By JOHNNY SCOTT

The students of Georgia Southern selected their new officers and class representatives for next year's student council in an election last Tuesday. Of the school's total enrollment of 1269 students, 557 turned out at the polls.

The candidates for office and their respective vote totals were:

President, Diane Brannen (281); Milton Calloway (269). First Vice-President, Embree Bolton (436); Catherine Dixon (114). Second Vice- President, Bill Wood (331); William Royster (218). Secretary, Carol Kinard (358); Ethelyn McMillan (199), Treasurer, Peggy Alexan-der (232); Jack Dillion (181); Jackie Marshall (138).

A run-off election was held Thursday between Alexander and Dillon and the results of this election were: Dillon, (190); Alexander (177).

Candidates for class representatives were: Senior Class-Mike Poole 88), Virginia Morgan 82), Mariben Mikell 70), Patsy Ginn (78), Sandra Strick tor (127), Joyce Clark (94),

After the election, the newly elected officers were asked by He is a native of Perkins, the George-Anne to state their Joyner is presently serving as has enough voice in the affairs

A New Kind Of Student Council Election Noted

Well, student council elections are over for another year. All that is left of Tuesday's event are a few campaign posters and a runoff election. Also congratulations are in order in this editorial to the members of the 1961-62 student coordinating body at Georgia Southern. We wish them a tremendous year in all their undertakings.

A few innovations should be noticed about this year's campaign. This has been the only time that we can remember that two candidates for the same office have campaigned together by placing both their names on the posters. We're speaking, of course, of the candidates who ran for second vice president. It's only too bad that both of them couldn't win. That would have been the fit climax.

Radio Station WWNS in cooperation with the George-Anne sponsored an hour's program Monday night to promote the election. The duties of the officers were described, the candidates' biographical sketches and the platforms were reported over the air. Also information about the election was given. We'd certainly like to

see the same kind of show next year. We would also hope that all the candidates will appear personaly and present their own platforms as well as participate in a panel discussion. This next show should be sponsored by Radio Station WWNS through the cooperation of the George-Anne and the 1961-62 student council.

Heading the list of changes is definitely the fact that Diane Brannen might be the first woman ever to be elected president of the GSC student council. There's only one step left for a woman in our nation.

The total number of students voting was approximately 550. Last year's enrollment was lower and 619 students voted.

As we have said before, now that the election is over we should not stop supporting the student governing body course, if you didn't vote, then we suggest you begin supporting your student council. It's important that the council members know what the students want and the only way they can know is if they are told. Student council meetings are always open to anyone who wishes to come and sit in.

The South Really 'Rose Saturday Night

The planning began weeks ago, some were dubious and some were enthusiastic, but regardless of the feelings held before the Old South Ball everyone is in agreement now.

Because of the dance, congratulations are in order for all those who worked to make it such a hit.

It would be impossible to name everyone who took some part in the preparation, but Walter Strickland, who headed the decorating committee certainly did a fine job in transforming Brannen's Tobacco Warehouse into a gala ballroom. Once inside it was practically impossible to think of the building as just a warehouse. Those who attended all felt that it looked as good as a hotel ball-

sident, in coordinating the efforts for this affair has left next year's president quite a task to match or better.

The cooperation between the college and high school students who also used the warehouse for their affairs gives us something else to praise.,

In addition many other students desrve credit. Those who performed at the dance also did a splendid job. Bob Fullerton, Bucky Carlton, and Billy Martin imitating the Kingston Trio and Charlotte Bellew and Beverly Webb's singing added an even more big time effect. The band hired for, the affair was enjoyed by everyone too.

All in all it was a great success and again we say "congratu-

A SQUARE DEAL By BILLY DEAL

are influenced by many things. guess the main governing factor is money, or the lack of it. When the freshman enters college, he finds conditions aren't the same as they were in high school. At college, he has to clean up his room,

put more time on his studies, and all that jazz. I guess these changes aren't too drastic. because the freshmen usually pull through and come back the fol-

lowing year to really mess things up.

But this is my point. Is it worth battling the rigors of dormitory life just to get a college degree? There has been a good deal of discussion on this topic in the men's dorms. A daily scene like the follow-

ing one is enough to make any struggling freshman think about throwing in the towel . .

