BIOS 7544 – Data Management for Biostatistics  
Spring 2018

**Instructor:** Dr. Jingjing Yin  
**Office:** Hendricks Hall 1007  
**Phone:** 912.478.2413  
**Email:** jyin@georgiasouthern.edu  
**Website:** Folio  
**Teaching Assistant:** Deborah Kanda (dk01636@georgiasouthern.edu)  
**Time:** Tuesday & Thursday 2:00-3:15pm (Some labs can extend to 3:40pm as necessary)  
**Office Hours:** Mondays 10am - 1pm and Tuesdays 10am -12pm.  
**GA:** Wednesdays from 4-5pm and Fridays 1-2pm in Hendricks Hall 1004

**Catalog Description:** This course emphasizes data management and software applications using the SAS (Statistical Analysis System) software package. It will introduce the student to SAS codes for: inputting and outputting data, creating temporary and permanent data sets, creating formatted and labeled SAS data sets, merging and connecting SAS data sets, creating output using the TABULATE and REPORT procedures, debugging a SAS program that includes the TABULATE, REPORT and SQL procedures, using characteristic functions in SAS, using a random number generator, probability distributions, arrays, and date and time functions. Students will also write a simple and complex query using the SQL procedure; create, populate and modify a set of tables/views using the SQL procedure; and create a SAS program which includes one or more macros. This course will cover basic relational database design and descriptive statistics in SAS. Particular focus is placed on applications pertaining to public health and biomedical research. 4 credit hours.

**Other Resources:**  
1) For statistics basic theory:  
http://faculty.ksu.edu.sa/73917/Documents/BIOSTATISTICS.pdf  

**MPH Core Student Learning Outcomes**

1. Demonstrate proficiency and effectiveness in the communication of core public health principles and practices, both oral and written.
2. Demonstrate proficiency in the integration of the core public health disciplines (Biostatistics, Epidemiology, Environmental Health, Health Policy/Management, and Social/Behavioral Science) in practice and research.
3. Demonstrate proficiency in problem solving, critical thinking, and public health leadership

**MPH Biostatistics Student Learning Outcomes (BIOS)**

1. Construct a public health and biomedical research question from ideas, conditions, and events that exist in a rural and urban community, region, state, and nation using critical thinking skills.
2. Design an experiment, survey or clinical trial pertaining to a public health and biomedical research question in order to collect the data needed to meet objectives of public health research.
3. Select appropriate statistical tools, methodological alternatives and graphical descriptives to analyze and summarize public health and biomedical data
4. Interpret results of biostatistical analyses so that valid and reliable conclusions regarding a public health and biomedical research question may be drawn from the analyses.
5. Communicate biostatistical principles and concepts to lay and professional audiences through both oral and written communication.

**MPH Concentration Competencies in Biostatistics**

1. Provide the biostatistical the components of the design of a public health or biomedical experiment by: clarifying the research objectives or questions; determining data and endpoints to be collected appropriate for the objectives; translating the objectives into biostatistical questions via hypothesis testing or confidence interval frameworks; determining the appropriate sample size; and writing the statistical analysis section of the experiment.
2. Apply appropriate statistical analysis methods using SAS to analyze both categorical and quantitative data.
3. Develop written and oral reports to communicate effectively to research investigators pivotal aspects of a study, including its design, objectives, data, analysis methods, results, and conclusions ensuring that results and conclusions are valid and reliable and address the research objectives.
4. Create a collaborative environment for working on written and oral reports and developing critical thinking skills.
5. Describe key concepts and theory underlying biostatistical methodology used in probability and inferential, analytical, and descriptive statistics

Performance-Based Objectives Linked to Course Activities (Note: Activities Described in Next Section)

1. Students will create SAS codes for inputting and outputting data into permanent and temporary data sets that are labeled and formatted.
2. Students will write SAS codes to merge and connect data sets and create new variables from existing ones with efficient code utilizing arrays and loops.
3. Students will create output using the TABULATE and REPORT procedures.

Assessment of Student Learning
Activity 1: A series of programming tasks will measure objective 1 progressively throughout the semester.
Activity 2: A real data project will be used to measure objective 2.
Activity 3: A final examination will be used to assess all three objectives.
### Overview of the content to be covered during the semester:

<table>
<thead>
<tr>
<th>Week</th>

**Instructional Methods:**

Class meetings will be a combination of lectures, class discussions, computer software demonstrations and guided student labs. Written homework assignments and examinations constitute the basis of student evaluation.

**Exam Schedule and Final Exam:**

Midterm Exam: TBA
Final Exam: TBA

**Grading:** Weighting of assignments for purposes of grading will be as follows:

<table>
<thead>
<tr>
<th></th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lab Assignments</td>
<td>60%</td>
</tr>
<tr>
<td>Midterm Exam</td>
<td>20%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>20%</td>
</tr>
</tbody>
</table>

The following point scale will be utilized in grading:

<table>
<thead>
<tr>
<th>Points</th>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>90-100 points</td>
<td>(90%) A</td>
<td></td>
</tr>
<tr>
<td>80-to-89 points</td>
<td>(80%) B</td>
<td></td>
</tr>
<tr>
<td>70-to-79 points</td>
<td>(70%) C</td>
<td></td>
</tr>
<tr>
<td>60-to-69 points</td>
<td>(60%) D</td>
<td></td>
</tr>
</tbody>
</table>

A cumulative total of 59 points or less will be considered as failing.

Your grades of lab assignments will not be posted. All lab assignments will be graded and returned promptly so that students may accurately calculate their grades at any point in time during the semester.

There are times when extraordinary circumstances occur (e.g., serious illness, death in the family, etc.). In such circumstances, and/or if you need additional time to satisfactorily complete any course requirement, please consult with the instructor within a reasonable
amount of time. *Nota Bene:* Extensions are not guaranteed and will be granted solely at the discretion of the instructor.

**Academic Misconduct:** As a student registered at this University, it is expected that you will adhere to only the strictest standards of conduct. It is recommended that you review the latest edition of the *Student Conduct Code* book, as well as the latest *Undergraduate & Graduate Catalog* to familiarize yourself with the University’s policies in this regard. Your continued enrollment in this course is an implied contract between you and the instructor on this issue; from this point forward, it is assumed that you will conduct yourself appropriately.

Academic integrity relates to the appropriate use of intellectual property. The syllabus, lecture notes, and all materials presented and/or distributed during this course are protected by copyright law. Students are authorized to take notes in class, but that authorization extends only to making one set of notes for personal (and no other) use. As such, students are not authorized to sell, license, commercially publish, distribute, transmit, display, or record notes in or from class without the express written permission of the instructor.

**Academic Handbook:** Students are expected to abide by the Academic Handbook, located at [http://students.georgiasouthern.edu/sta/guide/](http://students.georgiasouthern.edu/sta/guide/). Your failure to comply with any part of this Handbook may be a violation and thus, you may receive an F in the course and/or be referred for disciplinary action.

**University Calendar for the Semester:** The University Calendar is located with the semester schedule, and can be found at: [http://www.collegesource.org/displayinfo/catalink.asp](http://www.collegesource.org/displayinfo/catalink.asp).

**Attendance Policy:** Federal regulations require attendance be verified prior to distribution of financial aid allotments. Attendance will not be recorded after this initial period.

**One Final Note:** The contents of this syllabus are as complete and accurate as possible. The instructor reserves the right to make any changes necessary to the syllabus and course material. The instructor will make every effort to inform students of changes as they occur. It is the responsibility of the student to know what changes have been made in order to successfully complete the requirements of the course.
