Annual CEIT Symposium highlights student achievements and research

MAY 12, 2017

More than 100 students presented posters and demonstrations of their research in the Allen E. Paulson College of Engineering and Technology (CEIT) Student Research Symposium on Friday, April 21, in the Information Technology Building.

The CEIT Student Research Symposium showcased undergraduate and graduate student researchers in the College, and emphasized the applicability of CEIT research to current industry and employer needs.

Sixty-one undergraduate and 49 graduate students presented posters highlighting their research. Cash awards were given to the presenters of the top three undergraduate and graduate presentations.

The students who received prizes for the presentation include:

- MSAE student Sharaf Sumaiya
- MSAE student Md Mehedi Hasan
- MSAE students Musfiques Salahin and Md Azizur Rahman
- B.S. in Electrical Engineering student Priscilla Perez
- B.S. in Electrical Engineering student Deon Lucien
- Civil Engineering students Mariah Peart, Brandon Yingling, Sandra Yankine and Dylan Mesta

"Our students and faculty devoted a lot of hard work into preparing their presentations. I strongly believe that our graduates will realize the rewards of participating in academic research as they enter the professional world and demonstrate the strengths of a hands-on education at Georgia Southern," said Mohammad Davoud, dean of the College.

The annual Symposium promotes research within the College and demonstrates the value of research for all students. Industry leaders and professionals, faculty, CEIT alumni and board members, and others were invited to see the latest in research from students.

"At least 40 representatives of industry, students and faculty from throughout the University, as well as President Hebert, attended the 2017 Symposium," Davoud said. "Everyone was thoroughly impressed with the professionalism of the presentations and the maturity of the research presented. We are planning now to at least double the number of attendees from industry, governmental agencies and other stakeholders for next year's Symposium."

Georgia Southern University, a public Carnegie Doctoral/Research University founded in 1906, offers 119 degree programs serving 20,673 students. Through eight colleges, the University offers bachelor's, master's and doctoral degree programs built on more than a century of academic achievement. Georgia Southern is recognized for its student-centered and hands-on approach to education. Visit GeorgiaSouthern.edu.
