Georgia Southern professors team up to reduce food waste on Statesboro Campus

JUNE 5, 2019

Save

Three Georgia Southern University professors have been awarded a \$40,000 grant from the Center for Sustainability to fund a project that will focus on recycling and reducing food waste in the dining halls on Georgia Southern's Statesboro Campus.

Padmini Shankar, Ph.D., professor of nutrition and food science in the Department of Health Sciences and Kinesiology, in collaboration with Evans Afriyie-Gyawu, Ph.D., associate professor in the Department of Biostatistics, Epidemiology and Environmental Health Sciences, and Vinoth Sittaramane, Ph.D., associate professor in the Department of Biology, are working on the project, "Food Waste Recycling and Education to Promote Sustainability at Georgia Southern University and the Community."

"Food waste is a monumental problem in the United States," stated Shankar. "The proposed project utilizes innovative strategies to recycle campus food waste into compost and feed for poultry and aquaculture."

The project will also implement on- and off-campus educational intervention activities to educate students on the most effective and efficient means of reducing food waste. Long-term benefits of the project include increasing awareness about food waste, decreasing campus food waste, enhancing the profitability of farming and reducing the impact of food waste on the environment.

The project will be presented as an interactive exhibit during the Sustainability Showcase Exhibit schedule in April 2020

This project expands on another sustainability project, "Reducing Food Waste as Part of Sustainability Efforts on Georgia Southern Campus" that was funded by the Center for Sustainability and conducted by Afriyie-Gyawu during the 2017-18 academic year.

The project's grant is funded by Student Sustainability Fees, which funds several sustainability projects each year. Since 2014, more than \$1.25 million in Sustainability Fee Grants has been awarded to support campus sustainability efforts.

Georgia Southern professor receives Outstanding Engineering Educator Award

JUNE 5, 2019

Save

Georgia Southern University Associate Professor Rami J. Haddad, Ph.D., was awarded the 2019 Institute of Electrical and Electronic Engineers (IEEE) Region 3 Joseph M. Biedenbach Outstanding Engineering Educator Award.

This prestigious award is given in recognition of an IEEE member in Region 3 who, through technical and professional abilities, has made an outstanding contribution to the electro-technology profession.

“Teaching is something I am very passionate about, so to be recognized in this area is a commendation of all the effort invested in the students’ success at Department of Electrical and Computer Engineering in Georgia Southern University,” said Haddad.

Haddad joined the faculty in the Allen E. Paulson College of Engineering and Computing in 2011 in the Department of Electrical and Computer Engineering. He has been the Computer Engineering Program coordinator since fall 2018.

The IEEE is the world’s largest technical professional organization for the advancement of technology for the benefit of humanity with more than 423,000 members in over 160 countries around the world. Region 3 encompasses over 30,000 IEEE members across nine states in the southeastern US and Jamaica.

Dr. Gregg L. Vaughn, left, presents (IEEE Region 3 President) and Dr. Rami Haddad with his award.
