to him—he was named one of this year’s thirty Rangel Fellows.

The chief goal of the Rangel Fellowship is to prepare outstanding young people for careers in foreign affairs, a subject with which Hudson has become well-acquainted with during his time at Georgia Southern, particularly through writing his honors thesis, “Individual Domestic Terrorism: An analysis of the Motivations and Radicalization of Terrorism in the United States.” Mentored by Dr. Srobana Bhattacharya, Hudson’s thesis took root during her terrorism class.

“It started off when I took the international terrorism class here at Georgia Southern with Dr. Bhattacharya,” Hudson said. “I was really intrigued about the entire concept of how do we counteract terrorism. I wanted to look at more so what is happening here in the United States. Where does that fear come from? These experiences at Georgia Southern are what lead me to choosing the topic. Also, I love international security, so it was a natural fit.”

Hudson researched individual terrorist attacks in the United States and tried to discern what motivated these individuals to engage in political violence. His qualitative analysis examined rational choice as well as socio-psychological theories, factors that all enter into the radicalization process.

Of the writing process, Hudson said, “Writing, especially this type of writing, is a marathon. My mentors were very supportive, especially Dr. Bhattacharya. She had to push me. There was definitely plenty of constructive criticism throughout the process. All of my mentors have provided me with support, whether it was reading over different sections or pushing me to give more and do more.”

Dr. Jamie Scalera, honors coordinator for the Department of Political Science and International Studies, praised his efforts. “I saw Tony refine his talents through his honors thesis, and especially working with his mentor Dr. Srobana Bhattacharya. His accomplishments speak not only to his work ethic, but also to the quality of our program at GSU. Tony made full use of our program to help him succeed; rigorous courses, independent honors research, study abroad, and extra curriculars.”

In addition to accepting the Rangel Fellowship, Hudson was admitted to Pennsylvania State University, where he will work with experts in his field while pursuing his Masters in International Affairs. Pennsylvania is just one of the many new places Hudson’s fellowship will take him. This summer will find him in Washington again, completing a congressional internship, while next summer he will work for one of the United States Embassy’s headquarters in another country. Although he does not know where he will end up yet, he has his fingers crossed for the Middle East or North Africa, areas he has become interested in through his studies.

After graduating from graduate school, Hudson will serve as a diplomat for the State Department for five years, a future about which Hudson is keeping an open mind.

“My ultimate hope is to stay on and maintain my role as diplomat, although I’m also interested in working with different bureaus of the State Department. I want to be where the action is. I am not one-hundred percent sure what my future holds, but maybe I’ll take a stab at running for office. International politics are something I am definitely interested in. I’m just excited to make a difference in the world.”

Dr. Scalera said, “Tony’s acceptance to the Rangel Fellowship and to Pennsylvania State University are significant accomplishments. They speak to Tony’s unusual talent and motivation. I think he has a deeper appreciation for the collaborative nature of academic research and has positioned himself well for his graduate studies.”

Georgia Southern will certainly miss him while he is gone. Dr. Scalera said, “Tony’s acceptance to the Rangel Fellowship and to Pennsylvania State University are significant accomplishments. They speak to Tony’s unusual talent and motivation. I think he has a deeper appreciation for the collaborative nature of academic research and has positioned himself well for his graduate studies.”

“HIS ACCOMPLISHMENTS SPEAK NOT ONLY TO HIS WORK ETHIC, BUT ALSO TO THE QUALITY OF OUR PROGRAM AT GSU.”

DR. JAMIE SCALERA
A CLEAR PATH ON CUMBERLAND ISLAND

The slam of a machete against the trunk of a tree. The sharp clip of a lopper. The soft hum of a saw. These sounds provided the soundtrack for the May 2016 alternative break trip. Under the leadership of faculty mentor Dr. John Pallen and Cumberland Island volunteer coordinator Laura Buckmester, seventeen Honors students spent five days camping on Cumberland Island while helping to make it a more accessible place for visitors.

In their down time, students were able to learn about Cumberland Island’s history and natural environment. They explored several of the famous Carnegie family houses located on the island, such as Plum Orchard and The Dungeness Ruins. They also saw the island’s fourth famous Carnegie family houses located on the island, such as Plum Island’s history and natural environment. They explored several of the landmarks including the Saint Simon’s Sound and Fancy Bluff Creek. In preparation for an early morning of sea kayaking. They spent around three hours on the ocean, kayaking a total of eight miles and passing landmarks including the Saint Simon’s Sound and Fancy Bluff Creek. Afterwards, they ended the trip with a last meal together and reminisced over the week. Trip leaders Leath Anderson and Garrett Metropol were grateful for the opportunity to work with such an enthusiastic group. Anderson said, “Everything we did was strenuous work, whether it be sea kayaking or clearing trails. No matter what, everyone was awesome and had great attitudes.” Metropol agreed, “It was really enjoyable. Everyone wanted to help with anything we were asked.”

One of the greatest takeaways from the trip was personal and group growth. Cara Perrella said, “I went on this trip to push myself and try new things, and I didn’t expect to like it as much as I did.” For many people, this was their first time camping, and the new and experienced campers helped each other along the way, whether it be setting up a tent, helping make dinner or stuffing a sleeping bag into its tote. Stattery said, “Everyone was really comfortable with one another and was able to show their true personalities.”

This opportunity to meet and work with more students within the Honors Program was something Abi Johnson did not take for granted. “My favorite thing about this week was getting to meet more people in the Honors Program because after freshman year, it is harder to get to know the new incoming students,” she said. The 2017 alternative break trip to Cumberland Island was in session as this went to press.

A CONEY ISLAND OF HER MIND

Post Lawrence Ferlinghetti’s “A Coney Island of the Mind” wistfully looks back at a September day spent wandering Coney Island’s boardwalk amidst jellybeans and licorice sticks, a time of youthful innocence now lost, retrievable only by memory. Since the publication of this poem in 1958, Coney Island has also moved past its prime, its original splendor existing only in the minds of those who had the privilege of witnessing the park firsthand.Senior writing and linguistics major Maggie Delisle, however, plans to transpose Coney Island’s golden years from memory to the page, bringing them to life once again through her honors thesis. Her creative work, titled Lights over Coney, is a novel focusing on Luna Park, one of the original iconic parks built on the famous boardwalk, seen through the lens of a Jewish girl growing up on the island in the 1940s. One of the fiction writer’s main concerns is authenticity, so Delisle spent a few days both in Brooklyn and on Coney Island participating in primary research for her novella. This research involved indulging in authentic Nathan’s hot dogs, riding the Wonder Wheel, and doing everything just short of travelling back in time to see Luna Park as it must have existed for Lawrence Ferlinghetti so many years ago.

