Dr. Z. J. Farkas publishes work

Dr. Zolton J. Farkas, professor of languages, Georgia Southern College, recently published an article in *Names*, 1965, on the linguistic history of the name "America." The title of his article is, "The Challenge of the Name - America."

Additionally Dr. Farkas was invited to join the American Name Society and to present his paper at the society's New York meeting.

His research attempted to prove that Heimreich is the correct source of the name Amerigo. Most of the research done on the subject was conducted in the New York City Library, the Library of the Vatican, the library of the University of California, and at Georgia Southern College.

A small stipend was made available to Dr. Farkas by the Georgia Southern College Research Committee.

DR. FARKAS

NOTICE

All counselors planning to take Guidance 641 "Counseling Internship" next year are requested to meet in Room 2, Administration Building, August 10 at 3 p.m.

234 to receive summer degrees

According to Lloyd Joiner, registrar, approximately 234 students will receive degrees in the August 19 graduation exercises. Two will receive Master of Arts degrees, 66 Master of Education, 10 Bachelor of Arts, 18 Bachelor of Business Administration, 17 Bachelor of Science, 5 Bachelor of Science in recreation, and 116 Bachelor of Science in education.

The exercises will be held at

10:30 a.m. in the W. S. Hanner building, August 19, 1965. Rehearsal for the event will be at 8:30 a.m. on the same morning.

Division adds two instructors

The home economics division of Georgia Southern College will add two new instructors in September of this year. Miss Edna Earl Christmas of Tallahassee, Fla., and Miss Elizabeth Rose Jones of Athens will be instructors in family relations and child development and foods and nutrition.

Davis named to Peace Corps post

Larry Davis, administrative assistant to the dean of students, has been named as the official Peace Corps liaison at Georgia Southern College. He will consult with those interested in joining the Peace Corps or who would like to learn more about it.

\$6,050 grant received here for service biology institute

Georgia Southern College has received a \$6,050 grant to offer an in-service institute in the biological sciences for secondary teachers of science, under the direction of Dr. Leo Weeks, associate professor of biology. Sponsored by the National Science Foundation, institute enrollment will be limited to 20 teachers within commuting distance of the college, and the program will consist of two courses taught during the academic year 1965-66.

The objectives of the institute are: to afford an opportunity for high school teachers of science to increase their proficiency in the area of their greatest need, to provide instruction at such a level that each course carries five quarter hours of graduate credit toward the M. Ed. degree at GSC or towards the Sixth-Year Certificate, and to provide an opportunity for teachers to discuss current problems in their teaching with other high school teachers, and with the staff members.

In order to be eligible for consideration, an individual must: be teaching at least one science course at the secondary level, and plan to continue teaching science at this level, possess the T-4 Certificate and be eligible for admission to the graduate school of Georgia Sou-

thern, live in commuting distance from the campus; and be accepted generally on the basis of their potential ability to profit from the institute and their desire to continue on to an advanced degree.

Each individual must have a minimum of ten quarter hours of general chemistry with laboratory and ten quarter hours in biology with laboratory.

Under the proposed system a participant could attain the M.Ed. degree in two calendar years plus one academic year. He could also complete the Sixth-Year program in less than two calendar years. For those who have been participants in past in-service institutes at Georgia Southern College (1962-63, 1963-64, and 1964-65), it would be possible to complete requirements for the M.Ed. degree and the Sixth-Year Certificate.

A travel allowance of "up to" seven cents per mile per trip from home to the institute and return may be paid each institute participant. A book allowance may be made available to each participant in a maximum amount of \$10 for a full year's program. No tuition and fees will be charged.

The first course, Biology 554S, Histology, taught by Dr. Weeks, will consist of 17 four-hour per-

(Continued on Page 4)

THE ROEMEN

Concert set here by 'The Roemans'

The "Roemans" will appear at Georgia Southern College on Wednesday night, August 11, 1965. They have been scheduled by the Circle K Club for a concert-dance to be held in the alumni gymnasium from 8-11 p.m. Tickets are presently on sale in the student center and at the Music Box in Statesboro for \$1.00 each, and tickets can be purchased at the door on Wednesday night.

Having been organized for only one year, this group has enjoyed instant success everywhere they have performed. This can be verified by their performance in May here at GSC, while on the same bill with the Rolling Stones, according to Circle K. Besides the Rolling Stones, they have appeared with such outstanding stars as the Beach Boys, Cilla Black, the Animals, P. J. Proby, and Tommy Roe, for whom the band is named.

NOTICE

All classes, 1st period through 6th period, will meet on Monday, August 16, 1965. Final examinations will begin at 1:30 in the afternoon with all 7th period classes. At 3:30 on the same day all 8th period classes will hold examinations.

On Tuesday, August 17, the schedule is as follows:

7:30 a.m. — all 1st period classes

9:30 a.m. — all 2nd period classes

11:30 a.m. — all 3rd period classes

1:30 p.m. — all 4th period classes

On Wednesday, August 18, the schedule is as follows:

7:30 a.m. — all 5th period classes

9:30 a.m. — all 6th period classes

One of the highlights of the Fluid Power Institute at Georgia Southern College this summer was the formation of the Georgia Educators Chapter of the Fluid Power Society. The Fluid Power Society is an international organization interested in the development of fluid power. Here the charter members of the GSC chapter stand for the first formal pictures. This is the first of its kind in the United States, according to Professor Hayden Carmichael, advisor. The charter will be formally presented at a luncheon August 20, 1965, at the Holiday Inn.

'Special warfare' explained on Ft. Bragg trip

B. B. Burkhalter, Claxton High School, Avis Wells, of Bradwell Institute, Hinesville, and Henrinell Middleton, Mitchell County High School, Camilla, converse with an instructor in the Vietnamese language school and a major of the Vietnamese Army.

Visitors inspect "Liberty Village" sanitation projects.

Hand-to-hand combat in guerrilla warfare is demonstrated for the visitors from Ga. Southern College.

Sixty members of the social science institute at Georgia Southern College visited the U. S. Army Special Warfare School at Ft. Bragg, N. C. last weekend, July 30-31. The institute is financed under Title 11 of the National Defense Education Act, and this trip was sponsored by Education for Freedom under the direction of Peter C. White, executive secretary of Education for Freedom.

The term "special warfare" embraces all the military and paramilitary measures and activities related to unconventional warfare, counterinsurgency, and psychological operations. Three features of this special training the group observed are psychological operations, special forces, and counterinsurgency operations.

The purpose of the course in psychological operations is to provide a working knowledge of the nature and conduct of psychological operations; to develop an understanding of the nature and employment of propaganda and of the organizations, methods, and techniques for the use of propaganda. While the major emphasis of the course is directed toward the concepts of psychological support of a military operation, much consideration is also given to psychological operations in situations short of war; however, the instruction includes a comprehensive analysis of these operations in both hot-and cold-war situations.

In the special forces course a working knowledge of the doctrine, techniques, and concepts of guerrilla warfare and special forces operations is provided. The course is directed toward the problems of generating an effective guerrilla force keeping in mind that the methods of operations of special forces units are equally applicable during the present cold-war period. The capabilities of special forces in counterinsurgency operations are also stressed.

The course in counterinsurgency operations is offered to provide a working knowledge of the nature and conduct of operations against insurgent movements and to furnish a general knowledge of the various aspects of military participation. The course is directed toward the problems of the cold war, which includes situations short of war. Thus the operational environment encompasses the entire spectrum of activity by insurgent forces against duly constituted governments. The concept of tactical doctrine includes: isolation of the insurgents from civilian support, destruction of the hard-core ter-

My Neighbors

"Tell you what—I'll hold him and you give him the needle."

rorists and guerrillas, reconstruction, and the promotion of civic action programs in support of recognized authority.

Dr. Jack N. Averitt, director of the institute, stated that the most important phase of the school is the attempt to unite the Vietnamese into a responsible government. This can be accomplished only through an intensive program of rehabilitation, sanitation being one of the foremost elements.

In describing the demonstration, Dr. Averitt related that the physical aspects of war, namely guerrilla techniques of fighting, prove to be necessary in order that our troops land safely and survive. Protection against the Viet Cong is also established as a result of guerrilla warfare tactics and the program of counterinsurgency.

Who are the bright students who don't attend college?

By WINFRED L. GODWIN
Director, Southern Regional
Education Board

Who are the really bright young people who don't go on to college?

According to a study by the National Science Foundation, 98 or 99 percent of the gifted students who don't continue their education after high school are girls.

A comprehensive study on student admission and retention recently published by the Oklahoma State Board of Regents found that a large percentage of college drop outs are women. These young women who are not being educated to their full potential represent a reservoir of untapped talent that is a serious loss both to the state and the nation, summarizes the report.

And a report by the University of Wisconsin and the Johnson Foundation states that women are conspicuously under-represented in the top professional ranks. In the field of education, where women can help meet the great need for college teachers, the share of all doctoral degrees—acknowledged

passports to successful academic careers—awarded to women has declined from 17 percent to a steady 10 percent.

"Women who fail to take advantage of the doors now open to their sex constitute a real failure in terms of democracy," emphatically states Dr. Mary Bunting, president of Radcliffe College and temporarily on leave to the Atomic Energy Commission.

She points out that a woman does not necessarily need to have a paying job or a career. But she should be prepared to do something "that uses a large part of her capabilities and that she believes is worthwhile."

From a purely practical point of view, there are only one or two chances in ten that today's woman will not one day be in paid employment.

As Dr. Helen Edmonds, Dean of the Graduate School at North Carolina College at Durham, recently pointed out: "The age in which we live...two car garages, television sets, stereos, washing machines, etc., have brought into reality the necessity to have two pay envelopes...the husband's and wife's."

"Any nostalgia for the myth of the 'good old days' when woman's place was in the home cannot change the highly indus-

trialized America of today."

As significant as these economic facts of life is the truism that human beings, regardless of sex, "need to be using a large fraction of their capabilities or life doesn't seem very worthwhile," as Dr. Bunting has pointed out.

This is the idea behind a unique program recently launched at the University of West Virginia, where a notable list of outstanding women in the professions are conducting lectures, seminars and informal discussions on the unlimited opportunities open to the educated woman today.

More and more, second chances are being offered to the woman who fails to enter college after high school or who has allowed her skills to grow rusty during her childbearing years.

Dr. Bunting points out that American women "haven't begun to realize the amount of serious study that can be done during the homemaking years." And she believes a woman engaged in study helps to instill worthwhile values in her children.

For women long absent from the work force, the American Association of University Women Educational Foundation is developing an Adult Counselor Program to offer women the combination of personal, educational and vocational counseling necessary to adopting or resuming a career.

Dr. Edmonds has recently stressed the fact that the woman who graduates from college today, irrespective of her marriage status and her child bearing period, will spend 25 years in employment away from home.

"She need not bury her talents in chemistry, physics and mathematics fearing that she is treading into a world not properly shared by women," she says. "In her changing image, she has no limits. She is limited only by her ability."

Resources meet scheduled here

Outstanding Georgia High school boys, 15 to 17 years of age who have shown keen interest in conservation of natural resources, have been chosen to participate in the Natural Resources Conservation Workshop at Georgia Southern College August 9-13, 1965. Approximately 200 boys have been chosen from each county in the state.

This workshop is sponsored jointly by the Georgia chapter of the Soil Conservation Society of America and the Georgia Association of Soil and Water Conservation Districts in order to give youth a greater knowledge and appreciation of natural resources and how to conserve them.

The Soil Conservation Service, the U. S. Forest Service, the Georgia Forestry Commission, and the State Game and Fish Commission are all cooperating in the workshop.

The program for the week will include classroom study, tours in the county, recreation, group discussion, tests and evaluation.

LITTLE MAN ON CAMPUS

'Evening of Reading' by Overstreet tonight backstage in McCroan Aud.

Georgia Southern news will be seen on Channel 9 tonight at 9 p.m. featuring Dr. Harold T. Johnson discussing the principalship program of the education division.

Counselors hear job interviewer

Miss Alma Hopper, employment interviewer with the local employment office, last week spoke to counselors in training at Georgia Southern College on activities of the employment service.

In introducing Miss Hopper, Dr. Thomas L. Harris, counselor education professor, told the counselor trainees that the employment service is one of the principal resources which the school counselor may use in his work with youth who are ready to seek their first jobs.

Miss Hopper told the group that as the working world becomes more complex, it is important that young people starting on their first jobs have vocational assistance. Some will drift into jobs or may have assistance from family or neighbors in getting started, said Miss Hopper, but in order that more young people have the type of guidance that is needed, it is important that the schools and the employment service work together in job placement of youth. The employment service is anxious to extend and improve services and the assistance of the school counselor is needed in order for the employment service to make its maximum contribution to youth.

She reviewed the historical development of the employment service, and discussed some of their activities such as counseling, testing, job clearance, and participation in several new federal programs. She spoke of counseling in job change, job choice, and job adjustment.

"An Evening of Reading" will be held this Monday, August 9, at 8:15 p.m. in the backstage area of McCroan Auditorium on the Georgia Southern College campus. Performing artist for this occasion will be Mr. Robert Overstreet, assistant professor of speech.

Readings in the program will come from the poetry of Ezra Pound, Edwin Arlington Robinson, Edgar Lee Masters, from the Book of Job, and the "Ballad of the Sad Cafe."

Seating arrangements for the performance will be held to sixty people. There will be no admission charge. The public is invited to attend.

Dean of Women speaks to three house councils

Miss Lulane McBride, dean of women at Georgia Southern College, met this week with house councils in three of the residence halls: Veazey, Hendricks, and Lynne, for the purposes of meeting each member of the council, observing procedures used for conducting these meetings, and to hear comments or suggestions as to how dormitory life can be improved.

Miss McBride spoke to these groups briefly concerning their house council code and the housing of the college student as a very important part of the student personnel services on the campus.

"Housing of the college student," she said, "must provide the best possible facilities for the pursuit of learning—the dormitory should be 'a home away from home' and should be comfortable and convenient to the classrooms and the library. The resident halls can help in the personal development of the student, who can receive educational benefits from living in the resident halls. The experience of group living can 'teach' an individual social competence, emotional stability and citizenship," she said.

"Many values and attitudes are 'caught' rather than 'taught' through direct contact with the peer group and only indirectly through the classroom situation. Members of the house councils will be watched and imitated by others and will be a determining factor in personal growth and development in the resident halls on the campus," she said.

Freshmen given four dormitories

Arrangements for fall housing have been announced by Helen J. Mikell, director of housing for Georgia Southern College. Four dormitories will be provided for the annually in-

creasing freshman class of women. Hendricks Hall, Lewis Hall, Deal Hall, and Anderson Hall have been designated for freshmen; Veazey for sophomores, and the new and uncompleted dormitory, Olliff Hall, for junior and senior women.

— Briefs —

On August 2, Dr. Starr Miller attended a meeting of the Executive Committee of Teacher Education Council in Atlanta.

Dr. Donald Hawk will be in Athens August 11, 12, and 13, attending the Professional Rights and Responsibility Committee of the local GEA at the Center for Continuing Education on the University campus.

Dr. Elizabeth Hardin's Education 611 class on Problems in Arithmetic held an open house recently to show the materials the class members made.

At the beginning of fall quarter, one junior or senior will be temporarily placed in each of the rooms in Hendricks, Lewis, and Anderson Halls until completion of Olliff Hall.

Sanford and Cone Halls will house freshmen men, and Cone and Brannen Halls will house sophomore, junior and senior men.

Housing, both on-campus and off-campus must be approved before registration will be permitted in the fall. No housing certificates will be issued, however. As each student's housing is approved, the registrar's office will be notified.

Fine Arts Building construction set

Construction on the Georgia Southern Fine Arts Building may possibly begin in October, according to President Zach S. Henderson. Bids for the 4-story structure will be requested in approximately two weeks. Location of the new building will be on the present parking lot next to the student center. A new parking lot will also be pro-

vided.

The building will house the music and art divisions. Two features of the building will be a large music recital hall and an art gallery.

The Carruth Building, which presently houses the art division and the industrial art division, will be devoted to industrial education.

\$6,050 grant received here...

(Continued from Page 1)

iods which will meet weekly. The participant will upon completion of the first course, enroll in the second course, thus accumulating ten hours of graduate credit. The second course, will be taught by Dr. Sturgis McKeever. Each weekly four-hour session will consist of two parts: the first being devoted to lectures and discussions and the second to laboratory work. The first course will begin September 28, 1965, and last through February 1, 1966. The second course, February 8, 1966, through May 31, 1966. Class meeting will be from 6 to 10:20 p.m., and will be conducted in the modern air-conditioned Herby Science Building, with separate lecture rooms and fully-equipped laboratories.

Histology is a course designed to acquaint the secondary school teacher of biology with the important morphological characteristics of tissues and organs. As much structural-functional relationships of cells and organs will be shown as possible. These functional aspects of histology will be stressed with several disciplines drawn upon to illustrate these relationships. Laboratory experiences will be provided for participants to observe and study a wide variety of tissues. Preparation of some tissues for study will be a part of the laboratory experiences.

Histochemistry is designed to meet the needs of secondary teachers of biology and chemistry in teaching the histochemical aspects of modern biology. Studies will include inorganic and organic constituents of tissues. Inorganic anionic and cationic materials will be studied as well as carbohydrates, proteins and lipids. Special attention will be given to enzymes. Laboratory experiences will complement the class work. Selected methods for determining the chemical nature of tissue constituents will be a part of the laboratory. Simple animals and more complex tissues will be utilized.

Applications must be postmarked by August 16, 1965, to guarantee consideration. All initial stipend offers will be made on or about August 23, 1965. All recipients have until August 30, 1965, to accept or decline this stipend offer. If vacancies occur, late applications may be considered.

Address inquiries or applications to: Dr. Leo Weeks, director, NSF In-Service Institute for Teachers of High School Biology Box 2075, Georgia Southern College, Statesboro, Georgia.

Hollis Building opens for use

The Hollis Building, new classroom building on the GSC campus, opened last Tuesday, July 27. No formal ceremony was held at this time, but dedication of the structure will be held in the fall.

Social science, languages, and business divisions are occupying the new building, along with some physical education classes.
