This event is brought to you for free and open access by the Events- Conferences and Programs at Digital Commons@Georgia Southern. It has been accepted for inclusion in Georgia Association for Positive Behavior Support Conference by an authorized administrator of Digital Commons@Georgia Southern. For more information, please contact digitalcommons@georgiasouthern.edu.
Georgia Association for Positive Behavior Support
8th Annual Conference
December 2nd and 3rd, 2015
Georgia State University
Atlanta, Georgia

The Power of Positive Supports: Home, School, and Community
Is your PBIS messaging strategy EFFECTIVE, AFFIRMING, & INCLUSIVE?
We can help!

Waresboro Elementary School
BE RESPECTFUL
BE RESPONSIBLE
BE SAFE
“Be the EAGLE!”

We custom design and brand your core values and behavior expectations clearly, professionally and concisely!

Serving Georgia Schools Since 1981

YOUR #1 RESOURCE IN GEORGIA FOR PBIS MESSAGE BRANDING & SCHOOL-TO-STUDENT COMMUNICATION
Appreciation

Center for Leadership in Disability
GAPBS would like to thank the Center for Leadership in Disability (CLD) at Georgia State University for their generous support of the GAPBS Conference. The CLD maintains the GAPBS website, registration process, venue coordination, and finances. To learn more about the CLD’s work related to positive behavior support visit www.cld-gsu.org.

Georgia Department of Education
GAPBS would like to thank the Georgia Department of Education (GaDOE) for their generous support of the GAPBS Conference. This year the GaDOE provided the programs to conference attendees. To learn more about the GaDOE’s work related to PBIS, visit www.gadoe.org.

Bright from the Start: Georgia Department of Early Care and Learning
GAPBS would like to thank the Georgia Department of Early Care and Learning (DECAL) for their generous support of the GAPBS Conference. This year DECAL provided scholarships for early childhood educators to attend the GAPBS Conference. To learn more about DECAL’s work related to positive behavior support visit http://decal.ga.gov/

Parent to Parent of Georgia
GAPBS would like to thank Parent to Parent of Georgia for their generous support of the 2015 GAPBS Conference. This year Parent to Parent of Georgia provided resources, transportation, and interpretation services in order to give 40 bi-lingual and Spanish-speaking family members the opportunity to attend a talk on preventing and reducing challenging child behaviors. Visit this site to learn more about the services provided by Parent to Parent of Georgia. www.p2pga.org  1-800-229-2038
**Georgia Southern University**

GAPBS would like to thank Georgia Southern University for their contribution to the GAPBS Conference. This year Georgia Southern University managed the proposal submission platform, Digital Commons. For more information about Georgia Southern’s work related to PBIS visit [http://www.georgiasouthern.edu/](http://www.georgiasouthern.edu/)

---

**Newton County Schools**

We would like to thank Newton County Schools for providing musical entertainment during lunch break on Wednesday, December 2nd. Please join us in Student Center East (House-Room 135) from 11:45-12:30 for a performance by the Cousins Middle School Chorus!

---

**Cousins Middle School**

*Believe. Achieve. Succeed.*
GAPBS would like to thank the following organizations for donating raffle items to the 2015 GAPBS Conference.

GAPBS would like to thank the following GNETS programs for raffle donations: South Metro, FUTURES, Sand Hills, Elam Alexander Academy, North Metro, GNETS of Oconee, DeKalb – Rockdale, Cedarwood, Heartland Academy

And finally, GAPBS would like to thank South Forty Farms, Lowndes County GA for their raffle donation
Join your colleagues and the keynote speakers for happy hour Wednesday evening! The conference shuttle will be available throughout the happy hour to bring you to the Ritz and to return you to the conference parking deck at your convenience.
This year’s conference offers the following presentation tracks:

**K-12: Elementary, Middle, and High School-**
Presentations on positive behavior support practices for elementary through high school settings. Presentations will be organized according to content that is relevant to elementary school, middle school, high school, and special populations.

**GaDOE PBIS Schools-**
Presentations from Georgia Department of Education PBIS schools.

**Birth through Five-**
Presentations teach attendees the Pyramid Model of positive behavior support, with a focus on early interventions for young children.

**Family-**
Presentations on positive behavior support in the home and community.

**Georgia Network for Educational and Therapeutic Support (GNETS)-**
Presentations on positive behavior support practices relevant to the GNETS setting.