Delisle’s interest in Coney Island dates back to when she was a kid wondering through the Tybee Island Light Station and Museum, which features an exhibit on a defunct Tybee Island carnival. “I was obsessed with it when I was younger,” said Delisle. “And although the Tybee carnival was very old, Coney Island was the very first amusement park in United States, so I started to do research on it, and I’ve been really interested in it ever since.”

Luna Park in particular stood out to Delisle. Built in 1903, its 260,000 lights illuminated the coast line until the park tragically burned down in 1944 and was eventually replaced with a five building apartment complex. Unable to witness the beauty of Luna Park firsthand, Delisle turned to archival material, a search for information that took her to the Brooklyn Public Library, The Coney Island Public Library, The Coney Island Museum, and the large New York Public Library. Delisle said, “One artifact I found was a microfilm on the burning of Luna Park. There was even a photo. I actually had tears in my eyes. Seeing this piece of history was more than I would have ever imagined. It just made the project that much more real to me.”

Other sources she utilized included pamphlets and postcards from the early 1900s, census records for Jewish neighborhoods, and a document outlining a plan to revitalize Coney Island in the 1970s. Although these sources proved immensely helpful for Delisle, her most valuable research extended outside the archives and onto the streets of Coney Island. Not only did she get to experience the setting of her novella firsthand—she was able to live in it for a few days by staying in a historical Jewish neighborhood.

“Just being in the area helped me figure things out, because Jewish populations in New York are very different from what you’d expect,” Delisle said. “It’s very much traditional. People dress conservatively. I stayed on Ocean Parkway, which is a very important road in Coney Island’s history. It helped connect Brooklyn to Coney Island, and it really helped me get a feel for my novella’s setting.”

Delisle presented her work at the Spring 2017 Honors Research Symposium. “I’m excited to see it finally completed.”

In addition to snapping photographs and experiencing the locale for her novella, she had the chance to interview several locals. “I mainly talked to shop owners who’d been in the area for a long time, including a woman who was in a documentary about Coney Island,” said Delisle. “The people that I met kept asking me, ‘you’re going to let me read this when you’re done, right?’ Which was very intimidating. I hope I’ll be able to produce something that will make them proud.”

Delisle recently presented the first fifty pages of her novel at the Honors Research Symposium, where she explained her research, read a section of work, and expressed plans for the future. “After graduation, I’m going to study fiction in Georgia College and States’ MFA program in creative writing, where I plan to finish my novel. I’m excited to see it finally completed.”

HONORS STUDENTS CROSS THE EQUATOR

The best way to learn about a culture is to immerse oneself in it. For five honors students studying abroad in Argentina this summer, this meant exploring neighborhoods in Buenos Aires, marvelling at waterfalls, tutoring local children, and even taking a little time to pursue individual research. Kyle Hess, Berenquelle O’Donnell, Sophie Fieri, Malik Raymond, and Derrick Herrin were among several Georgia Southern students who took part in the Foreign Language Department’s study abroad program to Argentina, which focused on building students’ speaking and comprehension skills in Spanish.

For Sophie Fieri (mechanical engineering ’19), signing up for the trip was a no-brainer. “I went to the study abroad fair knowing I wanted to travel to a Spanish-speaking country. I had already been to Buenos Aires before during a mission trip to Las Teremos del Rio Hondo in Northern Argentina, and I decided I really wanted to go back again.”

Sophie Fieri and Kyle Hess help lead classroom activities at a school in The Villas, an underprivileged Buenos Aires neighborhood.

Derrick Herrin (mechanical engineering ’17) had a similar experience. While he had not visited Argentina before, on honors alternative spring break trip in Costa Rica he left him with the desire to return to another Spanish-speaking country.

“My senior year was coming up, and I realized if I wanted to graduate on time I really needed to study abroad,” he said.

The students, including Malik Raymond (history ’17), expressed a desire to improve their Spanish abilities during their summer abroad. However, Raymond also had other plans—conducting research. He studied Buenos Aires’ population of Afro-Porteños, citizens of African descent, during the late 19th century. His interest in their culture began last spring when he discovered their poetry.

“During the previous spring, I went to Argentina’s national archival website and found poems that weren’t translated into English. I was trying to build my Spanish by reading and translating the poems, and it occurred to me that maybe I could do something in that vein for my honors thesis,” said Raymond. “However, since I’m a history major and writing is only my minor, I couldn’t, but I still wanted to do research on the history of the Afro-Porteños around the time period during which the poems were written, which was around the late 1870s and early 1880s.”

His research included visiting the National Library of Buenos Aires, which had an exhibit on the Afro-Porteños currently on display. It featured newspapers the Afro-Porteños had licensed themselves, filled with articles, poems, and other miscellaneous writings.

In spite of his busy research schedule, Raymond still had time to enjoy other activities in which the group took part. Places visited included a street museum called Paseo de la Cartoon, which pays homage to the characters of famous Argentine comics; the La Boca neighborhood, where the famous Boca Juniors soccer team is located; and several art museums and shopping districts. As a writing minor, Raymond enjoyed being in a place famous for having more bookstores per block than any other city in the world.

“I got lost there trying to find particular books that I wanted,” Raymond said. “It was a great place to explore.”

After acquainting themselves with the city, Herrin says they also got to know some of the local population.

“We helped tutor a group of underprivileged kids in English and Math. I really enjoyed that opportunity. It was a good way to become more than a typical tourist and experience a more extensive range of Argentine culture.”

When asked about his favorite part of the experience, Herrin said, “I really enjoyed talking with the people of Argentina about their culture, history, and so much more. Not only was I learning from them, but they were learning from me about U.S. culture, history, etc. We compared our countries and cultures in a very refreshing, nonjudgmental way that put aside the cultural boundaries in favor of understanding of each other.”

Fieri undoubtedly enjoyed her experiences, as well, for she opted to stay in Las Teremos del Rio Hondo for two weeks after the program ended.

“I highly encourage anyone studying Spanish to go on an study abroad, but go early,” she said. “Don’t wait, because you have fewer opportunities as time goes by. I promise it’s worth it.”

