This presentation is brought to you for free and open access by the University Libraries Faculty Research and Publications at Georgia Southern Commons. It has been accepted for inclusion in Library Faculty Presentations by an authorized administrator of Georgia Southern Commons. For more information, please contact digitalcommons@georgiasouthern.edu.

**GEORGIA
SOUTHERN
UNIVERSITY**

Georgia's large-scale, small-feel research university

A Fruitful Collaboration: Offering More than Faculty Profiles

***Debra Skinner**, Interim Department Head & Coordinator of Cataloging
and Metadata*

***Ashley D. Lowery**, Digital Collections Specialist*

Background

Institutional Repository at Georgia Southern began in 2009 with locally hosted Eagle Scholar

- Dspace platform
- Part of 3 year grant with Georgia Tech
- Grant combined local institutional repositories into statewide GKR – GALILEO Knowledge Repository
- Grant was for 3 years, extended to 4
- Not sustainable after the grant
- Little faculty support other than ETD archiving

A Service with No Market?

- Time to reflect on purpose of Repository
 - Single focus was to archive content
- What faculty wanted
 - Place to create personal, professional website with links to download articles or links to access articles
 - Everything included whether full text is open access or not – the complete CV
 - Other things such as grants, honors and awards
 - And ... other services never before considered

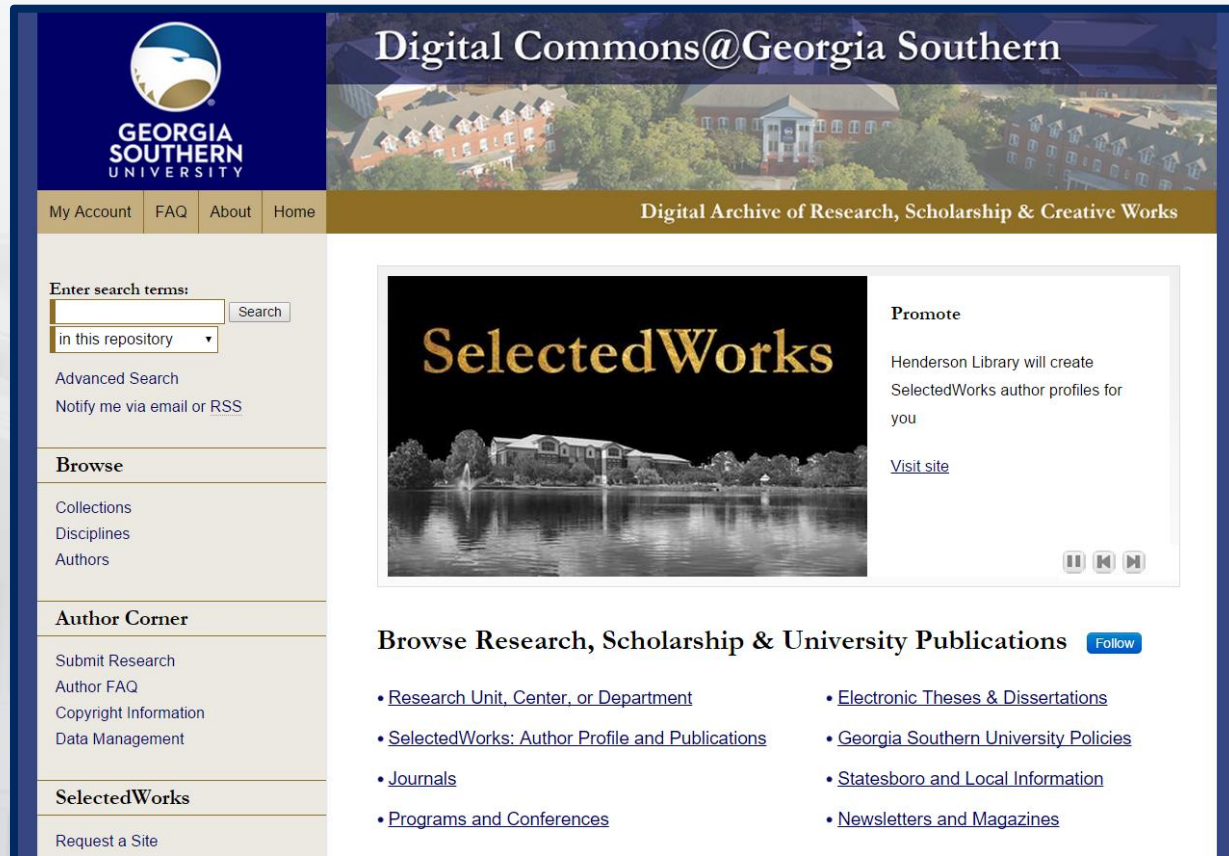

Future of the Repository

Suite of Services

- Archiving institutional, research, creative output of faculty & *students*
- Publishing – journals, conference presentations, textbooks, dissertations
- Showcasing faculty publications
- Disseminating university research
- Archiving research data & media of all types
- Technical Support

Just in Time?

Fall 2013: Zach S. Henderson Library launches institutional repository, Digital Commons@Georgia Southern

