under Jiann-Ping Hsu College of Public Health Programs

Prerequisites: N/A

FOLIO address: http://my.georgiasouthern.edu

Catalog Description
This course presents the knowledge, infrastructure, functions, and tools of health informatics. It explores technology, planning and management and applications in public health and health care. The emphasis is on conceptual frameworks as well as a deeper level of engagement on system applications. It focuses on the application of health technology, with a particular emphasis on the private/public sector of health management. It is designed to familiarize students with core concepts and issues confronting managers in the health sector associated with planning, implementation and evaluation of information systems. The course provides an overview of the theory, processes and applications of information systems and how they relate to health policy and management. It also provides a basic understanding of data standards and requirements, and the critical concepts and practice in mapping and interpreting health information.

Required Textbook:

Additional Readings:
See syllabus & website for additional assigned articles.

Required Resource:
Microsoft Office Professional (available in computer labs)
**MPH Core Competencies in Health Policy & Management**

1. Define the main components and issues of the organization, financing and delivery of public health systems in the US.
2. Describe the legal, values and ethical dilemmas in public health that are inherent in efforts to control cost, while assuring access and quality of services for the public.
3. Define the methods of ensuring community health safety and preparedness.
4. Compare the policy development, assessment, and evaluation process for improving the health status of populations.
5. Describe the principles of program development, management, budget preparation with justification and evaluation as related for public health initiatives.
6. Define principles of strategic planning and marketing to public health.
7. Define quality, cost benefit and performance improvement concepts to address organizational performance issues in public health.
8. Define how “systems thinking” can contribute to solving public health organizational problems.
9. Demonstrate health policy and management effectiveness using appropriate channels and technologies.
10. Compare leadership skills for building partnerships in public health.
11. Define trends in planning, resources allocation, and financing and their effects on consumers, providers, and payers in public health.
12. Compare the economic, professional, social and legislative influences on public health systems in the US.
13. Define population and individual ethical considerations in relation to benefit, cost and burden of public health programs.
14. Compare the potential impacts of policy and management on the conduct of public health research and practice.

**Course Learning Objectives**

1. Be familiar with the developments in health informatics, including use of electronic health records.(8)
2. Think in terms of information systems and underlying technological infrastructure (information architecture), rather than in terms of individual computer applications.(6)
3. Be familiar with accepted models and processes for managing information resources.(5)
4. Have a basic understanding of computer networking, and be able to describe the cost and support implications of various networking solutions. (11)
5. Understand the roles of different stakeholders in development and use of health informatics (4)
6. Be familiar with data standards for storage and transmission, and understand the domains of public health-relevant standards and standard-setting bodies.(6,7, 8, 11)
7. Understand the respective roles of policy and security in protecting privacy and confidentiality, and place a high priority on assuring privacy and confidentiality in the context of information systems.(16)
8. Communications, information acquisition, and information dissemination.(16)
9. Be able to apply traditional management skills to the management of information technology personnel and projects (13).

10. Be able to evaluate technology options and procure information technology for the enterprise in a cost-effective and justifiable manner. (14)

11. Be able to provide leadership toward the acquisition of integrated, cost-effective public health information systems within their public health enterprise. (11)

12. Discuss informatics as used in Public Health (15)

13. Identify and demonstrate the various tools used in Information Technology (12)

14. Investigate solutions in Information Technology by using web and other research tools. (13)

15. Analyze current healthcare information systems. (1, 2)

**Instructional Methods:**
Class meetings will be a combination of lecture, class discussion, and active participation.

**Course Assignments:**
Weekly terminology quizzes (19%): There will be 10 online quizzes assessing your knowledge of that week’s terminology list covering medical, informatics, and health care terminologies. The quiz will
become available on Folio on Monday at 12:30am Eastern and must be completed by 6pm Eastern the following Monday. The purpose of the OPEN BOOK, online quizzes is to assure that students are familiar with critical terminologies.

Exams (58%): The exam will be based on the required readings, lectures, and classroom discussions and will be include multiple choice / open response questions as well as short answer / paragraph length responses. The exams will be closed book and in class. The final will be the third exam.

Project (4%): As a class we will be gathering data for a Georgia Health Atlas and Visualization.

Assignments (19%): The course includes 7 short assignments to involve students actively in that module’s content. Assignments will generally be submitted via Folio and are due on the assigned date at 6pm Eastern, Mondays.

