Men’s basketball hopes to get revenge against rival Georgia State after early season loss.

Q&A with Damon Williams, Ph.D.

COMMENCEMENT CHANGES
SGA passes resolution to revert commencement changes for spring 2019. PAGE 5
# EVENTS AROUND CAMPUS

## MARCH 8

### “MARY POPPINS RETURNS”
Looking for fun on a Friday night? Join the University Programming Board for our monthly Friday movie series.
- **Friday, March 8 at 7 p.m.**
- **Russell Union Theater**

## MARCH 8

### DANCE MARATHON
Come out and enjoy music, dancing, games and our wonderful Miracle families. There will be a $10 minimum donation to enter, which includes dinner, and access to come and go from the six-hour event and a donation to our $16,500 goal.
- **Friday, March 8 at 4 p.m. and 10 p.m**
- **Williams Center Multipurpose Room**

## MARCH 9

### SPRING TAILGATE & BLOCK PARTY
Join the University Programming Board for a Tailgate and Block Party before watching the basketball game.
- **Saturday, March 9 at 2 p.m. to 4 p.m.**
- **Hanner Fieldhouse**

## MARCH 9

### CHI OMEGA - COOK OFF
Join the sisters of Chi Omega for a cook out to benefit Make-A-Wish. All proceeds go to granting a wish for a Wish Kid. There will be food, fun and entertainment. Tickets are $5 presale and $7 the day of.
- **Saturday, March 9 at 12 p.m. to 3 p.m.**
- **Recreation Activity Center | Pavilion**

Want you and your pet to be featured next time?
Post your photo on Twitter with the name of your pet and a little bit about you (name, year, and major).
Make sure you include #petsboro and tag @SeenAtSouthern!
Sigma Alpha Lotis Mardi Gras bake sale was on Tuesday. All proceeds went toward Georgia Southern University's music fraternity members in training.

Don't forget to come out to the spring game at Paulson Stadium on Saturday at 11 a.m.!
Building a Border Wall Won't Solve Jack

CY TAYLOR

Should the U.S. build a wall along the southern border?

On Feb. 15, Donald Trump declared a national emergency to free up billions of dollars to build a wall along the U.S.-Mexico border. As of Feb. 19, 16 U.S. states have sued Trump in an effort to stop his recent attempt of funding a border wall.

The lawsuit, California et al. v. Trump et al., states, “Contrary to the will of Congress, the president has used the pretext of a manufactured ‘crisis’ of unlawful immigration to declare a national emergency and redirect federal dollars appropriated for drug interdiction, military construction and law enforcement initiatives toward building a wall on the United States-Mexico border.”

However, being sued is nothing new to the current U.S. President. It was stated on “Fox News Sunday” that Trump has been involved in thousands of lawsuits throughout his lifetime. All that is happening raises the controversial question, should the U.S. build a wall along the southern border?

To answer this question, I am going to discuss a few aspects of Trump’s promised border wall.

Cost of the border wall

Andrew DePietro, finance writer for GOBankingRates, stated on Feb. 15, 2019, “Trump claims that the cost would only amount to $12 billion. But even that amount isn’t low when compared with the $2.3 billion spent on physical barriers for the entire period between fiscal years 2007 to 2015.

Additionally, an internal report by the Department of Homeland Security estimated the cost of the wall to be much higher at about $21.6 billion. And even that could be an underestimation, according to the Brookings Institution.

The effectiveness of a border wall

There are many factors regarding the effectiveness of a border wall that are often overlooked.

According to the U.S. Customs and Border Protection show more than two-thirds of land along the border does not belong to the federal government. This is a problem due to many people not willing to give up their land without a fight.

Bill Addington, a rancher in Hudspeth County, Texas, told Andrew Becker from Reveal/The Center for Investigative Reporting, “Trump will build a wall on my land over my dead body.”

Additionally, many people, myself included, believe a wall is not the most effective barrier. As stated by Dianne Feinstein in the San Francisco Chronicle, “It’s a fact that nearly half of all undocumented immigrants come to the United States legally but then overstay their visas.”

Also, another problem with a solid wall along the U.S.-Mexico border is the fact it can be climbed over or dug underneath. As researched by U-T San Diego, more than 180 tunnel attempts have been identified by law enforcement officials since the first cross-border tunnel was documented in Arizona on May 17, 1990.

