SGA Senate Sets Election Dates

The SGA Senate has set the dates for the Student Government elections as March 1-3 with the polls closing at 12:30 p.m. on Friday the 3rd.

Students who wish to run for SGA office must file an intent to run in the Student Activities Office of the Memorial College Center (M.C.C.) during the week of February 13-17.

The offices which are open

include President, Vice-President, Secretary, Treasurer, four sophomore senate seats, two at-large senate seats (upperclassmen), a night senator, and departmental senators as well as four Union Board seats.

Traditionally, the SGA elections have been held in the spring, however, an amendment passed last year sets the election

date in winter quarter.

This gives the new officers time to learn their new responsibilities and work with the old officers before assuming office.

This year's election will be held differently than the elections of past years in that voting machines will be used rather than the usual ballot boxes.

The voting machines will be placed at a central location such as the student center with a machine set up for each of the four classes (freshman, soph., etc.).

In this way students will be able to vote for their own class senators as well as the four executive officers.

The voting machines will thus prevent cross voting and will also

insure that there will be no possibility of ballot stuffing.

At the end of the third day of voting, the results will be known immediately and verification of the voting will be simpler as all voting will take place in one location.

Voters will be required to produce a validated I.D. at the polls in order to vote.

Homecoming Activities Begin

On Monday, January 23 at 8:00 p.m. in the Civic Center the ASC Pirates will play their homecoming game against the Columbus College Cougars. The game will complete a week of homecoming activities designed to include something for everyone.

To start off the Homecoming week the College Union Board has planned the debut of a new advent video beam television in the VTN room next to the cafeteria for Monday January 16 at 12:00 noon. A concert featuring Fleetwood Mac will be the first program to be shown as the 6-foot screen for the rest of the week, the one hour program will be shown from 8:30 A.M. until 3:30 P.M.

Also on January 16, the ASC Pirates will play Wright State at 8:00 P.M. The game will be played on campus and that night is Campus Family Night.

Tuesday, January 17 from 12:30-1:30 p.m. will be known as Take an Educated Lunch. This is the first in a series of informative lunch programs to

be sponsored monthly by the College Union Board. Bring your lunch (brownbagging allowed) to the Faculty Dining Room. UB will provide free iced tea, coffee, and a speaker. This month's presentation will be Hydroponic Plants - How to Grow Plants Without Soil. Mrs. Donald Myers will explain the process and display some of her own plants.

Wednesday, January 18 and Thursday, January 19 will be Sidewalk Art Days. Students are invited to do chalk drawings emphasizing school spirit as the campus sidewalk. CUB will provide the chalk and will award free concert tickets to all participants.

On Friday, January 20 at 9:30 p.m. CUB will present a showing of "The Way We Were". This appropriate Homecoming Film will be shown in the cafeteria. Admission is free. Popcorn and cokes are 25 cents each.

From 12:00 noon until 2:00 p.m. on Saturday, January 21 there will be a family matinee.

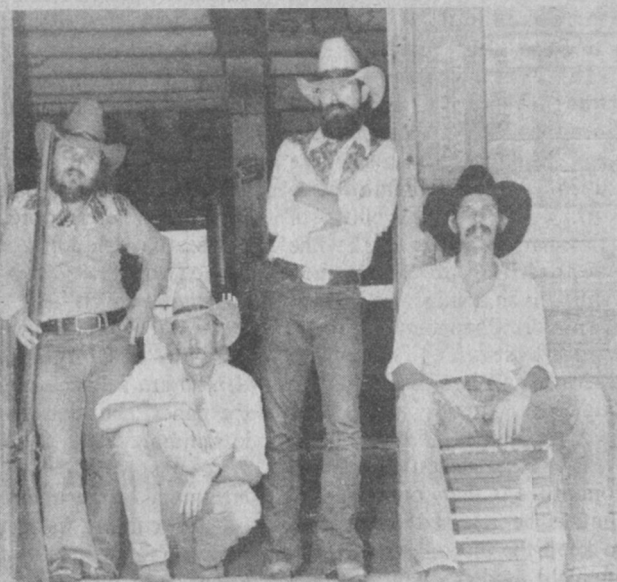

The film being shown will be Walt Disney's - Island at the Top of the World. Children of all ages will enjoy this Disney thrill. Once again, admission is free and the concession stand will be open.

The Homecoming Dance will also be on Saturday, January 21 from 9:00-1:00 A.M. in the MCC. Music will be provided by Liberation. Admission is free to ASC students presenting validated I.D. All others are \$2 single, \$3 per couple.

The Homecoming Concert will be on Sunday, January 22 at 8:00 P.M. in the Fine Arts Auditorium. The concert will feature Mike Williams and the Overland Express. These two country and rock acts are truly entertaining and worth the price of admission. Tickets are \$1 for students \$2 General. Tickets are available through the Student Activities Office.

The highlight of the week will be on Monday, January 23 when ASC plays their

Cont. on page 3

Overland Express to perform at ASC

Registration Goes Well

The number of students that registered last winter quarter was 2991. This year the number of students who enrolled should be at least one hundred or more, an increase of 1-3%.

According to the Registrar, Mr. George Hunnicut, registration went well. The students cooperated and had very good attitudes toward everything including the sometimes long wait in lines.

Mr. Hunnicut also announced

that there is a new drop-add policy. In the past there was a two dollar drop-add fee. However, the two-dollar fee has been eliminated. Mr. Hunnicut stated that this would help speed up the drop-add process. He also felt that students would not promiscuously drop-add.

The Registrar's office would like to remind all students that are planning to graduate in June to file their applications this quarter.

S.A.C. Will Lobby

by Charles Flournoy

ASC SGA President Craig Harper has appointed a special committee chaired by veteran student leader Charles Flournoy. It is the ASC SAC Lobbying Subsidiary Committee to the Georgia Board of Regents. The concerns of this committee will be to determine the issues that most concern students on a state and local level. Once these issues are determined, they will be charged with the responsibility

of lobbying before the appropriate public officials to effectuate changes. Also the group will lobby on issues determined by and supported by the Student Advisory Committee on a statewide basis. Public officials are being invited to attend meetings of the committee to answer questions. Our lobbying efforts will include frequent letter writing

Cont. on page 8

Anderson Gives Pep Talk

Political columnist Jack Anderson spoke to a nearly

Jack Anderson makes a point

packed house last Tuesday on subjects ranging from Watergate to the fuel shortage.

