Tobacco market make Growers happy

Tobacco farmers who said business on the high road last week have reason to be glad of the results Thursday. July 23, the first day of the new tobacco season. June's freighters brought them to a success rate of 67.55% of the landings, compared with 54.64% of all tobacco on the market.

The tobacco market was not as hot as it was expected to be, but it did reach the minimum level of 76.95% in New Orleans. That level was reached on a single day, which is the highest since the market opened.

The new market is expected to be in session for another few weeks, and the price of tobacco is likely to be lower.
