Georgia Southern University to host Invitational Mathematics Tournament

MARCH 5, 2008

Georgia Southern University will welcome more than 900 students in grades six through 12 to campus for the Invitational Mathematics Tournament.

Sponsored by the University's Department of Mathematical Sciences, the 20th annual event will be held on Saturday, March 8, in Hanner Fieldhouse.

Schools from as far away as Augusta, Brunswick, Macon and Savannah have registered for the tournament, which will feature separate categories for high school, junior varsity and junior high school teams.

"It's very exciting to see so many students eagerly give up a Saturday to participate in this contest year after year," said Susie Lanier, an assistant professor in the math department at Georgia Southern who has served as the tournament director since 1999. "The students enjoy visiting a beautiful college campus, interacting with students from other schools, and sharing their appreciation for mathematics."

Approximately 230 teams from 54 middle schools and high schools are expected to participate. Each school is allowed to enter as many as six teams per category.

Within each category, teams are placed into one of three divisions. Georgia High School Association (GHSA) schools in Class AAAAA and Class AAAA compete in Division I, all other GHSA schools compete in Division II, and private schools that are not members of the GHSA compete in Division III.

The tournament consists of a multiple-choice written test that is given in the morning and team ciphering matches that are held in the afternoon. The written test and the ciphering matches require knowledge of algebra, geometry and trigonometry, but the contestants are not allowed to use calculators during any portion of the tournament.

The maximum individual score on the written test is 200, which means that maximum team score is 800. The maximum team score in the ciphering competition is 160. Each team's final total point total is determined by combining the written test score with the ciphering match score.

Awards will be presented to the top three teams and top three individuals in each category. In addition, the Arthur G. Sparks Award of Excellence will be presented to any students who earn a perfect score on the written test. The Sparks award is named in honor of the former chair of the Department of Mathematics and Computer Science at Georgia Southern.

Georgia Southern University, a Carnegie Doctoral/Research University, offers more than 120 degree programs serving nearly 17,000 students. Through eight colleges, the University offers bachelor's, master's and doctoral degree programs built on more than a century of academic achievement. The University, one of Georgia's largest, is a top choice of Georgia's HOPE scholars and is recognized for its student-centered approach to education. Visit: www.georgiasouthern.edu