Although some appeared to feel that the lecture by Anderson was too vague and disappointing, a majority seemed to be satisfied with what can best be described as a pep talk on democracy and the value of investigative journalism in such a system of government.

Anderson described his role as that of a muckraker, however, there cannot be any muckraking without the necessary muck.

The thrust of his lecture was on the freedom which we enjoy

in this country and the constant battle we must wage to keep that freedom.

There were some light moments as when Anderson thanked us for Jimmy Carter and described Carter's arrival in Washington as "sending the bureaucrats scrambling and fluttering only to settle down the same as they were before they heard of him."

The lecture, which was sponsored by the College Union Board, is considered by the union board to be one of the finest programs brought onto this campus in some time.

Inkwell Opinions

Keeping us in the Dark

For at least the past two years the Student Government Association has been seeking a way to get adequate lighting installed in the area of the center of the campus. There have been numerous Senate resolutions and many committees have been formed to look into the problem. However, the simple fact remains that if lighting for the campus were a top priority for the administration of this college, Dr. Ashmore would have had it installed years ago.

And so the students unfortunate enough to have to attend ASC in the evenings are forced to play "grope in the dark" if they wish to cross the campus. The dangers of this situation are obvious but will probably continue to be overlooked until someone actually gets hurt.

In attempting to get something done about this situation, SGA Vice-President Ken Chapman has asked the student services committee to look into the possibility of "temporary Lighting". The proposition of temporary lighting is an asinine proposition even for Chapman, however, student services committee chairman Andrea Etersque has said that her committee is investigating the problem.

The first suggestion of this committee is that four thousand fireflies be released on campus to keep the place lighted. Next, all night students will be urged to take up smoking, at least temporarily, so that the light from their matches and the glow from their cigarettes will show the way. A third possibility would be to take the huge pile of paper which our administrators are apparently

lost behind and build nightly bonfires. Perhaps then both students and administrators could find their way better.

As much fun as this all appears to be, the only sensible solution to the lighting problem is for the SGA and the

administration to get off their butts and get some lights put up. This would alleviate the dangerous and embarrassing situation which now exists and would even put an end to the idiotic suggestion of temporary lighting.

Letter to the Editor

Dear Editor,

While my words should not be seen as an endorsement of the gentleman's ideas, Mr. Rodger Brown has the makings of a good writer under schrewd guidance. His philosophy on the functions of the Inkwell, however, need doctoring.

I am the past new editor and possible editor for next year. Being on the Inkwell for 2½ years, I understand the problems of getting a paper to press. The first hurdle to climb is to accumulate written material. Mr. Brown has referred to the "...nauseating plethora of pages devoted to Greeks and intramural sports". He adds that they were "very little worth reading". Rodger says the Greeks are a "necessary part of the paper", but does not include intramurals at this point. The students of ASC gave the intramural department \$9,500 for the current fiscal year. My philosophy is that they want to know what they are getting for their money. I agree that the basic format of these articles command attention, but hardly agree that as Rodger states "those columns are an insult to everyone".

When the Editor edited the term "negress" from Mr. Brown's

article, I concurred with his actions. It appears that Rodger wants the editor to edit all articles, but not his own. Also, I read the story before it went to press. I found the term was used in the profane, patronizing and contemptuous manner it is. It certainly would have offended a reasonably, needed group of individuals; not only a "small racist organization on campus".

Rodger suggests that Mr. Higgs Off The Wall column be rejected. He said after a "commendable start" Higgs is now "groping for material". I concur with the opinion that Ensign Higgs has great potential as a feature writer.

By this letter I hope to reaffirm the good reputation of the Inkwell and staff from the perspective of an interested bystander. There are causes for concern, but I feel that Mr. Brown's comments border on demagoguery. Let's not down an institution until we are inside on the facts long enough to form an educatable opinion. If the results do not meet your standards, do something to help. "If you are not part of the solution, you are part of the problem".

Charles W. Flournoy, Jr.
Former News Editor

Three quarters ago we elected SGA officers and entrusted with them the responsibility of administering student government. Now, as we prepare to elect their successors, we need to stop and consider what the SGA has done for us this year and what we should expect from our new officers.

QWe were promised almost everything by last year's candidates, with the promises ranging from ending apathy at ASC to building a day care center on campus. We got lied to. Apathy was not cured. We find that if apathy was even treated perhaps it was treated with respect. The SGA officers did quit using the word apathy and started saying something about student involvement but, like detente, changing the name of a problem will not make it go away. And if another candidate promises you a day care center, punch him out!

The big problems at ASC are the same as they were last year. Apathy, (there - we said it), parking problems, campus lighting, indifference and isolation on the part of the SGA, and the lack of good activity programming are still the major problems facing us.

So when was the last time your senator spoke to you about campus problems? And who are the members of the Union Board? And where did the executive officers disappear to after the election? (hint - two of them quit, a third one went into

isolation, and a fourth one went into a perpetual spin cycle of clouds of dust and nowhere).

The SGA has accomplished some good this year. I can think of anything right off .perpaps you can. But there have been no concentrated efforts to accomplish the promises heard last year or to solve the realistic problems facing campus.

But all is not lost. This quarter we get another chance to elect officers. Don't be fooled by a bunch of crap about unrealistic projects that are nothing more than a seduction to steal your vote. Do vote wisely. Now is the time for ASC to grow and improve. We need a good SGA if we are to accomplish anything.

Even if you don't have time to become personally involved in campus politics, the actions or inaction of the officers will affect you. If you waste your vote on someone who just happens to be a friend or a friend of a friend or a member of a certain group, or if you don't vote at all, there will be an excuse for any complaining if we end up with another winner of the year. So give it some thought. Run for an office if you can, to encourage someone to run. And take a good look at the candidates this year. Believe it or not, an active SGA is very important to the life of a school--and if we ever have one this fact will become apparent.

Basketball At ASC

The ASC Pirates are performing extremely well this year but they still need the support of the student body. The Pirates' brand of play is fast and exciting and under the direction of head coach Bianchi and assistant coach Backus, the Pirates provide the fans with great sports entertainment.

Without a doubt, basketball is one of the biggest things going on at ASC at this time. The students who do attend always find that win or lose, Pirate basketball is a lot of fun.

Anyone who claims that ASC suffers from a lack of spirit should take in a game and watch the fans "giving them hell" in no uncertain terms. And the cheerleading squad, though quite small, puts out an incredible effort in leading the small but rowdy crowd of Pirate fans.

