This newsletter is brought to you for free and open access by the Faculty Research Project on the AERA-SIG on Critical Issues & Cultural Studies (Jupp & Schubert) at Digital Commons@Georgia Southern. It has been accepted for inclusion in SIG Newsletters (1970-1995) by an authorized administrator of Digital Commons@Georgia Southern. For more information, please contact digitalcommons@georgiasouthern.edu.
As you can see, the editor has taken the liberty of changing the format of the newsletter, hopefully, to give it a more professional appearance. Your comments would be appreciated. Further, it has been requested that the SIG acknowledge the services provided by Owens College, at no cost, for typing, reproducing, and mailing the newsletter during the last year. Still, the main improvement needed is contribution of information, papers, or what-have-you by a wider range of the membership. Longer papers, studies, or bibliographies may be distributed by the SIG as special mailings. Please contact your editor (Michael P. Roetter, Owens Technical College, Caller No. 10,000, Toledo, OH 43699).

CALL FOR PAPERS - 1981 AERA Annual Meeting (Los Angeles)

Those attending SIG sponsored or jointly sponsored sessions in Boston, no doubt, found them most meaningful and informative. Division B was very satisfied with the SIG cooperation. It is suggested we continue such joint sponsorships as well as regular SIG sponsored sessions. Please submit proposals for the 1981 meeting to Dr. Bill Schubert (SIG Chairman and Program Chairman) at the University of Illinois at Chicago Circle, College of Education, Box 4348, Chicago, IL 60680.

1980-81 MEMBERSHIP

Paid membership to date indicates 54 active members in the SIG. A membership application is attached for those who have not renewed or to pass along to a colleague. Members are as follows:

New and renewed SIG members for 1980-81 (as of May 14):

Arthur Adkins
William M. Alexander
Vernon E. Anderson
T. Aoki
Roger V. Bennett
F. Michael Connolly
James H. Finkelstein
Johanna Goodlad
Naomi Herson
William E. Hoffman
Ladd Holt
Rosalind Horowitz
Andrew S. Hughes
Harry M. Hutson

University of Maryland
Gainesville, Florida
Carmel, California
University of Alberta
Rhode Island College
OISE
Ohio State University
UCLA
University of British Columbia
Wooster, Ohio
University of Utah
University of Minnesota
Atlantic Institute of Education
Columbus, Indiana

Not an official AERA Publication

Newsletter Editor
Dr. Michael P. Rosette
Owens Technical College
Office of Institutional Research
and Curriculum Planning
Caller No. 10,000
Toledo, OH 43699

It was decided at the meeting that the offices of chairman and program chairman be combined to centralize efforts. Further, Ann Lyan Schubert and Hersholt Waxman have graciously volunteered to assist the program chairman in preparation for the 1981 program.

The idea of having a SIG sponsored social hour was discussed with the thought that it could be a conversation session with certain invited well-known scholars. More information will be reported through the Newsletter as the idea is developed.

REPORT OF THE 1980 SIG RELATED SESSIONS

For the benefit of members not present at the 1980 Boston meeting, the following abstracts are offered for information purposes. Dr. Bill Schubert has provided an update as presented below of the well attended Session 2.02 "Curriculum Knowledge and Student Perspectives: Exploring the Relationships." The abstracts for Session 5.04, "Eclectic Approaches to Curriculum Research from Subject Matter Perspectives" and Session 8.31, "A Theory of Curriculum Construction as a Special Instance of Talcott Parsons General Theory of Action" are edited from the 1980 meeting abstract.

Curriculum Knowledge and Student Perspectives: Exploring the Relationship

-William H. Schubert, Organizer and Chairperson
University of Illinois at Chicago Circle

During the Past ten years, curriculum scholars and other educators have devoted increased attention to the relationship between student perspectives
and the creation and utilization of curriculum knowledge. Both the perennial character of this issue and some recent responses to it augment its significance.

