It has been accepted for inclusion in Southern Educator by an authorized administrator of Digital Commons@Georgia Southern. For more information, please contact digitalcommons@georgiasouthern.edu.
The University System of Georgia was awarded $34.6 million by the National Science Foundation (NSF) to strengthen math and science programs in Georgia, through a collaborative state-wide educational reform initiative titled Partnership for Reform in Science and Mathematics (PRISM). Georgia Southern University in the East Central region has been funded at $5.5 million to lead the effort in the five counties of Bulloch, Screven, Effingham, Evans and Liberty. The five-year NSF award is the largest ever received by the Board of Regents of the University System of Georgia. The leadership for the Georgia Southern—East Central region of the PRISM project will be provided by the co-principal investigators, Daniel V. Hagan, Georgia Southern University Professor of Biology, and Penny T. Sikes, P-12 coordinator.

PRISM’s goal is to increase student achievement in science and mathematics by ensuring: 1) that all students in the participating schools are taught science and mathematics by highly qualified teachers, 2) that all students successfully complete challenging science and mathematics courses, and 3) that all students develop a deep understanding of the major concepts in science and mathematics. The partnership reflects the seamless collaboration that is essential to solve systemic problems in education that span the educational spectrum from kindergarten to high school to colleges and universities. The timing of the awarding of the PRISM grant and the rewriting of the state’s curriculum standards, provides a unique opportunity to make substantive positive changes to Georgia’s education efforts.

The College of Education Receives a “Best Practices Award”

Georgia Southern’s unique partnership with area schools has earned a “Best Practices Award,” one of eight that were awarded by the Board of Regents. This second place award in the Academic Affairs category carried a $10,000 prize. The award recognizes the Professional Development District (PDD), a groundbreaking partnership among Georgia Southern’s College of Education, the Screven County School System and Savannah River Challenge Program. The PDD expands the traditional model in which a college of education partners with an individual school to help train new teachers by giving them supervised experience in the classroom. The PDD increases the partnership to include the central office. Georgia Southern’s training programs for administrators, counselors and psychologists are also involved with the PDD.

Kiwani Support International Study

Joel Vail, coordinator of international relations for the Kiwanis Club of Statesboro, presented a check from that organization to Dean Cindi Chance and Victoria Zwald, COE coordinator of alumni, media and external relations. The funds will be used to defray the costs of students who take advantage of study abroad opportunities sponsored by the College of Education.

Georgia Southern Soccer and COE in Iraq

Major Mike Smith (B.A. ’89), U.S. Army, Operation Iraqi Freedom, sent a request to individuals asking if anyone had soccer balls that they would be willing to send to Iraq. The soldiers needed a way to break the ice with Iraqi families, and giving the children a soccer ball did just that.

The College of Education and the Georgia Southern Soccer Team pulled together and sent 100 soccer balls to Bagdad. The Georgia Southern Soccer Team donated the soccer balls, while the College of Education purchased a hand pump and contributed money for the postage.

Mike was very touched that his alma mater fulfilled his request. In the e-mail that was received from Mike, he said, “I can’t tell you how much stuff like this means to these kids. The children would gather around and take the balls and run off to play while we could continue to work with the families in need.” Mike also met with the Minister of Youth and Sports and donated some of the soccer balls to the newly emerging youth soccer teams.
How many items do you own that are increasing in value every year without exception? Very few, is the answer I would give. You, as alumni of the College of Education at Georgia Southern University, can now point to your diploma with growing pride and proclaim its increasing value. The College of Education is growing in quality while expanding its state, regional and national recognition. The Southern Educator has consistently highlighted our accomplishments. I would like to take this opportunity to remind you of only a few of them and outline ways that you as alumni can help in our efforts to continue the phenomenal growth and recognition.

Points of Pride
- Received reaccreditation of all academic programs by NCATE/PSC.
- Awarded major grants and endowments including: $500,000 U.S. Department of Education FIPSE grant to develop Professional Development District as a national model; $5.5 million NSF grant (via Board of Regents statewide grant) to improve P-16 math and science instruction, $3 million from AACTE/Microsoft to showcase best practices, and $1 million endowment from the Goizueta Foundation for an endowed professorship in school leadership as well as scholarships for Hispanic students.
- Increased our international learning experiences through the International Learning Community with student and teacher exchanges.
- Continued memberships in the National Network for Education Renewal (NNER) and in the Holmes Partnership.
- Hosted annually national conferences including the Youth At-Risk Conference and the Southeastern Conference on Cross-Cultural Issues in Counselor Education.
- Assumed a leadership role in Georgia to address teacher shortages by developing quality alternative certification routes and partnering with the Board of Regents in securing federal funds to develop certification programs with 2-year institutions.

