FORMER KENNEDY AIDE TO ADDRESS STUDENTS

by Steve Langston

On April 22nd, the Student-Faculty Lecture Series will present Mr. Frank Mankiewicz, journalist and campaign strategist. The lecture will be held in the Jenkins Auditorium at 12:30 P.M. Mr. Mankiewicz received his Bachelor’s degree from U.C.L.A. and his Masters in Journalism from Columbia University. In 1955, he earned his law degree from Berkeley and practiced in Beverly Hills for 6 years.

During the 1960 Presidential Campaign, Mankiewicz campaigned actively for John Kennedy. After the election, President Kennedy appointed him director of the Peace Corps program in Peru. He was very successful and was thus promoted to director for all Latin America programs for the agency.

In 1966, Robert Kennedy asked Mankiewicz to join his staff as Press Secretary. Mr. Mankiewicz served in this capacity for two years. When Robert Kennedy announced his intention to run for President, Mankiewicz planned and carried out a large part of the Late Senator’s campaign.

Mr. Mankiewicz will undoubtedly be one of the finest and most interesting lecturers on campus this quarter. His experiences with formulating the first working design for Peace Corps operation, anecdotes of incidents with John and Robert Kennedy, knowledge of political campaigning and strategy, and his activities and interests since Robert Kennedy’s death should make this a lecture that should not be missed.

GENE WATERS NEW S.G.A. PRESIDENT

by Chris Cooper

In the annual election of officers for Armstrong’s Student Government Association, Eugene Waters was elected President of the Association. A runoff was slated for Vice-President between Francis Wimbish and Dave Randall. Susan Erson was elected as Secretary and the Treasurer’s post was won by Nancy Brelad.

The election, which was held on Tuesday, April 14th in the new student center also provided a fresh slate of student senators who will take office on May 13th. Elected to fill the senior seats were: Fred Cootidge, Joan Horne, Carl Kinsey, Stephen Langston, and Bunny Pollock. The junior class chose Pamela Burke, Linda Cubbidge, Dennie Pruitt, Dee Storkey, and Martha Tison. Filling the sophomore spots will be Jane Doij, Chip Humphrey, Carolyn M. Martin, Mark Sletin, and Pam Watkins.

The freshman class will select its senators in the fall.

Waters and the other student government officers will be installed on May 13th. The new president already has plans to implement numerous changes. Waters feels that the prospect of having “Wonderful Wednesdays” (No classes on Wednesdays) should be investigated with the idea of making Wednesdays a research day. He also is interested in looking into a new grading system for Armstrong students. Water’s system would eliminate the standard A, B, C, D, and F grades and employ a pass-fail system.

In addition, he would like to establish new cabinet posts including a Secretary of Greek Affairs to encourage more interest in Greek activities. He would also like to have a Secretary for the Lecture-Concert Series and establish a complaint bureau for the students.

President Waters is a rising senior majoring in Business Administration. He has served as a junior class senator and as Senior Justice of the House Council, as well as serving as Treasurer of Alpha Omega Fraternity.

REVIEW: ZABRISKIE POINT

by Bill Stever

(CPS)-After surviving two wars and donning dinner-conversation conversations on Michaelangelo Antonioni's "Zabriskie Point," I have decided it's time to take a stand. "Zabriskie Point" is an excellent film. It is excellent if for no other reason than it stimulates more discussion than any film in recent memory. Perhaps more than any film since "2001: A Space Odyssey," as MGM, which released it, claims. Very few people agree on anything concerning "Zabriskie Point," as was evidenced during a panel discussion following a screening of the film at the College Editor's Conference (CCE) in Washington this month.

At the session, "Zabriskie" was termed both revolutionary and counter-revolutionary, a weather forecast of things to come and a fantasy, and a realization of our hopes for the future. Young people are burning Bank of America branches in California and blowing up ROTC buildings on campuses from coast to coast.

And Antonioni is telling America that's the way it's going to be. He does so with extremely fine photography and visual effects. That's the one thing very few people disagree on. Antonioni is a master with his camera. Likewise, the music is well chosen, the natural setting of the part of the film around "Zabriskie Point" is beautiful and the love scene which brings life to Death Valley is highly pleasing.

The rap session at the film's opening with Kathi Clemmer is just as realistic as the one that took place in the theater after the film's screening at the CCE. But the film's ending is uncertain, both in its graphic technique and in its message. Daria is very much like a lot of other young Americans who come forth and are betrayed by their hopes for them.