The alarm clock goes off at 6 a.m. You are on a top bunk of course, so when you reach out to knock the clock off the stand, you miss and crack three knuckles across the bed post. You jerk your hand back suddenly, and the quick motion causes you to lose your balance, and about 30 seconds later, you're rubbing a part of your anatomy and looking at the spot in the floor where you

As college students, our lives grab the shaving leather, soap, wash cloth, towel and trudge to the other end of the hall to perform these daily duties. Of course, your injured toes don't feel any better after you kick over nine Coke bottles lined up against the side of your door. Well, by some miracle, you arrive at the bath room to find you left your razor in the room. You ignore an urge to crawl up in the shower to finish your snooze and trudge back down that long, dark, empty hall to get the razor. Okay. You're ready to start.

You insert that super blue blade into that adjustable razor (just like the fellow on TV) and take a long stroke on the right side of the face. The way things have been going, you aren't really surprised when you see the blood start flowing, but you are sort of disappointed. You thought this was going to be the day, didn't you? This was to be the day when you shaved without a single nick or cut. Optimistic attitude, remember? Well, 15 bloody minutes later, you step into the shower and turn on the facuet. And here's view." where you get your surprise. Thought you turned on the cold water, didn't you? Well, the shower goes nice for about five minutes ,then someone comes in and presses the wrong lever, and before you know it, that

lukewarm water has turned has turned to scalding hot and that red splotch on your back ain't

earn \$75 to \$100 per week this ner doing work that is in

Midge Lasky

The way the student council is is now set up, its purpose is as a coordinating body with the students. I think it has enough authority. The administartion should control disciplinary matters, being well-trained and quite capable. We shall try to do our best to do a good job for our school.

continued from page 1

Election...

Embree Bolton, first vice president: "I pledged myself, if elected to serve the students of GSC in all matters. I'd like to thank the students for putting their trust in me and for giving me this opportunity.

I hope the council will have, a stronger voice in matters that concern the student body. This includes such things as traffic violators, dormitory rules and campus activities. In working with Diane and the other officers and representatives of the council, I hope we can take a definite stand toward the future of GSC students. Each officer of the council has a challenge to push the council onward the develop its capabili-ties. By doing this the results be more effective." will

Bill Wood, second vice president: "The main duty of the Student council is concerned chiefly with the coordination of the students with the administration. Should the student council fail this main duty it may be considered as a failure to the students themselves. The students have no other means of making their wishes and needs heard and felt by the administration. I feel that perhaps the student council should have a somewhat stronger influence on the affairs affecting thee students, and once possessing this "stronger influence" exercise it to the utmost, as long as it is for the best interests of the students themselves.

My job mainly concerns the beginning freshmen. I pledge to do my best in working with them, in coordination of group affairs, and in working with the other members of the student council and the students. Carol Kinard, secretary: "I would like to thank the students for having the faith to vote for me. I hope that I can do the job that has been entrusted to me, always keeping the welfare of the students foremost in my mind. Although this is my first year to serve on the council, I do think we will have the power as an organization to voice our opinions and influence in any major issue that comes into

There are seven major differ-

taught in the grade school and par for the campus during the past couple of weeks. The most recent guest was Pio Tejada, taught in the high school and colleges. The third language general office supervisor of science in the Philippines.

Many students had the pleasure of hearing this gentleman talk on the educational system

ments. In his opening remark to the members of Kappa Delta Epsilon Mr. Tejada reminded his listeners of the strong ties which have bound our country and his together since 1898 when the Islands came under the administration of the United States. Although the Philippines are now independent and have been since 1946 the Americans still have a very great influence over the lives of his people.

Attendance Differs

The number of years a Phillipino attends school differs slightly from ours. Their schools are divided into elementary, which is for six years; secondary, which is for four years, and the university system.