Questions that characterize this topic and served as springboards for the presentations are exemplified by the following: Can curriculum be created and utilized defensibly if it is not rooted in knowledge about the ways students and teachers think and feel, that is, their perspectives on the world? Is the character of human perspectives too complex and rich to be adequately represented by inquiry that evolves from positivistic origins? Although the latter provide much worthwhile insight, is it not beneficial to seek more comprehensive and penetrating portrayals of student and teacher through?

Each of the invited presenters has made important contributions to these and related questions. Each was asked to comment on the potential and problems in studying student perspectives, and to recommend promising directions.

The first speaker was Professor Max van Manen from the University of Alberta, who spoke on "Iconicity in Pedagogy or Knowledge as Being." He drew upon his previous studies of the Utrecht School in the Netherlands and related work with his graduate students to characterize a form of pedagogy that restores the iconic or critical-hermeneutic dimensions of curriculum. He called for realization that the pedagogical relationship is an experience, a process that emanates from the life-worlds that constitute the being of pedagogues and students.

Professor Philip Jackson of the University of Chicago spoke on the topic, "The Uncertainties of Teaching." He emphasized the profound uncertainties involved in knowing what is occurring in the mind of another person, and in gathering evidence of learning. Professor Jackson offered four means of discerning what goes on inside the mind of another, and provided a brief critique of the potential and limits of each.

The third speaker, Professor Madeleine Grumet of Hobart and William Smith Colleges, spoke under the title, "Using Students' Stories to Study Curriculum Perspectives." She drew upon a notion of "curriculum" as the collective story that we tell our children. Emphasizing the centrality of autobiography to curriculum inquiry, Professor Grumet suggested the need to excavate the pasts, presents, and futures that grow within students and teachers through studying the curriculum expressed in the stories of children and youth.

Dr. Ralph Tyler, Professor Emeritus at the University of Chicago, Director of Emeritus of the Center for Advanced Study in the Behavioral Sciences, and currently Senior Consultant for Science Research Associates, served as discussant. He acknowledged the worth of inquiry into the relation between curriculum knowledge and student perspectives, cited related research, and noted that each of the presentations dealt with the following important questions: What learning is of most worth? Who is responsible for worthwhile learning, and by what methods should it be pursued?

Eclectic Approaches to Curriculum Research from Subject Matter Perspectives

-Jere Confrey, Michigan State University, Organizer
-Daniel L. Duke, Stanford University, Chair

Because curriculum research is, by nature, a straddling of at least two disciplines, subject matter and education, researchers must be aware of the individuality and integrity of contributions from each discipline as the views are merged in developing curricula. The purpose of this symposium was to advocate, illustrate, and begin to build an eclectic view for curriculum theory. It was the opinion of the participants that constructive activities could follow from such an approach because the diversity of an eclectic permits many options for curriculum development. The symposium was presented in three parts: (1) a brief view of work of representative curriculum theorists illustrating that their views are rooted in the disciplines from which they came; (2) perspectives of curriculum inquiry from four different subject matter disciplines; and (3) the beginnings of an eclectic view of curriculum theory in which alternatives and options, their uniqueness and range of applicability are discussed. The perspectives papers were presented by specialists in subject matter and education. Jere Confrey of Michigan State University discussed the implications for mathematics curriculum and for curriculum theorizing of conceptual change analysis of mathematics. Contributions of methods of literary criticism to curriculum inquiry were presented by Jean King of Dalane University. Concept origins, biological inquiry, and curriculum were presented by Margaret Waterman of Cornell University. Elliott Launderdale of Cornell University discussed historians' mistakes and their uses in curriculum theorizing. Pichas Tamir of Hebrew University provided a thought-provoking response as discussant.

