Papert, S. (2000). What’s the big idea? Toward a pedagogy of idea power. IBM Systems Journal, 39(3&4), 720-729. In this article, Papert decries how formal education has a tendency to disempower ideas in order to make them fit into a pedagogical framework. Papert writes, “Setting ourselves the task of re-empowering the ideas being learned is also a step toward re-empowering the idea of learning by discovery.” https://doi.org/10.1147/sj.393.0720
