The Editor's Uneasy Chair

The hospital is crammed with "sickle-cell" cases and there is a hole in the floor where people are falling through to the basement and the hands of Providence. It is the nature of the "sicklings" to come in batches of hundreds or even thousands. The patients are all in a state of shock, which is not conducive to the proper functioning of the hospital. The doctors and nurses are working overtime to keep up with the demand. The newly built "sickle-cell" wing is completely overwhelmed with patients, and there is no room for any more. The hospital is now on a 24-hour basis, with doctors and nurses working around the clock to meet the needs of the patients. The problem is only getting worse, as more and more cases are being reported. It is clear that the hospital is not equipped to handle this crisis, and urgent action is required to prevent a medical disaster.
Natural Bridge gives elegant expression to the importance of SUEDE in your new fashion plans.
