Items 1-25 from the Department of Art, Music, and Theatre were discussed and approved by the committee. They are being submitted to the Faculty Senate for approval.

1. Delete the following course:

~~ARTS 2012 PAINTING II~~ 1-4-3

Rationale: This course is no longer being required in our Major Field concentration for all B.F.A. in Visual Art, B.A. in Art, and B.S. in Art Education majors and is no longer needed. ARTS 2110 Introduction to Graphic Design is replacing it as a Major Field Course that all BFA students will be required to take. A new 3000 level painting course (ARTS 3020) is being created and will be placed in our new Drawing and Painting track for the BFA in Visual Art and will be placed in the Major Field concentration for the B.A. in Art and B.S. in Art Education degrees.

Effective Term: Fall 2017

2. Delete the following course:

~~ARTS 3150 COLOR PHOTOGRAPHY~~ 1-4-3

Rationale: This course is no longer being taught in our curriculum. The chemicals and equipment have become scarce and issues about color are now being covered in the digital photography courses.

Effective Term: Fall 2017

3. Delete the following course:

~~ARTS 3170 EXPERIMENTATION IN PHOTOGRAPHY~~ 1-4-3

Rationale: The content of this course is being rolled into ARTS 3160 in our curriculum.

Effective Term: Fall 2017

4. Delete the following course:

~~Artistic theories, styles, media, and techniques as they relate to the visual arts. Not recommended for art majors.~~ Introduction to materials and techniques, art history, aesthetic and color theory, and methods of criticism related to the visual arts.

Rationale: Description is more appropriate for the content of the course.

Effective Term: Fall 2017

6. Modify the following course:

ARTS 2011 INTRODUCTION TO PAINTING-I

1-4-3

Rationale: Title is more appropriate for the level of content of the course.

Effective Term: Fall 2017

7. Modify the following course:

ARTS 2040 INTRODUCTION TO DARKROOM PHOTOGRAPHY

1-4-3

Rationale: The change in the title is to better differentiate it from digital photographic processes.

Effective Term: Fall 2017

8. Modify the following course:

ARTS 2150 ~~THE COMPUTER IN ART~~ INTRODUCTION TO NEW MEDIA

1-4-3

Prerequisite: ARTS 1020 or permission of instructor or department

~~Computer as a tool for making art using its unique output characteristics to produce hardcopy on various printers and for making art using the hardcopy combined with traditional media.~~ Fundamentals of the computer as a tool for art-making utilizing its unique characteristics in various outputs utilizing 2D, 3D or 4D (time or audio-based) formats. Emphasis on image making and image manipulation using a variety of new media tools.

Rationale: The change in the title and description makes the course more appropriate to the changing digital world. The computer-based processes, tools and output have evolved since the course was created. This update will allow for the inclusion of output beyond the hardcopy (the printed version on paper of data held in a computer) to production of digital based artifacts that may include motion and audio. This is not intended to exclude computer-generated artifacts using hardcopy, but to allow for a broader, more relevant use of the computer as an art making tool.

Effective Term: Fall 2017

9. Modify the following course:

ARTS 2400 INTRODUCTION TO ~~CRAFT~~ FIBERS

1-4-3

~~Basic craft processes and techniques with emphasis on fibers and metalwork.~~ An introduction to the medium of fibers, including fiber identification, dye application, construction methods, and resist techniques.

Rationale: Title and description is more appropriate for the content of the course.

Effective Term: Fall 2017

10. Modify the following course:

ARTS 3140 INTERMEDIATE ~~DARKROOM~~ PHOTOGRAPHY 1-4-3

Rationale: Title is more appropriate for the content of the course.

~~Emphasis on hand-applied color and toning.~~ **Processes include building and shooting with pinhole cameras, paper negatives, solarization, composite printing, chromoskedastic sabattier, chemigrams, toning, and hand-coloring techniques.**

Rationale: Title change and descriptions updates the course and aligns the content more closely with the intent of the course. This course moves beyond traditional straight printing techniques into experimental processes that can be achieved through ordinary darkroom chemistry.

Effective Term: Fall 2017

12. Modify the following course:

Prerequisite: ARTS 2011

Description: This course will build on painting techniques previously taught in ARTS 2011 with an emphasis on composition and content.

Rationale: The ARTS 2012 course has been eliminated. This course will provide additional preparation in painting the students who are focusing in drawing and painting.

