PREPARED

The word prepared is not the word that we want to use but it is about the best that we could think of at the moment.

Mr. S. H. Sherman, superintendent of the school called us into his office and said, "You're going to see something funny, and unknowing what he meant we went into his office."

That was not funny to us, it was something that could be called "marvelous."

FACTS AND FALLACIES ABOUT CANCER

A drive to solicit funds for the control of Cancer was begun in Statesboro last week and is being carried on throughout the entire county.

Cancer has baffled scientists as long as Cancer has been known to Science. 145,000 deaths are caused by cancer.

Dr. A. J. Mooney has brought to the editor of the Bulloch Herald a small pamphlet which includes facts and fallacies about Cancer and we want to let you have the chance to know a few of these so that you may be a little more careful in your everyday life and so that you may know a little more about Cancer.

CANCER IS... Curable when treated in its early stages... Always fatal if left untreated... A disorderly growth of cells within the patient's body...

CANCER IS... Not an incurable disease in its early stages... Not catching, nor due to germ... Not caused by immoral nor unsocial practices...

CANCER IS... Not significantly affected by use of alcohol... Not significantly affected by mental worry... Not cured by faith healing, serums nor other medicines

BULLOCH COUNTY, GEORGIA DOESN'T EITHER

After the schools had been threatened to be closed in Campbell county in the state of Virginia but finally did not have to close because arrangements were made to keep them running here is what the official newspaper said "SCHOOLS IN GEORGIA have closed in most sections after completing six and seven months terms, with a few still open, but charging monthly for attending FREE PUBLIC SCHOOLS. We know that Campbell county, Virginia, didn't want that

PEACE CAN BE HAD

Quoting from the Savannah Morning News, a few days ago, with a poor memory we are going to give the solution to the European crisis that will end all talk of war and that peace will be enjoyed by all.

"The war crisis will end and peace can be had forever when Gen. Franco's widow, sent a telegram to Mussolini on his death bed, that Stalin had been assassinated at Adolph Hitler's funeral."

We have decided that the News is just ignoring China and Japan and hope that they will get tired and quit.

The Editors Uneasy Chair--

THE CHAIR IS VERY UNEASY--

Frankly the editor's chair is very uneasy this week and has been for three weeks. As a matter of fact it has been empty for the past three weeks while we have been flat of our back following an appendectomy.

When Dr. John told us that our "stomach ache" was a green light indicating that our appendix must go he didn't even give us time to argue about it.

There wasn't anything to it. When the Doc waked us off to the hospital a few weeks ago it was winter and now look... spring is here.

It looks as though we are going to become embroiled in the Roaming Reporter's Colonel Leon Tomlinson Easter hat feud. The Colonel has served us notice of suit for slander.

Before turning our uneasy chair over to the associate editor we wish to say that Bulloch county should be immensely proud of her hospital.

YOUR R. R. TAKES A TRIP

Your amateur reporter has just made a most interesting trip and I feel sure that you would be interested in reading of some of the things that were most interesting to me.

Believing that "work is noble" Dr. Jacobs planned to teach these homeless ones the dignity of labor, with the result that the Orphanage is very largely self-supporting.

to get around, for good people everywhere gave us a hearty response. Our obligation was to see that it all got to Thornwell, and along with that gathered at Statesboro, Metter, Stilton and in Swainsboro, Saturday found us headed to Clinton, S. C., with a nice truckload of provisions.

Checking out from Clito at 7:35, the "missus" Mike the human marvel (to her parents) and the elderly gent, made our way into Augusta by 9:50 A. M. where we spent a little over an hour, while the other 9-10ths tried on 85 per cent of the hats in that city.

Along the way, we enjoyed some of the changes from Bulloch County scenery. From here to Augusta the farm scene is similar to our own neighborhood, but after you have gotten out of the sand hills of Aiken county the trip takes one thru the Johnson-Ridge Springs section from whose neighborhood came the Quattlebaum's, whose industry and intelligence have helped to make Bulloch's agricultural bloom.

Are you surprised that we love the work, love the children and love those who are most directly in charge of this great work. We are never so happy as when we are "about our father's business," remembering that He said "Inasmuch as ye have done it unto one of the least of these my brethren ye have done it unto me."

OLD AGE PENSION PAYMENTS

This morning we were very much impressed in finding that the River's plan for enforced economy in state affairs was playing havoc with our old age pension payments.

Along the way, we enjoyed some of the changes from Bulloch County scenery. From here to Augusta the farm scene is similar to our own neighborhood, but after you have gotten out of the sand hills of Aiken county the trip takes one thru the Johnson-Ridge Springs section from whose neighborhood came the Quattlebaum's, whose industry and intelligence have helped to make Bulloch's agricultural bloom.