Jenny Shaffer (German/mechanical engineering ’17) spent her third summer in Germany gaining professional experience through the Materials Science Internship at Robert Bosch GmbH Center for Research and Advanced Engineering in Renningen. This highly competitive internship only accepts roughly thirty graduate students or alumni of the Deutscher Akademischer Austauschdienst Research Internship in Science and Engineering (DAAD RISE) Germany program, a program Shaffer participated in during summer 2015 at Ruhr-Universität in Bochum. Shaffer’s exemplary work from the previous summer provided her with the skills to succeed in this advanced, graduate level internship.

Shaffer’s roles included “designing and implementing experiments to program the global conditions inside a corrosion chamber and comparing the effects of the local environmental load on the corrosion rates of stainless steel, aluminum, and titanium parts inside the chamber,” Shaffer said. “This required knowledge not only from politics to healthcare to philosophy to food,” said Shaffer.

The professional atmosphere provided Shaffer with real life experiences of what a career in engineering has to offer. Working at the Robert Bosch GmbH Center, Shaffer utilized her classroom knowledge and began to flourish in a corporate environment. “This trip felt more like a ‘real run’ if I were to actually live and work in Germany someday,” said Shaffer.

Because she took part in the internship program twice, Shaffer was invited to serve as keynote speaker for the 2016 DAAD RISE conference on July 7-9, 2016 in Heidelberg, Germany. A conference whose audience included the program’s current students, employees, and dignitaries from the US, British, and Canadian embassies, including the US Consul General from the Frankfurt general consulate.

“The purpose of the presentation was to show an alumna’s perspective of the DAAD RISE German and RISE Professional programs and emphasize the importance of cultural exchange in our increasingly global society,” said Shaffer. “I went over my research from both internships and then encouraged students to pursue their passions overseas and network with their peers from the programs.”

Shaffer’s advice to students who are looking for adventures abroad is to simply apply. “Never pass up an opportunity simply because you think the odds are low.”

Spending a summer abroad is an amazing experience, but spending three summers abroad is a chance of a lifetime. Shaffer’s advice to students: “Don’t wait, because you have fewer opportunities as time goes by. I promise it’s worth it.”

Jenny Shaffer (German/mechanical engineering ’17) spent her third summer in Germany gaining professional experience through the Materials Science Internship at Robert Bosch GmbH Center for Research and Advanced Engineering in Renningen. This highly competitive internship only accepts roughly thirty graduate students or alumni of the Deutscher Akademischer Austauschdienst Research Internship in Science and Engineering (DAAD RISE) Germany program, a program Shaffer participated in during summer 2015 at Ruhr-Universität in Bochum. Because she took part in the internship program twice, Shaffer was invited to serve as keynote speaker for the 2016 DAAD RISE conference on July 7-9, 2016 in Heidelberg, Germany. A conference whose audience included the program’s current students, employees, and dignitaries from the US, British, and Canadian embassies, including the US Consul General from the Frankfurt general consulate.

“The purpose of the presentation was to show an alumna’s perspective of the DAAD RISE German and RISE Professional programs and emphasize the importance of cultural exchange in our increasingly global society,” said Shaffer. “I went over my research from both internships and then encouraged students to pursue their passions overseas and network with their peers from the programs.”

However, the trip was not entirely focused on working for the internship. Shaffer was able to experience the city’s culture, while forming relationships with others. The city of Renningen provides both “pre-war and modern architecture.” Shaffer explained, “Many of the historical castles and buildings were reconstructed after being destroyed in the Allied air raids during WWI, and these buildings stand next to modern buildings in a hodgepodge of culture in the city center.”

Shaffer’s studies of the German language at Georgia Southern University, and a DAAD scholarship to Germany after her freshman year, prepared her for tackling the language barrier. Working in a

In preparation for Georgia Southern’s upcoming consolidation with Armstrong, six honors students from both schools have taken initiative in bridging the gap between the two schools’ honors programs.

Students from Georgia Southern include Hannah Dorough (psychology ‘20), Morgan Gallishaw (biology ‘18), and Caitlin Shelby (graphic design / interior design ‘20), and students from Armstrong include Kaley Powers (biology ‘18), Linnea Ryan (history ‘19), and Lalee Cauthran (ASL, interpretation ‘20).

At this year’s annual Southern Regional Honors Conference (SRHC) in Asheville, North Carolina, they led a panel titled “Bridging the Gap: Attempting to Foster Community Among Honors Students in a Consolidation.” Their discussion focused on methods of fostering community and building rapport between multiple campuses, something they all consider important for honors students in the upcoming years.

Ryan said, “I got involved with this project because I wanted to connect with the students in the honors program at Georgia Southern and be involved with the consolidation process as much as possible. What I’ve learned is that the honors programs at both ASU and GSU have a lot to learn from each other and great potential for growth.”

The students were encouraged to join forces by their respective honors program directors, Dr. Steven Engel of Georgia Southern, and Dr. Jonathan Roberts of Armstrong.

At this stage in the process, we still do not know a great many details about how the new Georgia Southern University will be structured,” Dr. Engel said. “We know this much, however, at the end of the process, we will be one university. Consequently, Jonathan and I are both working to make sure we ensure that all of our honors students feel like they are in a shared community of scholars. There is no better way to do that than to get students together with each other and giving them the opportunity to play a part in building their new shared future together.”

Dr. Roberts agreed, saying, “For the better part of the last decade Armstrong and Georgia Southern’s Honors programs have collaborated quite well with one another. I feel strongly that the consolidation of the two institutions, done correctly, will lead to more opportunities for students on both campuses.”

These six students come from a larger group of honors students that travelled to the conference in late March, twenty-nine Georgia Southern students and eight Armstrong students had proposals accepted by SRHC, which brought in around 700 students. Their presentations included posters, papers, and thesis work from all disciplines.

Gallishaw spoke about the experience. “Our goal at the conference was to begin to open doors and form the beginning bands of friendship and community between attending Georgia Southern and Armstrong students. The initial reaction to the consolidation was not enthusiastic from either campus, but when this group of students from Georgia Southern and Armstrong came together in the same room, there was nothing but warm welcome and excited anticipation of what will come as we continue merging both our academic and social programs.”

Bridging the Gap: Attempting to Foster Community Among Honors Students in a Consolidation.
There are few places in the world where one can attend lectures by famous writers like Jonathan Franzen and Roxane Gay and then potentially run into them at yoga class or a restaurant the next day. In fact, the Associated Writers and Writing Programs (AWP) Conference might be the only place on earth where this is possible. Attracting over 12,000 writers, editors, and educators annually, this year’s AWP Conference, located in Washington, D.C., included both Georgia Southern honors students and alumni.