SESSION 8.31 - The Round Table

A Theory of Curriculum Construction as a Special Instance of Talcott Parsons' "General Theory of Action"
- Vincent Fresno and Albert J. Leonard
- Wright State University

The purpose of this paper was to present a systemic definition of the curriculum based in structuralist methodology. The definition and analysis is based on the "General Theory of Action" formulated by Talcott Parsons and extended by Parsons and his associates. The resulting definition yields of four-function paradigm, allowing for the inclusion of well-known specific definitions of the curriculum into a larger definition. Further, this paradigm allows for identifying, locating, and prioritizing critical gaps in curriculum knowledge, theory, and research. The major functions of curriculum theory, professional community, course development, and curriculum research were analyzed.
Because curriculum research is by nature, a straddling of at least two disciplines, subject matter and education, researchers must be aware of the individuality and integrity of contributions from each discipline as the views are merged in developing curricula. SESSION 8.31 — The Round Table

A Theory of Curriculum Construction as a Special Instance of Talcott Parsons’ “General Theory of Action”

—Vincent Presno and Albert J. Leonard

Wright State University

The purpose of this paper was to present a systemic definition of the curriculum based in structuralist methodology. The definition and analysis is based on the "General Theory of Action" formulated by Talcott Parsons and extended by Parsons and his associates. The resulting definition yields of four-function paradigm, allowing for the inclusion of well-known specific definitions of the curriculum into a larger definition. Further, this paradigmic definition allows for identifying, locating, and prioritizing critical gaps in curriculum knowledge, theory, and research. The major functions of
curriculum theory, professional community, course development, and
curriculum research were analyzed.

A SAMPLING OF SIG RELATED STUDIES, 1979-80

Provided as an enclosure with this newsletter is a bibliography provided by Dr. Edmund Short of Penn State University. Appreciation is expressed to Dr. Short for preparing this manuscript and Pam Pullella of Owens College who transcribed the information into the Word Processing System.

REVIEW OF RECENT SCHUBERT ARTICLE

An excellent article by SIG Chair William H. Schubert, University of Illinois, Chicago Circle, is the January, 1980, issue of Educational Researcher, the membership magazine of the American Education Research Association entitled "Recalibrating Education Research Towards a Focus on Practice." The article dealt with a number of research issues prompted by the proposed research orientation of Joseph J. Schwab and is commended for reading by all members of the SIG.

Schubert identifies a distinction between theoretical and practical research in terms of four categories - source of the problem, method of inquiry, nature of the subject matter of inquiry, and its general purpose. Schwab's conception of the practical is interpreted within three categories and arguments are presented from other sources in support of Schwab's recommended focus on practice in educational/curricular research. The concept of "precedents," as contrasted with theoretical science's search for generalization, becomes a key concept in the search undertaken in practical research, not withstanding the possibility that any single precedent which is discovered may not be useful as a guide to future action but must be corroborated by "accumulated precedents."

To illustrate that practical research has been and is being undertaken in curriculum inquiry, Schubert cites and discusses briefly work by Maxine Greene and Max van Maanen, and others related to phenomenology of experience, work by MacDonald, Pinar, and other related to reconceptuallist curriculum though, work by Eisner, Stake, Willis, and others related to qualitative evaluation, and work by Corey and others associated with the so-called "action research" movement. In conclusion, Schubert suggests several kinds of inquiry that might advance practical research in education: the development of compendia of precedents, the study, the characteristics and the procedures of practical research (so that the educator might be trained in it), idiographic studies, a balanced approach using the monothetic as well, and a synthesis of both. The reader is urged to ponder the many aspects of this thoughtful article.

Submitted by Dr. Edmund Short, Penn State

PUBLISHERS AND AUTHORS OF CURRICULUM BOOKS

William Schubert, chairman of the SIG, has prepared a tabulation of curriculum book publishers and authors covering the period 1970-1979. This eleven-page list will be mailed to SIG members a part of the groups activities. Members should receive this paper early this Fall.