Description: Advanced techniques in the photographic medium, either in digital, darkroom, or a combination. Approaches include mixed media and installation, with an emphasis on developing a body of work.

Rationale: This course is a way to address the needs of students who are pursuing Digital Photography within the scope of art, for which we currently have no courses beyond the introduction level. Darkroom-focused students will be able to take this course as well. The first half of the course will cover techniques that can be approached in either an analog or digital method, or both within one project. Assignments include working with digital negatives to create analog prints, working with Lazertran to make mixed media photographic objects, and experimenting with photo-based installation. The first half of the course will experiment with these processes/media, while the second half will focus on creating a body of work in whatever medium(s) the student chooses to work with, with technical assistance as needed. Students should have completed ARTS 2040 - Introduction to Darkroom Photo, and ARTS 3810 - Introduction to Digital Photo.

Music

Items 1-15 from the Department of Art, Music, and Theatre were discussed and approved by the committee. They are being submitted to the Faculty Senate for approval.

1. Modify the following course:

MUSC 3510 SAVANNAH WINDS

~~0-2-1~~ 0-2-(0-1)

Prerequisite: Audition and permission of instructor

~~Rehearsals and performances of standard literature for symphonic band.~~ Concert band consisting of rehearsals and performances of a wide variety of repertoire. Open to all qualified students.

Rationale: Offering a zero credit option for music ensembles would encourage the participation of students outside the music program who may not need (or can spare) the credit. Students often participate in Armstrong music ensembles without registering for the class, and a zero credit option would provide a better means of measuring student participation. Music students who have met the ensemble degree requirements would also have an option for continued participation.

Course descriptions updated for consistency.

Effective Term: Fall 2017

2. Modify the following course

MUSC 3520 JAZZ ENSEMBLE

~~0-2-1~~0-2-(0-1)

Prerequisite: permission of instructor ~~or department~~

~~Repertoire selected from a variety of jazz periods and styles. Public performances required.~~ Standard jazz ensemble consisting of rehearsals and performance of variety of jazz periods and styles. Open to all qualified students

Effective Term: Fall 2017

3. Modify the following course:

MUSC 3530 ~~UNIVERSITY SINGERS~~ VOCAL CHAMBER ENSEMBLE

~~0-2-1~~
0-2-(0-1)

Corequisite: MUSC 3540

Repertoire selected from ~~the Renaissance to contemporary~~ vocal chamber literature. ~~including classic literature and vocal jazz. Public performances each term.~~

Membership open to all students by audition.

Rationale: (See rationale from item 1)

Effective Term: Fall 2017

4. Modify the following course:

MUSC 3540 UNIVERSITY CHORALE

~~0-3-1~~0-3-(0-1)

Repertoire selected from standard choral concert literature. ~~Public performances each term.~~

Rationale: (See rationale from item 1)

Effective Term: Fall 2017

5. Modify the following course:

MUSC 3550 CHAMBER ENSEMBLE

Prerequisite: Permission of instructor or department

~~Open to all qualified students in the performance media of brass, woodwind, strings, keyboard, and percussion.~~ Various combinations of performance groups of varied instrumentation. May include public performances. Open to all qualified students

9. Modify the following course

MUSC 4850 SENIOR PROJECT

0-4-2

Prerequisite: MUSC 2810, ~~MUSC 4400~~, and either MUSC 3120 or MUSC 3610. ~~and successful completion of piano proficiency exam~~

~~Corequisite: MUSC 4400~~

Rationale: The piano proficiency exam is being eliminated as a separate entity. It will now be a component of MUSC 2130 Keyboard Harmony III. Music Performance Majors take two semesters of MUSC 4400. They take MUSC 4450 Full Recital and MUSC 4850 Senior Project during the second semester of MUSC 4400. Students who fail to complete MUSC 4850 during that semester need to take the course again. It is not necessary to require MUSC 4400 a third time. Advising should prevent students from taking MUSC 4850 without being enrolled in a second semester of MUSC 4400.

Effective Term: Fall 2017

10. Modify the following course:

MUSC 1230 KEYBOARD HARMONY I

0-2-1

~~Prerequisite: Music major status or permission of instructor or department.~~

Co-requisites: MUSC 1200, MUSC 1210

Rationale: Deleting the “music major status” aligns this course with its co-requisites: MUSC 1200 and MUSC 1210. Since this course is also required for students pursuing a minor in music, the pre-requisite becomes a registration issue.

