Kristi St. Clair Receives Highest Honors

May 1, 2018

Every year, Georgia Southern University hosts the Honors Day Convocation, which recognizes the achievements of students' work throughout the year, new members of honors societies, and graduating seniors. Kristi St. Clair (chemistry '18) was one of the many graduating seniors this year, but in one particular way she stood out.

President Dr. Jaimie Hebert awarded St. Clair the highest honor at the convocation, the University System of Georgia Academic Recognition Award.

This award recognizes the student that exemplifies the most outstanding academic achievement as well as their dedication to the campus community. "I was very happy when I walked on the stage to receive my award. I was so proud that my hard work has been recognized."

Her time with the University Honors Program has given her countless opportunities. However, her favorite memory with the program was when she gave back to the local community. During her freshman year, she was in Dr. Francis Desiderio's Honors section of the First Year Experience course (FYE), *Meaning of Place*. In the University Honors Program, students are required to complete experiential learning and in their first year, they complete the requirement with their FYE class.

Georgia Southern professor elected president of the GES

May 1, 2018

Edward Mondor, Ph.D., associate professor of biology at Georgia Southern University, was elected president of the Georgia Entomological Society (GES) in early April. Entomology is a branch of zoology which covers the study of insects and their relationship with humans, the environment and other organisms.

Mondor has been involved in leadership positions with GES for several years. Last year he served as president-elect, and in prior years he served on the site selection committee, the local arrangement committee and the student affairs committee. As president-elect, he was responsible for organizing the annual 2018 GES meeting held jointly with the state of South Carolina in Helen, Georgia. Mondor replaces outgoing president Dan Suiter.

"I am excited to begin serving my term as president, and to promote membership in the organization," said Mondor. "The GES is open to any faculty, student or staff from any background with an interest in entomology."

The society provides a focal point for entomologists through the dissemination of results of original research, ideas and accomplishments in technology transfer, and information on entomology and entomologists. The GES annual meeting is held at various sites throughout Georgia, providing entomologists, industry professionals and scientists in related fields a forum to convene and share advancements in the field of entomology and related disciplines. The GES also honors recipients of awards and scholarships and publishes the *Journal of Entomological Science*.

Patricia Humphrey receives MAA Southeastern Section Service Award

May 1, 2018

Patricia Humphrey, Georgia Southern University Professor Emerita of Statistics, received the 2018 Mathematical Association of America Southeastern Section (MAASE) Distinguished Service Award, which was announced at the 97th Annual MAASE Meeting at Clemson University on March 23, 2018. Humphrey has a remarkable record of service to the mathematical sciences community. Within the MAASE, she has served as Chair, Past-Chair, Chair-Elect, Program Chair, and Section NExT (New Experiences in Teaching) Coordinator. In addition, she organized and hosted the 86th Annual MAASE Meeting in 2007 at Georgia Southern University, served as MAA Liaison, and advised the MAA Student Chapter. In addition, she organized the Eagle Undergraduate Mathematics Conference at Georgia Southern in 2010, 2012 and 2014, which also included the MAA State Luncheon. Humphrey made numerous contributions to the profession at the national level as well. She served as Chair and Newsletter Editor of the MAA Statistics Education Special Interest Group, was a member of the MAA – American Statistical Association Joint Committee on Statistics Education and the MAA Dolciani Committee. Over her career, Humphrey gave approximately 30 presentations at national and regional meetings and organized numerous special sessions. Her extensive service contributions were also recognized with the College of Science and Technology Award for Excellence in Service in 2011 and the University Award for Excellence in Service in 2012.