How Can You Help?
- Encourage some of the brightest and best students you know to choose education as a career and to choose Georgia Southern University’s College of Education as their first choice for preparation for this wonderful rewarding profession.
- Keep in touch with us. We need P-12 educators to provide mentorships for our students, to speak to our classes, to collaborate with faculty and staff, etc.
- Volunteer to work with the Alumni Advisory Board on its various projects, especially as it prepares for the 2006 centennial.
- Talk with prospective students about the exciting undergraduate and graduate programs at your alma mater.

We are proud of our progress, of the increasing value of your degree from Georgia Southern University and of our many successful alumni. We look forward to hearing from you and working with you.

Information Sessions for Off-Campus Degrees
Are you interested in pursuing a graduate degree from Georgia Southern University in the Brunswick, Savannah or Dublin areas? Plan to attend an information session in your area to learn more about graduate degree offerings in early childhood, middle grades, school administration, supervision, educational leadership, and school psychology. Representatives from the graduate school, admissions office, registrar’s office, and program areas will be there. Contact the center director before the scheduled date for pre-qualifying information.

College of Education News Flash

Dianne Hickman, secretary to the dean of the College of Education, received one of the eight 2003 Staff Awards of Merit at the university’s Staff Awards of Excellence Ceremony in November 2003. Mr. Hickman has served the university since 1972.

Ada Williams, custodian II with Physical Plant, was recognized in April 2003 by the faculty and staff of the College of Education for all of the work she does daily to make the COE building a better work environment. Dean Chance proclaimed the day “Ms. Ada Day” and a breakfast reception was held where a copy of the proclamation and a gift from the college was presented to Ms. Williams.

Homecoming 2003 at Paulson Stadium initiated the start of an annual College of Education event. Dean Cindi Chance, faculty, staff, and friends of the College greeted alumni at Gate 4 as they entered the stadium. A drawing was held for a COE pewter plate and the winner was Peggy Spindel (BS ’75, M.Ed. ’85), a teacher at Claxton Elementary in Evans County. College of Education brass key chains were awarded to the following alumni: Helen Black (B.S.Ed. ’03) who teaches at Lewiston Elementary in Columbia County, Susan Lee (M.Ed. ’98) who teaches at Screven County Middle School, and Joni Tippett (B.S.Ed. ’78), who teaches at Snellville Middle School in Gwinnett County. Pictured is Helen Black registering for the COE drawing.

Staff Members Recognized

At the 2003 Staff Awards of Excellence Ceremony on November 20, 2003, the University presented awards for ten years of service to COE staff members Jackie Bedell, Instructional Resources Center, Pat Collins, Department of Teaching and Learning, and Gloria Martin, Education Advisement Center. Also, recognized among the nominees for a 2003 Award of Merit were Pauline deLaar, Education Advisement Center; Dianne Hickman, COE Dean’s Office; Wanda Mathew, Department of Teaching and Learning; and Kim Rogers, Department of Leadership, Technology and Human Development.

The College of Education’s website has been redesigned, thanks to the work of Jason Parker, graduate assistant and M.Ed. Instructional Technology student, and Mary Egger, CATES Administrative Specialist. More information is now available on the website including a link dedicated to alumni information. Visit the site at http://coe.georgiasouthern.edu/
COE Soaring Into Action

Department of Curriculum, Foundations and Reading

After only ten years of existence, the Ed.D. in Curriculum Studies has 45 graduates and a 100% placement rate. One-third of our graduates are teachers; a third are in public school administration; and the remaining third are higher education professors in colleges and universities.

Dr. Dorothy Battle—Paper presented: “What are the values of adolescents?” (with Kaneshia Robinson) at the International Conference on Civic Education Research, New Orleans, LA. (Kaneshia is an undergraduate student majoring in the area of Middle Grades Education.)

Dr. Ming Fang He—Elected: Member-at-Large to the Executive Board of the Georgia Educational Research Association (GERA) at the annual meeting in Savannah in October 2003.