The pep band, under the direction of Ken Chapman, provides music and spirit for the fans with rousing fight songs and cheers designed to fire up the players and the crowd alike. Chapman's pep band came into existence last year and have been entertaining the basketball enthusiasts ever since.

And the best part about basketball games is the fact that they are free to students. All a student has to do is show his ID

and he will be admitted to any home game.

The next home game will be homecoming, Monday, January 23rd, against the Columbus College Cougars. We would like to see the Civic Center packed for this game. But don't make this the full extent of your participation in Pirate basketball. The season will only be at the half way point. Try to make plans to support the Pirates throughout the remainder of the season. We're sure that you will be glad you did.

The Lady Pirates are also playing their hearts out for Armstrong. These girls work very hard to represent the school in women's basketball. Unlike the men's team, the ladies are not given the coverage that they deserve in the local papers or in the school press. These girls wear the maroon and gold for ASC and deserve the respect and support of the students.

The Lady Pirates play their home games in the gym right here on the campus. The girls' basketball games are exciting and a great deal of fun just as the men's games are. Head coach Betty Ford is building this

Alcohol: A Liquid Fuel

by Mark Henze
Reprinted from
Conservation News

The energy crisis plaguing the United States has left both scientists and politicians scrambling after the glory of finding the ultimate solution. Technologies such as nuclear and solar energy have quickly come to the forefront, but regardless of these advances, we will find it difficult to turn our backs on the liquid fuels to which we have become accustomed. Even if a switch is desired, our heavy reliance on liquids points to a lengthy transition.

It is becoming obvious that an alternative to petroleum must be found and that this alternative fuel may well be the familiar alcohols, ethanol and methanol. Not only would this alternative fuel free petroleum for use in the manufacture of plastics, life-saving drugs, and other organic chemicals, but it also burns cleaner and more efficiently than gasoline. The transition to alcohol have little effect on the economy, and the fuel could be manufactured from such materials as timber, agricultural, and municipal wastes.

Both methanol (wood alcohol) and ethanol (grain alcohol) are colorless liquids at room temperature, are combustible, and have been used as fuels in the past. During the formative years of the automotive industry, several studies were conducted that suggested alcohol fuels might be superior to gasoline. However, the discovery of vast petroleum reserves soon put alcohol at an economic disadvantage. During both World Wars, petroleum shortages in the United States and abroad mandated the use of alcohol, both in mixtures with gasoline and as a pure fuel source. In the 1930's Chrysler Corporation exported autos (to New Zealand) which were designed to run on 100 percent alcohol. Other countries such as Germany, Brazil, and Sweden have successfully used alcohol blends since that time.

Clean-burning methanol is the alcohol used in Sterno, the familiar food heating substance. It is quite toxic and can cause blindness if ingested. Ethanol, however, is the alcohol used in fermented beverages. It can be consumed and has been subjected to extensive tax laws due to its social implications. Both alcohols, unlike gasoline, can be extinguished with water and have been used in race car fuels where such a characteristic is of huge benefit.

Studies have shown that with slight modifications, internal combustion engines (as well as most other types) can be run on pure alcohol. A study undertaken at Stanford University in 1970, using a

brand new Gremlin run on pure methanol, showed that on the average, emissions were almost ten times lower than those of a similar car run on gasoline. Experiments at the University of Santa Clara also showed marked differences in carbon monoxide and hydrocarbon emissions. However, little difference was found in the NO (nitrogen oxides) omissions between the alcohol and gasoline fueled autos. Also, since alcohols have a higher octane rating, the fuel has excellent anti-knock tendencies and the highly pollutant tetraethyl-lead additive could be eliminated without compromising on performance.

Alcohol fuels also have some problems. For example, there is less stored energy in a gallon of alcohol than there is in a gallon of gasoline. Therefore, a larger volume of alcohol fuel must be consumed per mile traveled. This would mean enlarging automobile fuel tanks and bringing down the price per gallon of alcohol. Also, alcohols are known to react chemically with some of the materials used in the fuel system, and also lack many of the lubricating properties associated with gasoline. This would lead to some slight changes in the engine construction and fuel transport systems.

But, alcohol fuels have another big advantage. They are soluble in gasoline and could be used in increasing percentage mixtures as the alcohol industry increased its production or as gasoline supplies decreased. Studies have shown that as much as 15 percent alcohol can be added to commercial gasoline without any modifications other than simple carburetor adjustments. These alcohol blends have been shown to decrease exhaust and operating temperatures, slightly improve fuel mileage, eliminate engine knocking, and significantly reduce exhaust emissions. However, the solubility of the alcohol in gasoline decreases as the temperature drops and as the water content increases. Further tests have shown that this problem can be corrected by the addition of small amounts of alcohols such as isobutanol.

In Germany, Volkswagen performed a series of tests using an 85:15 blend of gasoline to methanol in 45 cars. Volkswagen found that fuel consumption increased by 4 percent in volume, yet the cars were 5 percent more efficient in their use of available energy. They also found that with the addition of isopropanol or isobutanol, low temperature solubility problems could be solved. Volkswagen did not report any problems with the absorption of water separating the mixture, despite tests run at

temperatures as low as -15 degrees C.

Many researchers consider the main problem to be one of supply. The United States, in 1976, consumed over 100 billion gallons of gasoline. Current methanol production is around one billion gallons per year and ethanol is even less. Even if all methanol were used for fuel, it would account for less than one percent of the current demand for gasoline. Obviously, new and large production facilities would be needed.

Ethanol is produced mainly from the fermentation of agricultural crops such as sugar cane, beets, and grain. Thus, there is a severe limitation on raw materials, and costs currently range around \$1.50 per gallon. Before any full-scale agricultural production ensured, however, studies of the adverse environmental effects — from possible overcultivation or intensive fertilization — would be needed. Methanol can be produced from many sources such as natural gas, coal, timber, or urban wastes. Of course, natural gas a source is not helpful if we want to decrease our dependency on petroleum-based fuels.

The method of converting coal to methanol is well known, and it has been suggested that 10 percent of our coal production could yield enough methanol to support a 10 percent fuel mixture. The savings from such a mixture would be over 10 billion gallons of gasoline. President Carter's entire gasoline conservation goal. Estimates put the cost of methanol derived from coal as low as 10 cents per gallon!