Effective Term: Fall 2017

11. Modify the following course

MUSC 1000 RECITAL ATTENDANCE

0-1-00-2-0

Rationale: This course officially meets only once a week. The 2 hours of lab are a holdover from an earlier version of the course that met twice weekly.

Effective Term: Fall 2017

12. Modify the following course:

MUSC 2130 Keyboard Harmony III

0-2-1

Prerequisite: MUSC 1500, MUSC 1510, and MUSC 1530; or permission of instructor or department.

Keyboard techniques that reinforce theoretical concepts covered in MUSC 2100, Chromatic Music Theory, and MUSC 2110, Aural Skills III, ~~including those skills needed to fulfill the piano proficiency exam.~~ Passing with a grade of “C” or higher indicates piano proficiency for all music degrees.

Rationale: The piano proficiency exam no longer exists as a separate entity. Language in the course description helps to satisfy accreditation requirements.

Effective Term: Fall 2017

13. Modify the following course

MUSC 3720 MUSIC HISTORY II

3-0-3

(Note: Creation of this course was already approved by UCC 11/2/2016)

GEOG 1111 INTRODUCTION TO PHYSICAL GEOGRAPHY 3-0-3

Description: A survey of physical geography. Topics include earth-sun relationships, weather, climate and climate classification, soils, bio-geography, vegetation, and landforms with emphasis on global patterns of distribution.

Effective Term: Fall 2017

CURCAT:

Major Department: HIST

Can course be repeated for additional credit? No

Maximum number of credits: 3

Grading Mode: Normal

Instruction Type: Lecture

Rationale: Geography recently created a new lower-level Introduction to Physical Geography course (GEOG 1111) because we have expanded our Geography faculty to include a person who has the expertise to teach the subject matter. The course was previously a 3000-level course, which was not appropriate for the introductory-level material. Equivalent Introductory Physical Geography courses in other parts of the University System of Georgia count as part of the Area D Core (see for example the University of Georgia and University of West Georgia). We have modeled the numbering of our new course after the University of Georgia. Physical Geography is by nature a science course that will meet the SLO for Area D. There is also a precedent for a course that fulfills Area D to reside outside the College of Science and Technology. Currently, Geology 2010 falls under the discipline of Geography, which is housed in the College of Liberal Arts. Geology fulfills part of the Area D core requirement.

Area D SLO:

Students will demonstrate a collegiate-level understanding of the method by which scientific study is conducted and students will accurately evaluate data in scientific reasoning problems.

Physical Geography SLOs:

- Students will be able to define the basic terminology related to Earth's physical features.
- Students will be able to describe the spatial patterns of Earth's physical environment, including Earth's atmosphere, water, land, and living systems.
- Students will be able to identify and analyze the physical processes that shape specific physical features on Earth's surface.
- Students will be able to demonstrate the environmental processes through interactive classroom exercises.
- Students will be able to explain how human activities impact and interact with the natural systems.

IV. College of Science and Technology

1. **For information only:** GEOG 1111 and Area D proposal from COLA

The CCC discussed the proposal from COLA to teach GEOG 1111 in area D. The committee voted in favor of this proposal; however, there were some concerns and it was not a unanimous vote.

A. Biology

Items 1-3 from the Department of Biology were discussed and approved by the committee. They are being submitted to the Faculty Senate for approval.

1. **Modify the following course:**

BIOL 3600 ~~SALT MARSH~~BARRIER ISLAND ECOLOGY

~~3-3-43-0-3~~

Prerequisite: ~~BIOL 2020~~BIOL 1108/BIOL 1108L or BIOL1108H (minimum grade of C)

Covers the abiotic and biotic ~~environment, faeto~~flora, and fauna of coastal ~~salt marshes~~barrier island habitats– with a focus on Georgia's barrier islands. Topics may ~~cover algal blooms, plant dormaney~~include geological history, coastal processes, and ecological communities of barrier island habitats. Current threats and current and

future coastal management techniques will be discussed, ~~marsh die-off, contaminant and pollution impacts, habitat loss, and marsh conservation.~~