Along with four other writing and linguistics majors and creative writing professor Jared Yates Sexton, senior honors students Maggie Delisle, Devon Pride, Summer Kurtz, and Aleya Rentz spent three days attending readings, networking with publishers and editors, and pursuing the largest book fair in America.

“The Associated Writing Programs Conference is the premier writing conference in America and provides an incredible learning opportunity for students interested in publishing, production, and simply looking for advice and support,” said Sexton. “This is the third consecutive year I’ve taken students and they seem to learn and find inspiration every time.”

Kurtz certainly did. “I loved being in a place where I felt like everyone pretty much had the same passion as me,” she said. “It was both validating and life-affirming. Getting to talk to editors of journals and magazines was really helpful and it gave me a clear idea that I definitely want to be an editor.”

In addition to helping solidify career paths, the conference also related back to some of the students’ honors thesis work.

Pride said, “Attending panels helped me with certain aspects of my thesis. I went to one that focused on writing from the perspective of the ‘outriders’ of society—murderers, kidnappers, terrorists, etc.—and because my thesis is a novel that uses psychological horror, the information this panel attendees shared was helpful.”

As the largest conference of its kind, AWP attracts several well-established writers each year, something this year’s students enjoyed. Delisle was able to attend a reading by National Book Award winner Jacqueline Woodson, a writer she had previously only encountered in class.

“One of my favorite parts of AWP was seeing Jacqueline Woodson read from her poetry. I read her memoir in my Children’s Literature class, and actually hearing her read passages from it made her work that much more meaningful to me,” said Delisle.

Rentz had a similar experience. “I got to meet Dave Eggers and tell him how much I loved reading his memoir, A Heartbreaking Work of Staggering Genius, for my creative nonfiction class. I also really enjoyed meeting some of the editors who have previously published my work. It helped me really expand my professional network.”

When they weren't attending panels or readings, the students had the chance to catch up with other Georgia Southern alumni. The Writing and Linguistics Department has sent several of its graduates to creative writing MFA programs, and three of them—Parish Turner, Yovania Ryan, and Michael Conner—all attended the conference with their respective programs. Turner came down to Washington from New York City, where he is a student in creative nonfiction at The New School, while Ryan traveled with Fairfield University Conner, a fiction student at American University, was fortunate to have the conference take place in his own backyard. Since last fall, he has been living in Washington and enjoying both his classes and the cultural opportunities going to school in a large city affords.

“It’s no secret that Washington’s a vibrant cultural hub, but I find the most excitement in workshops,” Conner said. “Without the program, I’d never have been exposed to the writers I so desperately needed to study, nor to the writer’s lifestyle of going to readings multiple times a week, establishing consistent writing goals for my own work, and reaching out to others in the literary community for advice and support.”

When asked to recount his favorite part of the conference, he turned to his former classmate. “Seeing my old classmates was a wonderful pleasure and always leaves me yearning for a slower clock. They’re the people I write for.”

Honors Writing Majors in Action: Associated Writers and Writing Programs Conference in D.C.
Each year, all honors freshmen take part in a year-long First-Year Experience (FYE) class tailored toward preparing students for success in the Honors Program. Among these classes is Animal-Assisted Therapy, an intensive service in research methods and service-learning taught by Dr. Jerri Kropp and Dr. Trent Maurer. While learning how to utilize both physical and online databases to look at findings from an international perspective, students also participate in a hands-on service project that pairs them with either a certified therapy dog or a local therapeutic horsemanship riding program. Stirrup Some Fun. Students emerge from this class fully prepared for tackling future research projects, such as their honors thesis; some are even inspired to continue working with therapy animals. For Caroline Lathi (health education & promotion ’18), the class provided her with the opportunity to continue working with therapy animals. For Caroline Lathi (health education & promotion ’18), the class provided her with the opportunity to continue working with therapy animals.

The presentation focused on applying scaffolded research methods to a classroom setting, scaffolded research being research that builds on prior knowledge “taught by the student.” Both professors wanted to share their unique, rigorous approach to teaching research in a condensed timeframe, but they felt a student who was completely trusted in her ability and her professionalism—based on her performance in our course sequence—and we knew whatever she created would be a perfect fit for the presentation. I can’t think of a greater compliment to her abilities than placing that kind of trust in her.”

The presentation was an inevitable success; in fact, Dr. Shanahan, whose research made the animal-assisted therapy class possible, was actually in attendance. “She’s someone we look up to as a mentor, so we were really pleased that she came to our presentation,” said Dr. Kropp.

Once the presentation was over, the group was able to enjoy the rest of the conference, which included listening to panels and, in the spirit of global citizenship, meeting researchers from around the world. Lathi was able to meet the presenters on Dr. Maurer’s other panel: one faculty member from Canada, one faculty member from the UK, and one undergraduate student from the UK. While encountering many new people and ideas, Lathi was also able to see her own experience as a student researcher from another viewpoint. “I liked going to the other presentations as one of the only students there,” she said.

“Being a student and listening to professors talk about how you learn is very interesting, even if you receive that different perspective.” Lathi’s student voice was just as valuable to the professors in attendance. Dr. Maurer said, “Student voices are important to the conversations had there, and certainly to our outcome, but they are few and far between. Students like Caroline help those of us who work with undergraduates on research to see the impact of our work. Being able to give any student an opportunity like that is a rare and precious thing.”

Lathi had just completed the course, but she jumped on the opportunity to present research just after the completion of her freshman year: an experience very few students have. “I ended up loving the class and working with therapy dogs, so I was happy to have the opportunity to share my perspective,” said Lathi. “I was really nervous going in because I was addressing these professors whose careers are dedicated to undergraduate research, but once I started talking it was very easy to speak to the crowd. It was fun.”

“Preparing for the presentation proved slightly challenging, since the conference was at the end of June and Lathi was attending a leadership retreat the week before. While the group had discussed their plans before the semester ended, Dr. Kropp and Dr. Maurer did not state Lathi’s contributions to their PowerPoint until the day before the presentation.”

“She’s someone we look up to as a mentor, so we were really pleased that she came to our presentation,” said Dr. Kropp.

“Preparing for the presentation proved slightly challenging, since the conference was at the end of June and Lathi was attending a leadership retreat the week before. While the group had discussed their plans before the semester ended, Dr. Kropp and Dr. Maurer did not state Lathi’s contributions to their PowerPoint until the day before the presentation.”