A study conducted in Maine estimates that one percent of the U.S. forest reserves could produce enough methanol for a 10 percent mixture. Some 280 gallons of methanol could be produced from every ton of wood, or about 2,250 gallons per acre of typical forest land. Yet, harvesting at this rate would necessitate the best forest management techniques available and even then, fuel production would have to compete with the already short supply of lumber and paper. The effects of this harvest rate could be alleviated by using lumbering wastes such as sawdust as the raw material.

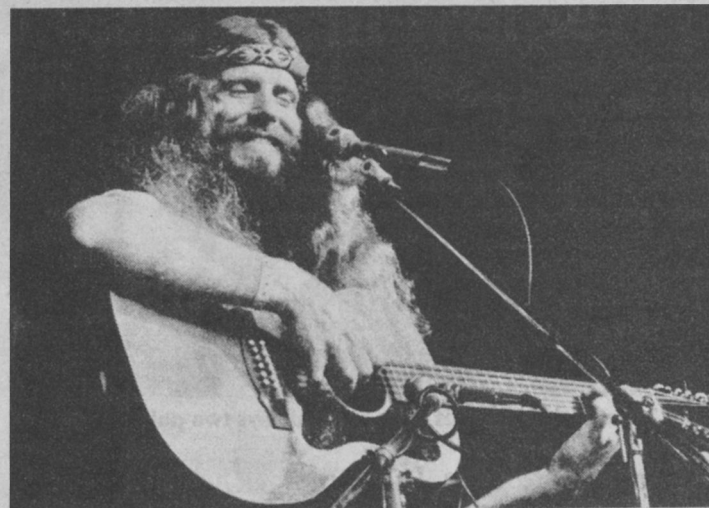

Another possibility would be the use of municipal waste to produce methanol. Such raw materials are usually cheap and are limited only by their availability to collectors. Studies performed in California and Seattle, WA, indicate that almost 60 gallons of methanol could be produced from a ton of urban waste. This would be helpful in reducing the staggering amount of waste Americans discard daily. The only real drawback

seems to be the task of changing traditional community disposal and collection procedures.

In 1971, the American Petroleum Institute published a paper entitled "Use of Alcohol in Motor Gasoline," in which gasoline was favored over alcohol only because it is cheaper and because there are not enough technical advantages to justify paying the higher price of alcohol. It is generally accepted that alcohol is viable fuel alternative. However, before it is accepted, its price must become competitive with gasoline, and as gasoline prices rise, this may soon be a reality.

In many countries, such as Brazil, Germany, and Sweden, competitive alcohol prices have already led to extensive pilot programs. Chrysler-Brazil, the major auto manufacturer in

Brazil, says that existing cars can operate on 20 percent alcohol blends without being adjusted, and insists that cars using these blends could run in California without emission controls and pass the state's stringent pollution specifications. The Ford Motor Company claims that "there are no fundamental reasons why it (alcohol) cannot be used as an automobile fuel." Yet, Exxon came to the conclusion that alcohol fuels pose too many problems. This has led many researchers to accuse both the government and the oil companies of disregarding the results and of spreading false information on the efficiency of methanol. Hopefully, future studies will solve this discrepancy, but for now, the question remains, "Who will take the initiative?"

Mike Williams to perform at ASC

Homecoming '78

Cont. from Page 1

Homecoming Game against Columbus College at 8:00 P.M. There will also be a Pep Rally sponsored by the Pep Band.

Half-time activities will include awards for the Banner Contest and Floats. \$25 will be awarded for the Best Banner and \$75 for the First Place Float. \$50 will go to the runner-up.

Also during the game, a display of old annuals and photos will be set up in the Civic Center Lobby. 1971, 1973, 1976 yearbooks and photos will be distributed free as long as the supply lasts.

One event scheduled for Homecoming will be the concert on Sunday, January 22 featuring Mike Williams and the Overland Express.

Mike Williams has a combination of fine musical talent and a great stage presence which all adds up to a great show. Much of his music seems to be country but has an underlying current of sophistication that sets his style apart from that type of music.

Appearing with Mike Williams is the group Overland Express. The group consists of Keith Sherman, Rick Williams,

Randy Clark, and David Pierce.

Keith Sherman is the lead and background vocals. He also plays acoustic and electric guitar.

Rick Williams is lead and background vocals. He plays the bass guitar and vocals.

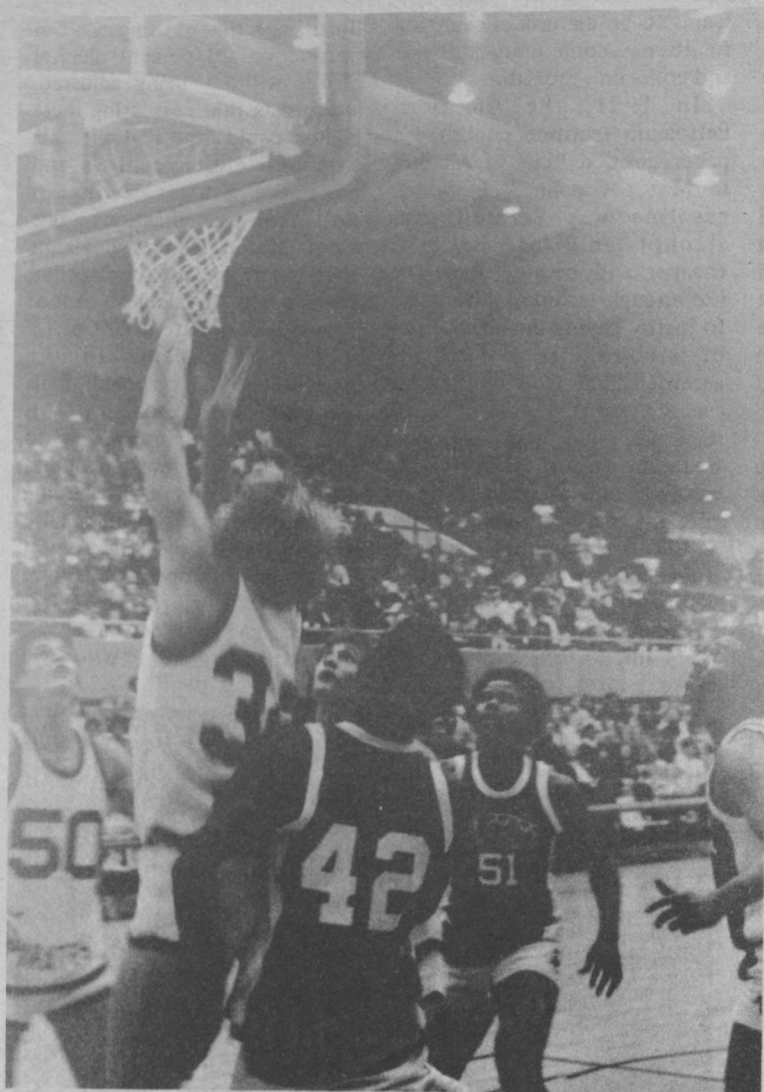

Also singing lead and background vocals is Randy Clark. Randy combines his singing with playing the acoustic electric, and bass guitar. Backing up the group is its newest member, David Pierce on drums and percussion.

