NEWCASTLE NEWS

Union Baptist WMS meets at the church

By Mrs. P. K. ANDERSON

The patients of the WMS were enjoying a day out in the country yesterday when they met for the first time on the grounds of the Bulloch County Fair and were treated to a lovely lunch. The WMS members made the trip in their own cars and enjoyed the day out in the country. The following patients are members of the WMS--Doris Aycock, Mrs. W. L. Gay, and children

Editorials

May we suggest

that in reviewing events of

the time frame in the old

Bullshnton News, there are

several stories that we

might like to bring to

our current attention.

We have received several

complaints from

homeowners who have

been bothered by noise

from a new building

that is being constructed

near their homes.

We believe that it is

important for the city

planners to consider the

impact of new developments

on the existing community.

The building is scheduled

for completion in the near

future, and we hope that

the noise levels can be

controlled during this time.

We also encourage

residents to communicate

their concerns to the

appropriate authorities.

The building has been

approved by the city

planners, and we believe

that it is important to

address any issues that

arise.

Georgia Agricultural College

Referee's Note: This is one of a series of articles prepared by Dr. C. D. Ballard, professor of Home Economics at Georgia Agricultural College. The subject of this article is the importance of lime in the soil. Lime is essential for the development of healthy plants and crops.

1. Lime helps to improve the soil by increasing the number of beneficial soil organisms. These organisms help to break down organic matter and release nutrients that are available for plant growth.

2. Lime helps to neutralize the acidity of the soil, which can lead to the growth of certain diseases and pests. Neutralizing the soil can help to reduce the incidence of these problems.

3. Lime helps to improve the physical structure of the soil, making it easier for water to penetrate and for roots to grow. This can lead to better yields and healthier plants.

4. Lime helps to improve the nutrient content of the soil, making it more available to plants. This can lead to better growth and productivity.

5. Lime helps to reduce the incidence of certain pests and diseases, such as rust and blight.

6. Lime helps to reduce the amount of energy and water required for plant growth, making it more efficient and profitable.

7. Lime helps to improve the health and productivity of livestock, as well as the quality of milk and eggs.

8. Lime helps to improve the taste and quality of food products, making them more flavorful and nutritious.

9. Lime helps to improve the health of the ecosystem, as well as the health and well-being of the people who live in it.

10. Lime helps to improve the profitability of agriculture, making it a more sustainable and profitable enterprise.

Lime is a key component of any successful agricultural enterprise, and its importance cannot be overstated. It is essential for the growth and productivity of all crops, and its benefits extend far beyond the field. Lime is a key component of a sustainable and profitable agricultural enterprise, and its importance cannot be overstated. It is essential for the growth and productivity of all crops, and its benefits extend far beyond the field.
Baseball at the Recreation Center

BY TEDDY HAYTON

This and last week’s games at the Recreation Center were between the local Jaycees and the Rotary Club of Statesboro.

The Jaycees have won the last three games and it looked like they were on the way to another win when Jaycees pitcher Billy Young started out with twenty strikes.

However, the Rotary Club didn’t hit the ball when it was thrown to them by the Jaycees and the Jaycees were forced to call in some of their All-Stars to try to stop the Rotary Club from scoring.

The Jaycees didn’t catch any of the Rotary runners, but the Jaycees still had a chance to win the game, especially since the Jaycees had 12 hits against the Rotary’s 90.

The Jaycees are playing another game today at 6:30 with the Jaycees batting and the Jaycees pitching.

The Jays have won five games so far and their pitchers have allowed only three runs.

The Jays also have allowed only three runs in their other games and the Jays’ only loss was against the State College team.

The Jays are still looking for their first win of the season and they will be hoping for a good performance tonight.

The Jays are playing against the Statesboro Jaycees today and the Jaycees have won the last three games between the two teams.

The Jays are currently in third place in the standings and they will be looking to improve their record against the Statesboro Jaycees.

The Jays are currently playing against the Statesboro Jaycees today and the Jaycees have won the last three games between the two teams.
