Edison found happiness in the chase after new ideas. Burbank found it in the search for new varieties of plants. Paderewski found it in his hours of practice at the plano. John Muir found it by climbing moutains. Goethals found it by digigng the Panama Canal. Joseph B. Straus found

Since World War II we have invested nearly half a billion dollars in expanding and improving the electrical facilities that serve you. Last year we spent more than \$53 million - more than a million dollars a week-for construction.

This growth in electric power supply and demand is an important factor in Georgia's economy. Another item of importance is our 1958 tax bill of approximately \$27 million, which represents 20 cents of every dollar received. This money is paid to local, state and federal governments and benefits you and all other Georgia citizens.

On Sunday, December 28, while enroute to Miami, an axle on my car broke down, several miles out of town. Since it was Sunday, and hard to find access to a garage, I was forced to go to your police station. Two of your officers came out to where my car nad broken down, and brought my family back into town, to a motel, and assisted me in getting my car into town. One of the officers was named Spence, the other I am sorry that I do not know, but I certainly would like my appreciation expressed to both.

Nowhere in my travels have we ever been treated so royally

and it is hard to find the proper words to express my thanks.