The group was formed in 1975 as a three-piece acoustic band. Its strong point is the incredible vocal harmony of Keith Sherman, Rick Williams and Randy Clark.

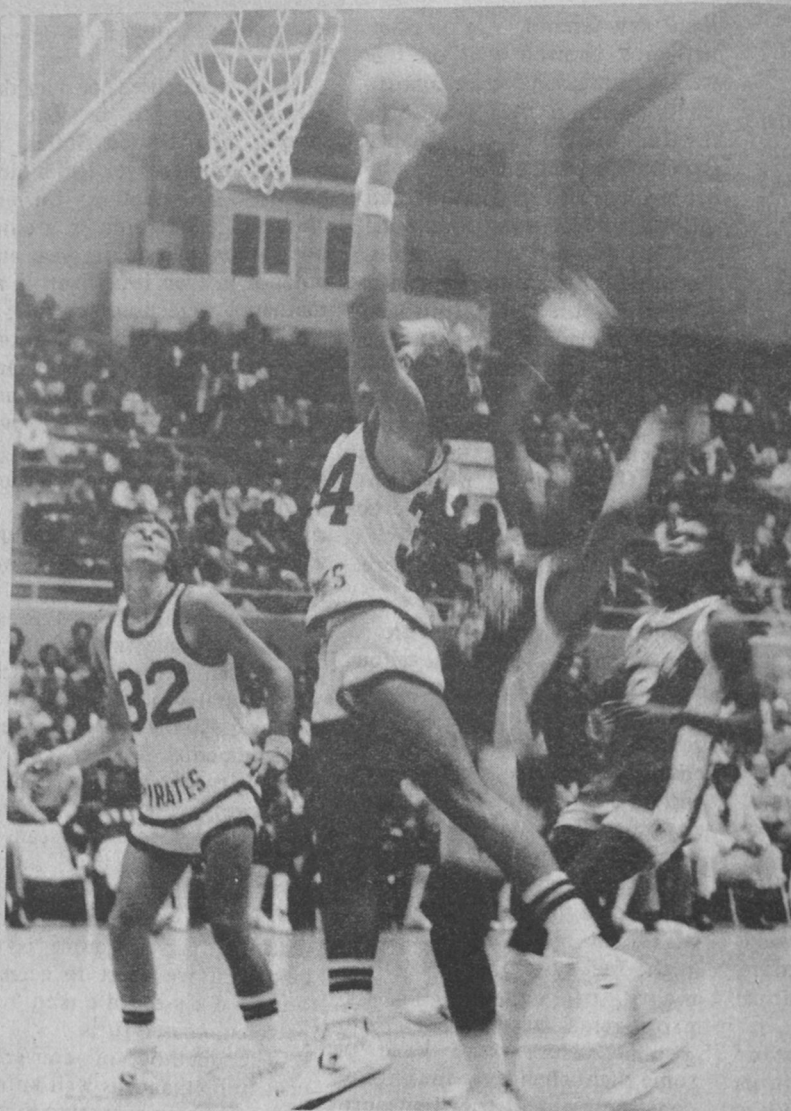

The group has performed all over the south alone and with other groups, such as Pure Prairie League, the Vassar Clements Band, and the Lost Gonzo Band.

Their recently completed first album is leading the band in a very positive direction. This could result in the opportunity for more and more people to hear the tight, energetic, harmonious sound of Overland Express.

PIRATES' BASKETBALL

Mike Lusignan stands by as Jim Hall lays two points in.

Jim Buice runs up the middle for two.

Photos by Sandra Turnquist
Stories by Lynda Broussard

The Armstrong Pirates have a new look this year by "running" and "gunning" their opponents. As it looks now Coach Bianchi's idea of a successful and winning team is to wear out the opposition. Being picketed to finish last in the conference, the Armstrong Pirates have been a pleasant surprise so far this season. Although their conference record now stands at 0-2, their overall record is 7-7.

The team had been suffering with colds and flue, and the resultant lack of stamina may have cost the Pirates in the 129-112 conference loss to West Georgia last week. On January 12 the Armstrong State Pirates lost their second conference game to Augusta College 87-77.

The Pirates are a hot-shooting club, averaging 98 points per game, and guard Jim Hall, a 6-2 senior leads the scoring attack with a 16.0 point average per game.

Joining Hall in the line up are guard Donnell Britton, 5-10, forwards Mike Lusignan, 6-5, and Henry T. Wright, 6-5, and center Harold Wilson, 6-6. Keith Ochs is the sixth man who has a nontiring ability to play ball.

Lusignan is second in scoring with a 13.8 average, Wright is averaging 13 points per game, Ochs 12, Britton 11, and Wilson 10.5. T. Wright leads the team

with the most points, rebounds, blocked shots, and most steals, while Donnell leads the team with the most assists.

Promising freshman of the A.S.P.B. ball team are Foy ballance who's one of the outstanding players on the team. He is an excellent, scrappy ball-handler. His ability to handle the ball is unbelievable. Foy is the first back-up point guard. Vincent Warfield is also an outstanding prospect at either the point or two-guard position. Vincent is a good outside shooter and an excellent person to direct the fast breaking Pirates.

State Smith is a very strong inside player. He is a good shooter to fifteen feet and is strong enough to pull down the rebounds. State is a very impressive player.

Mike DeVoss is an outstanding shooter. He runs well on the fast break and can play point position if needed.

Jim Buice, a sophomore, is a great asset to the team. Tim is perhaps the strongest player on the team and an extremely good leaper. Jim has potential to be a good strong forward.

Ike Glover and Chris Carter are two impressive Juniors on the team. Ike is quick, a good rebounder and a good outside shooter while Chris is a good

mid-range shooter with the ability to out rebound taller forwards.

Barry Stevenson, a senior, was a backup for Crow Armstrong last year. Barry plays a key role for ASC with his rebounding ability. He is an effective jump shooter inside fifteen feet.