The screenshot shows the homepage of Digital Commons@Georgia Southern. The header features the university logo and the title "Digital Commons@Georgia Southern" above a banner image of campus buildings. A navigation bar includes "My Account", "FAQ", "About", and "Home". Below this is a search section with a text input field, a "Search" button, and a dropdown menu set to "in this repository". There are links for "Advanced Search" and "Notify me via email or RSS".

The main content area is titled "Digital Archive of Research, Scholarship & Creative Works". It features a "SelectedWorks" section with a video player showing a building at night. To the right of the video is a "Promote" section with the text: "Henderson Library will create SelectedWorks author profiles for you" and a "Visit site" link.

Below the video is a "Browse Research, Scholarship & University Publications" section with a "Follow" button. It contains two columns of links:

- [Research Unit, Center, or Department](#)
- [SelectedWorks: Author Profile and Publications](#)
- [Journals](#)
- [Programs and Conferences](#)
- [Electronic Theses & Dissertations](#)
- [Georgia Southern University Policies](#)
- [Statesboro and Local Information](#)
- [Newsletters and Magazines](#)

The left sidebar contains a "Browse" section with links for "Collections", "Disciplines", and "Authors". Below that is an "Author Corner" section with links for "Submit Research", "Author FAQ", "Copyright Information", and "Data Management". At the bottom of the sidebar is a "SelectedWorks" section with a "Request a Site" link.

Digital Commons

- Open access digital collection or repository
- Collect & disseminate intellectual & creative works
 - Theses/dissertations
 - Research
 - Journal articles & Faculty bookshelf
 - Magazines & newsletters
 - Video Recordings
 - Textbooks
 - Conference presentations & proceedings
- Publishing platform
- Journals
- Conference management
- Selected Works

