ABSTRACT

Two nationwide Internet studies investigated the novel concepts of comfort foods and comfort brands. After examining qualitative and quantitative measures, results showed that consumers were desirous of an important and expansive notion of brand comfort, defined here as: (1) the alleviation of physical and emotional stresses through brand consumption; combined with (2) the emergence of positive emotions of warmth, happiness, and love derived from brand associations often initiated by nostalgic memories of a romanticized past. Brand comfort stems from issues of physical comfort (i.e., how a certain brand fits, feels, smells, and tastes), combined with both cognitive components (driven by rational trust judgments of quality and reliability) and emotional components (driven by perceptions of affective trust, authenticity, nostalgia, and brand love). Recognizing that brand comfort is a concept that extends far beyond food choices, this research may lead to a wealth of new investigations in consumer psychology and marketing.

ABOUT THE AUTHORS

K. Damon Aiken (Ph.D. University of Oregon), Professor of Marketing at California State University, Chico. His research interests include Old School fan values, compulsive consumption, and geographic branding. His most recent research has been published in the *Journal of Business Research*, the *Journal of Product and Brand Management*, and *Sport Marketing Quarterly*.

Ajay Sukhdial (Ph.D. University of Oregon), Associate Professor of Marketing in the Spears School of Business at Oklahoma State University. His research interests include the role of values and emotions in consumer behavior. His research has been published in the *Journal of Advertising*, *Journal of Advertising Research*, *Journal of Public Policy and Marketing*, *Marketing Letters*, and *Sports Marketing Quarterly* among others.

Matthew Meuter (Ph.D. Arizona State University), Professor of Marketing at California State University, Chico. His research interests focus on the intersection of services and technology, specifically on consumer use and adoption of technology, strategic implications of

technology integration into the service environment, and the role of social media. He has published in the *Journal of Marketing*, *Journal of Applied Psychology*, *Journal of Service Research* and others.