If Coach Bianchi, Assistant Coach Backus and Morris can get each player to play to their

potential, be a well organized team and play the fast running game Coach Bianchi has designed them to play, the prove to be a very promising and successful team.

I would like to ask each person to come out and support the Pirates. It will be well worth your time and effort to give support to your team.

Good Luck, Pirates!

Lady Pirates Basketball

The future looks bright for the Lady Pirates as Carmen Escartin, senior, has transferred to ASC from Augusta College. Carmen averaged eighteen points per game and should prove to be a great asset to the Lady Pirates. Also, Theresa McGrath, sophomore, who is 5'11" will add a great deal of height to the Lady Pirates.

The starting line up for the Lady Pirates are Sheryl McIver, sophomore, Marie Dotson, Junior, who is one of the two co-captains and leads the team in assists, averaging twelve points per game. Patty Rountree, senior, also a co-captain averages twenty-one rebounds a game. Cindy Hambrick, junior, is high scorer for the Lady Pirates,

averaging fifteen points per game. Tweet McCann also a junior starts for the Lady Pirates.

Five promising freshman on the team are Bernie Hamilton, Margaret Zeigler, Susan Johnson, Linda Wolfe and Tammy Todd. Amy Grimm is a sophomore.

The Lady Pirates' record now stands 1-6; however, they are 1-2 in their conference games. Women's basketball proves to be a very interesting sport, so come and see for yourself. Support your Lady Pirates and with Coach Ford's coaching ability and your support the Lady Pirates will prove to be a winning team.

Good Luck Lady Pirates!

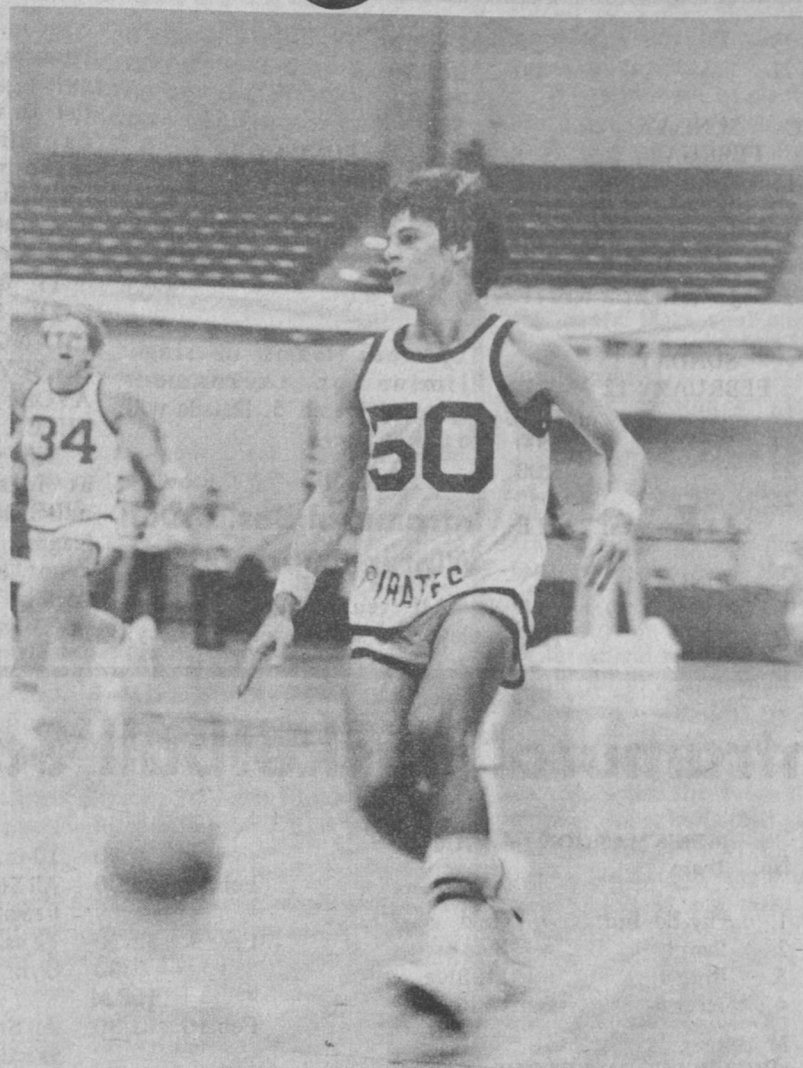

Jim Buice takes a shot.

Ike Glover and Chris Carter are two impressive Juniors on the team. Ike is quick, a good rebounder and a good outside shooter while Chris is a good

mid-range shooter with the ability to out rebound taller forwards.

Barry Stevenson, a senior, was a backup for Crow Armstrong last year. Barry plays a key role for ASC with his rebounding ability. He is an effective jump shooter inside fifteen feet.

If Coach Bianchi, Assistant Coach Backus and Morris can get each player to play to their

potential, be a well organized team and play the fast running game Coach Bianchi has designed them to play, the prove to be a very promising and successful team.

I would like to ask each person to come out and support the Pirates. It will be well worth your time and effort to give support to your team.

Good Luck, Pirates!

Lady Pirates Basketball

The future looks bright for the Lady Pirates as Carmen Escartin, senior, has transferred to ASC from Augusta College. Carmen averaged eighteen points per game and should prove to be a great asset to the Lady Pirates. Also, Theresa McGrath, sophomore, who is 5'11" will add a great deal of height to the Lady Pirates.