Adding on to the effectiveness of Trump’s promised wall, “A cinder block or rock wall, in the traditional sense, isn’t necessarily the most effective or desirable choice,” Border Patrol agents told Fox News.

Immigration Statistics

“As a percentage of their respective populations, there were 56 percent fewer criminal convictions of illegal immigrants than of native-born Americans in Texas in 2015,” Alex Nowrasteh, author of Criminal Immigrants in Texas, writes. “The criminal conviction rate for legal immigrants was about 85 percent below the native-born rate.”

Also, on a nationwide scale, states with larger numbers of undocumented immigrants tended to have lower crime rates than states with lower numbers of undocumented immigrants, Michael T. Light and Ty Miller, authors of Does Undocumented Immigration Increase Violent Crime found.

Conclusion

To conclude, Trump’s main focus is on drug cartels, terrorists and crime while ignoring the people seeking a better life for themselves and their families.

In the end, building a border wall won’t solve shit. The only reason Trump declared a national emergency is to try to assert some authority because Congress did not give in to his demands.
**Commencement Reversal**

Student Government Association convention passes legislation calling for reversal of commencement changes

BY NATHAN WEAVER
The George-Anne staff

A resolution calling for the recent changes to Georgia Southern University’s commencement ceremonies to be immediately reverted has been passed at a Student Government Association convention March 2.

SGA members from all three GS campuses gathered at a joint session in order to vote on pieces of university-wide legislation. One of these proposals was a resolution initially authored by Armstrong SGA Speaker Tyler Tyack.

The resolution was passed by the Armstrong SGA senate and then recently voted down by the Statesboro SGA senate on Feb. 20.

Along with calling for the president’s cabinet to immediately revert the changes which have been recently made to the commencement process, Tyack’s resolution calls for a new plan for commencement to be created by a committee made up students and faculty from all three GS campuses.

“I think that we as the SGA have done our job,” Tyack said. “We have represented the students to the administration. We can finally say together as three campuses and 21,000 students, ‘We want things changed.’”

The final tally of votes cast by SGA representatives on the resolution was 31 yes votes, two no votes and five abstentions.

Once passed, university-wide legislation goes to SGA President Jarvis Steele to be signed. Steele confirmed that he does intend to sign the resolution.

One proponent of Tyack’s resolution during the debate leading up to the final vote was Statesboro senator-at-large Keyshawn Housey, who was absent from the Statesboro SGA senate meeting where the resolution has previously been voted down.

“Can tell them that we did try,” Housey said. “Personally I do not believe that any changes will be made to this semester’s commencement, but for the future I hope we can have a say.”

JARVIS STEELE
SGA President

I don’t know what I would’ve done if I was able to vote but one thing I will say is if my senators feel like they’re representing their constituency, then that’s all you can really ask them to do, correct?” Steele said. “Their job is to represent the constituents and if they feel like that’s what they’re doing, then I’m on board with whatever they feel like.”

**New Workload Committee**

Faculty senate introduces new workload committee

BY KYLE CLARK
The George-Anne staff

The Georgia Southern University faculty senate has organized a workload committee composed of faculty from all across the university due to its increased size post-consolidation.

This committee exists to develop university-wide guidelines for teaching, research and service workloads, Dustin Anderson, faculty senate chair said.

Universities of GS’ size have detailed workload policies with clear expectations for the standard university workload.

“We’re trying to move away from one-size-fits-all practices, many that were defaulted to during consolidation, and this committee is part of that effort,” Anderson said.

As the workload committee starts to work and share their findings, more information will become available on the potential changes for the university.

An exact date has not been set, but the committee will propose its policy to the senate later in the semester.
Green Eagle Awards

Georgia Southern’s Center for Sustainability accepting nominations for the fifth Annual Green Eagle Awards

BY SARAH SMITH
George-Anne contributor

Georgia Southern University's Center for Sustainability is accepting nominations for the fifth annual Green Eagle Awards from Thursday to April 1. The Green Eagle Awards were created in 2015 and were started to honor individuals who have shown tremendous efforts to promote sustainability on GS' campus and in their community, Lissa Lege, director of the Center for Sustainability, said.

