CONFERENCE HISTORY AND FUTURE VISION

In 1990, the NYAR Conference was founded by the College of Education of Georgia Southern University. During the past 28 years, this conference has grown from a regional conference of 150 participants to a national conference of approximately 1200 participants and is beginning to attract participants from several nations. In the next five years, this conference plans to expand to 1400 to 1600 national and international participants and to further enhance the quality and diversity of the conference program and presentations. This conference will offer national leadership, service, and research for the professional development of educators who serve youth placed at risk.
The National Youth-At-Risk Journal (NYAR Journal) is an open-access and peer-reviewed online journal that publishes educational articles on how to reduce harmful risk conditions and promote the well-being of all youth, especially vulnerable youth in schools, families, and communities. The journal, edited by Dr. Cordelia Zinskie, Dr. Dan Rea, Dr. James Jupp, and Dr. Olufunke Adefope, is a publication of the College of Education at Georgia Southern University.

INTERDISCIPLINARY ARTICLES

Focused on the well-being of the whole youth, the NYAR Journal seeks interdisciplinary articles on fostering the 5Hs: “Head” for intellectual achievement and talents, “Heart” for social and emotional skills, “Hands” for safety and protection, “Health” for physical and mental health, and “Home” for family and community support.

MOTIVATION AND CHALLENGING “AT-RISK” YOUTH: IT’S POSSIBLE!
Scarbrough 1 - 2:30-5:30 p.m.
Abbigail J. Armstrong EdD, Assistant Professor, Winthrop University, Rock Hill, SC
“At-risk” youth (students) are motivated and can thrive in a challenging environment. In this session, participants will discuss and practice strategies that effectively motivate students placed at risk and help them learn to think critically and achieve academically. The instructional practices shared will help increase student engagement and rigor and will challenge learners at risk while fostering a supportive learning environment so they meet high expectations and experience success.

BUILDING A CULTURE OF HOPE IN HIGH-POVERTY SCHOOLS
Scarbrough 2 - 2:30-5:30 p.m.
Robert D. Barr, PhD, Emeritus Dean, Boise State University, Boise, ID; and Emily Gibson, EdD, Culture Coach, Vancouver Public Schools, WA
Effective high-poverty schools address the challenges of students’ learned helplessness and external locus of control by surrounding students with an atmosphere of optimism and high expectations. In this pre-conference session, participants will learn how schools can use surveys and staff collaboration to reveal staff perceptions and beliefs, monitor school culture, and help students develop essential “Seeds of Hope” important for success in school and life: Optimism, Belonging, Pride, and Purpose.

HAVE SOME P.I.E. (PERCEPTION IS EVERYTHING): INCREASING EXPECTATIONS AND DECREASING STEREOTYPES OF “AT-RISK” YOUTH
Harborside East - 2:30-5:30 p.m.
Keith L. Brown, Lead Consultant/Chief Messenger, 2020 Enterprises LLC, Fayetteville, GA
In this high octane, interactive, and thought provoking workshop, Keith will prove his “P.I.E.” [Perception Is Everything] Theory is the key ingredient to the success or failure of today’s youth and families. Through relevant examples, Keith will illustrate how our perceptions determine our level of expectations for youth, how we educate and interact with youth, how we relate to pop culture and social media, and the level of commitment we put forth once our perceptions are in place. This workshop will reshape your paradigm as it relates to some politically correct held beliefs such as, “I don’t see color,” and “I treat them all the same.” This workshop is a must for “change agents” who genuinely want to have the same impact on youth as Facebook, Twitter, Facetime, Skype, BET, and MTV do, but with much more substance. “P.I.E.” will enable you to close the gap between adults and today’s youth and provide strategies, which can be used as bridge builders.

Space may still be available for pre-conference workshops. Visit on-site exhibitors on the first and second floor.

Keynote Speaker: Alan Sitomer, California Teacher of the Year, Founder, The Writer’s Success Academy, Los Angeles, CA

Today’s students are worldly, wired, and widely exposed to a host of trans-media influences that easily distract them from academic learning. So, how does a modern day educator make it all work? Discover how to bring rigorous learning to life in a manner which is exciting, engaging, and even cross-curricular. Dynamic instruction and meeting the mandates of a standards-based curriculum do not have to be mutually exclusive. Learn how to create an instructional environment where passion meets grit, rigor meets high expectations, and student engagement meets fidelity to academic aims. From incorporating the power of hip-hop pedagogy into learning modules to tapping technology intelligently to engage and motivate reluctant readers and writers, attendees will walk away with immediately usable tools to serve the needs of capable but disengaged students.