Rationale: The change to the course title and course description will better reflect the background and expertise of current faculty. The modified course will expand the discussion of salt marshes to include additional habitats of Georgia's barrier islands and coastal ecosystems. Barrier Island Ecology was taught as a BIOL 4970 Special Topics course in Spring 2015 and received positive feedback from students. The students enrolled in the course included a mixture of General Biology, Marine Biology, and Cell and Molecular Biology track majors, as well as several Middle Grades Education majors, suggesting that this course would appeal to a variety of students with an interest in coastal ecology. The removal of the laboratory associated with the course allows for a more extensive end of semester field trip to a barrier island that includes all habitats covered in class rather than multiple field site visits with restricted time allotment to individual habitats during weekly laboratory times. A round trip to uninhabited barrier islands with large, undisturbed habitats within the region require at least 2.5 to 3 hours travel time and would not be possible in a 3 hour timeframe. Finally, reducing the prerequisite from BIOL 2020 to BIOL 1108/BIOL 1108L will better reflect the content of the course, which includes discussion of both the flora and fauna of barrier islands, while making the course available to a larger pool of students.

Effective Term: Fall 2017

CURCAT

Major Department: Biology

Can course be repeated for additional credit? No

2. Modify the following course:

BIOL 3470 MARINE POLLUTION ENVIRONMENTAL RESTORATION 3-0-3

Prerequisite: CHEM1212/1212L (minimum grade of C) and either BIOL 1108 (minimum grade of C) or BIOL 1108H (minimum grade of C)

Examines the identity, sources, and consequences of the major chemical, physical, and biological pollutants that impact marine environments. Also covers current federal and Georgia environmental laws and regulations, ~~coastal ecological concepts, and as well as the~~ techniques used for remediation of environmental degradation.

Rationale: Changes to the course title and description will better align the focus of the course with current faculty expertise. This will also increase the interdisciplinary nature of the course by retaining topics such as environmental policy, ecological principles, and restoration, while incorporating related topics in chemistry, organismal biology, and human health. Marine Pollution as described in the modification above was offered as a BIOL 4970 Special Topics course in summer 2016. It received strong positive feedback from the enrolled students, which consisted

of a mix of marine biology and general track biology majors, plus one business economics major. The student makeup of the summer course indicates that the modified version of this course will appeal to the wide range of students that are interested in marine biology and/or general environmental issues. Finally, including the requirement that students enrolling in the course obtain a minimum grade of C in CHEM 1212/1212L will ensure that all students have the necessary foundation in chemistry to discuss the composition of chemical pollutants.

C. Computer Science and Information Technology

Items 1-6 from the Department of Computer Science and Information Technology were discussed and approved by the committee. They are being submitted to the Faculty Senate for approval.

1. Modify the following course:

ITEC 2010 INTRODUCTION TO CYBER SECURITY

3-0-3

Prerequisite: ~~CSCI 1150~~ None

Rationale: This course is intended as an introduction to Cyber Security for non-Cyber Security students. Students taking this course will not need a background in the material covered in CSCI 1150, and in order for this course to be placed in the core, it should not have a prerequisite.

Effective Term: Fall 2017

2. Modify the following course:

CSCI 2070 INTRODUCTION TO COMPUTER ETHICS AND CYBER SECURITY

Prerequisite: ENGL 1102 and either ~~CSCI 1302~~ CSCI 1301 or ITEC 1310

Rationale: This course is the prerequisite to the courses that comprise the core of the Associate of Science, Cyber Security Track; the Undergraduate Certificate in Cyber Security; the Interdisciplinary Minor in Cyber Security; and the new Cyber Security Track in the Bachelor of Information Technology degree. ITEC 1310 is the direct prerequisite for CSCI 2070 in the BIT degree program. CSCI 1301 is the first programming course required in the Computer Science degree. Having CSCI 1302 as the prerequisite for CSCI 2070 places an extra course in the way of Computer Science majors taking CSCI 2070. It is also an extra barrier to students not majoring in IT or Computer Science that want to enroll in the program for the AS Cyber Security Track, the Undergraduate Certificate in Cyber Security, or the Interdisciplinary Minor

in Cyber Security. Consequently, CSCI 1301 should replace CSCI 1302 as one of the possible prerequisites for CSCI 2070.