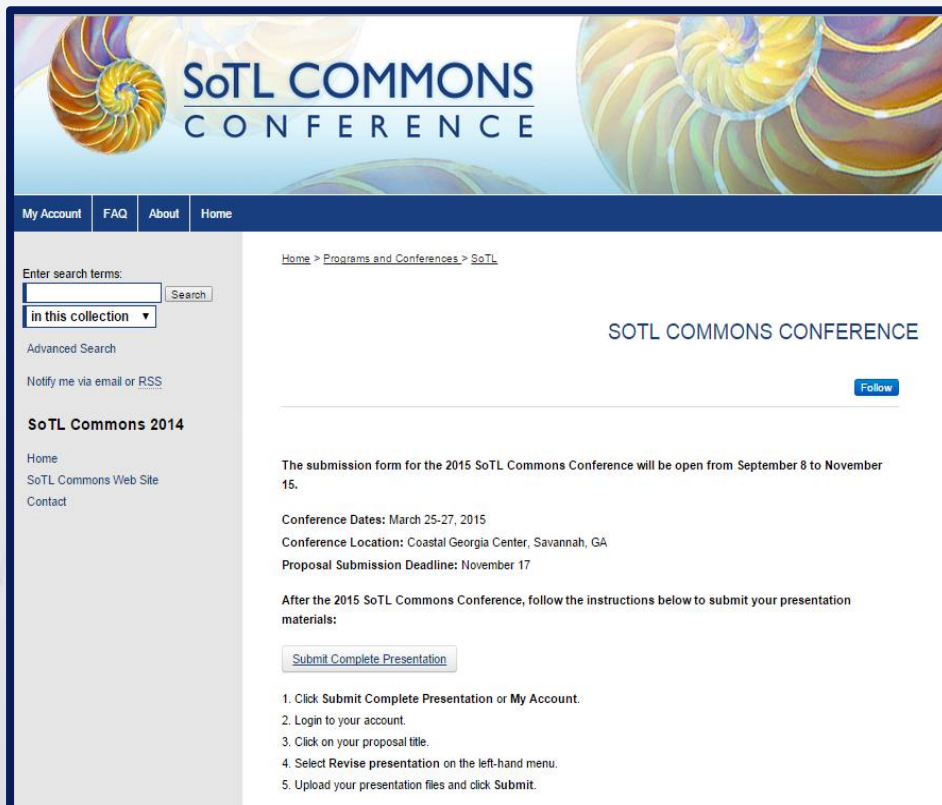

Repository

- Library Roles
 - Promote the services
 - Seek content
 - Provide training
 - Upload resources or create structures for self archiving
 - Field copyright questions
 - Develop campus partnerships

Digital Commons

- Journals
- Conferences

- Faculty & Student Work
- Data Management

SoTL COMMONS CONFERENCE

SoTL COMMONS CONFERENCE

The submission form for the 2015 SoTL Commons Conference will be open from September 8 to November 15.

Conference Dates: March 25-27, 2015
 Conference Location: Coastal Georgia Center, Savannah, GA
 Proposal Submission Deadline: November 17

After the 2015 SoTL Commons Conference, follow the instructions below to submit your presentation materials:

[Submit Complete Presentation](#)

1. Click [Submit Complete Presentation](#) or [My Account](#).
2. Login to your account.
3. Click on your proposal title.
4. Select [Revise presentation](#) on the left-hand menu.
5. Upload your presentation files and click [Submit](#).

HEALTH POLICY AND MANAGEMENT FACULTY RESEARCH AND PUBLICATIONS

The following citations represent the peer-reviewed works published by the department's faculty during their employment with Georgia Southern. For the full list of a faculty member's publications and presentations, visit his or her [SelectedWorks site](#).