“She’s someone we look up to as a mentor, so we were really pleased that she came to our presentation,” said Dr. Kropp.

The five honors students were appreciative of the experience because many students do not receive opportunities to present research at the undergraduate level. Smith was genuinely excited for the moment to present because this was her first conference in her undergraduate career. She also attended the graduate school fair at the conference and gained “information from schools with some of the top chemistry departments.”

The local experience provided the students will skills in communication, research, and public speaking.

“Tsends loved meeting ‘other people as passionate about chemistry as (she is),’” a sentiment Thies also agreed with.

“I thoroughly enjoyed talking with other students about their research and having the opportunity to network with renowned scientists,” Thies said.

HONORS STUDENTS PRESENT AT GEORGIA UNDERGRADUATE RESEARCH CONFERENCE

Honor in Action

ANIMAL-ASSISTED THERAPY AT THE COUNCIL FOR UNDERGRADUATE RESEARCH

FINDING REACTIONS AT THE AMERICAN CHEMICAL SOCIETY

Every year, one or two honors students usually attend the American Chemical Society’s annual conference, but this year five chemistry students—Mattie Brandson ’18, Olivia Pandue ’17, Jemima Smith ’18, Jonathan Taylor ’16, and Riley Thes ’16—took their research to the meeting, which was held in Columbia, South Carolina. Both students and professionals alike attended the conference, including 2008 Nobel Peace Prize winner for chemistry, Martin Chalfie.

Each student was able to transform the classroom into well-developed research through the support of their mentors. Jonathan Taylor’s mentor is Dr. Ji Wu, a professor of Analytical Chemistry.

Taylor said, “Often times the roles of the student and the professor can feel separated, but spending time with Dr. Wu, and other professors around the department, has helped to remind me that they were all undergraduates at one point too.”

Professors are valuable resources because they understand the struggles and difficulties that come with undergraduate research because they had similar experiences. Smith appreciates that fact that professors “have been in (our) shoes before.”

The students heard about the American Chemical Society through their mentors, who act as a bridge between the academic and professional worlds. Many of the mentors also played a vital role in the development of the poster presentations. “Whenever I had questions, I would ask my mentor, and he gave me all of tips about presenting my poster,” Smith said.

The five honors students were appreciative of the experience because many students do not receive opportunities to present research at the undergraduate level. Smith was genuinely excited for the moment to present because this was her first conference in her undergraduate career. She also attended the graduate school fair at the conference and gained “information from schools with some of the top chemistry departments.”

The local experience provided the students with skills in communication, research, and public speaking.

“Tsends loved meeting ‘other people as passionate about chemistry as (she is),’” a sentiment Thies also agreed with.

“I thoroughly enjoyed talking with other students about their research and having the opportunity to network with renowned scientists,” Thies said.

HONORS STUDENTS PRESENT AT GEORGIA UNDERGRADUATE RESEARCH CONFERENCE

Every since the Georgia Undergraduate Research Conference’s (GURC) conception five years ago, honors students have taken advantage of this opportunity to showcase their research locally, and this year was no exception. Eleven students in disciplines ranging from chemistry to creative writing took part in this year’s conference at Georgia College and State University’s campus in Milledgeville.

Writing and linguistics students featured prominently among the conference’s Georgia Southern population. Three seniors focusing on creative writing, Maggie Delisle, Summer Kurtz, and Lauren Gagnon, led a panel titled “Interweaving Realities in Fiction: How Research Informs Creative Writing.” Writing fiction and poetry is often dismissed as non-academic, but this panel dispelled that notion.

“Our panel talked about how research is actually really important to the creative writer,” Gagnon explained. “It helps the writer create an authentic world and make their fiction as close to reality as possible.”

Their creative projects have been informed by intensive research, both in class and in the real world. A novel called A Novel about Comey Island, found her combing through archives at the Brooklyn Public Library. The Cayne Island Public Library, and the New York Public Library. Gagnon spent a large portion of her summer interviewing people for her novel, tentatively titled After the War, which chronicles a wife’s struggle with her husband’s PTSD. Speaking with her cousin and his friends, who are all army rangers, helped her shape an accurate portrait of not just an army ranger’s life, but the cadence and sound of their speech, as well. She also met with a veteran suffering from PTSD, helping her to better empathize with her characters. Kurtz’s poetry collection, Milestones to Maturity, deals more with her personal experiences with mental illness, but were still informed by research that included psychology textbooks and analyzing how people talk about mental illness on social media.

At a conference largely attended by STEM majors, the students were grateful to have the opportunity to present a unique perspective on research.

“We were certainly in the minority, but it was good to represent for the liberal arts,” Kurtz said. “It was definitely a fulfilling experience.” Another liberal arts student, Marz Amal (international studies/ French ’17), presented on her honors thesis, “Exploring the Role of Corporate Social Responsibility. European Fashion Corporations
Compliance to Ethical Practice."

My project bridges the gap between art and law to explore and analyze the role that the fashion industry has in the movement of accepting and implementing corporate social responsibility, particularly in European countries," Amiel said.

Other presenters included a large number of athletic training and exercise students, including Lacey Dennis (athletic training '17), Diana Tyler (exercise science '16), Molly McLaughlin (exercise science '16), and Chelsea Rodriguez (exercise science '18). With encouragement from kinesiology professor Dr. Daniel Czech, these students presented original research.

STEM students also took their research and honors theses to the conference, including Kelvin Rosado-Ayala (computer science '18), Carlie Novak (chemistry '18), Wesley O'Quinn (electrical engineering / physics '19), and David Moore (electrical engineering '17).

O’Quinn, who presented research on energy harvesting with wind turbines, particularly enjoyed the conference. "It was an incredible experience because it provided the opportunity to meet and talk with other undergraduates who are doing research. This was beneficial because I was able to talk about future research project ideas with them."

One of Novak’s favorite aspects of the conference was its interdisciplinary nature. She said, "Presenting at GURC gave me the opportunity to share my research with my peers in different departments. This was a great opportunity to expose my research at a convention that was not solely dedicated to chemistry; something I do not get to do often."

"People were so excited about my research which caused a revitalization of my efforts," Gunby said. "The topic is something that I really care about and people were so encouraging. I had some people give recommendations which was actually really cool."

While Gunby enjoyed meeting people in her field, Bailey Kirk’s (mathematics '18) favorite part of the conference was the opportunity to see her research对面 fellow researchers. "I really enjoyed hearing about the different research projects that other students presented. It was motivating to see what other students are doing and also inspiring to think about my own research.