PUBLISHERS AND AUTHORS OF CURRICULUM BOOKS

William Schubert, chairman of the SIG, has prepared a tabulation of curriculum book publishers and authors covering the period 1970–1979. This eleven-page list will be mailed to SIG members part of the groups activities. Members should receive this paper early this Fall.
The schedule of dates projected for upcoming NEWSLETTERS is as follows:

November, 1980 - Materials due by Mid-October
March, 1981 - Materials due by Mid-February

The March, 1981, issue will contain AERA annual meeting information. If members want announcements to appear for attending SIG members, please send these to the editor for inclusion.

THANK YOU

The SIG thanks Tom Popkewitz and Debra Stuard, program chairmen of AERA Division B for their excellent cooperative planning for the joint meetings held in Boston. We hope to continue such cooperative endeavors next year.

CURRICULUM OCCASIONAL PAPERS

The editor received a letter from new member Dr. Ted T. Aoki, Department of Secondary Education, University of Alberta, stating that the Faculty of Education has available a series of occasional papers entitled "Curriculum Praxis." Five of the available 15 papers are listed here as being possibly relevant to the objectives of the SIG. More information or paper copies ($1.50 each plus shipping) may be obtained from the University (338 Education South, Edmonton, Alberta, Canada T6G2E5).

No. 2 "Toward Curriculum Inquiry In a New Key"
   by Ted T. Aoki, University of Alberta, Edmonton

No. 7 "Curriculum in Alberta: A Study of Perceptions"
   by Kim Krawchenko, Pat Paradis, and Bill Sommerfeld,
   University of Alberta

No. 9 "A Critical Analysis of Teacher Education from the
   Perspective of Curriculum"
   by Donald C. Wilson, University of British Columbia

No. 10 "The Use of Qualitative Forms of Evaluation for
   Improving Educational Practice"
   by Elliot W. Eisner, Stanford University

No. 15 "Preface To A Theory of Symbolic Interchange"
   by R. Glenn Martin, University of Alberta

BOOK ANNOUNCEMENT

The fourth volume of Information Through the Printers Word: Dissemination of Scholarly, Scientific, and Intellectual Knowledge by Fritz Machlup and Kenneth Leeson and Associates has just been published. This book completes a series of studies by these authors of the economics of scholarly journal and book publishing and of bibliographic services. The bottom line is, as everybody knows, that costs are up; the mountains of detailed data presented, however, provide much to contemplate for those concerned about the future of knowledge dissemination.
November, 1980  -  Materials due by Mid-October

PAPER EXCHANGE

The SIG offers to facilitate the exchange of scholarly papers among curriculum inquirers by providing in its Newsletter periodic lists of papers available upon request from their authors. The next issue of the Newsletter will include such a list, provided readers send the editor the following information: Author, Title, Brief Synopsis (35 words maximum), Coat, and Address.

If there is interest, the SIG will later extend its services to distributing fuller abstracts or to establishing a formal system of paper exchanges on behalf of authors. Please express your preference among these three options to the editor. For now, we encourage SIG members and any others who have papers available on curriculum research and utilization to list them with the Newsletter.

QUESTIONS ANYONE?

The idea has been suggested that members of the SIG submit scholarly questions for inclusion in the Newsletter addressed to the general membership. The officers of the SIG, in fact, may want to direct especially good and relevant questions to certain curriculum scholars. We can only do this if members direct good questions to the editor in time for the November Newsletter. May we hear from you?

* * * * * *

New and renewal members will receive throughout the year additional issues of the newsletter and any occasional papers distributed by the SIG. (This fall the SIG will distribute William Schubert's "A Tabulation of Publishers and Authors of Curriculum Books, 1970-79.")

Also, AERA now allocates annual meeting sessions to SIG's according to how many paid-up members each SIG contains; please help us retain our share of program sessions.

If you have not already done so please renew your membership by filling out the form below and sending it with $3.00 for dues for 1980-81 to SIG Secretary-Treasurer:

George Willie
Department of Education