There are three million school children in the Philippines and 80,000 teachers so there must be sufficient institutions for

teacher training there. In fact, there are 24 universities in the Islands and 10 universities in Manila alone. Also there are specialist schools. Mr. Tajada stated that there is a great over abundance of teacher applicants

Schools Like Ours

The Philippino school buildings are much like ours except that where the American trend has been to consolidate, the schools there are mostly rural schools

means of transportation is better. The schools are run from a centralized point, the secretary of education. Sixthly, the number of hours in the schoolroom are longer there. The child stays eight hours in eler mentary school, from 8:30 a.m. to 11:30 a.m. and from 1 p.m. to 5 p.m. Seventh and lastly, the children are sent home to eat because there are no facilities in the schools to serve meals. The entire discourse wasn't

about education though. Mr. Tajada did mention the festival season being held right now in his homeland. It is the custom to open every house and invite everybody else to visit. The

main pastime at these celebrations is to indulge in spirits and you don't celebrate you're considered a social outcast. Only a privileged few drive

cars in the Islands but every home has a maid. **President Described**

The President of the Philipis Carlos Garcia who pines serves for four years. He is a member of the Nationalist Party. However, the Vice President is a member of a different party. The president is elected directly by the people. In comparison to their political conventions, ours seem like funer-

als, reported Mr. Tejada. Once again in closing Mr. Tejada mentioned the attitude that the Philippinoes feel towards the United States and that they look upon it as a

room

lations to all who had anything to do with it.'

Clarification Is Necessary

Any time the George - Anne prints editorials, columns, features or news stories the staff wants criticism. The only way we can know what the student body wants in its newspaper is for the readers, faculty as well as students, to write letters.

There is some question about whether the George-Anne will print unsigned letters. The editor holds all rights to make decisions if a letter should or should not be printed. If a writer can be hurt in any way by publicly signing his name to the letter, the name will be withheld for this and other adequate reasons. However, these reasons should be submitted to the editor in order that a name not be published. The editor must have the name of the person who wrote the letter when it's printed.

These letters can pertain to any subject concerning the events on the campus or anywhere in the nation. We welcome any worthy remarks the students, faculty and administrative members wish to contribute.

The George-Anne staff is very small compared to the number of students on the campus. Therefore we cannot be expected to know about everything that happens. We do our best, but we could use the help of the publicity chairman and reporters in all the clubs. If these persons would contact us before an event is expected to occur, then we will be delighted to give the occasion all the publicity space we can.

In other words, we want the George-Anne to be the students' newspaper.

The George-Anne

Well, at least you're out of bed and ready for the day to start. But an optimistic attitude is too much to be hoped for. For when you stick six toes in the floor fan on your way to the closet, you realize that the worst part is yet to come. You still have to shave, take a bath and limp a quarter of a mile to breakfast - where you'll probably get stringy beans, lumpy grits, two pieces of toast you couldn't drive a nail through, and two strips of bacon so thin they're almost transparent. For dessert, there could only be one dish-banana pudding. I'll admit that's an odd breakfast menu, but you know what they say about variety.

But your sleepy thoughts leave this delightful subject and return present condition. There you are-trying to decide which shirt to wear when you remember the shaving, etc. So, you

World News Front

By HELEN NOWECK

Another Look at Space America's answer to Russia's

Yuri Gagarin came last Friday in the person of 37-year-old Navy commander, Alan B. Shepard, Jr. May 5, 1961 is now another historic date in the minds and memories of all men.

The rocket was finally launched from Cape Canaveral at 9:34 a.m. Fifteen minutes and 302 miles later, the craft settled gently to the surface of the Atlantic.

The rocket which supplied power for the trip was a Redstone, one of the oldest and most reliable, though less powerful than some of the newer types. As a result, our space shot lasted 15 minutes compared with Russia's 89 minutes, reached an altitude of 115 miles compared with 110 to 188 miles, and experienced 5 minutes weightless conditions compared with nearly 11/2 hours.

Speed Slower Our rocket developed only one third as much speed: 1.4 miles per second (5,100 mph) compared with 4.7 miles per second (17,000 mph).

In one minor point, we seem to have beaten the Soviet Union: Shepard was able to

shower in constant fear of being burned alive, and gather your equipment for the journey back to the room. Halfway down the hall, you remember you forget to dry off, so you go back and take care of that. Sure it's more sanitary to drip dry, but it's sooooo messy when

no birth mark. You finish your

you wear a white shirt. Well, you finally decide on a clothes combination for the day, learning later that you picked an orange knit shirt to go with the pants to your tux.