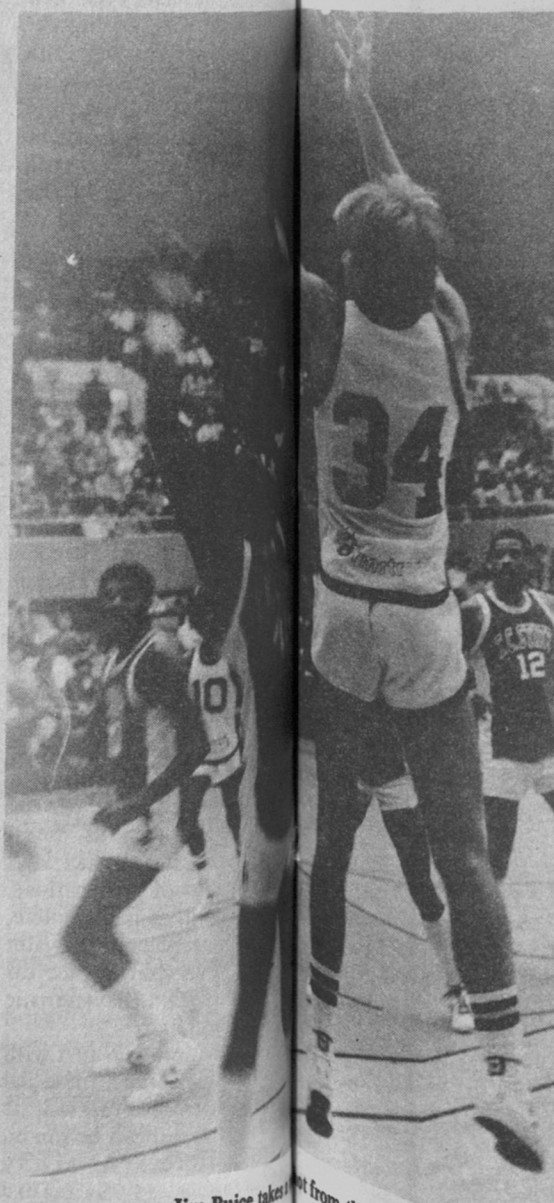

The starting line up for the Lady Pirates are Sheryl McIver, sophomore, Marie Dotson, Junior, who is one of the two co-captains and leads the team in assists, averaging twelve points per game. Patty Rountree, senior, also a co-captain averages twenty-one rebounds a game. Cindy Hambrick, junior, is high scorer for the Lady Pirates,

averaging fifteen points per game. Tweet McCann also a junior starts for the Lady Pirates.

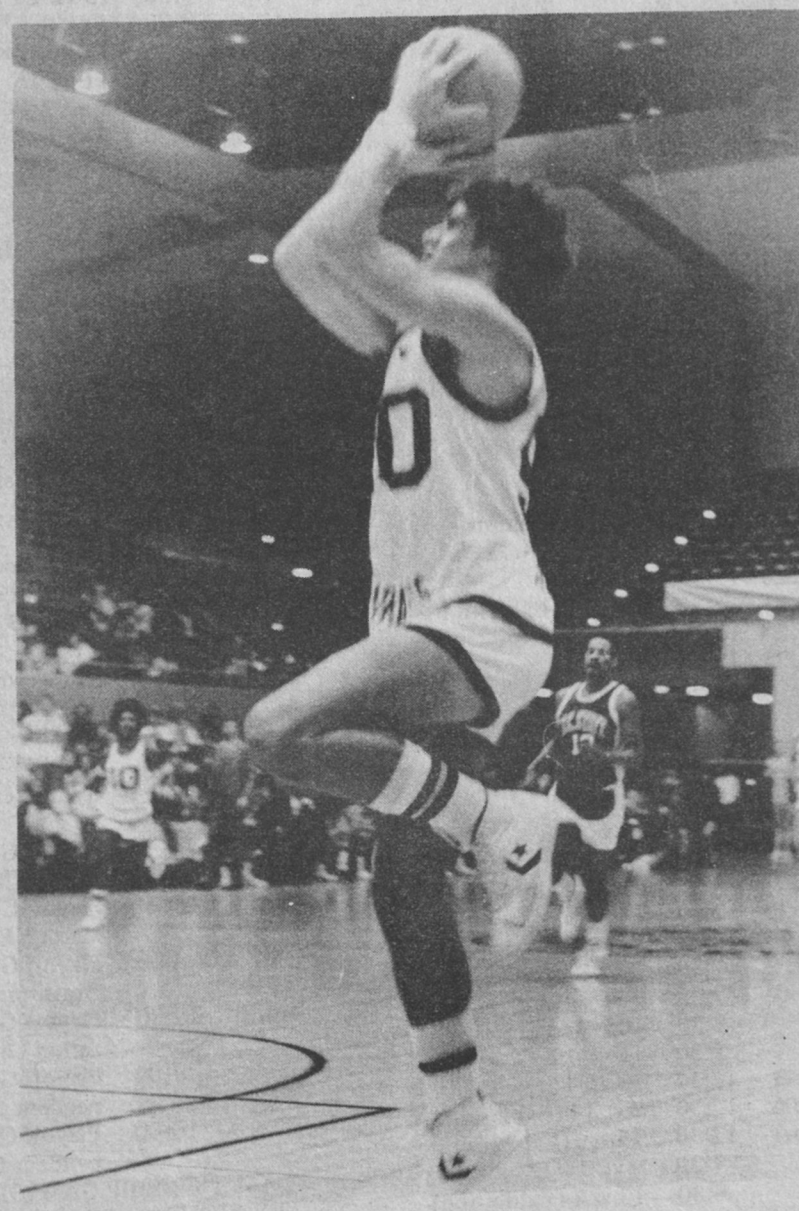

Five promising freshman on the team are Bernie Hamilton, Margaret Zeigler, Susan Johnson, Linda Wolfe and Tammy Todd. Amy Grimm is a sophomore.

The Lady Pirates' record now stands 1-6; however, they are 1-2 in their conference games. Women's basketball proves to be a very interesting sport, so come and see for yourself. Support your Lady Pirates and with Coach Ford's coaching ability and your support the Lady Pirates will prove to be a winning team.

