The Moment of Impact: An Inside Look at Titleist Golf Ball R&D

The Titleist R&D team recently fired up one of their mechanical robots to film golf ball impact footage, using a high-speed camera, at 22,000 frames per second.

One result, as you will see in the video: "If you compare the 120 mph driver speed to the 175 mph driver speed, you'll see that the compression on the ball is really quite similar," said Furze. In other words, every player, no matter their swing speed, compresses the golf ball.