With a jealous glance at your two roommates, who are still knocking it off in bed, you grab your books and head for the door. Then the thought hits you. They have an eight o'clock class, too. Why aren't they up? Then another thought hits you, Yeah, you forgot today was

Saturday, didn't you? Your roommates will probably never understand why you threw the alarm through the window that way. But don't let it get you down-give in.

turn his space capsule in any

direction during the flight and did. Gagarin was apparently not in control of his vehicle to this extent. The President said about the

flight: "This is a historic milestone in our own exploration into space. But America still needs to work with the utmost speed and vigor in the further development of our space program. Later, at his news conference,

he repeated; "We are going to require a larger effort in space. We have a long way to go in the field of space. We are behind - but we are working hard and we are going to increase our effort."

Shepard summed up his part in the 15-minute drama by exclaiming, "Man, what a ride!" Cuba

A glance at the surface information would tend to make a person think that the first attempt to free Cuba from Communism was a complete failure, but the war has only begun.

The Communists were pressured by the unexpected invasion to reveal that they had the greatest military force ever assembled in the Western Hemisphere outside the United

teresting and fun.

Students who need vacation employment are getting a break from an unexpected source. Big family-style amusement parks, the nation's newest extravaganzas, are paying students bonus wages.

Located in New York, Southern California, Texas, Massachusetts, and Ohio (others open later in Washington and Florida), most of these jobs begin in June and last until after Labor Day. Unusual jobs, such as submarine operator and antiquecar driver, and regular jobs, such as typist or shipping clerk, combine to produce a great variety of openings.

Hostess Jobs Open

There are jobs for hosts and hostesses to greet guests at the main gates, answer questions and help park visitors enjoy the various rides and amusements. There are jobs in guest relations and child relations for persons able to set others at ease. There are jobs for security officers, groundskepers and costumers. Talents sought but not required are: "Speilers" and lecturers; stagecoach drivers; tugboat, riverboat, and submarine operators; harness makers; horse shoers.

Brochure Available

Information about these jobs has been put into a brochure that is packed with facts: A list of available jobs and their pay ranges ;a list of parks and employment managers; application deadlines and dates of hiring peaks; and answers to questions frequently asked by applicants. Rush \$1 (to cover costs) to "Summer Jobs, " Weston-Mc-Murry Incorporated, 50 Broad Street, New York 4, N. Y.

States.

Khrushchev tipped his hand by threatening President Kennedy and the leaders of other American countries with war in the Western Hemisphere.

The Cuban underground was found to be much weaker and Castro's infiltration of this underground was much stronger

than prveiously supposed. From now on, the lesson learned at this "preliminary" invasion will be applied. The anti-Castro landings will be more frequent and will involve less men, to keep larger numbers of Castro's armed forces busy patrolling the long Cuban coast line.

By WINFRED L. GODWIN **Director Southern Regional Education Board**

"This is a time of peace and peril which knows no precedent American history," President Kennedy said, and so doing he redefined the state of war for Americans. "Our way of life is under at-

tack. Those who make themselves our enemy are advancing around the globe. The survival of our friends is in danger. And yet no war has been declared, no borders have been crossed, no missiles have been fired," President Kennedy said.

Challenge To Meet Crisis

To all of America he has given a challenge to meet the crisis. "Ask not what America can do for me, but rather what can I do for America." To specific groups he has given specific responsibilities. He has asked the press of the nation to exercise self-dis-

cipline in choosing what information is to be printed in sight of an ideological enemy. He has asked cooperation and a unified national front of both major political parties of the United States.

But to American education has fallen the most far-reaching responsibility of all-to prepare ourselves, our children and future generations for a new kind of siege which will demand every ability - physical, spiritual and intellectual.

Education System Pressured

As soon as Sputnik left the ground in Russia, America's educational system began to feel the pressure of the new warfare. One major change produced by this pressure was in national attitude toward education - people recognized it as a matter of national concern and of vital importance in federal defense.

