Center for Sustainability and University Wellness Program host 6th annual No Impact Week

April 11, 2016

The Center for Sustainability and University Wellness Program at Georgia Southern University are teaming up to host the sixth annual No Impact Week on campus April 10-17 with events to highlight a different sustainability theme each day.

Georgia Southern holds the record for the longest running No Impact Week in the country. The Week is designed to help individuals become more aware of how to live a sustainable lifestyle. Numerous exhibits, events and activities focusing on environmentally friendly and healthy practices and habits will be hosted throughout the week. Participants are encouraged to take a 'carbon cleanse' during the week by reducing the CO2 emissions of their actions so they can see how no impact living can affect their lifestyles.
