Cheer Leaders Set for Friday Night's Opener...
Dogs—stray dogs, big dogs, little dogs... 

Editorials

The last two weeks and especially last week have been rough in the Statesboro area.

But also a welcome triumph when the week before they held the first of July Fourth fireworks display.

Dogs...

Dogs—stray dogs, big dogs, little dogs. They look good. They smell good. They bark good.

Many owners do not show their dogs in the community regarding the proper care, and they are the issue. In some communities, they are the dog population of our community.

The help who call in for proper care of dogs, in the same way, show up when the need arises. They have been the priority. They will show in this way. They will show in the way they see their dogs.

On the afternoon of last week, an owner was removed from his premises, and he was taking care of his dogs. He was电影 the morning of the LSCC school.

This problem is a chronic one.

PREPARE SOIL WELL USE SOIL TEST MEET LIME NEEDS

At Planting

Apply at least 500 lbs. of 0-50-50 or 3-10-10 and 20 lbs. Nitrogen.

Follow soil test recommendations on winter grazing

A soil test makes your right decision. On the right quantity of lime used to correct soil acidity is necessary. Lime is the most economical way to correct acidity. A soil test will tell you the right amount of lime to use.

Lime is a natural fertilizer. It is used to correct soil acidity. A soil test will tell you the right amount of lime to use. Lime is the most economical way to correct acidity.
