I watermelon. Speaker in chapel last week. Mr.
friends you have met this summer them. is to talk with one of your here.. The best way to forget about piano, Shelby Monroe with the saxo-
chapel program. The music was in
the feature of Thursday morning's
furnished music for the occasion. tertaining speaker. The orchestra
talked in chapel and has proved him-
stalled through the efforts of County
and was assisted by Miss' Hazel
Thompson. Products are brought in
Thompson.

The cannery which is located near the dairy has been op-
cinated down at the dairy has been op-
cinated for the farmers of the coun-
ty and it is expected that the can-
nery will continue to operate at full
speed for several days yet.

New catalogues for next year have been distributed. This
book is the same size as the one for
last year, but it carries many addi-
tional courses added. A new system of credits has been in-
stalled as well as new requirements
and additional courses added.

Miss Henrietta Doster, of Rocky Ford, a pupil of Mrs. Jesse
Johnson, was presented in a recital last Thursday evening in the college
auditorium. Miss Doster read "Jour-
ney's End," a drama in three acts,
and was assisted by Miss Hazel
Thompson.

The Vesper Program for Sunday evening was in charge of
Prof. Ramsey. Mr. Ramsey has also
talked in chapel and has proved him-
to be a very pleasing and entertain-
ing speaker. The orchestra furnished music for the occasion.
A musical program was
the feature of Thursday morning's
chapel program. The music was in
charge of Robert Ford. Gilbert McLemore at the
piano, Shelby Monroe with the saxo-
phone, and M. Y. Hendrix, who sang
several numbers.

Don't lose that cheerful
smile just because exams are almost
here. The best way to forget about
them is to talk with one of your friends who won't be here this summer
from behind a good slice of Georgia watermelon.

J. C. Dixon, of the State
Department of Education, was a speaker in chapel last week. Mr.

News Picked Up
About the Campus

PHILIP WELTNER, OF ATLANTA, chancellor of the University System
of Georgia, was a visitor to the campus Wednesday, Chancellor Welt-
ner was formally introduced to the student body at the supper hour. In
the evening he was honored guest at a watermelon cutting given by the
faculty.

The Cannery which is located
near the dairy has been operating
during the entire week. The dairy has been canned for the farmers of the coun-
ty and it is expected that the can-
nery will continue to operate at full
speed for several days yet.

New catalogues for next
year have been distributed. This
book is the same size as the one for
last year, but it carries many addi-

A RACIAL EVOLUTION

Darwin stressed the doctrine of the survival of the fittest. He looked upon life in its lowest and highest levels as a constant struggle for supremacy in which the stronger and individually eliminated the weaker. The species best fitted to hold a place in the scheme of things persisted and the less fit became extinct.

The domesticated plants and animals have been vastly improved by men who have helped on the evolutionary process by substituting artificial for natural selection for reproduction purposes. There was a time when the wild cow scarcely gave enough milk to supply the largest need of her calf. By selective breeding cows are now able to supply their own offspring's need and those of a large family of human offspring.

When we leave the world of lower animals and come to the level of the human family we find a strong state of affairs. Men are using science and mental power to produce better animals, but in the case of their own species they are amazingly indifferent. A large percentage of the human race is seriously defective in mind and body. The burden of the physical and mental defectives becomes increasingly heavy from year to year. Unless organized society faces the facts and sets to the stupendous task of breeding a better race this burden will eventually become an intolerable one and society will sink to a lower level.

Why is this true? Why are defectives increasing so rapidly?

One reason lies in the fact that modern science is preserving the lives of millions of people who would have died had they been born a thousand or more years ago. The time was when defective children were intentionally allowed to die. Among some savage tribes now living death is allowed to carry away the new born infant that has become a liability rather than an asset to the tribe. Such is not the case in civilized society. The criminal who put his regrets in a test tube and closed his eyes would never make any discoveries.

Are we afraid to measure our progress with the forces that stand in our way? If we have such a fear we are not keeping society from eliminating the false and fostering the truth. The astronomer who would not turn his telescope on certain points in the depth of space because he feared that the telescope might reveal something out of line with accepted theories, would not be a success as an astronomer. The chemist who put his regrets in a test tube and closed his eyes would never make any discoveries.

Are we afraid to measure our progress with the forces that stand in our way? If we have such a fear we are not keeping society from eliminating the false and fostering the truth. The chemist who put his regrets in a test tube and closed his eyes would never make any discoveries.
A CHAPEL TALK

Some one, we'll not go into details, has said there is a time for everything. This being so, it seems that 6:30 until 7 must be the time for chapel exercises at 3:20, T.C.C. I wonder how many have heard the familiar strains of 'T'll give any one a nickel to fill my chapel seat today.' Those phrases seem to be woven on every thread.

The year's first party was given in the gym by the Greys. The feature of their entertainment was the awarding of the prize to the tackiest person and the best dressed person of the evening. They carried out the idea of a night club, having decorated to that end. Business and barnards were in attendance. Dancing was enjoyed after the program.

A real old-fashioned corn-husk was the entertainment provided by the Shufflers who gave the second party of the evening and corn husking contest among keen competition during the evening. Bern dance was the form of entertainment.

Dinner on the ground and singing in the house was the form of a party given by the Greyhounds who had charge of the third party. They designed a real old time school breaking in boosting the Greyhounds. The singing was led by an experienced singing master with his tuning fork. After the program dinner was spread, during which a very entertaining skit was rendered by members of the group.

Following is the basketball line-ups for the different groups:

The object of the conference is to plan with inspiration and information those who are assuming positions of leadership in their local associations. Membership in the conference is open to parents, teachers and all others interested in the_pixels on the screen, the victorious team is still in doubt. There seems
The Snopper

BY ANN ONYMOUS

FOUR

Monday, July 16, 1933

The Snopper—and the writer cannot see why the editor insists on calling it the Snooper when every one cannot see why the editor insists on it—has been a regular piano accompanist or what for his conversational style, tells about a man who has become what he is today in human nature? What connection has literature with the past? Let Dr. Merrill, cl927. The dynamic author of philosophy at Columbia University, answers this question in his book, "Human Nature in the Making." The Snopper wonders if it is because the subject is too complicated, and the students are not ready for it, or if it is because the subject is too simple, and the students are not interested in it.

Then we remarked to one of the students that some of the people at home had just begun coming to the school. We were not such strangers after all. We went to the library to get a book to read and while there, we noticed two or three students, a young man sitting at a table just outside of the library door and passing on by the building. We felt like a criminal being put through a guilty conscience, and crushed spiritually over five hundred students, mostly men and women of today.

The Greyhounds won the singing contest, "Coming Around the Mountain," with Mr. Goodin as leader. The Shufflers cut.

The Snopper is Rocky, but she is a very attractive saxophonist to the "Ford." The way she plays the saxophone, it is as if she were a part of the band. When you hear her play, it is as if you are right there on the campus, surrounded by the sound of music. The Snopper wonders if it is because the subject is too complicated, and the students are not ready for it, or if it is because the subject is too simple, and the students are not interested in it.

The Snopper wonders if it is because the subject is too complicated, and the students are not ready for it, or if it is because the subject is too simple, and the students are not interested in it.

The Snopper wonders if it is because the subject is too complicated, and the students are not ready for it, or if it is because the subject is too simple, and the students are not interested in it.
