Morris Technology – Full Stack Developer

April 15, 2019

We are seeking a **Full Stack Developer** specializing in UI/UX. We are looking for a developer with a passion for writing clean, maintainable, testable code. You will design, implement, and scale web and mobile applications. A good fit is someone who accomplishes more with a team than they do alone.

At Morris Technology LLC you will develop Software as a Service products that keep our media customers running with strategic technology, 24/7. Our industry strength, market turning products and services contribute to our customers' success and increase revenue.

This is a full time role with vacation, benefits, and 401k. We combine a competitive salary and benefits with a great culture. We also know how to throw a bowling party every once in a while.

Responsibilities include, but are not limited to:

- Developing/formatting/styling browser-based applications using HTML, JavaScript, and CSS
- Use of modern web development technologies including React, SASS, Ionic
- Working in Django, a Python-based web framework
- Being a central part of discussions powering development ideas and goals
- Give guidance to the junior developers on the team
- Ability to construct mockups based on customer articulated requirements
- QA testing of code and applying necessary modifications
- Handling support issues and troubleshooting code
- Managing databases and formulating SQL queries
- Researching and learning new technologies
- Using Git to collaborate with the team
- Monitoring and deploying the systems you create
- Interacting with customers and team members through a ticket system

Experience with AWS and serverless is a

Apply through indeed: <http://bit.ly/full-stack-gsu>
