Summer Enrollment Stands At 1,575

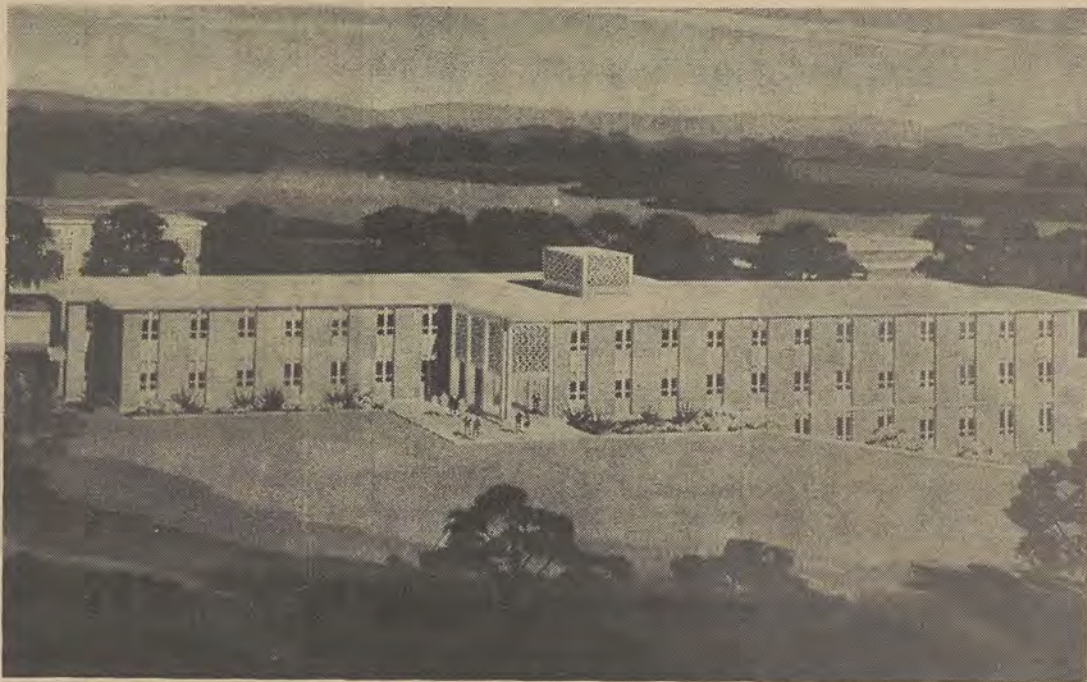

New Classroom Building Nearing Completion

Middle July Date Set For Opening New Hollis Hall

The new classroom building on campus, the Hollis Building, will be ready for opening in the middle of July.

Located on the corner of Georgia Avenue and Herty Drive, this building is named for a former President of Georgia Southern, Dr. Ernest V. Hollis. It is not part of the \$6 1-2 million building program of the college. The 50,000 square foot building will cost approximately \$800,000. It will be fully equipped with new furniture and a complete language laboratory. The Hollis Building will house the social sciences, languages, and business and part of the physical education division. It is hoped that the new building will adequately house these divisions for the next ten years.

The architect for the classroom building is Edwin C. Eckles of Statesboro. The contractor is Anderson & Davis of Albany.

Hollis Hall, newly completed classroom building, will be ready for occupancy soon.

415 Graduate Students Are Enrolled Here

Enrollment at Georgia Southern College reached a total of 1575 students last week for the summer quarter, 1965, according to Lloyd Joyner, registrar. This is the first year that Southern has offered a continuous ten-week session during the summer.

Included in the summer enrollment are 1045 undergraduates, 115 special and post-graduate students, and 415 graduate students.

An enrollment of 3500 students is expected for the fall quarter, according to Joyner. This will be the highest enrollment at the college.

The 3500 students represents a 17 percent increase over the fall quarter tally of 2969. The completion of two additional dormitories and a new classroom building provide for the increase.