Member: Research Scholars Panel, Pathways to College Network, an alliance of foundations, non-profit organizations, educational institutions, and the U.S. Departments of Education and Labor, working together to improve college access and success for large numbers of underserved youth.

Dr. Rosemarie Stallworth-Clark—President: Georgia Educational Research Association.

Dr. Cordelia Zinskie—Elected: Secretary/Treasurer of the Georgia Educational Research Association at the annual meeting in Savannah in October 2003.

Education Advisement Center

The Education Advisement Center has increased its efforts to conduct more group advisement sessions in response to undergraduate student needs. These group sessions allow for students in like majors to learn more about Teacher Education Program (TEP) requirements while preparing for classes for the next term. This approach has been well received and meets the demands of the increasing undergraduate enrollments in the COE.

A College of Education Student Ambassador Team is being formed to help in the areas of recruitment and retention. The team will consist of 4-6 undergraduate students who will attend various functions and work with different programs. This will allow prospective students to have taken advantage majors to see what college is about and what it is truly like at Georgia Southern. The team will be fully functioning in Fall 2004.

Instructional Resources Center

The Post-Secondary Readiness Enrichment Program PREP It Up!

Beginning in 1996 with a group of 7th grade students in Bulloch County, the Post-Secondary Readiness Enrichment Program (PREP) has been an academic support and outreach initiative created by the University System of Georgia in cooperation with the State Department of Education. It is designed to help students and their parents make timely, informed decisions that will adequately prepare young people to meet their higher education and career goals.

PREP is filling 2003-2004 with academic and leadership opportunities for the middle and high school students involved. After attending the PREP and 21st Century Leadership Camp, students from Bulloch, Screven, and Effingham counties have had the opportunity to attend workshops on testing strategies for the SAT, public speaking, and business and personal ethics. In November, 44 high school students attended the Leadership weekend at the Georgia Power Company’s office in Atlanta. Media and public relations executives from Turner Broadcasting and CNN led work sessions. In January, two students, Jason Soucy, South Effingham High, and Casey Reeder, Effingham County High, were selected to present at the 21st Century Leader’s luncheon with state legislators. The 38 students attending also enjoyed tours of the Capitol building, Centennial Park, and CNN center, a hockey game at the Philips’ arena, a night’s stay in Atlanta, and an adventure through the World of Coca-Cola and Underground Atlanta (see PREP photos on page 8).

In addition, while at their own schools, students have been taking advantage of the PREP tutoring team’s chemistry, algebra, and English literature tutorial sessions offered at Effingham High, Statesboro High, and Screven High. Middle school students at Langston Chapel Middle, Langston Chapel Elementary, and McIntosh County have visited Georgia Southern University to see for themselves what their future life at a university could be.

Department of Leadership, Technology and Human Development

A special program designed to serve the educational needs of practitioners in correctional institutions has been initiated by the Department of Leadership, Technology, and Human Development. Faculty from Educational Leadership and Counseling Education, working with Special Education, have created a six course (18 semester hour) Internet-based program that will provide a certificate for those who complete the course of study. This program was created especially for Associated Marine Institutes, Inc. (AMI), a Florida based company with sites in eight states, to provide education for the school leaders in their facilities. AMI students bring a variety of academic backgrounds and qualifications which provides a challenge to faculty teaching in the program. Initially, 136 students were enrolled in the program, split almost evenly between undergraduate and graduate students. Non-traditional enrollment periods were used for the first two enrollment periods (Oct 3-Jan 04 and Feb 04-Apr 04), but after those periods, AMI courses will be offered following the Georgia Southern University calendar. The first enrollment period has been successfully completed, and faculty are busy implementing changes to improve the program.

The College of Education’s newly redesigned website now includes a link to information related to the Office of Graduate Studies, Research, Sponsored Programs and Development at http://coe.georgiasouthern.edu/assocdeangradedu.html. Office of Undergraduate Teacher Education

The Office of Undergraduate Teacher Education and Accreditation recently sponsored a Professional Standards Commission/National Council for Accreditation of Teacher Education (PSC/NCATE) Steering Committee Retreat as a kickoff event to begin planning for the PSC/NCATE Continuing Review visit in Spring 2004.