Effective Term: Fall 2017

3. Modify the following program of study:

PROGRAM FOR THE DEGREE OF ASSOCIATE OF SCIENCE

Cyber Security Track

B. Additional Requirements 18 hours

MATH 1111 College Algebra (if not taken in Core Area A)

One class selected from:

ITEC 1310 Programming for IT

CSCI 1301 Introduction to Programming Principles

CSCI 2070 Introduction to Computer Ethics and Cyber Security

ITEC 3700 Cyber Security I

ITEC 4200 Cyber Security II, Network Security

ITEC 4300 Cyber Security III, Ethical Hacking

If MATH 1111 was taken in Core A, then select one of the following:

MATH 1113 Pre-Calculus Mathematics

CSCI 1150 Fundamentals of the Internet and the World Wide Web (if not taken in Area D)

ITEC 2010 Introduction to Cyber Security

Rationale: Students earning the AS Cyber Security Track would benefit from the option of taking ITEC 2010 instead of CSCI 1150, as ITEC 2010 will give them introductory material that will help prepare them for the more rigorous junior and senior level Cyber Security courses. ITEC 2010 is also in the program of study for both tracks in the BIT degree. This change will provide students with more flexibility regarding their initial programming course.

Effective Term: Fall 2017

4. Modify the following program of study:

Undergraduate Certificate in Cyber Security 18 hours

One course selected from:

CSCI 1150 Fundamentals of the Internet and the World Wide Web

ITEC 2010 Introduction to Cyber Security

One course selected from:

CSCI 1301 Introduction to Programming Principles

ITEC 1310 Programming for IT

CSCI 2070 Introduction to Computer Ethics and Cyber Security

ITEC 3700 Cyber Security I
 ITEC 4200 Cyber Security II, Network Security
 ITEC 4300 Cyber Security III, Ethical Hacking

Rationale: students earning the Undergraduate Certificate in Cyber Security would benefit from the option of taking ITEC 2010 instead of CSCI 1150, as ITEC 2010 will give them introductory material that will help prepare them for the more rigorous junior and senior level Cyber Security courses. In addition, as proposed in this set of changes, with ITEC 2010 not requiring a prerequisite, there will be one less barrier to completion for those students who are only earning the undergraduate certificate.

Effective Term: Fall 2017

5. Modify the following minor:

Cyber Security Minor

Cyber Security 18 hours

CSCI 2070, ITEC 3700, ITEC 4200, ITEC 4300

One course selected from: ITEC 1310, CSCI 1301

One course selected from: CRJU 5003U, CRJU 5010U

Rationale: when proposing this change, we were working off of the 2015-16 Undergraduate Catalog, not changes made and now published into the online 2016-17 Undergraduate Catalog. Upon further review of the new online catalog, CRJU 5003U (Cyber Forensics) is listed as both a mandatory course *and* an optional course. The change listed above corrects this situation.

[Editor's note: The minor had been transcribed to the online catalog incorrectly and has been corrected to match what was passed at the 12/2/2016 UCC meeting (and what was submitted to the catalog company).]

Effective Term: Fall 2017

6. Modify the following program of study:

PROGRAM FOR THE DEGREE OF BACHELOR OF INFORMATION TECHNOLOGY

Track 2: Cyber Security Track

Area F 18 hours

CSCI 1150 Fundamentals of the Internet and World Wide Web

CSCI 1301 Introduction to Programming Principles

CSCI 1302 Advanced Programming Principles

ITEC 1310 Programming for Information Technology

One class selected from:

ITEC 2000 Introduction to App Development

ITEC 2010 Introduction to Cyber Security

And one of the following:

MATH 1161 Calculus I

MATH 1950 Applied Math for Non-Science Majors

MATH 2200 Elementary Statistics

CSCI 2625 Discrete Structures in Computer Science

Rationale: The change to the Cyber Security Track is to make the degree program more flexible so that students who start in the Information Technology Track and then switch to the Cyber Security Track will receive credit for ITEC 2010 if they took it in the Information Technology Track.

Effective Term: Fall 2017

Items 7-8 from the Department of Computer Science and Information Technology were discussed and the undergraduate portions approved by the committee. They are being submitted to the Graduate Curriculum Committee and therefore are marked **"For Information Only"** for the report to the Senate.

Items 1-18 from the Department of Psychology were discussed and approved by the committee. They are being submitted to the Faculty Senate for approval.

1. Delete the following course:~~**PSYC 1200 DRUGS AND BEHAVIOR**~~~~**3-0-3**~~

Rationale: This course is deleted so that it can be recreated as an upper division undergraduate course (see PSYC 3095) and serve the role of a required course in the proposed neuroscience track.