Next year, another dining hall, the Arts Center, and two additional dormitories, are to be completed.

Dr. Henderson Begins 43rd Year As Southern President

This month marks the forty-third year that Dr. Zach S. Henderson, president of Georgia Southern College, has been affiliated with education in Georgia. As a teacher, coach, superintendent, and college administrator, he has worked in all roles in education.

He is now ranked in the national hierarchy of professional education. Two years ago he was one of nine college presidents chosen to tour the teacher education program in India. This past year, he was voted into the presidency of the Georgia Education Association by its 28,000 members. He is listed in *Who's Who in America* and *Leaders in American Education*.

Born and reared in the rural life of Gillsville, Ga., Dr. Henderson completed high school and later studied at Pierdant

College, Columbia University, and the University of Chicago. At the end of his junior year in college came the decision to teach, preferably in the areas of science, mathematics, and athletics. Dr. Henderson says that starting in this profession, there was never a serious moment spent in thinking that he should do anything else.

Dr. Henderson came here when Georgia Southern was changing from a normal school to a college. He says, "For me, being at Georgia Southern College has been a challenge all the way through. To have an opportunity to see a college grow

from a staff of fifteen and a student population of 200 to a staff of over 300 and a student body of over 3,000 is a real thrill and a challenge."

Under his leadership Georgia Southern College has grown into full maturity. In 1948, when he assumed the GSC presidency, there were 635 students, one degree program offered, and eight buildings. This fall there will be an approximate 3,500 student enrollment, eight degree programs, and, by 1967, thirty-two buildings completed and in operation.

When asked what the next forth-three years would do to education, Dr. Henderson replied, "Education will continue to change and change faster than it has in the last twenty years. It is difficult to tell how education will change. One problem that bothers the student

(Continued on Page 2)

No classes will be held on Monday, July 5, according to Dean Paul Carroll. Classes will be resumed at 7:30 a.m. Tuesday, July 6.

Personnel Office Revamp

Several changes are being made in the Office of Student Personnel Services effective July 1, according to Dr. Ralph K. Tyson, dean of students. In addition to a new dean of women and director of placement and student aid, three other appointments have been made: Miss Helen J. Mikell has been named associate director of housing, Larry Davis, administrative assistant to the dean of students, and Mrs. Suzanne Reynolds, secretary to the dean

of women. Miss Mikell is the present secretary to the dean of women.

She received her B.S. in Education at Georgia Southern College and taught in the Chatham County school system for one year, later becoming associated with the Mutual Benefit Life Insurance Company of Newark, N.J. She is a candidate for the M.Ed. degree at Georgia Southern with a major in guidance.

Davis holds the B.S. in Education and the M.Ed. from Georgia Southern College with majors in mathematics. For the past two years he has worked as a graduate assistant in the Office of Student Personnel Services.

Mrs. Reynolds graduated from the University of Georgia with a B.S. in Education and taught at Effingham County High School last year. She is married to Raymond Reynolds former GSC basketball star.

MISS LULANE MCBRIDE

Lulane McBride Named New GSC Dean Of Women

Miss Lulane McBride, a native of Montgomery County, will become Dean of Women at Georgia Southern College July 1, 1965. She is replacing Mrs. Carolyn C. Gettys, who has accepted a position at the Woman's College of Georgia, Milledgeville. Dean Gettys terminates a five year record in the Office of Student Personnel Services June 30, 1965.

Miss McBride graduated from Brewton Parker High School, Mt. Vernon, Ga., and attended the Woman's College of Georgia. She received a BBA degree from the University of Georgia with a major in secretarial science and a minor in economics. At the University of Georgia, she received the M.Ed. degree, majoring in guidance counseling and minoring in psychology.

BEN G. WALLER
New Administrator

Ben G. Waller New Addition To Personnel Office

Dean Ralph K. Tyson announced last week that Ben G. Waller has been appointed Director of Placement and Student Aid within the Office of Student July 1. Mr. Waller is a native of Washington County, Ga.