**All Audiences-**
Presentations are suitable for all audiences (educators, family members, professionals).

You are not locked into any one track’s selection of sessions. All attendees are free to design their conference schedule with any combination of sessions that interests them most.
Biography
James (Jim) Hanson, M.Ed. is a school psychologist for Portland Public Schools. Jim has worked at Lincoln High School since 1998. He is Lincoln’s full-time school psychologist and coordinator of Lincoln’s programs for RESPONSE Suicide Awareness, anti-bullying, and character traits development. With Jim’s support and direction, Lincoln’s students helped pass Oregon’s anti-bullying laws in 2008 and 2012. Lincoln has been honored by the US Department of Justice and the Portland Mayor’s Office for its work in social justice. Jim is a former board member of Wisdom of the Elders and he is the current school-based curriculum adaptation team leader for Wisdom’s Discovering Our Story, a SAMSHA-identified promising practice based on storytelling and traditional culture designed to improve the health and wellbeing of Native American and English Language Learning students. Jim has been active in his professional association and in state and national educational initiatives. Jim served as the President of the Oregon Association of School Psychologists (OSPA) from 1995-1998 and again from 2004-2007. Jim served as OSPA Past President in 2010-2011. Jim has been honored twice by OSPA for defining contributions to the practice of school psychology. Jim served three years on the board of the Oregon Safe Schools and Communities Coalition and two years on the Oregon Coalition Against Hate Crimes.

“School-Based DBT: Merging Mental Health and Behavioral Supports for High School Students at Tiers II & III”

Dialectical Behavioral Therapy (DBT) is a research-based methodology to teach students and families emotional, behavioral, cognitive, and interpersonal regulation skills. School-Based DBT (SB-DBT) is an adaptation of DBT designed as a Tier II and Tier III mental health intervention within a Multi-Tiered System of Supports (MTSS). Data support the effectiveness of SB-DBT for students with mental health challenges.

Large-Group Session
During the large-group session, Mr. Hanson will provide an overview of SB-DBT and how it fits into a MTSS. Learn which systems that must be in place to implement SB-DBT as well as how Student Support Teams can coordinate SB-DBT with other evidence-based interventions. The SB-DBT foundation in behaviorism and dialectics will be examined. Finally, student and program results from seven years of implementation in a large urban high school in Portland, OR will be shared.

Break-Out Session
During a break-out session following the large-group session, Mr. Hanson will provide a more in-depth examination of SB-DBT implementation, fidelity, and sustainability. He will examine issues such as practitioner qualification and training and supervision, student selection, scheduling, and treatment plans/IEP goals. Practical tools such as an SB-DBT syllabus, agenda, curriculum, and orientation checklists will be shared. Finally, facilitators and obstacles to district and site-based implementation will be discussed.
Biography
Erin E. Barton, PhD, BCBA-D, is an Assistant Professor in the Department of Special Education at Vanderbilt University. She teaches courses in Early Childhood Special Education on evidence-based assessment and intervention practices for young children with disabilities and their families and single case research design. She is a Board Certified Behavior Analyst and has worked with children and families in homes, schools, and clinics. She directs research projects related to evidence-based practices for young children and professional development systems. Dr. Barton serves on several editorial boards and is an active scholar with over 50 publications in major journals, multiple chapters, and two textbooks related to evidence-based practices for young children with autism and preschool inclusion, respectively.

“Critical Issues in Play for Children with Disabilities”

Large-Group Session
The role of play is often neglected in assessing and supporting the development and learning in children with disabilities. This session will outline critical issues related to: (1) why play should be a primary learning target for children with disabilities, (2) how practitioners can assess children’s play, and (3) what strategies can be used to teach play.

Break-Out Session: “Coaching Families: A Focus on Nurturing and Responsive Relationships”
The purpose of this session is to demonstrate the use of specific evidence-based family coaching strategies with a focus on supporting nurturing and responsive relationships. The presenter will introduce specific coaching strategies (e.g., performance-based feedback, video modeling, providing opportunities for practice), describe how and when to use the coaching strategy with families, and present several examples for using each coaching strategy with families. Participants will have opportunities to practice and plan for using the family coaching techniques.
Wendy Reinke, PhD
University of Missouri

Biography
Dr. Reinke is an associate professor in school psychology at the University of Missouri and co-director of the Missouri Prevention Center. She developed the Classroom Check-up, an assessment based teacher consultation model. She has expertise in teacher consultation and prevention of disruptive behavior problems in children and youth. Dr. Reinke presents nationally, has published numerous peer-reviewed articles, and has co-authored several books, including Motivational Interviewing for Effective Classroom Management: The Classroom Check-up.

