New Learning Models
A Critical Need – MATH 1113 Precalculus

37.7%
Do Not Succeed

USG 2013 System average percentage of D, F, W and WF (excluding Not Posted)
“While not effortless, the [emporium model] is as close to a silver bullet as one can get in the complex world of teaching and learning.”

(The Math Emporium: Higher Education’s Silver Bullet, Twigg, 2011)
Emporium Success Factors

• Require active learning. Emphasis on doing as opposed to listening to how to do math.
• Ensure sufficient time on task. Math activity is required (lab hours/exercises).
• Build in ongoing assessment and prompt (automated) feedback.
• Monitor student progress and intervene when necessary.
• Provide one-on-one, on-demand assistance from highly trained personnel.
“The virtual classroom is a space, a territory, where learning can happen.”

Timeline & Goals

**Timeline:**
- Develop Course in Fall 2013
- Offer Pilot Course in Spring 2014

**Goals:**
- Up to 300 Students from 5 Institutions
- Evaluate Impact of the Model
- Continue to Improve the Model
- Scale to More Institutions
- Modify Teaching Support Model
Who Are the Instructors?

Allison Arnold, UGA

Peggy Moch, VSU

Sutandra Sarkar, GSU

Sharon Evans, GPC

Barry Monk, MGSC

Kevin Yeomans, GPC
What Are the Platforms?

- Coursera
- ProctorU
- SmartThinking
- WebAssign
Student Perceptions/Feedback

• Helpfulness, Timeliness of Instructors
• Discussion Forums and Study Halls as Positive to Learning Outcomes
• Technology of Less Concern than Instructional Materials
• Interest in More Video Content and Direct Instruction
Next Steps

• Review Evaluative Data
• Refine Course (Platforms and Materials)
• Expand Number of Participating Institutions and Continue to Pilot in Fall 2014
• Address Faculty Load & Responsibilities
• Develop Long-Term Business Model