An alumnus of Georgia Southern College, he received the B.S. degree in 1943, majoring in industrial arts and minoring in mathematics. He received the M.Ed. degree from the University of Georgia in 1949 with a major in school administration and a minor in guidance, and the Advanced Ed. from Florida State University in 1962 with a major in administration

6,000 book additions made to GSC library in 1964-65

The Georgia Southern College Library acquisitions have reached the 6,000 mark for the year 1964-65, according to Miss Hassie McElveen, librarian. A valuable reference set and a Magnaprint Reader have recently been purchased in addition to the Xeroxing Service already in use.

The Catalog of Books Represented by Library of Congress Printed Cards, a titanic publication of over 300 volumes, represents a compilation of all Library of Congress author and main-entry cards printed between August, 1898 to date. The first issue covers all cards printed up to July 31, 1942; the first

supplement carries the worknow available for use and is located in the reference department.

This work constitutes probably the best single source for bibliographic checking, since most of the cards include not only full basic bibliographic data but also annotations, particularly on sets of books and the like, Miss McElveen said.

This set of books has been in great demand by faculty and students for many years. It is

The newly purchased Recordak Magnaprint Reader serves as a motorized film reader for fast, easy reference to microfilm files, and as an automatic printer for push-button production of paper enlargements of the microfilm image. The printing cycle is fully automatic and prints are exposed, cut, processed and delivered in less than half a minute. Microfilm image search can be resumed 10 seconds after the "print" button is pressed.

This machine has just arrived and will be available for use immediately after the company service personnel installs it. It will be located near the other microfilm readers and a fee will be charged for prints made.

The Library has a 914 Xerox Copier which makes single or multiple copies—up to seven per minute, and reproduces from any original up to nine by fourteen inches. It copies anything written, typed, printed, stamped, or drawn, even pages in a bound book. The copier delivers dry copies ready for immediate, permanent use and the copies often look better than the original.

This Xeroxing service is available at the nominal fee of ten cents per sheet. Apply at the desk in the Periodical Department.

Library hours for the summer are: 7:15 a.m. until 10:00 p.m., Monday through Thursday; 7:15 a.m. until 9:00 p.m. on Friday; and 8:00 a.m. until 5:00 p.m. on Saturday.

DR. RALPH K. TYSON
Named to post

Dr. Ralph K. Tyson Named To Post In National Counselors Program

Dr. Ralph K. Tyson, dean of students and director of testing and guidance at Georgia Southern College has been elected to the National Council on measurement in Education.

The Council, formed in 1938, is comprised of approximately 700 tests and measurement specialists in the United States. Membership is by invitation only to professionally qualified, practicing psychometrists. The

council has as its purpose the dissemination among educators of increased knowledge of the techniques and instruments available for the measurement of human abilities, personality characteristics, and educational achievement; and of the procedures appropriate for the interpretation and use of such measurements; and the promotion of the improvement of measurement techniques and instruments in these areas.

New Residence Hall Director Named for Lynne

Mrs. Hazel A. Moyer has been employed as full-time director of Lynne Hall in Knight Village, owned by Mr. Buford W. Knight. She began her duties with the beginning of summer school.

Born, reared, and educated in Columbia, S. C., Mrs. Moyer moved to Statesboro from Sanford, N. C., in January, 1964. Before moving to Statesboro, where she has been residing with her daughter, an anesthetist, she was active in civic and social clubs in Columbia, Lake City, S. C. and Sanford, N. C. She was chairman of The Federated Womens Club of Lake City, president of The Rutledge Book Club of Lake City, chairman of Libraries of The Federated Womens Clubs of South Carolina. She was a member of the Cotillion Club, Country Club, and several garden and bridge clubs.

From 1947 to 1952, Mrs. Moyer was owner and operator of The Saluda Flower Shop in Saluda, S. C.

She is now a member of the First Baptist Church of Statesboro and the Mae Perry Circle of the church.