The PSC/NCATE Subcommittee on Assessment, consisting of the PSC/NCATE co-chairs Dr. Stephanie Kenney and Dr. Judi Repman, Teaching and Learning Department Chair. In Spring 2004, representatives of other graduate programs, the Technology Committee chairperson, the COE data manager and the Associate Deans, is continuing the work begun by 2002-2003 COE ad hoc Assessment Committee.

Plans are being finalized for our data management and assessment system (yet to be officially named). The design and building of our system will follow a gradual rollout process. This process will be guided by TK20, the organization with whom we have contracted to build our system. Currently the Advisement Center staff is designing its student data management templates. Under the guidance of the Subcommittee on Assessment, other programs will soon begin planning and designing their program assessment templates using the Program Assessment matrices they have been developing as a guide. Faculty and staff will soon receive notification of Spring 2004 and Fall 2004 system use training sessions.

For further information about any of these activities, please contact Stephanie Kenney at kenneystephanie@georgiasouthern.edu or Judi Repman at repmanj@georgiasouthern.edu.

College of Education and First District RESA Co-Sponsor the JASON Project

A collaborative effort between two educational entities gave area students opportunities to explore real life applications of science. Working together, First District RESA and Georgia Southern University’s College of Education once again brought the JASON Project to approximately 400 students from surrounding school systems. Sponsored by a Georgia Southern University Service Grant received by the College of Education, pupils from Bulloch, Bryan, Glynn, McIntosh, and Wayne county schools visited the Georgia Southern campus between January 27 and February 4, 2004. Through a live satellite downlink, area middle grade students joined JASON Project scientists and the “real-time” exploits of peers gathering data in the tropical rainforests of Panama. In addition to the telecast, students took a tour of the Georgia Southern campus and enjoyed educational activities hosted by the Planetarium, Botanical Gardens, Museum, and Wildlife Education Center.

The JASON Project was created by Dr. Robert Ballard, an oceanographer renowned for his exploration of the Titanic. In its fifteenth year of operation, students from all over the world gain first hand experience working with some of the most famous scientists and leading experts on culture, geography, and the environment. Ballard began the JASON Project out of his desire to steer students toward careers in science. Through the use of the Internet, Ballard and his associates enable students to work directly with scientists in the field. The JASON Project strives to provide proof that science is both exciting and beneficial to the world, by taking upper-elementary and middle grade students to exotic locations such as barrier reefs, rainforest, and the frozen tundra.

First District RESA (working in concert with the National Science Center) supplied teachers from surrounding counties with curriculum, online resources, and training. Working with educators as early as August 2003, RESA held classes that explained how to use project materials and related technological tools such as GPS satellite programs, handheld data probes, and Internet based resources. After their initial training, teachers returned to the classroom and inspired students to participate in chat sessions with JASON experts and supervised the gathering of data for comparison with information being discovered in Panama. The trip to Georgia Southern was the culminating experience, which provided direct interaction with scientists via the satellite downlink. The state-of-the-art technology in the Nessmith-Lane Continuing Education Building allowed the students and teachers to see, hear and question the JASON Project scientists in Panama without ever leaving southeast Georgia.

While at Georgia Southern University, middle grade students participated in hands-on science activities which applied the JASON Project’s theme of bio-diversity to the local environment. Whether dissecting carnivorous plants, studying the paleontology of the coastal plain, looking at the stars, or learning about raptors’ role in the ecosystem, students were actively engaged in understanding the nature of science. In addition, Georgia Southern students involved in the PREP program guided the various groups around campus and provided insight into the college experience.

P-16 Partnership for Teaching/Learning Renewal

In the Fall of 2003, the Fund for the Improvement of Postsecondary Education (FIPSE) awarded the College of Education a three-year, half million dollar grant to support the work of developing the Professional Development District (PDD) with Screven County, named “P-16 Partnership for Teaching/Learning Renewal.” The focus of the work is to address (a) the significant gap in the academic performance between minority and non-minority students and between low SES (socioeconomic status) students and their more advantaged peers; and (b) the need for COE candidates (inclusive of all educator preparation) to possess the knowledge, skills and dispositions that will enable them to teach (and work with) all children and to understand how ‘the system’ is failing some youth. The PDD model that is developed— as well as the teaching and learning practices, education intervention models, and other activities that result from this work—will be shared with all COE partnerships under the direction of the Director of Field Experiences and Partnerships with the intent that all partnerships will benefit and continue to develop their work. If you would like more information about this work, please contact Stephanie Kenney at skkenney@georgiasouthern.edu or Amy Heaston at aheaston@georgiasouthern.edu.

