Georgia Southern University's online Master of Science in computer science has been ranked as one of the top ten "best buys" in the country by the education web site GetEducated.com, a consumer group that rates ranks and verifies the cost and credibility of online colleges and online universities.

GetEducated.com ranked Georgia Southern University's program ninth in the nation, out of 140 schools that were surveyed. Georgia Southern's online Master of Science in computer science program also earned an "A" in consumer satisfaction from the web site.

"Georgia Southern University launched the online Master of Science in computer science program last year to help meet the needs of busy professionals who saw the benefits of continuing their education, but knew it would be tough to juggle their career and family responsibilities with a standard class schedule," said Ronald Shiffler, interim dean of the University's College of Information Technology. "We are thrilled that just one year into this program, it is already ranked among the tops in the nation for cost and credibility. The fact that the program received an "A" in consumer satisfaction shows that our students know they are getting a solid education from a respected institution, but with the flexibility they need."