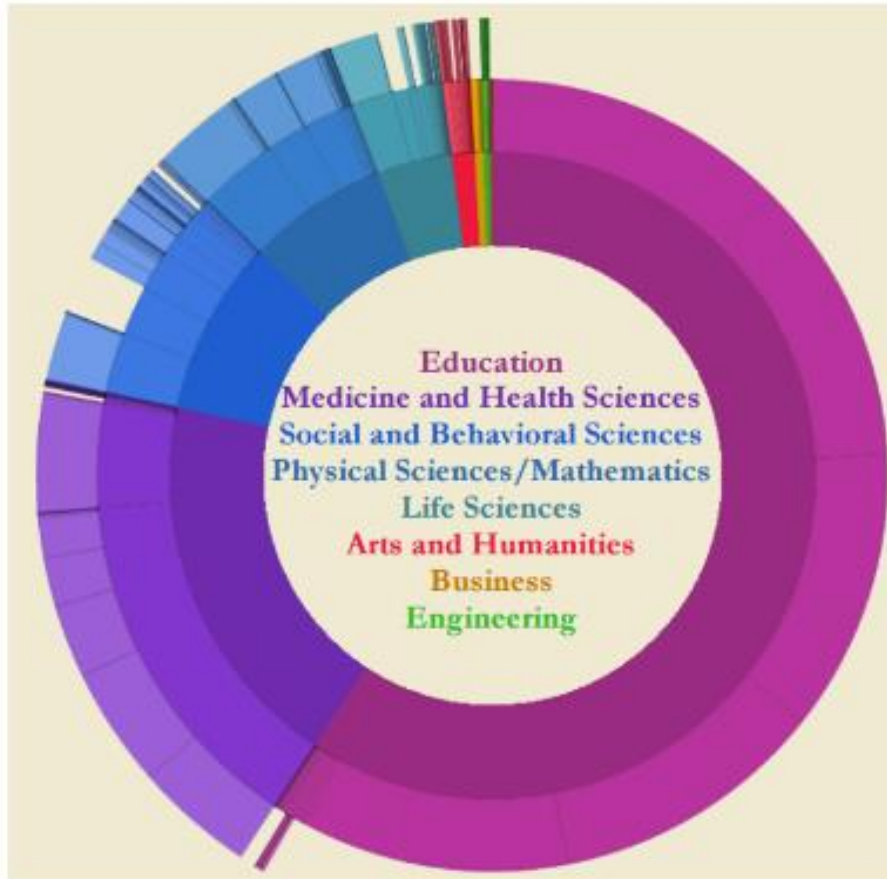

Only faculty with Selectedworks pages are included in this list. If you are a Georgia Southern faculty member, please review the [SelectedWorks handout](#) for instructions on how to create your site. You have the option to create it yourself or have the library staff create one for you.

Clinical Trial Methodology

Karl E. Peace, Georgia Southern University and Ding-Geng Chen, Georgia Southern University

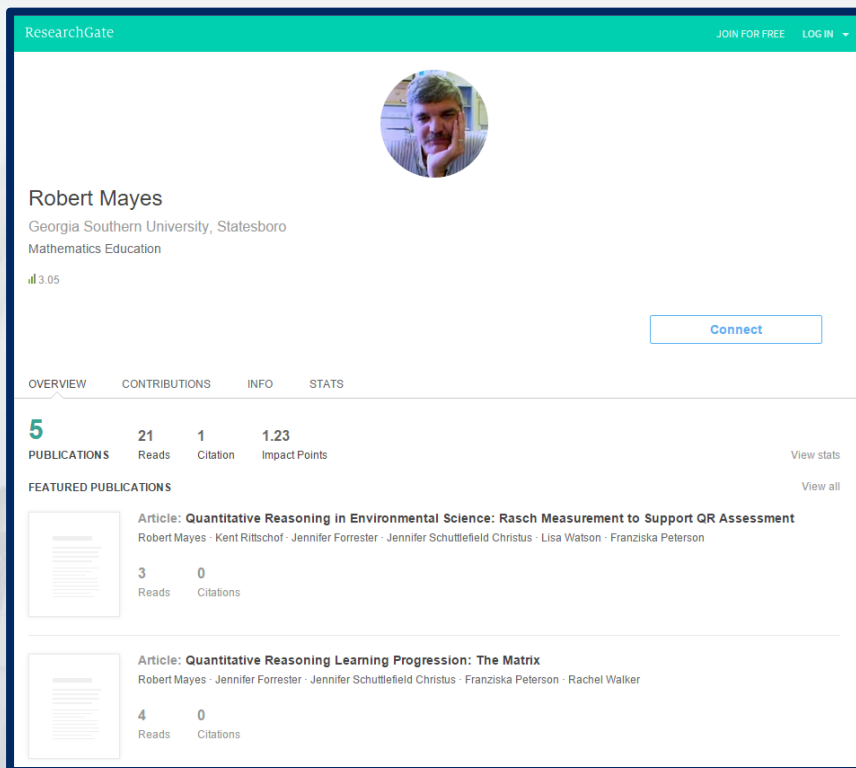

2010

Georgia Southern University faculty members Karl E. Peace and Ding-Geng Chen co-authored *Clinical Trial Methodology*.