Effective Term: Fall 2017

2. The department requests a blanket change removing all instances of PSYC 1200.

3. Create the following course:

PSYC 3095 DRUGS AND BEHAVIOR.

3-0-3

Prerequisite: PSYC 3090

An advanced exploration of the various factors involved in drug effects and abuse. Focus on laboratory methodology (with humans and non-humans) to examine drugs of abuse and some pharmacological treatments for neurological and psychiatric disorders.

Rationale: This course is being created as an upgraded version of PSYC 1200 Drugs and Behavior and serves the role of a required major course in the proposed neuroscience track in the PSYC BS degree.

Effective Term: Fall 2017

4. Modify the following course:

PSYC 2950 LIFESPAN DEVELOPMENTAL PSYCHOLOGY

3-0-3

Prerequisite: PSYC 1101

Examination of basic principles of human psychological development from conception through old age as these relate to biological, cognitive, and social development. ~~Not designed for psychology majors.~~

Rationale: PSYC 2950 is included in the updated Area F of the BS and BA programs of study and serves as a prerequisite for PSYC 3050 Child Psychology.

Effective Term: Fall 2017

5. Delete the following course:

~~**PSYC 3020 PSYCHOLOGICAL TESTING**~~

~~**3-0-3**~~

Rationale: This course is deleted so that it can be renumbered (See PSYC 3295) to a number larger than its prerequisite (PSYC 3280).

Effective Term: Fall 2017

6. Create the following course:

PSYC 3295 PSYCHOLOGICAL TESTING

3-0-3

Prerequisite: PSYC 2200 and PSYC 3280

Individual and group tests in psychological, educational, and clinical settings. Focus on the theoretical and statistical principles that underlie psychological and educational measurement and standardized psychological instruments, and ethical issues in psychological testing.

Rationale: The course is renumbered from PSYC 3020 so that it is a larger number than its prerequisite (i.e., PSYC 3280). The new prerequisites ensure students are prepared for the content and critical thinking expectations.

Effective Term: Fall 2017

8. Modify the following course:

PSYC 3030 ~~EXPERIMENTAL~~ SOCIAL PSYCHOLOGY

3-0-3

Rationale: The qualifier 'experimental' is unneeded and may be problematic for students who transfer away from Armstrong.

Effective Term: Fall 2017

9. Modify the following course:

PSYC 3050 CHILD ~~PSYCHOLOGY~~ DEVELOPMENT

3-0-3

Prerequisite: ~~PSYC 2200 and PSYC 1101~~ **PSYC 2200 and PSYC 2950**

Examination of psychological theories, research, and application of psychology of the child from conception through adolescence. Surveys recent literature within the areas of ~~perpetual~~ **perceptual**, biological, cognitive, and social/emotional development.

Rationale: PSYC 3050 will serve the role of an advanced course in our restructured programs of study and the added prerequisites will ensure students are prepared for the content and critical thinking expectations. Also, a typo is corrected.

Effective Term: Fall 2017

10. Modify the following course:**PSYC 3080 EVOLUTIONARY PSYCHOLOGY****3-0-3**

Prerequisite: PSYC 1101 ~~and or PSYC 1101H~~ either BIOL 1103 or BIOL 1107/1107L ~~or BIOL 1107H/BIOL 1107A, and BIOL 1108 or BIOL 1108H~~

Rationale: The changes in prerequisites are intended to streamline course eligibility and update them to include BIOL 1103 which will enable more of our BA students to take PSYC 3080.

Effective Term: Fall 2017

11. Modify the following course:**PSYC 3090 PHYSIOLOGICAL PSYCHOLOGY****3-0-3**

Prerequisite: PSYC 1101, ~~and either~~ BIOL 1103 or BIOL 1107/1107L ~~and BIOL 1108 each~~ with a grade of C or better

Rationale: Including BIOL 1103 will make PSYC 3090 more accessible to our BA students who are not required to take BIOL 1107. BIOL 1108 is not essential for success in PSYC 3090, and, therefore, deleted as a prerequisite.

16. Modify the following course:

PSYC 3200 INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY

3-0-3

Prerequisite: ~~PSYC 2200 and PSYC 1101~~3030

Prerequisite: PSYC 1101

Advanced examination of classical and operant conditioning, with an introduction of basic and applied research. Includes concepts and principles of behavior analysis, measurement, including data analysis, research design and fundamental elements of behavior change with ethical professional conduct.