Guidelines for Happy Teachers

After eighteen years of teaching, one might say I’ve “been around the block” a few times. Teaching was not my dream career when I was a child; it wasn’t even my dream career my first two years of college. I chose teaching because, at the time, it was a “practical” career choice for me. Now, after eighteen years, I still become excited at the prospect of teaching something/someone new. I love teaching, and I like to believe that I didn’t choose it; it chose me. While I haven’t discovered some secret formula to becoming a happy teacher, I have discovered a few guidelines for our profession:

SMILE—Every teacher has heard, “Don’t smile until Christmas,” during your first year. Unfortunately, many keep that disposition forever in an effort to appear “stern” and “tough” so the students will not think they are pushovers. Hey! It’s OK to show the students that you are content, well adjusted, and happy with your life. I know it has been a secret for quite a while, but teachers are human too.

QUIT GRIPING—We all know those teachers. These are the ones you avoid in the hallways for fear that you may hear the latest gripes about students, programs, and/or life in general. You know to NEVER ask these teachers the question, “How are you today?” The “gripers” are the reason most of us avoid the teachers’ lounge. Don’t let yourself become one of the dreaded “gripers.” Go back to the advice in number one above and if you can only find things to grip about in the profession, get out.

CARE ABOUT YOUR STUDENTS—Unfortunately, there are teachers who don’t seem to like children very much. They appear rude, bitter, and snarl when students pass them in the hallway, while desperately trying to catch a student doing something—anything—wrong. Teachers who don’t like children are, and will continue to be, a mystery. Remember that if you are going into or are in this profession, you must work with young people every day. Therefore, enjoy them. Listen to what they have to say. You will be surprised at how much you learn from them. Wonder at their naivety, and marvel at their youth. What you see before you every day in the classroom is our future. Try to help them become what we will all need.

HAVE FUN—Above all else, have fun. If you can’t get up in the mornings and look forward to work, reevaluate what is happening. There will always be days, and sometimes weeks, when things go badly, but these shouldn’t last forever. Enjoy this profession. I happen to believe that it is one of the greatest.

Melissa Akins, Ed.D., Clinical Associate and Demonstration Teacher
Effingham County High School

An Educator’s Perspective

Have you ever noticed a teacher who you knew (a) seemed to like children very much; (b) would do anything to help students succeed; (c) was never seen without a smile? Teachers like these may be labeled “sunny.” Unfortunately, there are teachers who don’t seem to like children very much. They appear rude, bitter, and snarl when students pass them in the hallway, while desperately trying to catch a student doing something—anything—wrong. Teachers who don’t like children are, and will continue to be, a mystery. Remember that if you are going into or are in this profession, you must work with young people every day. Therefore, enjoy them. Listen to what they have to say. You will be surprised at how much you learn from them. Wonder at their naivety, and marvel at their youth. What you see before you every day in the classroom is our future. Try to help them become what we will all need.

Melissa Akins, Ed.D., Clinical Associate and Demonstration Teacher
Effingham County High School
Mrs. Miller’s class collaborated with Dr. Mary Ann Nelson’s and Mrs. Victoria Zwald’s Introduction to Special Education class from Georgia Southern in December to support a local family with gifts during the holiday. Her tireless efforts on behalf of children at her school and in the community were recognized as she was named Teacher of the Year for 2003 at Julia P. Bryant Elementary School. She has also recently been nominated for the national Disney Teacher of the Year.

On behalf of the College of Education, we salute the career of Debra Miller and are proud to recognize her as an alumna of Georgia Southern University!
Southern Educator Class Roll

1953
Dr. Robert C. Pickens (B.S.Ed.) and Betty (Brannen) Pickens (B.S.Ed.) reside in Palm Springs, Florida. Robert taught in Alabama in 1954 after a long career as a teacher, administrator, county office evaluator (Palm Beach County, and SACD Director, Betty retired in 1994 too after a career of teaching, homemaking and being a stay-at-home mother. The couple has 4 children and 10 grandchildren.

1957
Jennings Williamson (Science) taught full time and coached girls’ basketball for 39 years. He retired in 1968 after several years in the ASE Office.

