Exigence: Undergrad Students’ Research Behaviors, Library - Writing Class Connections

- Jamieson, Moore Howard, & Serviss (The Citation Project, AUM): assessed student research practices by examining writing artifacts (student papers)
- Pedagogical implications for us: Changes to perspectives of “use”
  - “narrow views of plagiarism impede ways in which writing is taught to students and how students come to use sources in papers.”
  - “If instructors know how shallowly students are engaging with their research source … then they know what responsible pedagogy needs to address.”¹

A Rhetoric of Classification: Where Bizup Leads Us

- Bizup: current vocabulary used by writing teachers is part of the problem.
- Calls for a Rhetorical Shift --
  - from “what their sources are” to
  - what students “as writers might do with them” (75).
- Rhetorical renegotiation of pedagogical terms:
  - provides an “alternative vocabulary that emphasizes ...the functional role” of a source (75),
  - shifts power to the student...promotes agency, metacognition

### Adding A Rhetorical “BEAM” ¹:
Renegotiating the Meta-Language

| Background / Background Source | “materials whose claims a writer accepts as ‘facts’” (75).  
|                               | “noncontroversial, used to provide context...facts and information” |
| Exhibit / Exhibit Source       | “materials a writer offers for explication, analysis, or interpretation.”  
|                               | “exhibit...is not synonymous with the conventional term evidence, which designates data offered in support of a claim.”  
|                               | “Exhibits can lend support to claims, but they can also provide occasions for claims.”  
|                               | “Understood in this way, the exhibits in a piece of writing work much like the exhibits in a museum or a trial” (75) |
| Argument / Argument Source     | “materials whose claims a writer affirms, disputes, refines, or extends in some way.”  
|                               | “argument sources are those with which writers enter into ‘conversation’” (75-76). |
| Method / Method Source         | materials “can offer a set of key terms, lay out a particular procedure, or furnish a general model or perspective” (76). |

One-shot session with focus on Research Skills:

1) How to find sources using library databases and other resources
2) How to evaluate information sources
3) How to effectively use information sources
Introducing the Research Umbrella
• Think of your research as an Umbrella: Start broad with your main topic or theme which would be the fabric of the umbrella.

• Next, the framework, or supports of the umbrella, are what make up the fabric of the topic.

• The handle of the umbrella represents your thesis, or what you want to grab hold of within the fabric.

Research is connected to your writing. Relevant sources will address your questions. Ask yourself:

What could a writer do with this source?

- **Background**
  - Present Information, Establish Facts

- **Exhibit**
  - Explicate, Interpret, Analyze

- **Argument**
  - Affirm, Dispute, Refine, Extend

- **Method**
  - Critical lens; key terms, theory, style, perspective, discourse