Session 1: “The Incredible Years Teacher Program: Supporting Teacher Practices to Promote Social and Emotional Health of Children”

Session 1 Description: The Incredible Years Teacher program, an evidence-based, group-delivered, video-modeling method for promoting effective classroom management and reducing disruptive behaviors. The Incredible Years Teacher program is designed to promote teachers' knowledge and use of good classroom management practices including effective praise, proactive teaching strategies, compliance training, giving effective commands, consistent consequences, ignoring, and use of time out procedures for teachers. Additionally, the program focuses on ways to foster social-emotional development among children, build positive relationships between teachers and parents, and increase parental involvement in their children’s education. The core principles and processes of the Incredible Year Teacher program will be reviewed.

Session 2: “Using Classroom Check-Up to Support Teacher Use of Effective Classroom Management Practices”

Session 2 Description: Effective classroom management is directly tied to high levels of student involvement and academic achievement, making it an important component of teaching. The increasing numbers of students with challenging behaviors entering schools present new complexities for teachers working to manage classroom behaviors. The Classroom Check-up (CCU) is a consultation model to address the need for classroom level supports. Participants will learn about the CCU framework and how to use Motivational Interviewing, an empirically driven theory of behavior change utilized by the CCU, toward developing effective classroom level interventions with teachers.

Thank you to our amazing featured speakers!

School Climate and PBIS- There is a connection
Tony Feldman & Mark Fynewever, Georgia Department of Education
This session will provide an update on the Positive Behavioral Interventions and Supports (PBIS) statewide plan and the implementation of the plan in Georgia. Learn more about the correlation between the school climate star ratings and school districts implementing the PBIS framework with fidelity. Additionally, a preview of the statewide data, the development of regional resources to support local districts, examples of outstanding schools and an innovative approach focusing on the framework for PreK-3rd grade in 3 school districts will be provided.

Understanding Each Other - Developing Positive Relationships with Challenging Students
Ann Van Buskirk, PhD & Kimberly Robinson, PhD, DeKalb-Rockdale GNETS
Understanding Each Other - Developing Positive Relationships with Challenging Students will provide participants with a framework for understanding the behavior and needs of challenging individuals. The importance of positive relationships in facilitating academic success and behavioral change will be discussed. Participants will be encouraged to identify which types of students are most challenging for them, and will be provided with positive and supportive strategies for engaging with those students. While this presentation is aimed at educators, we recognize parents as the primary teachers for their children, and will present strategies for engaging positively at home as well as in the school environment.

FEATURED PRESENTATION

Student PBIS Teams and De-Escalation Techniques Promote Positive Climate
Joy Warren, Meghan Rober, & Christi Zelek, Clements Middle School (GaDOE PBIS School)
Maintaining a positive school climate and Operational Status through PBIS is no easy task. Clements Middle School embraced PBIS and worked hard to maintain both. Find out how this middle school took on the task of keeping a positive climate and creating a safe environment through PBIS.

PBS and RTI: Best Practices and Practical Applications Using Technology
Maggie Kjer, PhD & Blake DuBose, Pearson Clinical Assessments
This presentation will focus on the practical application of PBIS and RTI for Behavior within a Multi-Tiered System of Supports (MTSS) for K-12. The common challenges expressed by districts in establishing these systems will be reviewed, as will the requisite components and processes for a complete PBIS rollout. The presenters will discuss these challenges, and how districts have utilized available online tools to help overcome them, and have more successful processes and better outcomes for their students. Please join us as we look at
how to take Behavior Improvement from theory to practice with real outcome data from schools districts in the field.

FEATURED PRESENTATION

**RAMbassadorS: Making Student Leadership the Cornerstone of PBIS Success**

Chris Williams, MPA, Andre Byrd, MEd, & Adrienlle Boisson, Newton County Schools

Newton High School is a Title I school serving 2,400 students 35 miles East of Atlanta. Now in its fourth year of PBIS implementation, data shows a successful impact on student behavior and achievement at the high school level. The objective of this presentation is to provide a map for the creation of a successful PBIS student advisory organization by detailing a) PBIS at Newton High School, b) modeling expectations with RAMbassadorS, and c) the planning and structure of the RAMbassadorS organization.