1958
William R. Wells “Bill” (B.S.Ed. Industrial Arts) is married to Ginny Griffin from Douglas, Georgia. They have two children (Craig, a teacher and Suzanne, a homemaker, wife and mother) and two grandchildren. He published a book, Fifty Years of Postcards. He and Ginny are members of St. Anne’s Episcopal Church, APIC, DSC Club and Mid-Georgia Miata Club, and they travel a lot.

1963
Norris Kemp Mabry (M.Ed. Counselor Education) is a Georgia Southern University Professor Emeritus, taught in the School (now College) of Education for 22 years. He retired in 1988. He is active in community service, was named Kappa Delta Pi’s Living Treasure, and received the Governor’s Award in Humanities in 2001. He received community service awards from the Georgia Retired Educators Association and the Daughters of the American Revolution. Kemp was named one of four Honorary Altamaha River Pilots for service to Georgia Southern’s Project R.A.F.T. He also received the Oenon Day Smith Service to Mankind Award and Lifetime Achievement Award. In 2002 he was named Statesboro Citizen of the Year and Marietta High School’s Distinguished Alumni. He and ordained deacon of Bethel Baptist Church and writes a weekly human interest column for the Statesboro Herald.

1967
James A. Gooldby (B.S.Ed. Business ’53, M.Ed. ’67) taught for 27 years and held administrative/supervisory positions for 18 years in Lowndes County School System, Valdosta, Georgia. He retired to the family farm to work on a small restoration project of longleaf yellow pine and forest restoration for all wildlife.

1970
Susan L. Powell Arnold (B.S.Ed. Elementary Education) lives in Huntsville, Alabama, with her husband, Steve [’70]. The couple met at Georgia Southern and married in 1969. They have three children and three grandchildren, Susan teaches first grade in the Madison City School System. She received her M.Ed. in Elementary Education from UNA in 2000. She is the head of the SACD committee, on the leadership team, and a grade level chairman at her school.

1971
Emma Gayl Skys (B.S.Ed.) is retiring after 34 years of teaching in metro Atlanta. She has two sons, Jon [’98] and Ted [’99].

1985
Lynda Mathis Yawn (B.S.Ed., M.Ed. Middle Grades) taught 5th & 6th grades for five years and she worked in middle school administration for five years. From 1997-1999 she worked in kindergarten planning at Ogeechee Technical College. Presently she is Vice President of Student Services at Ogeechee Technical College.

1992
Christopher L. Sumner (Ed.S., School Psychology) is currently a school psychologist with C-F RESA and serves four school systems, R-YDCC and Camp E-Tu-Nake Therapeutic Camp. He and his wife, Sheila, a math teacher, with gifted certification at Blakely Middle School in Early County have three children, Christopher, Catherine and Chandler.

1993
Zolle Annora Allen Williams (B.S.Ed. Science) is in her 10th year of teaching chemistry at Fayette County High School. She and her husband, Ric [’91], live in Hampton with their three children, Tristan [4], Rachel [4], and Logan [2].

1994
Syfelle Denise Roberts Rivers (B.S.Ed. Special Education) resides in Lithuania with her husband, a diplomat, and two special children for kindergarten seven years in Cobb County and earned an EdS. in Special education. She is now teaching in DeKalb County and working on her Ed.D. in Curriculum and Instruction.

1994
Wendi Adkins Varvel (B.S.Ed.) is a full-time graduate student after teaching for eight years. She is attending Old Dominion University in Norfolk, Virginia, and pursuing a M.Ed. with an emphasis in Speech-Language Pathology. She serves as the chapter representative of the National Student Speech Language Pathology Association. She also volunteers at Children’s Hospital of the King’s Daughter and her husband, Wendi, have two children, Alex and Jude. Todd is an officer in the United States Navy.

1996
Hollie Neil Heath Beale (B.S.Ed. English ’95, M.Ed. English ’96) is a high school English teacher at West Laurens High School in Dublin, Georgia. She completed requirements for a reading endorsement and served as director Southern this past summer. She is married and has a three year old daughter, Anna Claire.

2001
Christine E. Callo McLaughlin (B.S.Ed. Math) taught high school math for two years. She married Lt. Michael McLaughlin in February 2003 and they reside in Waegon, Korea at Camp Carroll, U.S. Army.

2002
Patty V. Cox (B.S.Ed. Middle Grades) is teaching at Wrens Middle School in Jefferson County. She is completing her M.Ed. in Middle Grades and can not wait to work on higher degree.