This recognition means several things specifically. It means that the national support through federal aid to education should be considered in terms of the national need and the national interest and not in terms of federal control-a control which ultimately is ours anyway.

Education leaders must continue to ask embarassing questions about cherished traditions in the interest of efficiency and greater returns for every dollar spent on higher education. This may mean rescheduling school terms for year-round operation, it may mean holding classes at unpopular times of the day and during the weekend. It means greater use of every available teaching tool, including "gadgets.'

Money Needed To Pay

The people of the nation and the South must face the possibility of increased taxes to pay for a system of education which turns out quality citizens. It is not a question of whether the money is there - Americans spend almost \$4 billion a year for TV sets, radios, phonegraphs, and other musical equipment; they spend \$10,896,-840,000 on alcoholic beverages and \$6,372,380,000 for tobacco products. The question is whether people are willing to buy top-flight education with the money they have.

Dr. James W. Martin, director of the Bureau of Business Research at the University of Kentucky, has estimated that Southern states alonge could raise an additional \$11/2 billion in revenue from existing taxes if every state in the region would make an average effort to impose and collect that tax. It is not enough that universities and colleges take up the battle of ideas in the new war. Change must begin in the secondary schools - a change

which means teaching young Americans how to think critically and independently as well as teaching them facts and subject matter.

Citizens Face Controversy

The Athenian lawmaker Solon decreed it a crime for the citizen to shrink from controversy. But in order for a citizen to face any controversy, he must be informed himself and led by others whose training and stature have fitted them to lead in times of adversity.

Underground Weak

AS I SEE IT

By ROBBIE POWELL

"The baseball season will end tomorrow and upon the recommendation of Coach J. I. Clements, we have decided not to participate in post season games," Coach J. B. Scearce announced Thursday. No doubt this statement comes as a shock and a disappointment to the baseball fans of Georgia Southern. Coach Scearce explained that this decision was reached because of the poor showing of the GSC team in the later part of the seaoson." It is not the policy of Georgia Suthern to enter competition if we do not feel that we can benefit the school by doing so. When Coach Clemments made this recommendation, I just followed it," added Coach Scearce.

The baseball team played last year in the small college World Series, and in this series they represented the college very well. They went to the finals where they were edged out. * * * * *

Eddie Mathews found out this week that sounds do not always produce the desired effect. He noticed that the Milwaukee Brave shortstop, Roy 'Radar' McMillan, made a noise while he was fielding the ball.

"It seemed to work so well for him I decided to try it myself, "Mathews said. "The ball hit me in the chest." McMillan commented that he was just breathing through his teeth.

Jim Gentile made the record book as he hit two bases loaded home runs in a row against Minnesota Twins. Although three other major leaguers have hit two in one game, Gentile is the only person to hit two in a row. This record is likely to stand for many years simply because of the odds. The odds are very high against the bases being loaded when a batter steps to the the plate twice in succession. The odds go even higher when he hits a homer the first time up.

major leaguers to hit two grand slam homers in one game. * * * * *

Eagle Team Splits Double Header With Citadel 3-2, 5-1

came through with a gritty twohittter against the Citadel Saturday to salvage a split in a double header.

The senior right-hander was superb in the nightcap allowing only a scratch hit and a triple in the 5-1 win. The Citadel took the opener by 3-2 score in extra innings.

It was in the eleventh inning that the Cadets pushed across an unearned to tag Ed Brown with his third loss of the season. It was the second game that Brown has lost on unearned runs this year.

Mike Keasler lead the Eagles in hitting with two hits and one run batted in. Clark Fain produced two runs with his only hit, Tracy Rivers, Billy Griffin, and J. E. Rowe also had hits for the Eagles.

SIGNAL SING MEST SIDEN

CAUGHT IN THE ACT are the Masquers at their recent spring quarter performance of "See How They Run." Galloping in and out of four doors of an English vicarage an American actor and actress, a cockney maid who had seen too many American movies and an old maid who "touches alcohol for the first time in her life." Everyone who saw this comedy agreed that it was excellent force of the most involved variety. This will be the last major production of the masquers for this year.