HOW A BLACK FELT AT THE GRIDIRON CLUB

by Roger Wilkins

"(CPS)-The guests (at the Gridiron Club Banquet) are generally gregarious and gracious. But the event's importance is beyond the structure of graciousness because it shows the most powerful element of the nation's daily press and all elements of the nation's government united in symbolic embrace. The rich and the powerful in jetskiing and in the television media talk about themselves and their country. I don't feel very good about it when they told me..."

One thing quickly became clear about those faces. Apart from Walter Washington, I suppose, as Mayor, had to be invited - mine was the face in a crowd of some 500 that was not white. There were no Indians there were no Puerto Ricans, there were no Mexican-Americans. There were just the Mayor and me...

But it was not the people sitting with me that night, or the evening. It was the humor amidst that phenomenal inanity. What was going on in this country that the people gave the evening its form and substance. There were many jokes about the "Southern Strategy." White people have funny black jokes. And some of them found something to laugh about in the Southern strategy. But I don't think it's funny at all. That strategy hits white people, black people, Indians - people don't think its funny in any sense of humor. And White people have fun with those. Black people know the "Southern strategy." The white people don't.

McFarland asked the crowd, "How many of you who would rather be here than in the best hospital in Washington?" The not too surprising response was positive. The participants took the crowd on its placards and banners, particularly the sign, "Win America! Save it for me." "That's a good one," I thought, as I flashed to the crowd to cheer for the sign. But the signs were in abundance. Ask what flag was not patriotic. A congressman proclaimed, "This is my flag. And we won that war that year." After lead singer of the Republic, McFarland's hymn leader directed the singing of the nation's song. A few of the words were

Several groups passed out literature laying Jewish, Catholic, black, socialists and atheists to the Communist menace which they said must stop.
RECENT CAMP-IN PROTESTS BASF

by Terence Seyden

On the weekend of April 13, a camp-in was held at Hilton Head Island to generate opposition to the location there of a German petrochemical plant. Approximately 100 people from across the country participated in the affair which lasted from Friday afternoon until Sunday afternoon. The staging area was in sight of the proposed BASF plant.

The weekend started informally Friday night with several folk singers and informal raps. On Saturday, an ecologist from Shorrier College led a tour of the marsh and explained the tremendous value of preserving the marshlands. That evening the formal discussions were held with John Mitchell of the Sierra Club and author of “Knotstick.” Marion Eley, from the League of Conservation Voters, discussed how to increase the political power of the conservationists. Bob Hanie, Director of the Georgia Natural Areas Council, started off his comments with: “We are here to affirm life. a new life style, and to delineate alternatives.”

“Tom Barnwell, of the all-black fishing and oyster cooperative located at Hilton Head, stated that a suit had been brought against BASF and, that “We had no choice; it was a matter of our livelihood,” During the discussions throughout the weekend, several serious points were raised about BASF. One of the most serious dangers, according to geologist Roger Pinckney, was that the proposed dredging of a deep-water harbor would cause a break into the artesian aquifer which supplies water for much of the coastal Carolina - Georgia area. Salt water contamination of the aquifer could become a major problem. In addition, BASF has not released specific information as to the exact composition of its effluent. It is known that the effluent will contain metallic salts, some of which are dangerous to aquatic life even in extremely minute quantities. Also, in connection with the plant will be the establishment of a Free Foreign Trade Zone, with provisions for the importation of a daily 40,000 barrels of naptha. The danger of toxic waste and contamination from this are said to be serious. The German firm plans to make the plant a

by Steve Langston

On April 22nd Student Operation Survival will plan an action across the nation in trying to bring to the attention of the public, the problem of Environmental Pollution. This action will begin with several professors, their classes, and volunteers. Their lectures will concentrate on the Environmental Problem as it applies to their discipline. Among those professors that will participate are Dr. S.K. Shatkin speaking on environment and economics, Mr. Stuart Worthington who will lecture on Man’s Irresponsibility, and A Psychological Approach to Pollution, and Dr. David Perry from the International Communication Center. Mr. Bernard Comaskey has already planned an action for the Earth Day of April 22nd at Hilton Head Island to generate opposition to the location there of a Galman petrochemical plant. Approximately 100 people from across the country participated in the affair which lasted from Friday afternoon until Sunday afternoon. The staging area was in sight of the proposed BASF plant.

