Giving Students a Voice to Create a Positive Classroom

Our goal is to provide practitioners with a candid overview of our journey toward a student-centered classroom. We will provide research-based strategies that allow students to be in charge of their own learning.

We will discuss creating learning targets for and with students. Students first need to know where they are going in order to accomplish a goal/standard. When students know where they are in a learning target, they know where to go next.

We will discuss creating success criteria for students. Why not have students see and make the rubric with you? Students have buy-in on an assignment when they know what criteria they need to accomplish.

Strategies, like Nearpod and reciprocal teaching, will be introduced. Want the students to teach themselves and each other? We will show you ways to be the guide on the side and not the sage on the stage.