“The nominees have [to] gone above and beyond when it comes to sustainability for Georgia Southern, such as leading a sustainability effort, serving a role with the Center for Sustainability, working on some aspect of sustainable food or for faculty and staff, incorporating sustainability into their courses and research,” Lege said.

One to two students, faculty or administrators and staff will be chosen based on their roles and activities, contribution and impact of sustainability on GS’ campus. The winners will be chosen by the Sustainability Fee Committee, primarily made of students.

All nominees will be honored and winners will be announced at a ceremony following the closing reception for the Sustainability Showcase on April 22 at 3 p.m. at the Zach S. Henderson Library. The winners will receive a plaque as well as have their name displayed on a plaque in the Biological Sciences Building.

Candidates must be committed to making GS' campus sustainable and can be nominated by anyone through filling out a form online. For a full list of requirements, visit the Grants and Awards tab on the Center for Sustainability’s website.

Miracle Organization to host dance marathon at Georgia Southern

BY ANTHONY BELIFANTE
The George-Anne staff

Georgia Southern University’s Miracle Organization will host the Children’s Miracle Dance Marathon, a fundraising event to help sick and injured kids, for the second year in a row on March 8.

Starting at 4 p.m. in the Williams Center Multipurpose Room, the fundraising event encourages students to donate money towards the Children’s Miracle Network while participating in games, dancing and more.

Money earned through the fundraiser will also go towards the Children’s Hospital of Georgia in Augusta. Fifteen-second dance challenges will take place during the event, along with hearing stories from miracle children and food provided by the Miracle Organization.

Attendees can also sign up for a standing challenge, in which they would pledge to stand for the full six hours of the dance marathon.

 Miracle hopes to meet their goal of raising $16,500, after successfully passing their goal last year by raising $16,200, Abbey Glaze Miracle vice principal of internal operations said. “Schools across the country host dance marathons and are able to raise millions of dollars,” Glaze said. “We are hoping to get Georgia Southern to eventually become one of those top fundraising schools.”

The dance marathon has a minimum $10 donation to start off the night at the door.

Georgia Southern University’s Miracle Organization will host the Children’s Miracle Dance Marathon, a fundraising event to help sick and injured kids, for the second year in a row on March 8.
Marie Lorenz to speak on campus
Renowned environmentalist artist to host lecture on Georgia Southern Statesboro Campus March 12

Environmental artist Marie Lorenz will be hosting a lecture series on March 12. Lorenz artwork combines nature with refuse she finds around NYC.

By Tatiana Joseph-Saunders
The Georgia-Anne contributor

Georgia Southern University has attracted New York-based artist, Marie Lorenz, to host a lecture on March 12.

Lorenz is an innovative artist who uses unique materials like discarded objects as integral pieces of her installations. All her life she has been devoted to creating. Her most recent piece reminds her of making mud sculptures as a child.

Lorenz started working with garbage eight years ago, through her exploration of NYC’s coast. She started incorporating debris in ceramics around four years ago. A common theme throughout her artwork is combining the illustrious world of art with the disregarded world of debris.

From now until March 18, the Center for Art & Theatre University Gallery at GS Statesboro Campus will be showing her art exhibit, “Ash Heap/Landfill.”

The piece uses man-made and natural materials and the islands in the New York Harbor serve as the inspiration. Lorenz wants her audience to take a moment and really consume her art, to hopefully walk away with some of the same enjoyment that she had while creating the art piece.

“I think as an artwork, the main thing that I am asking with this installation is just to slow down and examine something,” Lorenz said.

The lecture will take place at 5 p.m. in Arts Building room 2071 in conjunction with the Center for Sustainability’s Sustainability Seminar Series.

‘Ash Heap/Landfill’ is Lorenz’s newest art piece. The art is on display at the Center for Art and Theatre from now until March 18.

Nursing Program Ranked No.27 in the Nation

Georgia Southern’s RN-BSN program ranked No. 27 as one of the most affordable in the nation

By Joiya Reid

The George-Anne contributor

Georgia Southern University’s School of Nursing RN to BSN program was ranked No. 27 out of 50 schools as one of the most affordable programs in the nation by GreatValueColleges.net.