Another student who enjoyed the conference was Francis Woodford, who presented research on energy harvesting with wind turbines. "It was a great opportunity to share my research with others and to learn about the research of my peers. I was able to make connections with other students who are doing similar research and we had some really great discussions.

Kirk also enjoyed the interdisciplinary nature of the conference. "It was amazing to see so many students discovering new knowledge. I was able to learn about research in fields that I wasn’t familiar with."

The conference presented them with multiple opportunities for engagement with other like-minded individuals.

"The conference was a wonderful experience for me personally," said Blais. "I was amazed by not only the intellect of others attending the conference but also the openness and friendliness I received as a fellow researcher. I would definitely recommend it to other Georgia Southern students thinking about attending conferences in the future."

Even their down time was full of educational experiences, such as visiting the Spalding National Running Center to see the latest research in Running Science, exploring Boston, and touring a lab at Harvard Medical School.

Rodriguez said, "We got to make connections with students from other renowned universities and participate in public discourse with different keynote speakers including Jill Abramson and Harold E. Varmus. We were able to participate in various workshops which included discussions about graduate school, entrepreneurship, ethics in research, and much more. It was incredible getting to hear about all the participants’ research. From neuroscience, to research in curing cancer, it’s amazing to see so many students discovering new knowledge."

With original research topics and strong commitment to academics, Georgia Southern’s honors students are on par with students from some of the best institutions in the country. Lacey Dennis (athletic training '17), Eva Blais (exercise science '17), Chelsea Rodriguez (exercise science '18), and Kolyse Wagstaff (exercise science '17), proved this by presenting their research at Harvard University’s National Collegiate Research Conference, a symposium whose application process is highly competitive and attracts scholars from all over the world.

Dr. Daniel Czech, honors coordinator in the School of Health and Kinesiology, urged them to seize this opportunity. “To me, transdisciplinary learning experiences like our trip to Harvard can increase a student’s intellect, motivation, and of course multicultural mindset,” he said. “I asked Kolyse, Lacey, Chelsea and Eva to apply, and I am so proud of them for saying yes and following through.”

Blais, Dennis, and Wagstaff’s theses are part of a three-part project, mentored by Dr. Li Li, looking at the effects of static stretching on the gastrocnemius muscle, while Rodriguez’s thesis, mentored by Dr. Czech, explores how different motivational climates affect the motivational engagement with other like-minded individuals.

"It was amazing to see so many students discovering new knowledge," said Woodford. "I was amazed by not only the intellect of others attending the conference but also the openness and friendliness I received as a fellow researcher. I would definitely recommend it to other Georgia Southern students thinking about attending conferences in the future."

OF DOGS AND DOCTORS: PRESENTING RESEARCH IN DUBLIN

The year of 2016 presented Dr. Jerri Kropp and her students with myriad opportunities to share their research in the field of early childhood education. In addition to presenting at the Council for Undergraduate Research this summer, Kropp recently spent a week in Dublin, Ireland with honors alumnae Mikaela Shupp (business management and Spanish ‘16) and Mary Wallace-Noe (child & family development ‘11), where they were able to present their findings on an international stage. During the first week in September, they attended the 26th Annual European Early Childhood Education Research Association (EECERA) Conference held at Dublin City University, the largest conference of its kind. This year’s conference included 920 attendees from 44 different countries representing 6 continents. Of all the presentations given at EECERA, two of them included Dr. Kropp. She presented “Benefits of Having a Therapy Dog in the Classroom: A Review of Research,” alongside Shupp, and “How to Reduce Children’s Fears of Doctor Visits Using Medical Play” with Wallace-Noe.

Dr. Kropp and Shupp also made contact with other colleagues with similar interests, such as a professor and psychotherapist from Spain who presented a poster on a study of therapy dogs with children who have been abused. He plans on two future studies involving therapy dogs in children’s hospitals and in classrooms—exactly Dr. Kropp’s avenue of research. Shupp also enjoyed the opportunity to meet researchers from other countries. “One of the most interesting aspects of the conference was meeting people from other places, especially considering that the topic was education and everyone was coming from completely different education systems. In our session alone, which was on improving child outcomes, one set of presenters was from Denmark, and the other was from the UK. It was just really cool meeting people from other countries with the same interests.”

She also had the chance to see another Georgia Southern alumna in action—Mary Wallace-Noe, a current Masters of Public Health Candidate, presented research with Dr. Kropp that began with Wallace-Noe’s honors thesis. Dr. Kropp had collected data for several years involving a class assignment where students conduct medical play sessions with children ages 2 to 11 in child care settings and after-school programs. Students visited 23 different programs and Kropp and Wallace-Noe conducted a content analysis of 56 reviews of the medical play sessions. The research question was whether or not medical play in childcare settings would lessen children’s fear of doctor visits by familiarizing them with medical equipment during a session of dramatic play.

Wallace-Noe emphasized the importance of their research. “The experience of play allows children to express fears and misconceptions; they may not feel comfortable sharing in an openly vulnerable way. It presents them with the opportunity to play doctor and be in control of the situation so their fears can begin to diminish. Play is very powerful in the hands of a young child.”

Dr. Kropp agreed, saying, “Medical play sessions in childcare centers help children cope with repeated experiences with doctors and medical staff. Young children spend a lot of time at the doctor’s office for well visits, including vaccinations, as well as sick visits, including colds, injuries, and respiratory infections. Incorporating these sessions into preschool curriculum can help child cope with past medical experiences and prepare for future medical encounters.”

After the presentations were over, everyone was pleased with their results, particularly Dr. Kropp, who sees both presentations as opportunities for future research and publication.

ASHWOOD AT THE AMERICAN PHYSICAL SOCIETY

After a year and half of research, Elizabeth Ashwood (physics ‘17) presented her honors thesis at the American Physical Society (APS) March Meeting in New Orleans, Louisiana. The goal of APS is to unify the scientific community to advance people’s awareness of physics. The conference separates over 8,000 presentations into specific categories such as “biological physics and chemical physics” over the course of a week, said Ashwood. She was given the opportunity to present at the level of professionals instead of presenting with other undergraduates.

“My research is a development of programming tools to rapidly evaluate experimental set ups in atom interferometry,” she explained. “Atom interferometry measures the interference patterns produced by a phase difference of atomic waves.” Her goal is for her research to be used on the International Space Station (ISS) in the Cold Atom Lab, which is being sent to the International Space Station in June 2017. This amazing opportunity would move Ashwood’s thesis, “Developing Tools for a Precision Measurement of Newton’s Gravitational Constant,” from the academic setting into a professional setting.

