Ernest Vandiver is our choice for governor

Every year a great number of candidates are

unfavorable to the party that we are sup-

porting, and it is usually found that

the people who favor these candidates

are usually the persons who are least

interested in the success of the party.

This is due to the fact that the party

that we are supporting is usually the

one that is fonid to bring about the

most good for the people. This is true

of all parties, and it is particularly true

of the Democratic party, which is

the only party that is truly interested

in the welfare of the people.

But we must not be deceived by the

fact that we are supporting a candi-

date who is not as good as the one

that is supporting the other party.

For the people who support the other

party are usually the ones who are

interested in the welfare of the peo-

ple, and they are also the ones who

are interested in the success of the

party that they are supporting.

We should therefore support the

Democratic party, which is the only

party that is truly interested in the

welfare of the people, and we should

support the candidate who is sup-

porting the Democratic party, as he

is the only one who is truly inter-

ested in the welfare of the people.

Democracies: the world's best government. We then proceed to the principle of the free government as a free government for the free government, with free government as the essence of government. The purpose of government is the protection of the free government, the essence of government. Blanket protection of the free government is the purpose of government, and the purpose of government is the protection of the free government.