ANDREW S. EDWARDS
Test maker

Andrew Edwards Develops Test In Mathematics

Andrew Edwards, assistant professor of education at Georgia Southern College, was an associate in the development of mathematics achievement tests that have the prospects of being used to test fourth, fifth, and sixth grade children all over the state of Texas.

Edwards was associated in the development of these tests for use in his doctoral dissertation at the University of Georgia and has been asked by the College of Education of the University of Houston for permission to use the examinations for the evaluation of the mathematics education program throughout Texas. The test items were first constructed by Dr. Kathryn Blake and Miss Helen Westbrook of the University of Georgia. Edwards helped with the initial administration of the tests and was concerned with the further development of these tests for utilization with fourth, fifth, and sixth grade children.

HENDERSON ...

(Continued from Page 1)

is his ability to keep up with all the knowledge that we will have. Some think that in the next twenty years we will have four times as much knowledge as we have presently.

"In 1948, when I became president, it seemed almost an extravagance to dream of a college of over 1500. Now in 1965, it is more realistic to see the college with 5000 in 1968 and over 7500 by 1975. There is also a strong possibility of additional graduate work being offered, and by 1975, possibly, the doctor's degree will be in the program."

In a closing statement, Dr. Henderson remarked, "One of the real thrills is to see the image of the college change from year to year. At the present time, almost anywhere in Georgia you find someone who has a strong attachment and deep interest in Georgia Southern College. This is the result of the fine feeling that the students have toward the college."

"Years ago, a man who saved his money was a miser. Today he's a miracle worker."

Clorinator Purchased For Georgia Southern's Water System

According to Chuck Johnson, director of plant operations, a clorinator was installed in the water system last week. The clorinator injects chlorine into the water supply for purification

purposes. This is a safeguard against the increase in water pollution today.

Mr. Johnson stated that Georgia Southern has never had any problem with an unsafe water supply. Samples have been sent once a month for years to the Health Department for analysis and there has never been a report of anything wrong.

Fluid Power Study Institute Underway

The six-weeks Fluid Power Institute is being held at Georgia Southern College under the direction of H. M. Carmichael of the Industrial Arts Division. The institute permits the study of the transmission of energy by means of fluid power under pressure, and includes the fundamental principles of hydraulics and pneumatics, their components and circuitry.

Mr. Carmichael stated that fluid power industry is the most rapidly growing industry today. "It is an important factor, both as an industrial concept in present day automation and also in the aero-space program," commented Carmichael. There is a tremendous need for personnel from the skilled craftsman to the design engineer. The purpose of this program is to help fill some of these needs.

Several outstanding persons

in the industry are assisting in the program as guest lecturers to supplement the laboratory sessions and demonstrations, according to Carmichael. These include George Carlson, president of Minnesota Rubber; Wesley Master, president of the Dynex Company, and George Altland, director of training for Vickers Corporation, a division of Speary Rand.

Southern Marks First In School Administration

The commencement at Georgia Southern College on June 6, marked another first for a growing institution. Among the many graduates were the first two graduates of the School Principals Program. The two graduates receiving the Master of Education degree with a major in School Administration were Charlie D. George and Pat C. Walls according to Dr. Starr Miller, chairman of the Education Division.

Georgia Southern College was approved by the Board of Regents and the State Board of Education during the 1962-63 school year to offer a program to prepare leadership personnel for the public schools. The program was initiated during the summer of 1963 with Dr. Harold T. Johnson serving as director of principalship studies. Approximately seventy-five persons are enrolled in the program.

Charlie George is presently serving as assistant principal at the Fort Stewart Dependents School. He is a graduate of the University of Tampa. He has several years experience as a teacher of social science and physical education. Pat Walls is principal of the Ty Ty Jr. High and Elementary School, Ty Ty, Ga. He is a graduate of the University of Georgia.

All GSC Student Vehicles Must Be Registered Now

All vehicles operated on the Georgia Southern campus must be registered with the security office and must have the necessary decal properly displayed, according to Dean Ralph Tyson. Proper display of the decal is on the left rear bumper of the automobile.

Restricted parking zones for staff, off-campus students, and residence hall students and time limits in certain areas must be observed.

All vehicles should be operated in a careful and reasonable manner and traffic regulations observed.

All summons issued are recorded on a registration card, and summons that are not paid or appealed within three days are turned over to the controller's office for collection.

Participants in the Fluid Power Institute at Georgia Southern observe demonstration.

Art Workshop to be held here at Marvin Pittman

Fifty teachers in summer school at Georgia Southern College will attend an Art Workshop on June 28, 29, and 30, at the Marvin Pittman School, according to Dr. Donald Hawk and Miss Gladys Waller of the GSC Education Division.

A free educational service provided by Binney & Smith, Inc., manufacturers of Crayola crayons and other school art supplies, the Workshop will be conducted by Miss Elizabeth Belt, who has taught extensively and holds a Master's degree from Columbia University.

The participants will devote fifteen hours of their time to learning about modern creative art education and some of its materials and tools. They will "Learn By Doing"—the theme of the workshop.

These techniques will include some of the uses of crayons, water colors, poster paints, finger paints, colored chalks, and modeling clay. Simple craft techniques will also be shown, giving teachers an opportunity to work with paper, paste and other materials to gain three-dimensional effects. All of the Art Workshop activities will be experiences which the teachers can relate to their own classroom teaching.

Mrs. Loris G. Lane New House Director of Deal Hall Dormitory

Mrs. Loris G. Lane has been named House Director of Deal Hall for the 1965-66 year, according to Dr. Ralph K. Tyson. Mrs. Lane comes to Georgia Southern from Vashti School for girls in Thomasville, Ga., where she has been senior house director.

Mrs. Lane is replacing Mrs. Jane Morgan who is moving to the new 300 capacity girls' dormitory named for the late Charles Preetorius Olliff.

and a minor in sociology. Mr. Waller taught mathematics for six years at Glennville High School in Glennville, Ga. He has been a Rehabilitation Center Counselor for the United States Air Force, an assistant principal and coach at Swainsboro High School, principal of Wrightsville High School, and principal of Baxley High School. Since 1955, he has been principal of Cairo High School.

Mr. Waller is a member of the National Education Association, District Director of the Georgia Education Association, and a member of two honor fraternities in education, Kappa Delta Pi and Phi Delta Kappa. He has been a member of the Kiwanis Club for twenty years and is a past president of the Cairo Kiwanis. He is also a past member of the Board of Trustees at Norman College, Norman Park, Georgia.

Dr. Marvin Whitehead (second from left) works with students participating in Biology Institute.

Dr. DeRidder addresses First District School Counselors

Dr. Lawrence M. DeRidder, Professor of Educational Psychology and Guidance at the University of Tennessee, was the featured speaker for the fourth annual First District and Summer School Counselors' Conference held Thursday, June 24, on the campus of Georgia Southern College. His topic was the theme adopted by the Georgia Association of School Counselors at their Leadership Conference: "Challenge 1966—The

Individual in Society."

Dr. DeRidder brought to the counselors a wealth of experience in the field of guidance. He was Assistant Psychologist, University of Michigan; Teaching Fellow in Educational Psychology, University of Michigan; Student Counselor and Assistant Professor of Psychology, Chicago Branch of the University of Illinois; and has taught six years in the public school. In 1953 he went to the University of Tennessee as an Associate Professor of Educational Psychology and in 1964 was promoted to Head of the Department of Educational Psychology and Guidance.

He received his B. A. degree from Northern Michigan University in 1940, his M.A. and Ph.D. degrees from the University of Michigan in 1944 and 1951 respectively.

Dr. DeRidder has written a number of articles for such professional periodicals as the Ele-

mentary School Journal, School and Society, Journal of Educational Psychology, The School Counselor, and the Journal of Counseling Psychology. He is professionally associated with the American Psychological Association, American Personnel and Guidance Association, National Vocational Guidance Association, Association of Counselor Educators and Supervisors, Student Personnel Association for Teacher Education plus other national, regional, and state educational organizations. In addition to these accomplishments, Dr. DeRidder is a member of Phi Kappa Phi, Phi Delta Kappa, and Kappa Delta Pi.

Dr. Fielding Russell Appeared on WSAV-TV "Three for the Show"

Dr. Fielding Russell, chairman of the English Division, was featured on a fifteen-minute special over WSAV-TV, Savannah, on Friday, June 18 on the program, "Three for the Show." He discussed and read some of the Joel Chandler Harris "Uncle Remus" literature.

Biology Institute in progress here

The National Science Foundation is presently supporting a Biology Institute at Georgia Southern College under the direction of Dr. Leo Weeks, professor of biology. The grant is approximately \$25,000 for the six weeks institute, June 14-July 23.

According to Dr. Weeks, the objectives of the institute are: to strengthen subject matter competence of junior and senior high school teachers of biology who have taught for several years; to update subject matter necessary to implement programs such as modern biology in their high schools; and to give the participants a chance to discuss problems with colleagues and the staff.

Two courses are being taught in the institute: principles of botany by Dr. Marvin D. Whitehead and principles of zoology by Dr. Leo Weeks. These courses carry five quarter hours credit and may be applied toward the M.Ed. degree. In addition to course lectures, the schedule includes laboratory work, seminars, field trips, and guest lecturers.

The twenty-five participants in the institute come from eight states and from all sections of Georgia.

"I feel," stated Dr. Weeks, "that the institute program has been a big help. Teachers who have attended such programs have reported that they have benefited greatly, both academically and personally."

This is the second consecutive summer institute to be held at GSC. "We should all feel indebted to the National Science Foundation for its support of the science program," said Dr. Weeks. "The program has enabled teachers to further their education. I feel that Georgia Southern College is fortunate in

being selected as a location for an institute."

Three Dorms Named

The three new dormitories now under construction at Georgia Southern College have been named upon approval by the Board of Regents. These dormitories, part of a \$6.5 million building program, are located on Georgia Avenue and Chandler Road.

The 300-unit woman's residence hall has been named for the late Charles P. Olliff, one of Statesboro's leading business men. This 58,000 square-foot hall will cost approximately \$950,000. The architect is Thomas-Driscoll & Hutton of Savannah. The contractor is Demetree Builders, Inc., of Jacksonville, Fla.

A 250-capacity men's residence hall is named for the late Alfred Dorman, a leader in the business, educational, and civic life of the community. The cost of this hall is approximately \$825,000. Mr. Edwin C. Eckles of Statesboro is the architect, and the contractors are Claussen & Webster, Inc. of Augusta.

A woman's residence hall for 250 students is named for the late Robert L. Winburn, a former comptroller at GSC. Mr. Winburn served the college and community for twenty years. The estimated cost of this hall is \$850,000. The architects are Cunningham & Forehand, Inc. of Atlanta, and the contractors are Claussen & Webster, Inc. of Augusta.

Aerospace Study Being Made In Summer School

An Aerospace Teacher Education Workshop was held yesterday and today at Georgia Southern College under the direction of Dr. Tully Pennington, professor of Biology. There were ninety-two participants enrolled in the two-day course.

Special consultant to the workshop was Mr. Harold E. Mehrens of the John F. Kennedy Space Center, NASA and lecturer Mr. Robert Hawkins of the John F. Kennedy Space Center. Two other lecturers, Mr. Charles Coleman and Mr. William A. Lockard, II, of the NASA Spacemobile appeared.

Sessions for the two days began at 9:00 a.m. on Thursday and ended at 4:00 p.m. on Friday. Activities for the students included previewing NASA films, evaluating aerospace science educational publications; performing aerospace related experiments, and working with projects.
