Armstrong Atlantic State University
Faculty Senate Meeting
Minutes of February 17, 2014
Student Union, Ballroom A, 3:00 pm

I. Senate President Baird called the meeting to order at 3:00 pm (see Appendix A)

II. Senate Action

A. Approval of the Minutes from January 27, 2014 Faculty Senate Meeting

B. Remarks from Dr. Linda Bleicken, President

1. Various changes in Enrollment Services including new personnel and review and streamlining of procedures.
2. A process to evaluate both academic programs and ancillary services is being developed for implementation in fall 2014.
   i. The book, Prioritizing Academic Programs and Services is being used to guide the discussion.
   ii. Work will be done collaboratively with Dean’s Council, President’s Cabinet, Angeles Eames (Dir. of Assessment), and faculty through their respective departments

3. Update on Faculty Salary Study
   i. Raises will be based on results of faculty performance review being completed by Deans.
   ii. Review should be finalized by early March.
   iii. Question from floor: Why was mean salary vs median salary used for the study? Response: Means (based on 9 month salaries) were used because the CUPA data is based on means.
   iv. Question from floor: Has issue with the CIP codes from previous and current study been resolved? Response: CIP codes issue has now been resolved by Provost’s office.
   v. Question from floor: Will there be some stability in the Enrollment Management area in the future? Response: Maria Noblitt is currently serving as Interim AVP of Enrollment Management through May, 2014. She is working with the President Bleicken’s office to provide stability to the area moving forward. A follow up report on the status of the open AVP of Enrollment position will be given as stability improves.

C. Old Business

1. Outcome of Bills
   i. FSB-2014-01-27-03 Preservation of Degree Programs
      a. Faculty Senate leadership met with President Bleicken to express concerns regarding elimination of the Physics degree program.
      b. The review process will be modified per President Bleicken’s comments above (See II.B.2).

D. New Business

1. Committee Reports
   i. University Curriculum Committee Minutes
      a. APPROVED without modification
   ii. Graduate Affairs Committee

2. Budget Presentation by Dr. Linda Bleicken, President, and Mr. David Carson, Vice President for Business and Finance (Appendix B)
i. Armstrong receives funding through formula based on enrollment, building square footage, fringe benefits and other operating factors.
ii. Current funding formula has been used since 1982. We now only get approximately 50% from state.
iii. New funding formula is being developed based on retention, progression and graduation rates along with other factors.
iv. Not likely we will ever return to past levels of state funding per student FTE.
v. Business Office works with Provost and Enrollment Management to determine enrollment projections.
vi. USG held harmless for $20.1 million loss in enrollment funding given the previous years of budget cuts.
vii. Students have asked for two fee increases (student activity and athletic fees). However, BOR wants to avoid any fee increases.
viii. Housing and meal plan fees will be held flat in spite of 3-4% increase in costs. Students will also be given a 5% discount for returning to the residence halls the following year.
ix. A quarterly financial report (See page 16 of Appendix B) will be available on the Business and Finance website.
   a. Question: Has differential tuition fees for online programs helped with our budget? Response: Yes, it (as well has the growth in graduate enrollment) has helped and should be expanded. The differential fee helps departments defray other costs.
   b. Currently running a ~ $2.5 Million surplus, but should end year with zero surplus. Armstrong was one of two schools last year with a zero end of year surplus.
x. Instructional expenses compared to other USG institutions
   a. Question: Are athletics (auxiliary) expenses included in instructional expenses? Response: No, it is only based on education and general expenses.
xi. Comment from floor: Although Armstrong is within norms of combined instructional and academic support (See page 19 of Appendix B) with respect to peer institutions, but that does not mean we should not have higher levels of support? Response: The Business and Finance Office only reports the information, but is open to participating in those types of discussions with the Provost’s office. Question from floor: What is included in the Instructional Support line item? The library, ITS, secretarial staff, essentially anything supporting instruction. A detailed list can be send to FS. Student Services represents 5.89% of the budget. Question from floor: Do we have any data that shows the impact of funding on retention so we can better allocate future funding? Response: This is more a question for the Provost and Institutional Research, but we are happy to assist in providing relevant financial data.