Presentation Track: K-12 (High)
Tier(s) of Intervention: Tiers 1, 2, 3

**Student Center East - Court**

**How to Sustain Excellence: Reigniting Your Mojo**

Laurel Kinard, PhD & Kelly McNabb, EdS, Cobb County Schools, Jaime Espinosa, MA, Gwinnett County Schools

Schools at all levels sometimes struggle to maintain commitment and effectiveness after several years of PBIS implementation. District level coaching support and training may need to be differentiated based on factors impacting individual schools. Learn from the experience of two metro districts who have tackled this issue and pursued strategies to reignite the commitment of their district and school teams.

**Creating Self-Sufficient Learners: Applying the Science of Self-Control and Delayed Gratification to Academic Management**

Sucheta Kamath, MA, BC-NCD, Cerebral Matters

This presentation will discuss the role of the prefrontal cortex and development of Executive Functions and self-regulation. Sucheta will present academic management techniques that promote development of organization and planning via the process of delaying gratification and self-control.

Presentation Track: K-12 (High)
Tier(s) of Intervention: Tiers 1, 2, 3, 4

**Student Center East - Senate**

**Using Check & Connect to Increase Student Attendance and Academic Performance**

Jason Cavin, BCBA, Georgia State University

This presentation details the steps and tools necessary for implementing Check & Connect, a “comprehensive student engagement intervention” (Christensen, Stout, & Pohl, 2012) with disengaged high school students. The presenters will provide a comprehensive overview of Check & Connect through a combination of didactic instruction and small group activities. Participants will leave this presentation with an understanding of the Check & Connect process.
Student Center West - Room 460/462
Positive Behavior Support System That Works- School-Wide, Classroom, & Home
Katherine McGee & Jen Owen, MEd, The Cloverleaf School
The Cloverleaf School successfully implements a school-wide positive behavior support system that builds student independence, encourages self-reflection, and promotes positive behaviors. This presentation will outline the steps for anyone to develop and implement a positive behavior support system in a school, classroom, or home.
Presentation Track: K-12 (Elementary)
Tier(s) of Intervention: Tiers 1, 2, 3

Student Center West – Room 466/468
What to do about children’s persistent challenging behaviors?
TEACH!
Daniel Crimmins, PhD, GSU Center for Leadership in Disability & Stacey Ramirez, Georgia ARC
This will be an extended session to allow parents and teachers to conduct a preliminary assessment of one child’s behavior and develop an initial behavior intervention plan. We will use the Brief Behavior Questionnaire and Intervention Plan (BBQuIP) to guide our efforts. The BBQuIP is a positive behavior support planning tool. The focus of the session will be to identify the communicative function of one child’s persistent behaviors, select ways to prevent the behavior, and select one or more replacement skills to be taught. This is a lot to accomplish in a short time, so come to this session ready to work!
Presentation Track: Family/All Audiences

An Ounce of Prevention: Pyramid Strategies to Prevent Challenging Behavior
Cassa Andrews, MEd, Georgia Department of Early Care and Learning
Self-regulation, prosocial behaviors, and emotional competence are skills that we can help children develop. Sometimes, children express their emotions or needs in ways that we view as socially unacceptable or challenging in our classrooms. Participants in this session will learn how to adapt their behaviors and environments to prevent or intervene in children’s challenging behaviors.

Spectrum Teens and the Issues They Face
Stephanie Holmes, MA, Calvary Church Counseling
Stephanie C. Holmes has interviewed and written articles with Dr. Tony Attwood, world renowned ASD/ASD expert on the issues of spectrum teens and dangerous and unhealthy special interests. Spectrum teens are facing bullying and social isolation leading to clinical levels of depression and anxiety, underachievement at school, and underemployment at work. Better understanding issues spectrum teens face will aid in implementing positive supports by understanding different paths to the same profile and what behaviors are communicating. Spectrum persons respond better to positive support and understanding than punishment when helping to change behaviors or implement change. Stephanie’s presentation will include some video interviews with Aspie teens.

**Excellence for All: A Community Viable Coaching Initiative throughout Georgia**
Sonja Ziegler, MS, Tabitha Nelson, & Jennifer Staple-Wax, PsyD, Marcus Autism Center

All children who are in need of early developmental support should receive the highest quality evidence-based intervention in their natural environments, regardless of their location. This can be achieved through collaborative coaching partnerships between specialized coaches, early childhood professionals and caregivers, empowering each team member with expert knowledge and practical skills to successfully support all children in obtaining their fullest developmental potential. The Marcus Autism Center’s currently implemented nonprofit - public collaboration model uses coaching to further develop the knowledge and skills of early childhood professionals around autism and evidence-based developmental supports through the integration of in-person coaching, live remote coaching, and collaborative web-based video review. Underlining access, efficiency and community viability, this innovative delivery of coaching allows Marcus community interventionists to support the development of early childhood professionals in public health districts throughout Georgia, who in turn empower Georgia’s parents and caregivers to best support their children’s development, thereby ensuring their best developmental trajectory.