Facilitated by: Dr. Aviva Goelman-Rice, Professional Learning Coach, Savannah-Chatham County Public School System, GA

Please join us for a special opportunity to better understand what many of our youth living in poverty face on a daily basis. Approximately 32.9 million Americans, 11.7 million of whom are children under the age of 18, live in poverty every day. Many more have incomes above the poverty line, but their incomes are still low enough to qualify for programs like Food Stamps and Medicaid. The recent economic downturn has seen unemployment rates rise and the use of emergency food pantries increase. It is difficult for those of us who have enough to truly understand the situations that families living in poverty experience every day; the decisions they have to make; and the fears and frustrations they feel. That is why we are inviting you to walk in the shoes of those facing poverty by participating in the Community Action Poverty Simulation (CAPS). The CAPS provides participants with the opportunity to assume the role of a low-income family member living on a limited budget. The experience is divided into four 15-minute sessions, each of which represents one week in which you must provide for your family and maintain your home. As one participant commented, “This simulation dramatically demonstrates how much time and energy many families have to give just to survive from day to day.” It quickly dispels the myth “that people would do fine if they would only go out and get a job!”

ANXIETY IN ADOLESCENTS: HOW MEDITATION, DEEP BREATHING, AND NUTRITION CAN HELP

Poster Session Presenters: Shannon Cearley, BS (Nutrition & Food Science), Independent Researcher, Augusta, GA, and Dr. Padmini Shankar, Professor, Georgia Southern University, Statesboro, GA

In the United States, more than 6% of adolescents aged 12-19 years reported having used psychotropic drugs to treat clinical psychiatric symptoms or mental disorders, which included antidepressants (3.2%), ADHD drugs (3.2%), anxiolytics/sedatives/hypnotics (0.5%), and antimanics (0.2%). Furthermore, 4.5% reported using only one medication, while 1.8% reported having used two or more medications. Nearly half of adolescents (53%) in the United States that used psychotropic drugs had been seen by a mental health professional within the previous year. While females were more likely than males to use antidepressants, males were more likely to use ADHD medications than females. Meditation and deep breathing have been shown to decrease stress levels, provide calmness, improve concentration, memory, and focus. Research provides evidence that meditation and deep breathing exercises: (1) synchronize the heart and brain, (2) reduce the harmful effects of stress, (3) shift the body from a sympathetic state to a parasympathetic state, (4) lowers blood pressure, (5) improves concentration, focus, and memory, and (6) reduces anxiety and depression. We suggest that in some cases meditation and deep breathing exercises could potentially attenuate the symptoms of anxiety, depression, and ADHD providing adolescents with a non-pharmaceutical treatment option. Meditation and deep breathing exercises can be practiced daily for twenty minutes by adolescents to achieve positive results, possibly reducing the need for medications at during such an early age. We urge parents, health care professionals, and schools to consider providing education about the benefits of these alternative treatment methods as first line treatments to anxiety, depression, and ADHD.

THE EFFECTS OF ALCOHOL ABUSE AMONG YOUTH

Poster Session Presenters: Ian Affeldt, BS, (Nutrition & Food Science Junior), Georgia Southern University, and Dr. Padmini Shankar, Professor, Georgia Southern University, Statesboro, GA

Alcohol abuse among youth is a serious issue that is not going away. It is currently one of the leading causes of death among young adults. Excessive drinking by minors can cause serious health problems such as fatty liver and liver damage. In 2016, the National Institute on Alcohol Abuse and Alcoholism and the Teen Rehab Center reported that 8.7 million young people between the age group of 12-20 reported consumption of alcohol in the past month. Among 10th graders, 52% believe it is easy to obtain alcohol. This is an alarming statistic, proving we need more regulations in place to prevent minors from purchasing alcohol. Alcohol abuse needs to be addressed by our nation’s schools on a regular basis to fortify campaigns like the Red Ribbon Week. Kids need to take an active part in learning the adverse health effects of alcohol abuse on their bodies. With age-appropriate community health programs and curricular education on alcohol abuse, it is hoped young adolescents will live longer and safer lives.

GROWTH MINDSET: THE ANSWER TO “WHY DO I NEED TO KNOW THIS?” - Ballroom E

Speaker: Carmen Long, Teacher Georgia Connections Academy, Duluth, GA

Motivating students is a challenge to most educators at some point or another. Students deserve to know why they are being asked to learn concepts or produce evidence that learning has occurred. They are often given empty reasons like, “we must review the standards-based curriculum” or “it is on the test.” These answers are not motivating to students. The answer to the question “Why do I need to know this?” is powerful when the answer provides relevant truth about skills students need to have in order to succeed after high school is over. Growth mindset is a theory utilizing the scientific evidence that working through difficult tasks promotes brain growth and strengthens understanding.
