BUILDING A BETTER BULLOCH COUNTY

The Churches

BEFORE THERE was a Bulloch County, the founders of liberty in our land fled here, and in the days of early settlement our churches were the first to be set up. As a result, Bulloch County is known as a proud churchgoing county.

And these men built churches — the first ones in 1792. Others followed, and today our county has many churches housed in beautiful sanctuaries, dedicated to the worship and the glorifying of God.

The building of a church is a great act at any time. Through it one acts to affect the total area of the individual and community life, for the church is dealing with the soul counts mightily in affecting the physical and mortal man, since it affects the source of thinking and action.

To build a church is a mighty evidence of loyalty to one’s human friends, for it supplies the one supreme basis for the nature of that friendship. It is also a testimony of appreciation of the source and power of such friends — good government, educational opportunities, and all the ministry to the sick and old and lonely.

No family can hope to be effective as a social unit or relate its qualities of love and permanence, without a substantial quantity of some religion involved in it. The church has been and is now, and will continue to be, the supreme safeguard and contributor to the home.

And in the gift of greetings for Bulloch County, all also is in nothing without our churches which are the foundation of all our strength, the fountainhead of all our happiness, the solace for all our troubles, the source of tranquility for our souls, and our only hope for immortality.