The RN to BSN program is a fully online program recognized for its commitment to providing high-quality education at an affordable price, according to a press release.

The RN to BSN program was designed specifically for registered nurses wanting a Bachelor of Science in Nursing degree, according to the official program page. Both part-time and full-time enrollment are available for working registered nurses. The program’s flexibility was one of many aspects considered in the ranking process.

Sheri Carey, DNP, assistant professor and RN to BSN program director, said the recognition attested to the program’s reputation and affordability as well as ongoing faculty excellence.

“We strive to give students all the tools they need to achieve their full potential and meet future academic and career goals,” Carey said. According to the press release, information from each program’s website and tuition pricing gathered by College Navigator were used to make the list. Tuition information, flexibility, customization within the degree program and unique offers were determining factors for the rankings.

The School of Nursing, located in Waters College of Health Professions, is fully accredited by the Georgia Board of Nursing and the Commission on Collegiate Nursing Education. There are four undergraduate nursing programs offered at GS including the online RN-BSN program, according to the official School of Nursing webpage.

Registered nurses interested in the program can apply online through the School of Nursing’s website.
Damond Williams, Ph.D., is a national expert on diversity and inclusion who has worked with Georgia Southern University throughout the 2018-2019 academic year by gathering student feedback regarding the campus climate. Williams’ work will help the university develop a comprehensive plan to enhance diversity, equality, and inclusion at GS.

Williams sat down with The George-Anne to discuss the work he and his team are doing on Georgia Southern’s campus.

What is your primary role as a diversity and inclusion educator?

“I am an organizational strategist, and I work on helping organizations to improve and to get better in different types of ways, and I do that using a range of different techniques, whether that’s strategy development, research, evaluation and assessment, leadership development or educational experiences and products. So, I don’t really define myself as a diversity and inclusion educator. That’s part of it, but the work we’re doing is far more than diversity and inclusion training or professional development. It’s really a broader set of areas that we’re focused into.”

Based on what you have seen so far, what are your thoughts on Georgia Southern University concerning diversity and inclusion?

“I think there’s a lot of opportunity to really make diversity and inclusion a real power and strength of the university. [Georgia Southern has] such a strong diversity in the student body. I think it’s a point of strength that makes [it] very unique. It’s served as a positive asset for the entire university environment, so everybody’s learning from one another, and individuals are building relationships across diverse communities, and students are having experiences where they’re developing friendships; they’re developing relationships in the classroom, they’re working in student organizations across differences of race, across differences of sexual orientation, across differences of opinions and values and perspectives, across differences of being from different parts of the country or different parts of Georgia. So, how do those diversities come together to ultimately make one another stronger and better as leaders? I think that Georgia Southern has so much or giving a keynote or giving remarks or spending a day in residency with the institution. Most instances, it’s not necessarily in response to an incident. It’s really in response to that institutions are trying to get better, and they believe that some of the work that we’re doing can be helpful in that regard.”

The George-Anne recently reported on the “triggerish” incident and the incidents involving two Georgia Southern professors allegedly using the N-word in class. What do you think about that?

“Every situation is different because you’re dealing with freedom of speech, you’re dealing with academic freedom and you’re dealing with the need to create an inclusive, loving environment. Further complicating it is, was it recorded? Was it videoed? Was it transmitted live? Is it archived in social media? So, there are a lot of different dynamics that happen with every scenario, so I think it’s important for each and every scenario to be treated individually. One of the things that I’m asked a lot is, ‘what is the difference between hate speech and protected speech?’ A lot of people don’t know when ‘hate’ speech exists, when it doesn’t exist. Using the N-word in class isn’t necessarily ‘hate’ speech, but using the N-word in class is speech that causes a lot of harm to certain communities that are in that classroom. So, I think it’s important for the faculty to exercise their academic freedom, but I think it’s also important for faculty to understand the implications of words and language, and understanding how words and language can be very harmful to certain communities when those words and language are used. It’s important for faculty to have empathy for our students, no matter who they are and their backgrounds, and when we’re engaging in difficult conversations in classrooms, and certain types of language are going to be used, I think it’s important to let students know that on the front end, I think it’s important to have a conversation with students in the classroom about what they’re comfortable with and what they’re not comfortable with. I think it’s fair to have a negotiation back and forth with students to really understand what it is that the learning environment is going to entail, and I think that ultimately leads to the type of learning experience that everyone can tap into, and sometimes, when difficult language is necessary, it makes it a better proposition. Finally, I think that there are times when certain language probably isn’t even necessary to be used to have the conversation that needs to be had. I think the faculty needs to be very thoughtful and understanding of that as well.”

What do you hope to accomplish during your time here at Georgia Southern?

“We’ve been working with the university now for several weeks, and we’re really trying to support President Nickel, and the Provost Reiber and Vice President Lewis, as they’ve been stewarding the university, with others, around getting the university started on the diversity and inclusion journey, and as a strategic priority, and our job is to help them really launch that work, and I think we’ve done that. We’ve had a chance to be on campus and to speak in front of a number of different audiences. We’ve had a chance to engage in survey work, to gather some insights about the diversity and inclusion at Georgia Southern. Our job is to help support the university’s leadership, and they’re really wanting to strengthen the university’s diversity commitment and the work that’s going on, and I think what’s particularly important is the timing of how this is happening, because there’s a new president that will soon arrive on campus, and he has been very interested in this work and very supportive of this work, and he’s looking forward to playing a key role with the Provost and the VP of student affairs and others to help us toward the future.”

Damon Williams, Ph.D., is a national expert on diversity and inclusion.

The cast of 'Bug' creates a skin-crawling night tale of addiction, conspiracy and loss.

Bug centers around two self-conflicting drug users who contain their addiction and past trauma in the confinement of a claustrophobic motel room. Those who enter from the outside will struggle to understand the downfall of the two protagonists.

The Cast and Crew take a bow for their terrifying performance. With only five cast members, 'Bug' is one of the Theatre department's smallest productions.

Writing Tips from Christina Olson MFA

BY CHRISTINA MCKINLEY
The Reflector Staff

Professor Christina Olson is a poet and creative nonfiction writer who came to Georgia Southern University in 2011. Before coming to GS, she taught at Grand Valley State University and attended Minnesota State University for graduate school as well as the State University of New York at Fredonia for her undergrad.

Now Olson teaches Intro to Creative Writing, Poetry Writing, Advanced Poetry Writing, Creative Nonfiction writing and Advanced Creative Nonfiction Writing. She has published two full-length collections of poetry, one called “Terminal Human Velocity” and the other “Before I Came Home Naked.” She has also published two chapbooks, “Room and the M.E.” and “Weird Science.” As a writer, Olson likes seeing how poetry and creative nonfiction work together.

When asked what advice she had to give to other writers, this is what she had to say:

Read everything

Read everything, “even if you think it’s old or weird or you don’t like it,” Olson said. “Because there’s always something to learn from other writing.” Other works can teach you what you like or don’t like to include in your own writing and can show you how to improve.

Try

According to Olson, it’s easy for writers to get frustrated and think they can never be good enough or never accomplish the things they want because they haven’t done it before. Trying is the way to start and the only way to get to the place you want to go. Write a draft, even if you think it’s bad, that way you have something to pull from, whether it be a scene, an image or even a sentence. This way, you create your own jumping point from there.

Don’t be afraid to tell your story

Many people can feel intimidated by good writing they see elsewhere and get discouraged when it comes to their own writing. It’s hard to feel your voice matters when there are so many others. According to Olson, this is the biggest problem of writing. It’s even easier to let your insecurities influence you if you are working alone, but this is something every writer faces.

“Everyone has a story that they get to tell and so there are a lot of reasons you can find not to write,” Olson said. “but I think once people get over that initial hump and realize that they do have something to say, then usually that can be a very powerful thing.”

Engage with writing somehow

As controversial as it may seem in the writing world, Olson is not an advocate for writing every day. “It’s a piece of advice that you will often hear,” said Olson. “Like just put your butt in the chair and do your thirty minutes of your page or whatever it might be. I think, for some people, that system works and it’s really great. I have tried it and I can sustain it for short periods of time, but I can’t do it long term, it’s not the way I work. And I get to say that because I’ve tried it and I’ve been doing it for fifteen to twenty years at this point.”

However, if the system of writing every day doesn’t work for you, you should be engaging with writing in some way. This can involve reading something every day; even if it’s a small poem, or talking about some form of writing with others. Engage with creativity and paint or walk through the park, that way you can be ready to write when you sit down again. Most importantly, don’t knock anything before you try it, including the “write every day” rule.

Branch out

It’s easy to look at another style of writing and think that a piece of genre or writing isn’t worth our time, but we can be surprised by what we find if we just try it out.

“I came in as a fiction writer,” Olson said. “I thought I was going to be a fiction writer when I was in college and I had a poetry professor say ‘You know, your fiction is fine but it’s not great. Like your poetry is what’s really good’ and I was really surprised to hear that. I would not have thought that in a million years that I would have ended up teaching poetry like a profession.”

Recommendations

It’s good to read other works and get a feel for process and ways to improve your writing. To help with that, Professor Olson made these recommendations:

• “On Writing: A Memoir of the Craft” by Stephen King
• “Ordinary Genius” by Kim Addonizio
• Online literary magazines Brevity and Verse Daily

Meet the writing community

Writing can feel very solitary, but it is important to find a writing community that can encourage you and help you improve. Olson stands by the Department of Writing and Linguistics at GS and says that it is a very supportive community and a cool place to be a writer. People are willing to listen to readings at events like Burning Swamp and share ideas and tips. Finding other, like-minded people to help build you up can be very empowering.

I.S. MAYFIELD/Staff

Students Peyton Rowe and Paige Oney rehearse an intimate, unsettling scene for “Bug.” As the play progresses, both characters will struggle not to lose their sense of self, reality and possibly each other.

GS men’s basketball takes 81-66 win over Little Rock, extends winning streak to five

BY KAITLIN SELLS
The George-Anne staff

The Georgia Southern men’s basketball team extended their winning streak to five as they claimed an 81-66 victory over Little Rock in a heated match Feb. 28.

UALR tried to come out strong, dinking the ball right off the bat in attempts to throw the Eagles off. Their trials failed as GS responded by grabbing an early lead and running up the score with a few of their own dunks and other impressive plays for the remainder of the game.

“We knew from the jump they were coming to play hard,” senior guard and other impressive plays for the score with a few of their own dunks and other impressive plays for the remainder of the George-Anne staff.

“We knew from the jump they were coming to play hard,” senior guard Tookie Brown said. “They’ve got some good guys on their team, but I mean by their record they play real hard every night and I’ve got to give them credit for that. I think tonight we were prepared for them.”

Junior forward Isaiah Crawley was on fire as he reached a season high on the night with 20 points in the 23 minutes of play the forward saw. Shooting 65.5 percent from the floor, Crawley ended up being a huge contributor to the Eagle’s win. While showing dunk after dunk on the offense, Crawley also continued to be solid on the defense, racking up three rebounds and one steal.

Brown was also on fire as he contributed 19 points to the GS win. The senior played with a high level of intensity after UALR tried to challenge him, and Brown responded by shooting 58.3 percent from the floor as well as collecting two steals.

“It’s clicking now,” Brown said discussing the Eagles’ recent success. “I mean I feel like we still got some more left in us to keep going, to get better.”

The Eagles held the lead for 38 minutes of the total game, allowing UALR to see the lead for only less than a minute. As a team, GS shot 54.5 percent from the floor as well as shooting 62.1 percent on free-throws-a big deal considering 18 of their 81 points came from free-throws.

After stealing the win, GS progresses to an overall record of 19-10 and a conference record of 11-5, tying them for second in the Sun Belt.

“I thought that was a typical end of February almost early March hard fought game,” Head Coach Mark Byington said. “I continually think we’re getting better. I’m not worried about a streak or how many games we’ve won, we’re just trying to get better.”

Eagles defeat Arkansas State Redwolves to mark sixth win in a row

BY AMANDA ARNOLD
The George-Anne staff

The Georgia Southern men’s basketball team defeated the Arkansas State Redwolves 81-70 in a hard fought against the Georgia State Panthers in the conference game which took place in Jonesboro, Arkansas.

Although the Red Wolves came out on top, putting their record at 11-16, the Eagles fell down to 7-21.

GS tied the single-game three point record by making 13-16 against ASU. Each of those baskets was assisted by junior guard Amber Muntz. She achieved a school record, making 14 assists in a single-game.

Junior guard Alexis Brown showed star athleticism in the game, scoring 29 points and playing in the game for a total of 34 minutes. Going into halftime the Red Wolves only led by four points and there was real potential for the Eagles to come back and fight for the win.

There were many shots that were missed by the eagles from rebounds and on. Missed opportunities really played a factor into the loss.

Although this loss did not help the Eagles improve their record, they are set to take on a new opponent to hopefully still end the season on a high note.

GS will be on the road to finish off the 2018-19 season by competing against the Georgia State Panthers in Atlanta, Georgia Saturday at 2 p.m.
Eagles use insane 6th inning to salvage game against No. 9 Bulldogs

BY MCCLAN BAXLEY

The Georgia Southern baseball team was able to earn a much-needed 10-7 victory against the No. 9 Georgia Bulldogs to cap a three-game series after falling to the Bulldogs 4-2 earlier March 2.

Game two—UGA wins 4-2

In the blink of an eye, the visitors shot out to a two-run lead in the second inning off of freshman LHP Braden Hays. GS cut the lead in half in the bottom of the third inning with freshman third baseman flying out to centerfield, scoring sophomore centerfielder Nolan Tressler.

Sophomore rightfielder Noah Searcy scored a run in the seven-run sixth inning in the series finale against No. 9 Georgia.

“The seven-run sixth inning was what GS needed to give the Eagles their first win of the series,” Hennon said. “I kind of expected to score, they don’t always fall for you,” Hennon said. “That was the case in the first game.”

Game three—GS wins 10-7

The series finale featured an inning that may never be recreated again. Facing a 6-3 deficit in the bottom of the sixth inning with one out, junior Matt Anderson stepped up to the plate with bases loaded, UGA’s third pitcher of the game, Christian Ryder, hit Anderson for Anderson’s second HBP of the game.

Ten pitches later, Anderson was on third, Tressler was on second and Thompson was on first, all by wild pitches and a walk.

With one out and bases loaded, junior second baseman Steven Curry took his 52nd career HBP to score Anderson, making it a 6-4 game.

“Some people say I stand on the plate, but I don’t think I do,” Curry said. “I kind of dive into the pitch too. I really don’t know [why I get hit so much] though.”

Jack Gowen walked freshman third baseman Blake Evans to make it a one-run game. Another UGA pitching change went for naught as Adams Goodman hit sophomore rightfielder Noah Searcy, tying the game at six.

Goodman walked senior leftfielder Tyler Martin to give the Eagles their first lead of the weekend, but the damage wasn’t over yet.

Sophomore first baseman Jason Swan went in to pinch hit and reached on an error at third base to bring three more runs home.

A popfly from Anderson ended the bizarre inning. “It was seven runs with no hits and I don’t think I’ve ever seen anything like that before,” Curry said. “I know their bullpen was struggling to score, they don’t always fall for you, but I don’t think I’ll take it”, Hennon said of the sixth inning. “It was definitely a strange inning.”

Harris went two and two-thirds innings with one hit and two strikeouts to earn his first save of the season.

“Some people say I stand on the plate, but I don’t think I do,” Curry said. “I kind of dive into the pitch too. I really don’t know [why I get hit so much] though.”

The seven-run sixth inning was what GS needed to give the Eagles their first win of the series.

“You have to go out and get one [win] anyway you can,” Harris said. “We grinded out seven runs without a hit, made them work. I knew if I was coming in, I was just going to have to go to work and find a way to get it done.”

GS ended a 10 run game with just four hits and two errors in a wild, three-seconds innings with one hit.

The visitors shot out to a two-run lead in the second inning off of freshman LHP Braden Hays. GS cut the lead in half in the bottom of the third inning with freshman third baseman flying out to centerfield, scoring sophomore centerfielder Nolan Tressler.

Sophomore rightfielder Noah Searcy scored a run in the seven-run sixth inning in the series finale against No. 9 Georgia.

The seven-run sixth inning was what GS needed to give the Eagles their first win of the series.

“Some people say I stand on the plate, but I don’t think I do,” Curry said. “I kind of divide into the pitch too. I really don’t know [why I get hit so much] though.”