xii. Question from floor: Is it correct to say we actually have ~$88 million budget in expenditures if we include auxiliary and interest? Also, is it correct to say that of the ~$48 million in Salaries and Wages, ~$19-20 million is for faculty salaries? Response: The total budget expenditures is ~$100 million if auxiliary and financial aid is included. The proportion of
salary for faculty is not immediately available, but personnel salary details can be presented at the next FS meeting.

xiii. Question from the floor: There was a $1.6 million increase in operating expenses compared to 2013, what was the source of this? Response: This is typically due to capital projects for campus improvement.

xiv. Responses from emailed questions:
   a. No budget line item set for consulting fees. Consultants hired when in-house expertise is not available for a specific event. Consultants can not be hired for longer than a year and usually funded from one time funds or directly from departmental operating funds. It is independent of the salary adjustments.
   b. End of year money could potentially be used to fund faculty grants, but it must spent by June 30. President Bleicken is in discussions with Deans to develop a faculty summer grant program using these funds. These grants should not supplant efforts to teach summer classes since our budget is dependent on summer classes.
   c. A spreadsheet has been provided for all employees making over $50K/year to President Baird.
   d. There have been no raises in the Business and Finance Office in the past 3-4 years with the exception of a single individual promoted in the office.

xv. Question from floor: How much have we saved from the solar panels on the Commons building? Response: It is producing 25% of the power to the building as designed.

xvi. Question from the floor: It was mentioned that it is advantageous for us to attract more non-traditional students, but we have put a lot of resources towards traditional students in recent years. Is this suggesting a shift in our institutional focus? Response: We know that the traditional student population has not been as robust as it has in the past. We expect to continue to see a leveling of the number of high school graduates. We must therefore look at the non-traditional population to make up the enrollment gap. It is a USG wide effort to create a more friendlier environment for the non-traditional student population. Attractive services and schedules need to be developed for them, but not to the exclusion of the traditional student population. Armstrong had a history of attracting non-traditional students in the past, and we need to examine how we get them back to Armstrong.

xvii. Question for the floor: Are surpluses from the current year included in the budget for the subsequent year? Response: We do not have a contingency fund. Surpluses are really one time funds, usually salary funds from vacant or open positions. Another source is from utility savings which always needs a built in surplus due to unknown weather contingencies. These funds cannot be re-budgeted, but are shifted to one time funds once it is determined it will not be spent.

xviii. Please feel free to ask follow up questions as needed.

xix. Question for the floor: Are deferred action students considered residents? BOR policy 4.3.4 states that each institution should verify the lawful
presence. Department of Homeland Security (DHS) has also indicated that deferred action students are considered lawfully present by DHS during the period deferred action is in effect. Response: Enrollment Services handles this decision. Also, DHS made that statement; however, state legislators and the BOR have a very specific view on lawful presence. We are required to report lawful presence every semester. There is zero tolerance from the BOR if we cannot verify lawful presence of each student. Ultimately, this is out of Armstrong’s hands considering we are dependent on state funding.

xx. Comment from floor: We are holding housing fees constant to help our students. We sympathize with on the plight of students. However, faculty are faced with significant cost increases without increases in salaries. While the salary study will provide merit based raises for some, it would good to see a cost of living salary increase for everyone. Response: President Bleicken has discussed this specific issue directly with the Chancellor, and it is at the top of his agenda.