Richard H. Horah (M.Ed. Instructional Technology) joined the Lane Library faculty at Armstrong Atlantic State University in December 2000 as a library media specialist. He received a promotion in July 2003 to Instructional Technology/Assistant Professor.

Diane McNeely (M.Ed. Counselor Education) ’92, EdS. Administration/Supervision is the assistant principal at Jenkins County High School. She received her Ed.S. from the University of Saranac in 2002. She will complete her Ed.D. in Administration/Supervision in May 2004 from Argosy University in Sarasota, Florida.

Shameka Cha’net Milton (B.S.Ed. Early Childhood) is currently teaching first grade in Jacksonville, Florida. She is also working on her master’s in Educational Leadership at the University of North Florida and should graduate in December 2004. She is coaching middle school basketball and JV basketball at The Bolles School. Shameka plans to relocate to the Atlanta area sometime in 2005.

2003
Leah K. Baker (B.S.Ed. Business) is working at Lithia Springs High School teaching computer applications and marketing principles to students in 9th-12th grades. She is also assisting with the FBLA and DECA clubs.

2004
Amanda L. Thomas (B.S.Ed. English) is teaching high school English and sponsors the BETA Club in Valdosta, Georgia. She resides in Vidalia, Georgia where she also works at the Sylvan Learning Center teaching reading, writing and study skills. She is planning a move to the Gwinnett area in June 2004.
DESTINATION
TEACHING: Customized
Pathways to Get You There

The Destination Teaching program is a federally funded Teacher Preparation Recruitment Initiative. The mandate of this program is to develop creative methods of training individuals to meet the standards for highly qualified teachers and to meet the teacher shortages in critical areas. The Destination Teaching program at Georgia Southern University includes two cohorts: Paraprofessional Track to Teaching and Career Path Changers.

The first cohort, Paraprofessional Track to Teaching, is comprised of individuals currently working as paraprofessionals in special education classrooms and who have expressed a desire to become special education teachers. This is a good target group due to their existing commitment to the community in which they are currently serving. Special Education is a high-needs field, and these persons already have knowledge and experience of what is required in the special education classroom. Georgia Southern University is partnered with East Georgia College where these paraprofessionals will earn their Associate in Arts in Special Education degree. They will continue their teacher education at Georgia Southern University where they will earn their Bachelor of Science in Special Education degree. The challenge of the Destination Teaching program is to design a program of study that will meet the high standards of teacher preparation while providing a course structure that will meet the needs of these working paraprofessionals. Courses will be delivered via distance learning, on-line, by weekend college and in evenings.

The second Destination Teaching cohort, Career Path Changers, is comprised of individuals entering teacher education from non-education degrees or careers. These individuals already hold at least a four-year degree. The design of this program meets the PSC-approved Georgia Teacher Alternative Preparation Program. These participants begin their course work in the summer with four rigorous courses to prepare them to begin teaching in a classroom in the fall. The teacher education training continues while they are in their first two years as interns teachers. Upon successful completion of the two-year program, these participants are then eligible for clear renewable certification. Again, the delivery of courses is designed to meet the needs of these in-classroom participants. Courses are offered on-line, via weekend college and in evenings. While students are not required to complete a master’s degree, many will be able to do so during their two-year internship.

We are pleased to offer these programs which allow entry to the teaching profession while upholding the academically challenging standards by which the College of Education is known. Susan Cason, Career Counselor/Project Coordinator, can be contacted at (912) 486-7841.

A Glimpse of the Future

Approximately 300 high school students visited the College of Education on November 12 as part of A Day on Campus with Teachers of Tomorrow.

College of Education Board of Advisors Fall Meeting

The COE Board of Advisors met on November 12, 2003.

Back row (l to r): David Wood, Microsoft Senior Manager; Al Burke, Bulloch County School Board Chair; Charles Bonds, College of Education Professor Emeritus; Ken Bader, Executive Vice President of Western Natural Gas Company of Jacksonville; Paul Scott, President of Altamaha Technical College; Middle row (l to r): H.F. Johnson, Appling County Schools Superintendent; Kay Brown, Board of Advisors Chair; Marie Hooks, Principal, Saxon Heights Elementary; Linda Lewis, Executive Director of First District RESA; Robert Winter, Superintendent, Glynn County Schools; Front row (l to r): June Bradford, Executive Director of Heart of Georgia RESA; Mary Sue Smith, coordinator of the Boys and Girls Club After School Tutoring Program; Sheila Hoynes, retired teacher and past Georgia Southern Alumni Association President; and Martha Bacon, Statesboro business person.