**Student Center West - Room 464**

**Cultural Competence in Education**
Brenda Liz Muñoz & Emily Graybill, PhD, GSU Center for Leadership in Disability

Cultural competence is critical when providing supports and services to our students with mental health and behavioral health challenges and their families. Yet, cultural competence is a term that can be vague and not well defined. This presentation will provide specific recommendations for monitoring one’s own cultural competence and for ensuring culturally responsive practices when working with youth in schools and their families. Participants will gain practical strategies and resources that will help guide them on their path toward culturally competent practice.

“School-Based DBT: Merging Mental Health and Behavioral Supports for High School Students at Tiers II & III”

Dialectical Behavioral Therapy (DBT) is a research-based methodology to teach students and families emotional, behavioral, cognitive, and interpersonal regulation skills. School-Based DBT (SB-DBT) is an adaptation of DBT designed as a Tier II and Tier III mental health intervention within a Multi-Tiered System of Supports (MTSS). Data support the effectiveness of SB-DBT for students with mental health challenges.

Student Center East- Auditorium

Large-Group Session (12:45-2:15pm)
During the large-group session, Mr. Hanson will provide an overview of SB-DBT and how it fits into a MTSS. Learn which systems that must be in place to implement SB-DBT as well as how Student Support Teams can coordinate SB-DBT with other evidence-based interventions. The SB-DBT foundation in behaviorism and dialectics will be examined. Finally, student and program results from seven years of implementation in a large urban high school in Portland, OR will be shared.

Break-Out Session (2:30-4:00pm)
During a break-out session following the large-group session, Mr. Hanson will provide a more in-depth examination of SB-DBT implementation, fidelity, and sustainability. He will examine issues such as practitioner qualification and training and supervision, student selection, scheduling, and treatment plans/IEP goals. Practical tools such as an SB-DBT syllabus, agenda, curriculum, and orientation checklists will be shared. Finally, facilitators and obstacles to district and site-based implementation will be discussed.

Nashville, TN

“Critical Issues in Play for Children with Disabilities”
Student Center East - Senate

Large-Group Session (12:45-2:15pm)
The role of play is often neglected in assessing and supporting the development and learning in children with disabilities. This session will outline critical issues related to: (1) why play should be a primary learning target for children with disabilities, (2) how practitioners can assess children’s play, and (3) what strategies can be used to teach play.

Break-Out Session: “Coaching Families: A Focus on Nurturing and Responsive Relationships” (2:30-4:00pm)
The purpose of this session is to demonstrate the use of specific evidence-based family coaching strategies with a focus on supporting nurturing and responsive relationships. The presenter will introduce specific coaching strategies (e.g., performance-based feedback, video modeling, providing opportunities for practice), describe how and when to use the coaching strategy with families, and present several examples for using each coaching strategy with families. Participants will have opportunities to practice and plan for using the family coaching techniques.

Implementing Universal Screening for Mental Health in Elementary and Middle Schools

Jason Byars, Griffin-Spalding County Schools, Tammi Clarke, Muscogee County Schools, Emily Graybill, PhD & Andy Roach, PhD, GSU Center for Leadership in Disability

Through this presentation, participants will learn about the use of universal screening for mental health in three PBIS school districts in Georgia. Participants will learn about resource mapping, parental consent, facilitating the screening, analyzing the screening data, and using the results to inform supports provided through a multi-tiered system of support.

Token Boards and Beyond- Digging Deeper into Problem Behavior

Samantha Hebensteit, MEd, & Karen Barineau, EdS, DeKalb County Schools

This presentation will outline some of the challenges that arise in dealing with students with problem behaviors. The presenters will provide practical strategies to assist educators and parents in identifying problem behavior, examples will be given on how to determine the function or purpose of the behavior, and how to develop interventions to teach acceptable alternatives to that behavior. A variety of strategies will be discussed such as: token boards, behavior contracts, self-monitoring, check-in/check-out systems, and many more.

Screening for Internalizing Behavior in the Classroom

Peyton Groff, PhD, Georgia Neurobehavioral Associates

Students with internalizing behavioral concerns are an underserved segment within education that when overlooked can lead to poor academic and social outcomes. The following presentation will seek to review some of the most well documented screeners for internalizing problem behaviors. It will also provide strategies that teachers and parents can use to better look for early warning signs for internalizing problems taking into consideration age and gender.