DYER TELLS 4-H BOYS HOW TO BE FOREST RANGERS

Requirements for Bulloch county club members to become 4-H club Forest Rangers and complete for free trips to the annual State-wide Wild Life Conservation Camp were outlined this week by County Agent Byron Dyer.

"The project is open to all 4-H club boys and girls and consists of growing a small nursery, collecting tree seed, planting and thinning pine trees, constructing fire breaks, improving forests and tree identification," the agent replied.

"Club members must carry out at least one of the outlined projects and then write an essay of 200 to 500 words on their selected project by November 15," Mr. Dyer continued.

BETTER METHODS OF CULTURE PRODUCES HIGH YIELD OF NUTS

Fertilization: Peanuts do not respond to fertilizer like cotton and corn, but if they do not follow the crop well fertilized with a complete fertilizer or a fertilizer with a high percentage of phosphorus.

"Georgia's 1938 average peanut yield was 800 pounds per acre, an increase of 60 pounds over 1937," the county agent pointed out.

"Any type of tree may be collected in the seed gathering project and can usually be sold from 75 cents to \$2.00 per pound," he continued.

All's Fair...

Easter bunnies and maidens fair, pretty dresses and upswait hair. Pure white lilies with leaves of jade--All make up the Easter parade.

And we couldn't have asked for a lovelier day. Fleeting glimpses of the Easter parade--Esther Barnes in navy and white ensemble. Ouida Simmons in green and white print suit with a fluff of white organza blouse worn with hat of japonica straw with brown winged bird perched on top very similar to Lannie's club plane. Bobbie Smith in plaid silk with rose, black, and blue, the predominant colors. Jessie Averitt in black suit with high crowned hat with a corsage of pink roses and swansonia. Mrs. John Eyeritt gown in cyclamen with a lovely corsage of roses and violet lilies. Ollie Smith's blond loveliness accented by navy and white suit worn with navy millan with tall white crown. Alma Booth proudly wearing perfect specimens of white American Beauty roses. Neva Bean smart in blue and white print with trim sailor.

And among the younger set we spied Gloria and Barbara Macon and Jan Murphy at church with their Easter bunnies. As discreetly as they could they made their bunnies nod at each other across the aisles. Someone remarked that Homer Blitch was resplendent in a new gray suit, we were also reminded that Fred Kennedy was a model of what the well-groomed young man should wear this spring. Our only regret was that we did not catch a glimpse of our Roaming Reporter in his Easter regalia. We do know that Editor Coleman is the proud possessor of one of those green sport jackets.

Charlotte Blitch's ecstatic squeals as she unwrapped an Easter basket sent her by Daddy Jack Blitch. At the Easter Egg hunt given by the Presbyterians behind the church on Maude Edge's lawn, little Jimmie Bland just couldn't find any eggs and was becoming discouraged he announced that he knew where he could find some. 'I know there's some in Aunt Maud's hen house,' and straightaway he went as fast as his little chubby legs could carry him. A charming sequel to the incident occurred when he went home and the story was related. Annie Simmons went down town and bought some eggs and Jimmie had a private egg hunt with Anne Simmons hiding the eggs and also helping to find them. Drive out to see Miss Alva Wilson's flowers and shrubbery surrounding her home in the country near Ogeechee School. Alva says that she hasn't spent a dime for shrubbery, but that many people think that her formal trimmed hedges and shrubbery are nursery products. Make a pilgrimage into the woods this spring with someone who knows the plants of the forests and you can transplant to your garden many lovely bits of shrubbery.

Inspection Night at the National Guards' Army was a brilliant affair and the banquet afterwards was attended by 160 young men and officers.

Just saw Mary Lee Peck drive by all dressed up in a pink straw hat with nodding roses on it and a hyacinth blue frock. We seem clothes conscious this week but the lovely weather and dressed up show windows are to blame.

As Ever, JANE.

Potash ROUNDS OUT SWEET POTATO PROFITS

POTASH is the profit element in growing sweet potatoes. It fills out the roots into chunks which bring the best prices. It also increases the set, which means greater yield per acre. Successful growers have found that a 4-8-8 fertilizer can be depended upon to give good quality and high yield when applied at the rate of 800-1,000 lbs. per acre.

For the right analysis and amount per acre for your soils, consult your county agent or experimenter station. See your fertilizer dealer or manufacturer about fertilizers containing plenty of potash. You will be surprised how little extra it costs.

BULLOCH STOCK-YARD REPORTS LIGHT RUN OF STOCK

O. L. McLemore of the Bulloch Stockyard, in a statement this morning, stated that there was a light run of both hogs and cattle for Tuesday's sales.