Grading:

<table>
<thead>
<tr>
<th>Basis</th>
<th>Percentage of grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>10 weekly terminology quizzes</td>
<td>19% (10 quizzes x 10 points possible = 100 points possible)</td>
</tr>
<tr>
<td>3 examinations</td>
<td>58% (3 exams x 100 points possible = 300 points possible)</td>
</tr>
<tr>
<td>7 assignments</td>
<td>19% (7 assignments x 14 points possible = 98 points possible)</td>
</tr>
<tr>
<td>1 project in 2 parts</td>
<td>4% (2 parts x 10 points possible = 20 points possible)</td>
</tr>
</tbody>
</table>

</table>

Expectations:
All assignments must be delivered to the instructor on the specified due date and time. Late assignments will not be accepted. Extensions will not be offered. Missed quizzes and exams may not be made up. Extenuating circumstances will be considered on a case-by-case basis.
Please turn off all cell phones during any class meetings, since ringtones are disruptive to others.

Laptops, cell phones, calculators, PDA, tablets, or other devices will not be allowed during testing unless stipulated previously by the professor.

**Class Attendance and Participation Policy**
Federal regulations require attendance be verified prior to distribution of financial aid allotments. Regular attendance is expected. However, attendance will not be officially recorded after the first class period.

Attendance at all scheduled classes and online chat sessions is required by Health Policy and Management policy. Unexcused absences will incur deduction of one letter grade per day late for any assignments. To request an excused absence, please contact Dr. Jones via email and arrange to make up any missed work. Requests are preferably made two weeks in advance, but Dr. Jones understands that certain emergencies do not allow for such advanced arrangements.

**Plagiarism:**
"According to the Academic Dishonesty Policy of GSU, Plagiarism includes (but is not limited to):

A. Directly quoting the words of others without using quotation marks or indented format to identify them.

B. Using published or unpublished sources of information without identifying them.

C. Paraphrasing material or ideas without identifying the source.

D. Unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic material.

If you are accused of plagiarism by a JPHCOPH, the following policy, as per the Judicial Affairs website (http://students.georgiasouthern.edu/judicial/faculty.htm) will be enforced:

**PROCEDURES FOR ADJUDICATING ACADEMIC DISHONESTY CASES**

**First Offense - In Violation Plea**

1. If the professor and the Dean of Students agree that the evidence is sufficient to warrant a charge of academic dishonesty, the professor should contact the Office of Judicial Affairs to determine if this is a first violation of academic dishonesty. The incident will be reported via the following website: http://students.georgiasouthern.edu/judicial/faculty.htm

2. If it is a first violation, the professor should talk with the student about the violation. **If the student accepts responsibility in writing and the professor decides to adjudicate the case, the following procedures will be followed:**

   a. The student will be placed on disciplinary probation for a minimum of one semester by the Office of Judicial Affairs.

   b. The student will be subject to any academic sanctions imposed by the professor (from receiving a 0 on the assignment to receiving a failing grade in the class).
c. A copy of all the material involved in the case (Academic Dishonesty Report Form and the Request For Instructor to Adjudicate Form) and a brief statement from the professor concerning the facts of the case and the course syllabus should be mailed to the Office of Judicial Affairs for inclusion in the student’s discipline record.

First Offense - Not In Violation Plea (student does not admit the violation)
If the professor and the Dean of Students agree that the evidence is sufficient to warrant a charge of academic dishonesty, the professor should contact the Office of Judicial Affairs to determine if this is the first or second violation of academic dishonesty. The student will be charged with academic dishonesty and the University Judicial Board or a University Hearing Officer would hear the case. If the student is found responsible, the following penalty will normally be imposed:

a. The student will be placed on Disciplinary Probation for a minimum of one semester by the Office of Judicial Affairs.

b. The student will be subject to any academic sanctions imposed by the professor.

Second Violation of Academic Dishonesty
If the professor and the Dean of Students agree that the evidence is sufficient to warrant a charge of academic dishonesty, and if it is determined this is the second violation, the student will be charged with academic dishonesty and the University Judicial Board or a University Hearing Officer would hear the case.

If the student is found responsible, the following penalty will normally be imposed:

a. Suspension for a minimum of one semester or expulsion.

b. The student will be subject to any academic sanctions imposed by the professor.

NOT RESPONSIBLE FINDING
When a student is found not responsible of academic dishonesty, the work in question (assignment, paper, test, etc.) would be forwarded to the Department Chair. It is the responsibility of the Department Chair to ensure that the work is evaluated by a faculty member other than the individual who brought the charge and, if necessary, submit a final grade to the Registrar. For the protection of the faculty member and the student, the work in question should not be referred back to the faculty member who charged the student with academic dishonesty.

In the case of a Department Chair bringing charges against a student, an administrator at the Dean’s level will ensure that the student’s work is evaluated in an appropriate manner.

CONFIDENTIALITY
In accordance with provisions of the Family Educational Rights and Privacy Act of 1974 and the Georgia Open Records Act, any information related to a violation of academic dishonesty or the outcome of a judicial hearing regarding academic dishonesty, is prohibited and must be treated as confidential by members of the faculty.
University Calendar for the Semester
The University Calendar is located with the semester schedule and can be found at:
