What is Media Literacy?

The ability access, analyze, evaluate and produce communication in a variety of forms ~ Peters, 1998

- Accrediting Council for Education in Journalism and Mass Communication
  http://www2.ku.edu/~acejmc/
- National Communication Association
  http://www.natcom.org/
Why is Media Literacy important to instruction?

- The information literacy standards developed by ACRL are NOT all encompassing.
- The ACRL standards can be a little impractical to incorporate into the arts.
- Other standards of literacy are more appropriate (i.e. visual and/or media).
What is Popular Culture?

Contemporary lifestyle and items that are well known and generally accepted, cultural patterns that are widespread within a population

- Merriam-Webster Dictionary

Popular Culture and American Culture Association
http://pcaaca.org/
Why is Popular Culture important to instruction?

- Students are already familiar or have a general knowledge
- Easily transferred into other genres or areas of study
- Creates an instant connection between the instructor and the students
- Allows for the easy inclusion of social technologies
What is instruction at RWWL?

- Typical 1 shot instruction is generally:
  - 50 minutes/ 1 hour & 15 minutes or less
  - Assignment Driven

- Consist of:
  - Housekeeping
  - 2 or 3 basic databases (less if complex database is shown)
  - Hands on activity
  - Active learning
  - Article take away
  - Brief Assessment
Class Makeup

- **Audience:** Mass Media Arts majors (juniors/seniors)
- **Course:** Mass Media Research
- **Learning Outcomes (given by professor):**
  - Learn about media literacy
  - Begin researching for upcoming assignment:
    - Create a 30 second commercial with indirect marketing or media influence on public relations
Classroom Experience

Classroom Opening Discussion
- Do you know when you are being persuaded to purchase a product or service?
- What do you know about media literacy
- What do you know about Curtis Jackson (a.k.a. 50 cent)

Video Showing: Candy Shop by 50 cents

Further Discussion
- How many times were you marketed to during that time?

Demonstration of 3 databases
- Biography Resource Center
- Business Source Complete
- Hovers Online

Video showing again and count number of times you were marketed to

Students begin individual research
- Brainstorm topics related to their class project
- Choose a topic
- Find relevant articles

Brief Assessment
Advantages

• 90% of the class was already familiar with Curtis Jackson and his business dealings

• The topic was something that the students could easily relate to

• More and more celebrities are partnering with businesses, creating business, or promoting companies
Disadvantages

- Topic was so popular students needed directing back to the assignment several times.

- Helping students put their own “popular culture” topics in perspective for assignment may require that the librarian and the student brainstorm outside of class.

- Time constraints.
What didn’t this study do (future implications)?

Compare an instruction session that uses popular culture references and one that does not to measure student engagement.
