There is no chance of shock to the subject of the investigation, which begins around 2000 V or 2100 V with a potential around 2000 V in the case of malfunctions. The device used to test the current flow for exception includes measuring the weight and height of the subjects. There is a very small risk of decompression.

In this document, we discuss the new impedance values of all devices and the body composition data of the commercial devices. The data will be moved from each device to a computer, where analysis will be performed to determine the commercial devices.

The data will be saved to the device based on the subject number. The procedure is as follows. The data is saved to the device identified by the subject number. For the first time, you will be asked to remove the adhesive on the fingers. After this, you will be asked to place your fingers on the electrodes. Then, you will be asked to put your fingers in a container filled with water. The impedance analysis device will be used to measure the body composition. The procedure will be repeated three times. Data will be saved to the device, and the process will be repeated three times. For the second time, you will be asked to grip the handles and stand on the self-report your efficiency and date of birth. You will be asked to grip the handles and stand on the self-report your efficiency and date of birth. Then, you will be asked to stand on the device, which will first measure your weight. Then you will be asked to put your fingers in a container filled with water. The impedance analysis device will be used to measure the body composition. Then, you will be asked to stand on the device with the same measurement set. This process will be repeated three times. For the third time, you will be asked to grip the handles and stand on the self-report your efficiency and date of birth. Then, you will be asked to put your fingers in a container filled with water. The impedance analysis device will be used to measure the body composition. Then, you will be asked to stand on the device with the same measurement set. This process will be repeated three times. For the fourth time, you will be asked to grip the handles and stand on the self-report your efficiency and date of birth.
approved by the CSU Institutional Review Board under protocol number H18400.

You will be given a copy of this consent form to keep for your records. This protocol has been reviewed
drew below.

1. You must be 18 years of age or older to consent to participate in this research study. If you are
under 18 years of age, you must have an adult who is legally responsible for you to sign this consent
form for you.

2. There is no penalty for not participating or deciding to end participation in the research study.

3. Data collected prior to your withdrawal from this study will not be used in the study and cannot be
removed. If you have questions about this study, please contact the researcher named above or the
researcher’s contact advisor.

4. Rights to Ask Questions: Participants have the right to ask questions and have those questions
answered.

5. Policies which protect the anonymity of individuals and institutions

6. Confidentiality: Data will be maintained and accessed by the investigators only.

7. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

8. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

9. Voluntary Participation: Participation in this research is voluntary. You may end your participation
at any time, and for any reason. Should you want to discontinue participation, let one of the
researchers know at any time.

10. Data collected in this study will be held in confidence and will not be used in the study and cannot
be removed. If you have questions about this study, please contact the researcher named above
or the researcher’s contact advisor.

11. You must be 18 years of age or older to consent to participate in this research study. If you are
under 18 years of age, you must have an adult who is legally responsible for you to sign this consent
form for you.

12. Data collected prior to your withdrawal from this study will not be used in the study and cannot be
removed. If you have questions about this study, please contact the researcher named above or the
researcher’s contact advisor.

13. Rights to Ask Questions: Participants have the right to ask questions and have those questions
answered.

14. Policies which protect the anonymity of individuals and institutions

15. Confidentiality: Data will be maintained and accessed by the investigator only.

16. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

17. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

18. Policies which protect the anonymity of individuals and institutions

19. Confidentiality: Data will be maintained and accessed by the investigator only.

20. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

21. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

22. Policies which protect the anonymity of individuals and institutions

23. Confidentiality: Data will be maintained and accessed by the investigator only.

24. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

25. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

26. Policies which protect the anonymity of individuals and institutions

27. Confidentiality: Data will be maintained and accessed by the investigator only.

28. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

29. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

30. Policies which protect the anonymity of individuals and institutions

31. Confidentiality: Data will be maintained and accessed by the investigator only.

32. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

33. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

34. Policies which protect the anonymity of individuals and institutions

35. Confidentiality: Data will be maintained and accessed by the investigator only.

36. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

37. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

38. Policies which protect the anonymity of individuals and institutions

39. Confidentiality: Data will be maintained and accessed by the investigator only.

40. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

41. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

42. Policies which protect the anonymity of individuals and institutions

43. Confidentiality: Data will be maintained and accessed by the investigator only.

44. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

45. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

46. Policies which protect the anonymity of individuals and institutions

47. Confidentiality: Data will be maintained and accessed by the investigator only.

48. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

49. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

50. Policies which protect the anonymity of individuals and institutions

51. Confidentiality: Data will be maintained and accessed by the investigator only.

52. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

53. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.

54. Policies which protect the anonymity of individuals and institutions

55. Confidentiality: Data will be maintained and accessed by the investigator only.

56. Statement of Confidentiality: Data will be maintained and accessed by the investigator only.

57. Right to Ask Questions: Participants have the right to ask questions and have those questions
answered.
I, the undersigned, verify that the above informed consent procedure has been followed.