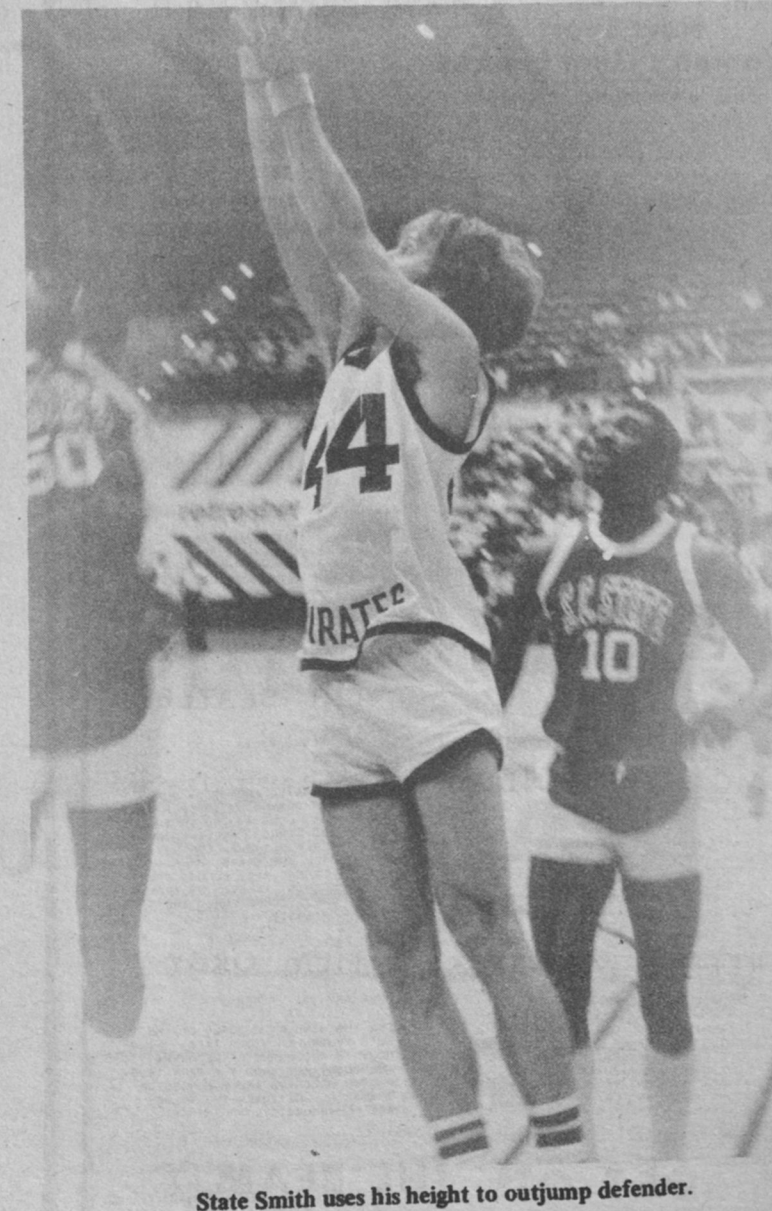

Good Luck Lady Pirates!

Jim Buice takes from the side.

Mike Lusignan tries an outside jump.

State Smith uses his height to outjump defender.

Intramurals

Intramural Men's Basketball Total of 16 Teams

Four in the MAROON LEAGUE - This is the fast league with a limit of two ex-college players per team.

Five in the ORGANIZATION LEAGUE - Clubs, Fraternities, etc.

Seven in INDEPENDENT LEAGUE - This league has a limit of two ex-high school players per team.

There will be some exhibition games between teams of different leagues and all-star games between leagues this year. The top four teams in each league will be in a single elimination tournament for each separate league at the end of the season.

Women's Basketball Total of 8 Teams

One league

All games played on Sunday afternoons.

Top four teams in playoffs at the end of regular season will participate in a single elimination tournament.

Soccer-Men Total of 5 Teams

Season begins Sunday, January 22nd - Games will be played on Sunday afternoons on the new intramural field across Science Drive from the Tennis Courts.

New Sport Women's Gym Hockey

This is sometimes referred to as "Pillow Polo". This will be played in the gym at 12:30 p.m. on Monday nights and an occasional other weekday night. The game is played with foam padded hockey sticks and a foam ball approximately twice

the size of a softball. Each team has six players and a goalie similar to ice hockey. The game rules are very much like that of ice hockey except the players use their own "little old feet" instead of skates. This league has eight teams and will begin play Tuesday, January 24th at 7:30 p.m. with four games that night. This promises to be a fun game so come and watch.

Co-Ed Bowling

The turnout for the four-person teams is ten teams - largest turnout from faculty. League begins Thursday, January 19th at Major League Lanes on Tibet Avenue at 6 p.m.

Intramural Basketball Winter Quarter 1978

All teams must have all players in similar colored jerseys

with numbers. No tape can be used for numbers. Please observe rules as detailed in your intramural handbook. Team captains and coaches are responsible for checking the intramural bulletin board for any notices, schedule changes, etc. on a regular basis.

IT WILL BE NECESSARY FOR SOME TEAMS TO CHANGE JERSEY COLORS ON SEVERAL OCCASIONS TO AVOID COLOR CONFLICTS. CHECK YOUR SCHEDULE.

This year each team will have at least one exhibition or non-division game in the men's leagues. These games will not count in the standings but a forfeit will cost you \$ and possibly intramural points.

Intramural Basketball Schedule

Instructor II. Degree in Behavioral Science or some experience. \$6714 per year to start.

Basketball

Cont. from page 2

young team into a group that should be a big competitor in the future. But this team must have your support.

The girls won't be playing at home again until February 3rd when they take on Tift College. But in the interlude they will be representing our school against other colleges in the state. The schedules of the two teams are printed in the sports section of this paper. Make your plans to support these teams at their future games.

The importance of our basketball teams can best be explained in terms of the publicity they give Armstrong. When our teams play other schools, these schools find out who we are and develop opinions about ASC. If ASC is ever to grow into a bigger and better school we must show the world (or at least as much of it as we can reach) that we are a good school and have good students. One of the best ways to accomplish this lofty goal is through our basketball teams and student support of these teams. We are counting on all of you to join in and make ASC count.

Armstrong Bowling

The men and women's bowling teams will be beginning the Southern Intercollegiate Bowling Conference this Saturday, January 14th at Valdosta State. Sunday, January 15th the men's team host the University of Georgia. There are matches almost every weekend through March 15th. Teams in the ASC Division are: University of S.C., University of GA, Georgia Tech, Citadel, and Valdosta State.

The Armstrong men's team is the defending S.I.B.C. champion and although they lost three of their top seven bowlers, ASC won the Savannah Invitational Tournament in November of this season.

Returning are: John Ibarra, John Seidl, Ray Seidl, and David Taylor. Newcomers are: Ralph Haynes, Ed Kendrick, Dennis Cook, Earl Rogers, Butch Rountree, Robert Simons and Mike McKeever.

Beginning this quarter, Willie Tuten will be joining the men's team for the first time and there is a strong possibility that the former ASC outstanding bowler from several years ago, Vic Martin, will be returning. Vic was Collegiate National Singles Champion in 1975.

The women's team will be inexperienced with only one returnee, Virginia Sample, from last year. Newcomers are: Andra Adair, Lisa Thompson, Brenda Mays.

All home matches will be held at Victory Bowling Center.

Bowling Schedule '77-'78

All Home Matches at Victory Lanes

*Jan. 20	Citadel (SIBC Div.II) 1 P.M.	Charleston, S.C.
