Editorials

New driving laws

With the 1954 Legislature failing to include any substantial improvements to the state's driving laws, enthusiasm prevails. Occurrence of reckless driving, including the all-too-common occurrence of drivers under the influence of alcohol, is a threat to the safety and welfare of all Georgia's citizens. The legislators and the people of Georgia are probably best advised to wait until the 1955 Legislature to take the necessary action.

Let's go 1st class on concrete!

These roads ignore father time! Modern concrete will last 50 years and more!

When they all go concrete-they're going over a paved highway. Reports from every angle show that concrete pavements have outlived older types by 3 to 4. The concrete road is the same as ever!

Every man today is selling smoothly on this new concrete... and the same weather! (It won't have to be measured 3 or 4 inches.)

Concrete proves stronger with age—Endures in strength 30 years. Other paving materials have the opposite effect, in fact, becoming less hard concrete.

That's why it costs less and needs little maintenance—doesn't get stippled and bumpy. The roads are smooth and clean, easy to maintain for miles.

Engineers build for your safety. Concrete offers a durable, permanent material, and the fact that you're building as good as the ground is the difference between a fine road and one that's a constant source of danger.

PORTLAND CEMENT ASSOCIATION
700 Michigan Avenue Building, Chicago, Illinois

A national organization to improve and maintain the use of concrete.