Rationale: This course is being created as an equivalent course to PSYC 3400 that will eventually replace it. PSYC 3400, 5060, 5061, and 5062 constitute an approved course sequence by the Behavior Analysis Certification Board (BACB) that, when completed, enables students to take the Board Certified Assistant Behavior Analyst Exam. PSYC 3500 COGNITIVE ~~PSYCHOLOGY~~NEUROSCIENCE I 3-0-3

Prerequisite: PSYC 1101

~~Examines the neural basis of cognition with an emphasis on the nervous system, attention, sensation and perception, and methodology, including principles and applications derived from basic research. Issues related to the various models of human information processing with an emphasis on perceptual and linguistic development, including principles and applications derived from basic research.~~

Rationale: This course name and description is modified to reflect the neurological basis of cognitive psychology. The topics are being split into two sections in order to adequately cover all topics. It will be a required course in the updated PSYC BS degree.

Examination of biological, psychological, and social factors that interact with and affect health and illness. Topics discussed may include, but are not limited to, the psychophysiology of stress and pain ~~and recovery~~, rehabilitation, and psychosocial adjustment of individuals with health problems.

Rationale: The term recovery is redundant with rehabilitation, and, therefore, deleted. Commas included where needed.

Effective Term: Fall 2017

32. Modify the following course:

PSYC 3950 RESEARCH IN PSYCHOLOGY

~~V-V-(1-6)~~**V-V-(1-9)**

Prerequisite: ~~junior standing, permission of department head, and agreement by a faculty member to supervise the research.~~ **By permission of supervising faculty member**

~~Uncompensated~~ **R**esearch to be assigned and directed by a faculty member of the Department of Psychology. Students will conduct research which may include a literature search, field or laboratory observation and experimentation, data reduction and analysis, and written and/or oral presentation of results. ~~The research experience will be evaluated by a rotating committee of the departmental faculty before the initiation of the project, and again upon completion of the work.~~ Credit will vary depending on the work to be completed. Course may be repeated up to a total of ~~six~~ **nine (69)** credit hours.

Rationale: Supervised research is occurring at earlier stages of students' academic tenures and prerequisites beyond faculty permission are not needed. We prefer this course description be silent on the issue of compensation. We are no longer using a committee to evaluate proposed and concluded research projects. With the support of faculty, students are participating in more research projects and 6 hours is not sufficient in many cases.

A continuation of Learning and Behavior I. A more in-depth exploration of classical and operant conditioning with the requirement of conducting experiments with non-human animals to illustrate concepts and principles surveyed in Learning and Behavior I. Students collect and analyze data to write research reports. Laboratory component with rotating emphasis (depending on instructor): cognitive, behavioral, biological. ~~An examination of basic learning processes and theories. Emphasis on experimental procedures used in the laboratory to better understand human behavior.~~

Rationale: This course is modified to serve the role of an advanced Learning and Behavior course taken after its prerequisite (PSYC 3400) and continue to be paired with a laboratory section. It is a required course in the BS degree, but will no longer be a course in our applied behavior analysis course sequence that prepares students for the certification examination. PSYC 1101 is not necessary as a prerequisite.

Special attention is given to the influence of philosophy in the history of psychology.~~

Child and Family Studies Program

Items 1-2 from the Department of Childhood and Exceptional Student Education were discussed and approved by the committee. They are being submitted to the Faculty Senate for approval.

1. Create the following course:

EDUC 3050 Introduction to Child Life Theory and Practice **3-0-3**

Prerequisites: ECUG 3040

Description: Course provides students with an understanding of the psychosocial needs of children and families in hospital or pediatric clinical settings. Students will learn assessments and techniques to promote adjustment and coping during stressful medical events. EDUC 3050 does not qualify students to take the Child Life Professional Certification Examination or complete the 480 hours of internship/fellowship to become a Certified Child Life Specialist.

Rationale: Child life specialists are experts in child development, who promote effective coping through play, preparation, education, and self-expression activities. They provide emotional support for families, and encourage optimum development of children facing a broad range of challenging experiences, particularly those related to healthcare and hospitalization. Understanding that a child's wellbeing depends on the support of the family, child life specialists provide information, support and guidance to parents, siblings, and other family members. They also play a vital role in educating caregivers, administrators, and the general public about the needs of children under stress. This course introduces students to the profession of child life specialist.