PROFESSORS WHO HAVE MADE A DIFFERENCE

In the fall issue of Southern Educator, the editors requested alumni to send in remembrances of faculty who had made a difference and influenced their development as a teacher. One submission praised several former faculty—Dr. Tully S. Pennington, science; Dr. William B. Moye, math; Dr. W. S. Hanner, science; Ms. Frieda Germain, art education; Henry L. Ashmore, education; Dr. Zach Henderson; and Dr. Paul Carroll. Also noted was Ms. Sophia Johnson, dean of men during the Georgia Teacher College years, who was a “mother to many” and gave “guidance and encouragement to all.”

When you posed the question about a teacher at GSU who made a difference in my development as a teacher in a recent edition of Southern Educator, I immediately thought of the impact that Dr. Ronnie Sheppard had on me. Our association began many years prior to GSU when I had the privilege of receiving my preservice training in middle grades language arts under his careful guidance and later as a graduate student at GSU. My love of adolescent literature and writing began in his classes. Every time I explore a new novel or writing assignment with my students, I always remember Dr. Sheppard’s instruction. Early on, I learned the importance of making personal connections to reading and writing for my students and using graphic organizers to assist in accomplishing these goals. Techniques and strategies that I learned from him many years earlier are now being hailed as “best practices” throughout the nation! Even years ago, Dr. Sheppard was embracing these “practices” in his instruction and making lasting impressions on many fledgling educators, including me! His influence has always encouraged me to seek excellence and reach for higher levels in my professional career. Thanks, Dr. Sheppard, for making an impact in my life! — Jerry Snyder, Ed.D.

Please continue to share with us those who made a difference and how they made a difference to you. Contributions can be a maximum of 300 words in length and e-mailed to dscolson@georgiasouthern.edu.
Partnering with the UK

Two groups of educators from the United Kingdom visited the College of Education, Georgia Southern University, and the surrounding area from October 26 through November 4. The group from Derby investigated raising standards in rural schools, specifically in the area of literacy. The Oxford group looked at inclusion. Public schools involved in some aspect of the visit included: Brooklet Elementary, Julia P. Bryant Elementary, Langston Chapel Elementary, Langston Chapel Middle, Mattie Lively Elementary, Mill Creek Elementary, Nevils Elementary, Portal Elementary, Sallie Zetterower Elementary, Southeast Bulloch High, Southeast Bulloch Middle, and Statesboro High School. Great connections were made between the UK and US teachers.

United Kingdom-Georgia Southern Student Teacher Exchanges. In Fall 2003, President Grube welcomed three student teachers from the University of Derby, United Kingdom, to the Georgia Southern campus. This semester, two Georgia Southern middle grades student teachers will spend four weeks of their student teaching experience in the United Kingdom. Dana Lewis and Jessica Warnock will be based in London for their experience. Pictured with President Grube are (l-r) UK student teachers, Helen Smith, Heather Bostock, and Emma Cooper.

Faculty/Staff
Retirements

Dr. Jackie Bedell retired at the end of January 2004 after ten years as Instructional Services Coordinator for the College of Education’s Instructional Resources Center (IRC). During her tenure, Dr. Bedell was instrumental in expanding the center’s resources to include both PC and MAC computer labs and a multi-media classroom.

Dr. Synnove Heggy retired September 1, 2003. She served as a Professor of Exceptional Children in the Department of Leadership, Technology, and Human Development, and as Director of the Regents’ Center for Learning Disabilities.

Dr. Fred Page plans to retire at the end of spring semester 2004. He currently teaches in the educational leadership program and holds the rank of Professor in the Department of Educational Leadership, Technology, and Human Development. Dr. Page joined the university in 1973 and has served in various capacities in the College of Education including Director of Student Teaching and also Associate Dean for External Relations.

Dr. Jim Stephens retired at the end of Fall 2003 having served the university since 1994. Dr. Stephens, Associate Professor in the Department of Teaching and Learning (formerly named the Department of Middle Grades and Secondary Education), taught in the middle grades education program.