3. No update available from Faculty Welfare regarding part-time faculty salaries.
4. President Baird has no remarks regarding the degree program given the recent changes to the program review process (See II.B.2 above)
   i. Regarding [FSB-2014-01-27-03](#), it is flawed to use a fixed number for all degree programs since some degree programs will be inherently smaller than others. This issue will be raised at the next USG Faculty Council meeting.
   ii. Question from floor: Has the Physics program been deleted? Response: It is no longer scheduled for deletion for now.
   iii. Question from floor: What about other programs that are in danger of being deleted? Response: Initially only knew of the plans for eliminating Physics.
   iv. Question from floor: If part of future funding will be based on degree completion then taking away a (Physics) degree option would seem to be counterproductive. Should this be looked at? Response: This needs to be discussed with the BOR Vice-Chancellor. In previous discussions (Sept. 2013) where Physics was mentioned specifically, he seemed to understand that some degree programs will never be popular but are still necessary. Follow up attempts for additional clarification from the Vice-Chancellor have gone unanswered.

5. Motion for Executive Session of Faculty Senate to discuss protocol matters APPROVED. All non-senators were asked to vacate the room. Subsequent Faculty Senate discussion has been archived and can only be approved in a subsequent Executive Session of the Faculty Senate.

III. Meeting adjourned at 5:00pm.

Yours faithfully,
Wayne Johnson
Faculty Senate Secretary

Agenda

- Welcome and Opening Remarks
- Budget Process
- The Budget!
How Funding Works

• Under constitutional authority, the Board of Regents (BOR) approves annual budget requests for the University System of Georgia (USG).

• Funding is provided to the USG through a funding formula, linked to:
  – enrollment growth,
  – increases in facilities square footage and
  – other operating factors.
**FY 2015 Budget Cycle**
*(Budget Effective July 1, 2014 – June 30, 2015)*

Current Formula

- Current in place since 1982
- Formula Variables (Semester Credit Hours, Square Footage, and Fringe Benefits)
- State Funds – Tuition ratio: once 75% - 25% is now ~48% - 52%
- Formula Revision Overdue
What is the New Funding Formula?

• Progression/Retention Measured at 15, 30, 60 and 90 Hours
• Completion/Degrees Conferred
• Potential Bonus Measures:
  – Strategic Initiatives
  – Critical Fields
  – Pass Rates
• Special Populations:
  – Low-Income (Pell As Proxy)
  – Non-Traditional (Age 25 or Over)
State Funding Per Student FTE

[Graph showing state funding per student FTE from 1994 to 2014 with funding amounts ranging from $5,412 to $8,294. The trend shows an increase from 1994 to 2001, a peak in 2002, followed by a decline until 2006, a slight increase in 2007, and then another decline leading to an estimate of $6,082 in 2014.]
Revenue Projections – Campus Level

• In December, institutions complete and submit the **Revenue Projections**. It includes:
  – Estimated number of students, head count,
  – Revenue estimated at current rate with no tuition increase
  – The amount of revenue generated from a 1% increase in tuition
  – Other revenues

• **The Board determines the tuition rate increase for all USG institutions.**
BOR FY 2015
Budget Instructions

• FY 2015 Office of Planning and Budget Instructions

• No required reductions or withholds

• Request Limited: For most State Agencies the FY 2015 Budget cannot exceed the FY 2014 Budget

• Exceptions:
  • State Education Agencies may request workload increases including enrollment, M&O and fringe benefits.
  • Medicaid based on number served
  • Retirement Systems addressed by OPB
FY2015 USG Outlook

- 2.74% decline in semester credit hours
- $20.1 million loss in enrollment funding
  - 11 Institutions Potential Gain totaling $21.2M
  - 20 Institutions Potential Loss totaling - $41.3M
- Further enrollment decline Fall 2014 (FY 2016)
- No quick recovery – action required!
- “New Normal”

Fees

• All mandatory, housing, and miscellaneous fee requests are due from the institutions to the BOR Fiscal Affairs Office in December
  – Detail of revenue projections for each fee
  – A financial data form with actual and projected revenues and expenditures

• The BOR approves tuition rates and all mandatory fees in April/May. The Chancellor approves housing and food service fees at the same time.
Budget Amendments/Adjustments

• Revenue Adjustments
  – Throughout the course of the fiscal year, various factors necessitate the adjustment of revenue estimates within the budget system:
    ▪ Changes in enrollment
    ▪ Changes in other income
    ▪ Budget reductions
