Homeless College Students Are A Reality

Demink and Morales to Represent Armstrong

The results are in for the 2018-2019 SGA Elections. Several student spots across all three campuses cam- puses will be held by Nunez. Student Government Associ- nation.

"Starting this fall, there will be over 50 students serv- ing in SGA. This includes delegates from all nine col- leges such as the College of Health Professions and the College of Science and Math- ematics.

The new SGA board will be constructed in a sophis- ticated way in that concerns from the Liberty, Statesboro, and Savannah Campuses are all addressed and reported back to the SGA president, Jarvis Steele, who will then consider input from those concerns.

Among those who won were Armstrong students Spencer Demink and Yil- nette Nunez. These students will both serve as delegates of the Armstrong and Liberty Cam- puses. Spencer will serve as the Executive Vice President and Nunez will serve as the Executive Vice President of SGA.

Spencer was elated once he found out the good news and has high goals for next school year. He mentioned that "with a new SGA and a smoother process, we can address more issues that need to be solved and make SGA more transparent and accessible to the stu- dent body."

With a large and consoli- dated university brings an issue for students when regis- tering for classes. Some are not quite sure how to access FWSG, the new student port- al, which is required for all GSU students to register for fall classes.

There has also been growing concerns if students’ academic grades will be affect- ed. Spencer plans to resolve these issues so that students can have an easy transition into classes with as little ob- struction as possible. We are going to work closely with administration to make sure they are listening to what the students want, as well as having them inform the student body in a timely manner and allow the student body to give feedback," he added.

Villette Morales Nunez will be charged with the task of maintaining all disburse- ment and financial operations of the Armstrong campus of GSU. She will be responsible for student expenditures by organiza- tions receiving funding from SGA.

Nunez currently serves as a Senate member and has also made the Dean’s List of GSU and two Executive Vice Presidents of the Statesboro Armstrong and Liberty campsuses.

This new act should be con- structed in a sophis- ticated way in that concerns from the Liberty, Statesboro, and Savannah Campuses are all addressed and reported back to the SGA president, Jarvis Steele, who will then consider input from those concerns. This new act should be.

Nunez currently serves as a Senate member and has also made the Dean’s List of GSU and two Executive Vice Presidents of the Statesboro Armstrong and Liberty campuses. Each week there will be meetings held between executive boards from each campus.

There will also be con-
Circuit Board in the U.S. and Europe. During the 1980s, he was known for his work on high-temperature superconductors. His research on this topic led to the discovery of the first superconducting material, which opened up new possibilities for the development of superconducting devices and technologies.

Following his work on superconductors, Buzulutis turned his attention to the study of novel electronic materials. This period of his career was marked by a series of groundbreaking discoveries, including the development of new types of semiconductors that could be used in the fabrication of advanced electronic devices.

Throughout his career, Buzulutis has been recognized for his contributions to the field of materials science. He has received numerous awards and honors, including Fellowships from the American Physical Society and the Materials Research Society. His research has been widely cited and has had a significant impact on the field of materials science.

In 2020, Buzulutis retired from his position as a professor at the University of California, Berkeley, where he had spent the majority of his career. He continues to be actively involved in the scientific community and is currently working on several new research projects.

Buzulutis' legacy in the field of materials science is a testament to his dedication and commitment to advancing the understanding of the properties and behavior of materials. His work has had a lasting impact on the field, and his contributions will be remembered for years to come.

In addition to his scientific achievements, Buzulutis is also known for his love of music and his contributions to the world of music. He has been a part of several music groups and has performed at various events and venues. His passion for music has inspired him to incorporate musical elements into his research, and he has used his scientific knowledge to create new musical compositions.

Buzulutis' research and musical pursuits have brought him recognition and admiration from both the scientific and musical communities. He has been the recipient of numerous awards and honors, including the National Medal of Science, which is the highest honor given to scientists by the United States government.

Despite his many accomplishments, Buzulutis remains humble and dedicated to his work. He continues to inspire others with his passion for science and music, and his legacy will continue to be celebrated for generations to come.
Our editors come up against the idea that we are in a Billy Collins poem—a speaker who is getting my information from my private life. Though his sentences are not flamboyant nor embellished, his simple compositions overflow with wit, humor and depth that touches the very essence of the human experience.

In the spirit of poetry month, I chose “Introduction to Poetry” by Billy Collins in hopes to inspire you readers to analyze poems you come across this month with patience and an open mind.

Introduction to Poetry
By Billy Collins

I ask them to take a poem and hold it up to the light like a color slide or press an ear against its surface as if they were waterskiing across the entire composition. I want them to waterski across the surface of a poem waving at the author’s name on the shore. But all they want to do is the poem to a chair with rope and force it. They begin beating it with a hose to find out what it really means.

In “Introduction to Poetry,” Collins personifies a poem with the intention to motivate readers to dissect them in a more sensual manner and avoid overly analyzing them. The title of this poem suggests that it is written from a teacher’s perspective, advising students how to treat the poem placed in front of them. To truly understand the meaning of a poem, one must gently probe their way through each line, like the metaphorical mouse does in the third stanza.

One must slowly and carefully feel each word as if they were feeling the walls for a light switch in the middle of a dark room. One must glide across the entirety of the composition as if they were waterwalking across it. However, one must not tie a poem to chair and torture a confession out of it. Read deep into poetry, as with any other forms of art, rob the piece of its intended meaning and beauty. While we celebrate poety month, I urge you to invite Collins words into account next time you find yourself reading poetry. Try holding the poem up to the light like a color slide and avoid tying it to a chair. It may be starting to boil with a hose to find its meaning.

You may be surprised by gratifying feeling that can be experienced when analyzing a poem with kindness and curiosity.
The SGA Minute

The Senate presented new legislation that would allow Georgia Southern to host athletic events for recruitment. While athletics on the Statesboro campus, the Senate recommended the Senate to host athletic events, with a valid E.D. In Statesboro, the Senate further stated that the intent is to have Armstrong representatives at the table when the decisions on recruiting and renamings are made. The Senate presented the new legislation that would allow the creation of a twenty-four-hour and five-day learning week. Given that one already exists on the Statesboro campus, the availability of one the Armstrong campus may not be reasonable. The ideal candidate would be the Learning Commons. Although Lane Library could also be an option. Should the Learning Commons be selected, the proposed opening hours are entering on Monday and remaining open until 10 PM on Friday with closure still occurring on Saturday. The vote on this legislation will occur next Monday.

The Deadman rose. Roux made an easy challenge of his champion but didn’t have an easy time; the match was a solid one of both fighters. Roux doesn’t just have a title match, it was a solid match but not one to remember. Randy Orton walked in as the champion but didn’t have an easy time; he wasn’t even in involved in the decision. Jinder Mahal would come gold again in his return to WWE as he pinned Rusev, on Raw. Day, to hoist the United States title while Bobby Roode wasn’t as involved.

Ronda Rousey. Just the thought of her name and being put into the same sentence still has some flabbergasted. Roux would team up with Olympic gold medalist and Hall of Fame Kurt Angle against Triple H and Stephanie McMahon. In Roux’s debut match, many wondered how she would look and, by day, she didn’t disappoint. Roux’s move to WWE was already ready to get fans excited. She has shown her skills in the ring, which included squaring up with Triple H. Rousey would expect a bright future in front of her eyes.

As most WWE fans know, Roux has been working hard to put on a show as Styles and Shinsuke Nakamura two showed mad respect after the match but they didn’t want that fight. In Roux’s debut match, it was a solid match but not one to remember. Randy Orton walked in as the champion but didn’t have an easy time; the match was a solid one of both fighters.
