Resource Updates – RefWorks New Platform and SAE Mobilus

October 3, 2016

The library is excited to announce two resource updates:

RefWorks New Platform
RefWorks now has a new platform! With an improved user experience, full-text management, and collaboration features, RefWorks supports a more efficient and reliable process for producing your research papers.

The new RefWorks platform will completely replace the legacy platform in late 2017. Until that time, the library will support both platforms. However, if you currently use RefWorks, we strongly encourage you to set up a new account on the new platform.

In Spring 2017, users of the legacy platform will be encouraged to migrate to the new platform when they log into RefWorks. In Fall 2017, they will be required to migrate.

Until Fall 2017, both the legacy and new platforms of RefWorks will remain available via the library’s A-Z Database List.

SAE Digital Library Is Now SAE Mobilus
SAE Digital Library is now SAE Mobilus and has an all-new platform. SAE MOBILUS is the only engineering database that offers engineers, educators, researchers, and students access to resources that help move the mobility industry forward. This platform is continuously adding information and creating new value through features like HTML linking, language translation, annotations and more.

SAE Mobilus temporarily is available on-campus only; the library will restore off-campus access as soon as possible. It is available via the library catalog, Discover @ Georgia Southern, and the library’s A-Z Database List.

If you have any questions or concerns about these changes, please contact the Information Services Desk at (912) 478-5645.