Ashwood says her mentor, Dr. Edwards, has been an influential aspect of her research. She said, “When I first started research with Dr. Edwards, I had only basic physics 1 and 2 level knowledge, and I was just beginning to take differential equations. Dr. Edwards helped in the start by teaching me what Bose-Einstein condensates were.” Dr. Edwards asked her at the genesis of her project, explaining new, difficult concepts that would eventually become the overarching argument behind Ashwood’s thesis.

Dr. Edwards explained his experience with working with a dedicated student who genuinely loves learning. “I have enjoyed being Elizabeth Ashwood’s research mentor. She is quick to grasp new concepts, incorporates them into her skill set, and is able to think on her own. She is quite mature for her age and is a natural leader of other students.”

After graduation, Ashwood will enter the Peace Corps and spend two years in Swaziland.

research emphasizes how truly vital the study of therapy dogs is to early childhood education research. Before the conference even began, a prospective director from Wales who wanted to begin a research project on dogs in classrooms contacted Dr. Kropp based on reading just the abstract for her presentation.

“Shupp contacted me and said she wanted to implement a program and collect data in several schools in Wales and wanted to meet us in person,” Dr. Kropp said. “Our session was in the last slot of the conference though, so she had to leave early to catch her flight, but she ran to our session to briefly talk to us before leaving.”

Dr. Kropp and Shupp also made contact with other colleagues with similar interests, such as a professor and psychotherapist from Spain who presented a poster on a study of therapy dogs with children who have been abused. He plans on two future studies involving therapy dogs in children’s hospitals and in classrooms—exactly Dr. Kropp’s avenue of research. Shupp also enjoyed the opportunity to meet researchers from other countries. “One of the most interesting aspects of the conference was meeting people from other places, especially considering that the topic was education and everyone was coming from completely different education systems. In our session alone, which was on improving child outcomes, one set of presenters was from Denmark, and the other was from the UK. It was just really cool meeting people from other countries with the same interests.”

She also had the chance to see another Georgia Southern alumna in action—Mary Wallace-Noe, a current Masters of Public Health Candidate, presented research with Dr. Kropp that began with Wallace-Noe’s honors thesis. Dr. Kropp had collected data for several years involving a class assignment where students conduct medical play sessions with children ages 2 to 11 in child care settings and after-school programs. Students visited 23 different programs and Kropp and Wallace-Noe conducted a content analysis of 56 reviews of the medical play sessions. The research question was whether or not medical play in childcare settings would lessen children’s fear of doctor visits by familiarizing them with medical equipment during a session of dramatic play.

Wallace-Noe emphasized the importance of their research. “The experience of play allows children to express fears and misconceptions; they may not feel comfortable sharing in an openly vulnerable way. It presents them with the opportunity to play doctor and be in control of the situation so their fears can begin to diminish. Play is very powerful in the hands of a young child.”

Dr. Kropp agreed, saying, “Medical play sessions in childcare centers help children cope with repeated experiences with doctors and medical staff. Young children spend a lot of time at the doctor’s office for well visits, including vaccinations, as well as sick visits, including colds, injuries, and respiratory infections. Incorporating these sessions into preschool curriculum can help child cope with past medical experiences and prepare for future medical encounters.”

After the presentations were over, everyone was pleased with their results, particularly Dr. Kropp, who sees both presentations as opportunities for future research and publication.

ASHWOOD AT THE AMERICAN PHYSICAL SOCIETY

After a year and half of research, Elizabeth Ashwood (physics ‘17) presented her honors thesis at the American Physical Society (APS) March Meeting in New Orleans, Louisiana. The goal of APS is to unify the scientific community to advance people’s awareness of physics. The conference separates over 8,000 presentations into specific categories such as “biological physics and chemical physics” over the course of a week, said Ashwood. She was given the opportunity to present at the level of professionals instead of presenting with other undergraduates.

“My research is a development of programming tools to rapidly evaluate experimental set ups in atom interferometry,” she explained. “Atom interferometry measures the interference patterns produced by a phase difference of atomic waves.” Her goal is for her research to be used on the International Space Station (ISS) in the Cold Atom Lab, which is being sent to the International Space Station in June 2017. This amazing opportunity would move Ashwood’s thesis, “Developing Tools for a Precision Measurement of Newton’s Gravitational Constant,” from the academic setting into a professional setting.

Ashwood says her mentor, Dr. Edwards, has been an influential aspect of her research. “I have enjoyed being Elizabeth Ashwood’s research mentor. She is quick to grasp new concepts, incorporates them into her skill set, and is able to think on her own. She is quite mature for her age and is a natural leader of other students.”

After graduation, Ashwood will enter the Peace Corps and spend two years in Swaziland.

Wallace-Noe emphasized the importance of their research. “The experience of play allows children to express fears and misconceptions; they may not feel comfortable sharing in an openly vulnerable way. It presents them with the opportunity to play doctor and be in control of the situation so their fears can begin to diminish. Play is very powerful in the hands of a young child.”

Dr. Kropp agreed, saying, “Medical play sessions in childcare centers help children cope with repeated experiences with doctors and medical staff. Young children spend a lot of time at the doctor’s office for well visits, including vaccinations, as well as sick visits, including colds, injuries, and respiratory infections. Incorporating these sessions into preschool curriculum can help child cope with past medical experiences and prepare for future medical encounters.”

After the presentations were over, everyone was pleased with their results, particularly Dr. Kropp, who sees both presentations as opportunities for future research and publication.
For honors political science and international studies students, this year brought multiple opportunities for sharing their research, most notably at the Georgia Political Science Association conference (GPSA) and the International Studies Association conference (ISA).

The GPSA conference is hosted annually in Savannah, making it the perfect place for Georgia Southern students to showcase their theses, and five honors students took advantage of this opportunity. Charlotte McDonald, Maria Alejandra Amiel, Carolyn Nison, Tony Hudson, and Auburn Bell each gave presentations to an audience consisting of both political science educators and students from around the world.

"The conference was incredible," said Maria Alejandra Amiel (international studies & French '17). "It's an experience I believe more undergraduate students should get.