The idea of Student Operation Survival began with a discussion on “Environmental Irresponsibility” in Dr. Worthington’s senior seminar class during the early part of Winter Quarter. Some students decided to form S.O.S. in hopes of taking action on the problem rather than just talking about it. With advice from Dr. Worthington and Dr. Les Davenport, several rallies were organized, at which approximately 800 people attended. Terence Seyden, co-ordinator for Earth Day, stated that S.O.S. is giving people information and trying to develop an in-depth understanding of the problem, of all aspects of improving the environment, the class last night environmental quality. The main aim of S.O.S. is to try to disseminate our information for full understanding of the problem. We want to establish a foundation for knowledgeable action. Later we will develop action plans. Thus the main purpose of Earth Day will be to acquaint the general public with the problem, solutions, and related aspects (including the urgency) on environmental pollution.

In conjunction with the activities at Armstrong, S.O.S. is making tentative plans to secure a booth at Oldenburg Mall for distribution of environmental control literature.

Terence Seyden has many “follow-up” projects including a rally every two weeks for the rest of the quarter. Also S.O.S. is in making tapes to be monitored on Savannah radio stations. In addition, S.O.S. is planning to sponsor a lecture on pollution each Wednesday night from April 22nd until May 27th. The first speaker will be Dr. Debro, a radiation biologist at Oglethorpe Mall.

Other action has included Terence Seyden addressing local high schools and Dr. Davenport speaking to certain interested groups on the ecological aspects of pollution.

Dr. Worthington stated that Student Operation Survival is an “ongoing program.” Their primary goal is to... keep efforts (those of environmental control groups) in the public eye. We are not going to be satisfied with rhetoric, we are seeking local as well as national and international improvements. We need grass roots support to provide us with the people responsible to legislators.

Sigma Kappa Sorority won the first Armstrong “500” bicycle race held Sunday, April 12, at the school parking lot. Following the race, Coach Bogid explained the sorority would present a first-place trophy and announced that it would be added to their intramural totals.

Coach Brochwell explained that the race consisted of 500 yards, 1 lap around a bicycle around the parking lot. A group of girls, sorority chief or the team, could enter the race, and each team could have as many riders as needed. The restrictions were that only one bicycle could be used and that the riders only be the intramural totals.

Adrie Carter was the winning rider for Sigma Kappa Sorority from an early lead, which was never really
**ENVIRONMENTAL FACT SHEET**

The U.S. spends more on the war in Vietnam in two weeks than it has spent on air pollution control in the past ten years. (Environmental Action, 1/3/70)

At the present rate of population growth, the U.S. will have to build the equivalent of one new city of 250,000 inhabitants every 20 days for the rest of the century. (Dr. R.O. Egeberg, Washington Post, 11/12/69)

"If wedevoted our entire food surplus for one year to the world's hungry, it would be the equivalent of only two teaspoonfuls of rice every 17 days per person."

[Senator George McGovern]

Over 15 million fish died last year from water pollution. (Senator Edmund Muskie, 12/10/69)

The Cayahoga River, because of the irresponsibility of polluters, is contaminated with flammable oil and petroleum by-products, that it caught on fire!!

Children in Chicago are kept inside during recess on heavy smog days. (Chicago Tribune, 1/16/70)

Well-informed scientists reckon that if city noise continues to rise as it is presently rising, by one decade a year, everyone will be sealed in the year 2000. (New York Times, 11/23/69)

A recent survey of litter along one-mile stretch of Kansas highway turned up the following: 770 paper cups, 730 empty cigarette packs, 580 beer cans, 130 soda drink bottles, 120 beer bottles, 119 whiskey bottles, and 90 beer cartons. (U.S. News and World Report, 9/18/69)

Americans average 12 ppm of DDT in their fatty tissue. (According to FDA standards, we are safe to eat!)

Some lobsters now receive more DDT in their mother's milk than is permitted in cow's milk.

According to a study published in the Emory University Journal of Public Law, 1968, the following states have limited or no laws whatsoever covering general use and application of pesticides. Alabama, Alaks, Delaware, Georgia, Kentucky, Maryland, Missouri, Montana, Nebraska, New Jersey, Pennsylvania, South Carolina, Vermonia, Virginia, West Virginia, Wisconsin.