Positive Supports for Families with Gender Nonconforming Children
Rebecca Baker, PhD, Georgia Gwinnett College
Children who demonstrate gender nonconformity face numerous challenges throughout their development. While recent years have shown a positive shift in how professionals view gender nonconformity, parents still struggle with finding helpful resources and social support in an effort to understand and empower their gender nonconforming child. Families continue to need support and advocacy as parents learn to provide an environment for their children that allows them to thrive and reach their fullest potential. This presentation provides practical tools grounded in research and theory regarding how best to support gender nonconforming children.

**Early Identification and Screening of Infants and Toddlers with Autism and Related Disorders**
Naima Bond, MEd, & Erica Chapman, EdD, Marcus Autism Center
This presentation will discuss how caregivers and early childcare providers are on the frontline of identifying and screening infants and toddlers at risk for autism and other developmental delays. Information regarding developmental milestones, early signs of autism and other related disorders, and developmental screeners will be described in great detail in order to equip parents and professionals with important knowledge and skills. Knowledge of parent/caregiver-implemented positive supports are vital to ensuring that infant and toddlers at risk get the early intervention services that they require. Marcus Autism Center is spearheading initiatives to increase evidence-based early intervention in the community settings.
Presentation Track: Birth through 5
Tier(s) of Intervention: Tiers 1, 2, 3
Session 1: “Using Classroom Check-Up to Support Teacher Use of Effective Classroom Management Practices”
(8:30-11:45am)
Effective classroom management is directly tied to high levels of student involvement and academic achievement, making it an important component of teaching. The increasing numbers of students with challenging behaviors entering schools present new complexities for teachers working to manage classroom behaviors. The Classroom Check-up (CCU) is a consultation model to address the need for classroom level supports. Participants will learn about the CCU framework and how to use Motivational Interviewing, an empirically driven theory of behavior change utilized by the CCU, toward developing effective classroom level interventions with teachers.

Session 2: “The Incredible Years Teacher Program: Supporting Teacher Practices to Promote Social and Emotional Health of Children”
(12:45-4:00pm)
The Incredible Years Teacher program is an evidence-based, group-delivered, video-modeling method for promoting effective classroom management and reducing disruptive behaviors. The Incredible Years Teacher program is designed to promote teachers’ knowledge and use of good classroom management practices including effective praise, proactive teaching strategies, compliance training, giving effective commands, consistent consequences, ignoring, and use of time out procedures for teachers. Additionally, the program focuses on ways to foster social-emotional development among children, build positive relationships between teachers and parents, and increase parental involvement in their children’s education. The core principles and processes of the Incredible Year Teacher program will be reviewed.

Teaching Social Skills in the Community to Individuals with Autism
Lisa Cymbor, BCBA, Chiara Cunningham, BCBA, & Dana Zavatkay, BCBA-D, Marcus Autism Center
Often times social skills are missed as a significant clinical need for children with high functioning autism when they are successful academically. Social skill deficits impact an individual’s ability to make meaningful friendships, to participate fully in a fully inclusive setting (e.g., public school), and to participate in community activities with their peers and family (e.g., sports events, restaurants, baseball/soccer games, etc.). An approach to selecting individual social goals, intervention techniques, and data collection procedures will be discussed.
Student Center West – Room 466/468  
**Faculty, Community, and Parental Ownership and Buy-In throughout the PBIS Process**  
Christina Craft, EdS, Heidi Thompson, & Lauren Flanagan, Mainstay Academy-Griffin GNETS  
This presentation describes the process of acquiring and maintaining staff, home and community ownership, participation and buy-in to the PBIS process.

Dialogue Journaling and Students in a Therapeutic Education Setting
Carrie Kane, MEd, David Houchins, PhD, Kris Varjas, PsyD, & James Schwab, MEd, Georgia State University
Disruptive behavior and academic achievement are concerns for all teachers, but are especially concerning for teacher in alternative settings (Lehr, Tan, & Ysseldyke, 2009). Positive school climate, including positive student-teacher relationships, is one way to address both academic achievement, and student behavior outcomes (Cohen, McCabe, Michelli, & Pickeral, 2009). In addition, implementing effective instructional strategies has been shown to improve on-task behavior as well as academic achievement (Gunter, Hummel, & Conroy, 1998). One instructional strategy that has been shown to improve student on-task behavior and writing skills is Dialogue Journaling (Regan, Mastropieri, & Scruggs, 2005).