Art and fashion have long interested Amiel, especially in how they relate to law, corporations, and human rights. Her presentation focused on the bridge between art and law, and the role that the fashion industry plays in corporate social responsibility. Motivated by Dr. Flynn, Amiel has analyzed the interaction of corporate social responsibility, international law, human rights, and activist groups.

Charlotte McDonald (international studies & German '17) presented on a comparative case study she conducted of European states. Under the mentorship of Dr. Maureen Stobb, she has been pursuing this study for some time. The presentation focused on human trafficking, which she reported is "the second largest international crime in the world," as well as potential legal changes within the European Union to address the issue.

She praises the conference for having given her the opportunity to network with possible future graduate schools, as well as being "an opportunity to present my research to a broader audience of academics," which she hopes will go on to aid her in future research and presentations.

"Helping Ourselves First: Conflict Management Strategies of Regional IOs," presented by Carolyn Nison (political science, '17) discussed the effectiveness of differing international organizations, such as the European Union. Her research focused primarily on numerous international organizations which she has studied, and their reactions and decisions pertaining to specific conflicts.

Her research focused primarily on numerous international organizations, such as the European Union. "I have always enjoyed examining the differences between the political activity and awareness of citizens in Europe compared to the United States," she said. "Also, it was interesting to me to compare the candidacy of socialist Bernie Sanders, being so new and enthusiastic during the 2016 election cycle, to perceptions of socialism in Europe, where it's the norm."

Amiel pursued her masters in International Affairs at the Bush School of Government and Public Service. She praised the conference for having given her the opportunity to present her research to a broader audience of academics, which she hopes will go on to aid her in future research and presentations.

The presentation itself focused on human trafficking, which she reported is "the second largest international crime in the world," as well as potential legal changes within the European Union to address the issue.

"Helping Ourselves First: Conflict Management Strategies of Regional IOs," presented by Carolyn Nison (political science, '17) discussed the effectiveness of differing international organizations, such as the European Union. Her research focused primarily on numerous international organizations which she has studied, and their reactions and decisions pertaining to specific conflicts.

"It was a great chance to meet people in the field and discuss my research," Nison said. "Getting to share your research in a professional atmosphere makes it feel so much more real."

Nixon, Bell, Hudson, and McDonald also took their research to the ISA conference in Baltimore, Maryland this February. Being in close proximity to Washington, D.C. was appropriate for Auburn Bell’s (political science & Spanish '17) thesis, “A Revolutionary Norm: Socialism in the United States vs. Europe,” which concerns itself with perceptions of the term “socialism” and socialist candidates, such as Bernie Sanders, in both the United States and Europe.

"I have always enjoyed examining the differences between the political activity and awareness of citizens in Europe compared to the United States," she said. "Also, it was interesting to me to compare the candidacy of socialist Bernie Sanders, being so new and enthusiastic during the 2016 election cycle, to perceptions of socialism in Europe, where it’s the norm."

Nixon also said the conference was beneficial to revising her thesis for submission. "It was a bit intimidating presenting to professionals and academics with years of graduate work and research but I was welcomed and accepted as a peer. They tore my thesis apart, but it was all for the betterment of my research."

"It was interesting to hear their current research and just see how academics in my field interact, because as students we are usually very removed from this aspect."

They tore my thesis apart, but it was all for the betterment of my research."

"It was interesting to hear their current research and just see how academics in my field interact, because as students we are usually very removed from this aspect."

Undergraduates usually do not attend these kinds of conferences, something Nixon hopes changes in the future. "Everyone in my presentation seemed surprised I was an undergrad because it isn’t common for students to attend these major conferences at this stage. Hopefully more Georgia Southern students will have opportunities to attend events like this, as it’s been extremely helpful in clarifying my career path."

"Helping Ourselves First: Conflict Management Strategies of Regional IOs," presented by Carolyn Nison (political science, '17) discussed the effectiveness of differing international organizations, such as the European Union. Her research focused primarily on numerous international organizations which she has studied, and their reactions and decisions pertaining to specific conflicts. 
The 35-year history of Honors at Georgia Southern was celebrated in April as University Honors Program and Bell Honors Program alumni, current students, and faculty and staff past and present gathered at Eidson House for an evening of storytelling, reminiscing, advice, good food, and good music.

You will see the 35 years of honors represented in our photographs from the event, and a good number of alumni sent us updates as well. Be sure to keep the program apprised of your continued good work and success. We want to hear from all of you! And look for our next alumni events in the upcoming years.

After completing her honors thesis in 2011 titled “The Voices of the Lost: How the Poetry and Prose of the Great War Reveal the Mentality of the Lost Generation,” Danielle Blalock (history and Spanish) switched gears and focused her studies on Latin America while completing her Ph.D. in history at the University of Arizona. With the aid of a Fulbright grant, Blalock has the opportunity to travel to Chile to finish her research. She will live in the country for nine months, conducting research for her dissertation, tentatively titled “Collaborative Activisms: Chilean University Student Networks and Mobilization, 1964-1990.” Her research aims to contribute to the historical understanding of universities as political spaces.

Blalock further explained the goals of her dissertation: “I examine how Chilean university activists in Santiago, Valparaíso, and Concepción mobilized during this period, questioned the status quo, and gained leadership experience through the construction and maintenance of communication networks with political parties and other social movements to foster social change.”

While in Chile, she will also work closely with Professor Oscar Aguilera of the Universidad de Chile as an affiliated researcher on a Chilean Science and Technology Development Fund funded project, “The Visual Construction of Youth in Chile: Canon Representation, Intermediality, and Sensorium from Visual Images in Newspaper and Photographic Archives (1910-1973).” Her role in the project will include cataloguing and digitizing archival materials.

To keep up with her travels, you can visit her blog at chileanista.com

**Honors Students**

- 526 Honors Students
  - (38% Men, 62% Women, 78% White, 22% Non-white)
- 468 Georgia Residents
- 19,667 Hours of Service and Leadership
- 95% Freshman Retention Rate
- 182 Faculty Teach Honors Courses and Mentor Students
- 91 Honors Courses Offered
- 48,503 Thesis Downloads

**2017 Incoming Freshman Class Projections**

- 139 New Freshmen
- 130 Georgia Residents (94%)  
  - 1280 Average SAT  
  - 28.2 Average ACT  
  - 3.84 Average GPA (Unweighted)

**Honors Freshman Retention Rates**

- 90% Fall 2006 Cohort
- 90% Fall 2007 Cohort
- 94% Fall 2008 Cohort
- 91% Fall 2009 Cohort
- 91% Fall 2010 Cohort
