Mayor and Council fight gas rate increases

There may be some who believe that the Mayor and Council are not doing enough to fight the high gas rates in our city. Our city has experienced an increase of 40 cents per thousand cubic feet. This is not the first time the City has faced this problem. In 1978, the city council also faced a similar situation.

Our city council is taking steps to address the issue. They have met with representatives of the gas company to discuss ways to reduce the rate. The council has also considered the possibility of forming a committee to study the problem further.

It is important that we support our city council as they work to find a solution to this problem. We must remember that the council is working on our behalf to ensure that we have affordable gas rates.