**What Are the Stories of Students Who Attend an Alternative High School?**  
David Houchins, PhD, Kristen Varjas, PsyD, Carrie Kane, MEd, Zachary Johnson, MEd, & Mora Pressley, MEd, Georgia State University  
Students who attend alternative school have typically had a greater number of factors in their lives that put them at risk for failure in school than do their peers in traditional schools. (Fulkerson, Harrison, & Beebe, 1997). These students have a variety of stories about their experiences in school and life that contributed to their attendance in an alternative setting. Through this mixed-methods study, researchers conducted the Three Interview Series of in-depth phenomenological interviews (Seidman, 2006) with high school students to identify their experiences that have led to them attending alternative schools, what school is like at the alternative school and what are their prospects for the future and what control do they have over that. By understanding the student's perspective of how they got to the alternative school and what they think their future looks like, teachers and parents will be able to identify strategies and interventions to help students be successful at the alternative school and to help them return to traditional schools.

Stabilizing the Pyramid of Intervention
Donna Eskut, EdD, Coweta County Board of Education
Tired of seeing the pyramid of interventions (POI) topple when a student has inappropriate behaviors? The POI is established for academics. However, when behavior becomes an issue, many professionals don’t know what to do. This session will highlight the various tiers and provide ideas of what can be done from Tier 1 through Tier 3 with research based interventions. (Note: Tier 4 is considered Special Education in Georgia.) We’ll take a look at how the pyramid often topples over and what can be done to stabilize it and move forward for the sake of our students.

Reaching and Maintaining PBIS Operational Level in an Alternative Setting
Thiago Aleixo, EdS, & Hanna Kiser, EdS, Elam Alexandar Academy
After 3 years of changing obstacles into challenges and challenges into goals, we have been able to reach and maintain operational level under PBIS. An operational school has scored 80% on school-wide benchmarks of quality; school-wide benchmarks of quality consider the critical elements of PBS team, faculty commitment, effective procedures for dealing with discipline, data analysis, and the development of rules and expectations. This journey has been a teaching experience for our staff and students at Elam Alexander Academy, GNETS program. PBIS is about creating school-wide discipline codes of conduct that align with the PBIS framework, using problem solving process to reduce office discipline referrals, acknowledgement systems, and creating an overall positive school climate. In order for our team to maintain operational level we have to continually meet to review data and provide strategies and interventions that effectively impact our school. We would like to share lessons from our journey and to share experiences with others who envision the same process. Participants will become familiar with specific strategies of implementing school-wide PBIS, learn a framework for evaluating school-wide behavior data, and understand the need for comprehensive plans for wraparound support. Participants will achieve these objectives through process analysis, in-depth case study, collaborative planning, and a question and answer session.

Promoting Social Emotional Engagement through a Universal Design for Learning
Jennifer Ro, MA, CCC-SLP, Marcus Autism Center
A positive, caring, and supportive school environment paired with high levels of student engagement and motivation for learning are key factors that significantly influence a student’s success in school and, as a result, for life beyond. With school districts tasked to educate a diverse student population with a range of abilities and learning styles, teachers are challenged to maintain high levels of motivation and engagement to facilitate learning within their individual classrooms. An innovative program through the Marcus Autism Center specifically addresses these challenges within the context of the classroom through a Universal Design for Learning (UDL) framework relevant for all students in both the general education and special education settings. Based on the most current social neuroscience and on normative social emotional guidelines, the SEE-KS program facilitates teachers’ ability to meet the needs of all students through proactive planning that considers students’ developmental levels and learning styles.
Presentation Track: K-12 (Elementary)
Tier(s) of Intervention: Tiers 1 & 2

Student Center West - Room 460/462
Yoga for Regulation of Emotions
Stephen Fusco, JD, Georgia State University, & Kimberly Viel-Ruma, PhD, University of Georgia
Yoga is an ancient tradition that has been around for centuries to help center students and assist in the regulation of emotions. The presenters conducted a study at Hillside regarding the use of yoga for the
regulation of behaviors. Additionally, this program offers suggestions for the use of yoga in the classroom as a Tier-1 and Tier 2 support and provides a model to easily implement this strategy in the classroom.

Presentation Track: K-12 (High)
Tier(s) of Intervention: Tiers 1 & 2

**Student Center West – Room 466/468**

**Differentiating Instruction with Technology**
Amanda Oxford, EdS, Northwest GNETS
Differentiating instruction with Technology is a presentation intended to improve teacher and parent understanding of what differentiation looks like in a modern classroom. Differentiation strategies are not only effective tools for increasing learning and engagement but can also be an important part of a student's Individualized Education Plan.