Book Summary: Now viewed as its own scientific discipline, clinical trial methodology encompasses the methods required for the protection of participants in a clinical trial and the methods necessary to provide a valid inference about the objective of the trial. Drawing from the authors' courses on the subject as well as the first author's more than 30 years working in the pharmaceutical industry, **Clinical Trial Methodology** emphasizes the importance of statistical thinking in clinical research and presents the methodology as a key component of clinical ... Author Home Browse Subjects Browse Article Types Series Home

Robert Mayes received his B.S. (1976) and M.S. (1981) in Mathematics with a secondary education focus from Emporia State University and his Ph.D. in Mathematics Education from Kansas State University (1989). He has taught mathematics on the high school, community college, and university levels. His first professorship was at West Virginia University (1989-93) where he specialized in satellite television professional development courses for secondary mathematics teachers. From 1993-2001 he assisted in developing and implementing an innovative Mathematics Education Ph.D. offered through the Mathematics Department at the University of Northern Colorado. While at UNC he was a Co-PI on COSMOS, a mathematics and science upward bound program and served as the Director of the Mathematics and Science Teaching Center (MAST).

In 2001 he returned to the WVU Mathematics Department to direct the Institute for Mathematics Learning (IML), whose mission is to improve the teaching and learning of mathematics in lower level undergraduate courses. He served as the coordinator and curriculum development leader for a technology enhanced applied algebra course, writing a text for the course called ACT in Algebra. He was a Co-PI on the NSF Center for Learning and Teaching ACCLAIM program and was the steward for the second doctoral cohort. He also served as the Vice-President for College on the West Virginia Council of Teachers of Mathematics Executive Committee.

In the summer of 2008 he joined the University of Wyoming assuming the directorship of the Science and Mathematics Teaching Center (SMTC). The mission of the SMTC is to improve the learning and teaching of science and mathematics in Wyoming and the Rocky Mountain region. In this capacity he secured partnerships in multiple grants to support STEM education, including two National Science Foundation projects: Pathways to Ecological Literacy and Mathematics Teacher Leadership Center.

As of August 2011 Robert Mayes has joined Georgia Southern University as a Research Professor in the College of Education. His research focus is on the teaching and learning of problem solving, mathematical modeling, and quantitative reasoning in the sciences and social sciences. He currently is serving as the first director of the new Institute for Interdisciplinary STEM Education. In this capacity he has secured two grants supporting interdisciplinary STEM projects in collaboration with seven school districts and 13 research institutes across the Georgia coastal plain.

SelectedWorks

SelectedWorks profiles compile your information and scholarship in one place with options to upload materials or link to other sites that contain your work.

You have two options for creating a site:

Request to have a site created for you.

Email your CV, photo, and expertise keywords to Ashley Lowery. When the staff creates your site, they conduct copyright research on your articles to determine what full-text can be uploaded.

Create the site yourself.

Go to works.bepress.com. Click on the green Start button and follow the instructions. You must have copyright or permission for any content you upload. Add keywords in the Expertise section to be included in the Expertise Search.

Plum Analytics and Expertise Search, both sponsored by the Office of Research and Economic Development, harvest their information from SelectedWorks sites. To be included in these features, you must have a SelectedWorks page.

Plum Analytics: Discover the altmetrics for your publications and select presentations.
plu.mx/georgiasouthern

Expertise Search: Visitors to the Georgia Southern's website will be able to find your SelectedWorks profile based on your areas of expertise.

Current Marketing

- Sessions with faculty
- Events for Open Access Week
- Emails to new faculty
- Demos with coffee/snacks
- PlumX reports

PROMOTE.

SelectedWorks profiles compile your works in one place with options to upload materials or link to sites that contain your work. These profiles are ideal for promoting your work due to SelectedWorks high visibility in search engines.

Interested in Promoting Your Works and Measuring Your Impact?

Request the Henderson Library to create your SelectedWorks and PlumX profiles by clicking on this flyer.

All you need is your CV and Expertise Keywords!

PlumX profiles measure the impact of your works by compiling the following metrics: usage, captures, social media, mentions and citations. It is a stress-free way to exemplify your outreach during hectic times such as tenure review.

MEASURE.

Faculty Feedback

Positive

- Pleased with library staffs' effort & dedication
- Different systems appeal to different faculty

Negative

- Creates confusion about integration and branding

Conclusion

Our efforts represent a shift in research and scholarship: open access, online promotion of faculty, altmetrics, etc.