**COMPUTERS SHORT-CIRCUIT AIR AND WATER POLLUTION**

PITTSBURGH—(CPS)—On a recent Friday in heavily industrial Greater Pittsburgh, a temperature inversion trapped air-borne pollutants, creating a potential health hazard for residents. The Allegheny County Health Department received a vital early warning of the conditions from a computerized system of air pollution monitoring.

In the Pittsburgh incident, information transmitted electronically to an IBM computer from sensing devices resulted in the ordering of an alert which lasted six hours. During the alert, the area's heavily industry-including steel mills—carried pol- lution--breeding operations.

The next step, had the situation persisted, would have been to restrict downtown auto traffic. In this instance, it was not necessary.

Computer-based systems also are being used in pollution research and control in Hartford, Conn.: State College, Pa., and Chicago.

Scientists at the Travellers Research Corp. in Hartford, Conn., soon to be known as the Center for the Environment and Man, are testing various methods of reducing air pollution by simulating atmospheric conditions inside a computer. Aimed at providing specific recommendations for improving the environment's air quality, the research is based on a mathematical model developed by the Travelers for use in an IBM system.

At Penn State University, computerized research is underway on systems with information common to cold or other respiratory ailments. By the year 2000, there will be a large delegation of demographers, high winds and intermittent rain cut short the afternoon meeting of the demonstrators. The hawks, who began drifting away long before Georgia Gov. Lester Maddox spoke against government leniency on Communists.

**CAMP-IN PROTESTS BASF**

(Continued from pg. 3)

BASF is considering locating in Savannah, if this is so, leaders in the conservation groups who have opposed BASF coming to Hilton Head have stated that the industry should still be required to process its effluent so that the receiving stream would suffer no degradation. There is also strong feeling that no permission should be given to BASF, until it publicly announces that specific pollutants it will discharge and until some economic guarantee is set up to prevent any degradation of the environment.

**VICTORY REVIVAL**

(Continued from pg. 2)

oped before peace can be attained. One demonstr- ator said he wished Head had finished the job of "cleaning out" Jewish Communists. Several of the placards offered the same sentiment.

At the National States Rights Party, described by rally staff members as a new socialist group for the South, a large delegation of demonstrators led by two hawks who began drifting away long before Georgia Gov. Lester Maddox spoke against government leniency on Communists.

"...it looks as if we're just about pushed our environment to its limit."

**GEECHEE GATHERINGS**

**by Jim Burch**

Armstrong State College announced recently that Danny Stell will be inducted in the 1970 volume of Outstanding Athletes of America. Stell is among approximately 5000 athletes chosen to appear in this publication. During his two years at Armstrong, Stell broke over 20 individual basketball hall records including the career 1970 points and the single season scoring record. Stell made the NAIA All-American Honorable Mention team, and was chosen both years for the coaches' All-Conference team. This past season Stell was chosen to the GIAC players' All-Conference team, and he was also unanimously chosen by the players in the GIAC as the most valuable player in the conference.

Both students and faculty have reason to be proud of Danny Stell for his contributions to the sports program at Armstrong.

**ASC GOLF**

Last issue, the Inkwell had an interview with Jim Brotherton, captain of the 1970 Armstrong Golf Team. Jim Inkwell stuff talked with Jim about the golf team’s chances of moving to the Nationals this June. The deciding factor will be Armstrong's experience. Although Armstrong’s golf team is honored throughout the state, the team this year has only two returning members, Jim Brotherton and Phil Grey. Newcomers Jack Lindsey and Mike Cohen have improved 100% since the beginning of the present tour and will do a splendid job for Armstrong in the upcoming District Tournament in May. Phil Grey, Robert Bradley, Bob Ferrelle, and Captain Jim Brotherton will, of course, help keep the scores low and add strength to an already improving team. At press time the Inkwell didn’t have the scores from last week’s match with Augusta State College. This week the golf team is playing Augusta again, in Augusta, and Ga. Southwestern in Statesboro.

**ALPHA GAMMA DELTA**

On April 4, Alpha Gamma Delta, held its annual Easter egg hunt. This year’s hunt took place at Fort Pulaski and children from St. Mary’s Home. After the five dozen eggs were found, the prizes awarded, and refreshments served, the children were taken home. However, before leaving, thanks to the special efforts of Vicki Herrington in her bunny suit, the Easter bunny paid a visit to the children. Fanny Farmers donated some of the candy and prizes.

Besides the Easter activities, a raffle was sponsored by the women’s fraternity. The tickets printed was donated by the ‘I’ Shop, Inc.

The first place winner, Mark Mamalakes, won an evening to two consisting of a dinner at Hester’s Martinique and a movie at any Weiss Theatre. Mrs. James N. Staubes, the second place winner won a movie, also at any Weiss Theatre. The names were drawn by Mike Joyce, President of the senior class.

Sunday, April 10, Alpha Gamma was second to Sigma Kappa in the Armstrong 500 Bicycle Race. Despite the bruises and sore muscles, the girls enjoyed the race and are looking forward to next year’s race.

Other activities of Alpha Gamma were the leukemia drive held on April 1st and Pioneer Day, featuring Aunt Gerly’s Delicatessen and a turtle and crab race.

Recently, an election was held for next year’s officers. They are: Frank Cohen, rush; Bunny Pollock, vice president; Kay Hardy, secretary; Vicki Herrington, treasurer; Jean McKenzie, Rush chairman; Carol Martin, editor, and Mury Ford, Panhellenic representative.

**PHI MU**

Phi Mu is proud to have three new pledges this quarter—Nancy Mauburger, a freshman; Cornelia Robertson, a sophomore; and Paulette Kaluzny, a junior. The pledge ceremony was held on Easter Sunday evening in the lounge of the Student Center.

Phi Mu would like to commend Nancy Mauburger, a junior for her recent 4.0 scholastic average. Phi Mu has been emphasizing its scholastic average recently, and has raised it considerably since fall quarter.

The pledges have been busy organizing Phi Mu’s booth for Pioneer Day. The booth was a General Store with popcorn, peanuts and old-fashioned candy. Phi Mu also sponsored an apple bob.

Phi Mu’s hats are off to Sigma Kappa for winning the “Armstrong 500” Bicycle Race. The contestants acquired a lot of skewed knees and elbows, but it was a lot of fun! Phi Mu is still ahead in the intramurals.

The sorority is currently busy with projects to raise money for its President and two sisters to the Phi Mu National Convention. The convention will be held in French Lick, Indiana the second week in July.

The Washborad Band was asked to play on April 11th for the Mason’s banquet in Garden City. The band donated the money they made to the fund for the National Convention.

On Friday, April 25th, Phi Mu is having a game party in the new Student Center. This party is open to anyone who would like to come. Tickets are $1.00 per person and are available from any Phi Mu sister. There will be door prizes, refreshments, and entertainment by a band.

Treasurer, Jan Doty, was elected Sophomore Senator in the recent Student Government.

**ASC Faculty Secretary plays theatrical lead**

Armstrong’s Peggy Strong is currently holding down a leading part in Oh Dad, Poor Dad, Mama’s Hung You in the Closet and I’m Feelin’ So Bad at Savannah’s newest playhouse, The Lincoln Street Theatre.

Mrs. Strong, who works as faculty secretary at Armstrong, is the real-life Madame Rosepettelle in the Arthur Kopit farce. She has worked as a professional dancer in New York, and appeared on the Broadway stage. She has also played in several Armstrong productions, including Lee of Virginia, Take Me Along, Pinter Sketches and Ping Pong.

Before coming to work for the Lincoln Street Theatre, she played in 110 in the Shade, and A Very Rich Woman at the Savannah Little Theatre. She has also been on the boards in the Hunter Ensemble production of Invitation to a March.

The Lincoln Street Theatre, located above The Sign of the White Hart restaurant, is owned by President and Lincoln Streets, opened its doors for the first time in January with Neal Simon's Star Spangled Girl. The director of the theatre, Rusty Russell says that the theatre’s aim is to present “all kinds of plays” from the classics to contemporary comedy and drama on a regular basis.

Student rate tickets are available and may be obtained by calling either 233-0018 or 233-7471.

“Of Dad, Poor Dad” is scheduled to run through April on Tuesday thru Saturday nights.

Frank A. Hancock (left) and Peggy Strong, Armstrong State College faculty secretary, rehearse a comic scene from Oh Dad, Poor Dad.

In the Closet and I’m Feelin’ So Bad. “Oh Dad” is the current production at the new Lincoln Street Theatre.