**GNETS/GaDOE PBIS School**
Presentation Track: GNETS
Tier(s) of Intervention: Tier 4

**Student Center East - Capital**

**Prevention and Replacement of Challenging Behaviors in Young Children**
Allison O’Hara, EdS, Breanna Kelley, MSW, & Lillie Huddleston, PhD, GSU Center for Leadership in Disability
Participants will be introduced to the functions of behavior and learn why their child is engaging in challenging behaviors. Participants will be guided through the research-supported interventions aimed at prevention and replacement of challenging behaviors. Participants will have the opportunity to create an individualized behavior intervention plan for their child, student, or client via the use of the Brief Behavior Questionnaire and Intervention Planning tool (BBQuIP).

Presentation Track: Birth through Five; Family
Tier(s) of Intervention: Tiers 3 & 4

**Student Center East - Sinclair**

**Preschool Pyramid Model Tier Two: Implementation and Research**
Cynthia Vail, PhD, University of Georgia
In this session, participants will learn about the importance of teaching social/emotional skills to young children. Key social skills such as those key to developing friendships along with emotional literacy will be discussed. Finally, participants will learn about Dr. Vail’s research teaching emotion words to 3-year olds in Headstart using a bilingual approach.

Presentation Track: Birth through 5
Tier(s) of Intervention: Tier 2
Student Center East - Lanier
Development and Training of Comprehensive Behavior Intervention Plans
Jennifer Alexander, BCBA-D, & Katie Smith, BCBA-D, Comprehensive Behavior Change
When it comes to behavior intervention plans (BIP), there is a large discrepancy between what is required, what is best practice, and what is actually occurring. This presentation will cover recommended components for an effective BIP that meets federal and state requirements, research based methods for training staff and parents to implement BIPs in the school and home, and ways to evaluate BIPs once implemented. Participants will leave with a copy of the Behavior Intervention Plan Development Tool.
Presentation Track: K-12 (Elementary)
Tier(s) of Intervention: Tiers 3 & 4

Student Center East- Lucerne
Assessment and Treatment of Challenging Behaviors that Interfere with Academic and Social Development
Jamieson Ekstrom, MEd, Clarissa Priore, Shannon Hewett, Nicholas Shrewsbury, Mindy Scheithauer, BCBA-D, & Joanna Lomas Mevers, BCBA-D, Marcus Autism Center
Individuals with developmental delays are at high risk for exhibiting challenging behavior that interfere with learning and adaptive skill development. These behaviors can often be resolved, or their impact can be mediated, by the use of behavioral interventions using functional assessments and reinforcement strategies. This talk will present on research representing specific behavioral strategies used to treat challenging behavior specifically focusing on applied examples that have implications in the home, school, and community settings.
Presentation Track: K-12 (Elementary)
Tier(s) of Intervention: Tiers 3 & 4

Student Center West – Room 455
Cultural Competence, Family Support, and Disability
James Butler, Lamar County Schools, & Stacey Ramirez, Georgia ARC
The GaDOE Cultural Competence Project: Family Support, Culture and Disability was initiated approximately five years ago by the Georgia Department of Education, Division of Special Education and Services and the Center for Leadership in Disability at Georgia State University. The cultural competence project followed the Family Support, Culture, and Disability curriculum developed out of Denver, CO. The curriculum is highly interactive and is driven by participant interaction. Project participants reported gaining an understanding of the perspectives of many of the challenges faced by individuals with disabilities and their families. This understanding led to a self-reported increase in empathy among project participants. Participants in this presentation will experience parts of the 8-hour Family Support, Culture, and Disability curriculum and will leave the presentation with positive attitudes about disability, and understanding about the family perceptions of disability, the impact of culture on services, supports and attitudinal change relative to disability.
Presentation Track: Family/All Audiences
Tier(s) of Intervention: Tiers 1, 2, 3, 4
In Student Center East, take the elevator to the third floor
Cross the third floor bridge (you will go outside) to Student Center West
When you enter Student Center West, turn right
Walk to the end of the hall (past the GSU bookstore)
Turn right and go up the stairs to the 4th floor
The conference presentation rooms are on the 4th floor
After reviewing conference presentations and locations, use this template to design your own personalized quick and easy guide to the 2015 GAPBS Conference.

**Wednesday, December 2nd**

8:30-10:00am  
Session:  
Room:
