Easter is a way of life

On Easter we celebrate a great, ancient event. Jesus of Nazareth, the Son of God, rose from the dead. It is the great high point of the Christian faith. The story of Jesus has a lot to say about our lives. It is a story of love and forgiveness, of sacrifice and service.

This year, as Easter approaches, we are reminded of the importance of this day. It is a day of great joy, of hope and renewal. It is a day of remembrance, of gratitude for the gift of life. It is a day to reflect on our own lives, to think about what we can do to make the world a better place.

As we prepare to celebrate Easter, let us remember the message of hope and forgiveness that it brings. Let us remember the love and kindness that Jesus showed to all people. Let us remember the power of faith to overcome the darkness of death.

This Week's Meditation

LOUISE E. BOSTON

It Seems to Me...

It seems to me that the world is a place of constant change. Things are always happening, always changing. Sometimes it feels like there is too much going on, too much to deal with. It can be overwhelming, can't it?

But then I remember that change is a necessary part of life. Without change, we would not be able to grow and learn. We would not be able to adapt to new situations. Change is a natural part of the world. It is a part of our own lives.

So, I guess what I'm trying to say is that it's okay to feel uneasy about change sometimes. It's okay to feel a little bit overwhelmed by all the things that are going on. But remember, change is part of life. It's a natural part of the world. And it's a natural part of us.

As we move through life, we will encounter change in many forms. It may be something big, like a major event in our lives. Or it may be something small, like a change in the weather. But no matter what form it takes, change is a natural part of life. It's a part of who we are.

The light

The light, even if faint, can still pierce the darkness. It can bring hope and healing. It can help us see the beauty in the world. The light is a symbol of hope and possibility.

But the light is not always easy to see. Sometimes it can be hidden, or obscured, by the darkness. And sometimes it can be so faint that it is almost impossible to notice.

But even in those times, there is still light. There is still hope. We just have to look for it, and be open to it. We have to be willing to see the beauty in the world, even when it is hidden.

So let us hold onto the light, even when it is faint. Let us keep searching for it, even when it seems impossible. For the light is always there, waiting to be seen. And it is always waiting for us.

Livestock growers fight screwworms

Mr. Tobacco Farmer

Why does gas cured tobacco bring highest prices year after year after year?

1. Insulate impermeable canopy of curing leaves more weight in the tobacco - more of it leaves without loss.

2. Thermostatic control means highest quality, effective in odor.

3. Uniformity, choice, conditions - no mould, mildew or worst in lower grades.

Change now to this superior method of curing

Reilly and Jack Hanna tell it better than we can

"We made 1,266 pounds more peanuts per acre, thanks to aldrin soil insecticide."

Reilly Hanna and Jack Hanna of Hanna Bros. Farms, Inc., Tifton, Ga., show how the use of aldrin and DDT has improved peanut yields. The Hanna Brothers are members of the Georgia Peanut Growers Association. The association has joined with the Georgia and South Carolina Agricultural Experiment Stations to test the effect of several pesticides on peanuts in the two states. The test plots show that aldrin and DDT give the best results. The use of these chemicals has increased peanut yields by 50 to 100 per cent. The yield from plots treated with aldrin and DDT is about the same as that from plots treated with DDT alone. The use of aldrin alone gives a yield of about 1,200 pounds per acre.