Mr. McLemore stated that there was a good demand for all types of stock but there was not enough stock on hand to meet the demands.

Number 1 corn fed hogs sold from \$6.25 to \$6.35, No. 2's 6.00 to 6.10. Number one mixed fed hogs sold from 6.00 to 6.15. No. 2's sold from 6.75 to 6.90. No. 3's from 5.50 to 5.80. No. 4's from 5 to 5.30. No. 5's 5.00 to 7.00.

Fat sows sold at 4.75 to 5.25. Stags brought from 4.00 to 5.25. Sows and pigs brought anywhere from 10.00 to 32.50 according to quality.

The cattle market was higher than last week. There were no beef type offered. Fat natives brought from \$7.25 to \$8.00. Medium from \$6.50 to \$7.00. Thin common yearling from \$5.00 to \$5 and fat cows from \$5.00 to \$6.25.

Mr. McLemore also stated that the Bulloch Stockyard will have a fat cattle and grazing sale next week with plenty of buyers.

CHEVROLET SALES REACH HIGH IN MARCH

Chevrolet dealers' retail sales in the last 10 days of March turned sharply upward, reaching the highest total for any similar period since the new model introduction and making March by long odds the highest sales month in that period.

The March total was \$8,836 units, as compared with \$3,750 in February and with 62,880 in March of last year.

The percentage of increase over March 1938 was 41.2 and over February 1939, it was 7. There was an increase of 70.1 per cent over the sales for the preceding 10-day period, the records indicate.

At the same time, used car sales showed a substantial gain, both over the previous 10 days and over the same period last year. They reached a total of 151,696 for the month of March, giving Chevrolet dealers a grand aggregate, new and used, of more than 230,000 units.

Bulloch Schools Farming Is Big Making Effort Business On Improve Health B. and S. Farm

The schools of Bulloch county are making a special effort to improve the health conditions in their communities. It was announced here last week...

Dear Friends: The schools of Bulloch county are striving to improve the health conditions in their communities. In a survey made last fall...

Surveys show that during the year 1936-37 when so many sanitary toilets were built, hookworm was reduced from 60 per cent to 40 per cent. This year's record shows that hookworm has been reduced to 36 per cent...

With the coming of spring and summer, flies and mosquitoes will increase rapidly unless their breeding places are controlled. We know malaria is transmitted by an infected Anopheles mosquito...

A committee has visited the local hardware stores and studied the prices of materials needed to screen the homes. It was found that the cost of screening an average size window would range from 50c to \$1.00...

It is believed the health of the citizens of Bulloch county would be greatly improved if every home were screened, had a sanitary toilet or sewage disposal, had a pure water supply, and breeding place of flies and mosquitoes destroyed...

Yours for better health, Rosenwald Helpers in cooperation with Bulloch County Teachers.

Extension Agricultural Engineer G. I. Johnson has reminded us that the average farm household takes more than 200,000 steps a year just to throw out the waste water. Another interesting figure is that the average farm family washes over five tons of dishes, drawing from the well and carrying into the house 37 tons of water per year...

LEADERSHIP IN VALUE BRINGS LEADERSHIP IN SALES. Chevrolet is first in sales because it's first in styling—first in acceleration—first in hill-climbing—and first in value in its price range! Again the people of the nation are awarding Chevrolet first place in motor car sales!

"I top-dressed with NV MURIATE OF POTASH 100 pounds per acre"

W. J. VERDIN, Greenville, S. C., says: "Despite bad weather and boll weevil, I got 890 pounds of seed cotton per acre at first picking and the photograph below shows open cotton for the second picking with more still to open. It received 500 pounds of 3-4-3 fertilizer per acre of planting and 150 pounds of muriate of potash and nitrate of soda in equal parts. I always use heavy potash after grain crops."

W. B. CROSS, R. D. 1, Wilsonton, Ala., says: "Most of my cotton land was subject to rust. Last season I tried 10-0-10 top-dresser at 125 pounds per acre. Rust was controlled 100% in spite of bad weather. Bolls opened wide, where before they would just crack open and stop there. On part of my cotton where 10-0-10 was put on twice as heavy, the yield was better and the bolls were larger although it was on poor soil."

J. H. MEADOWS, Forterdale Seed and Stock Farm, Macon, Ga., says: "I believe most farmers do not use enough potash for profitable results. Under last year's adverse conditions I made 90 bales of cotton on 125.5 acres. The staple measured 1 1/4 inches. My fertilizer was 3-15-15 at 400 pounds per acre."

COTTON NEVER RUSTS when well-fed with NV POTASH—it's too busy producing a healthy, high-yielding, high-quality crop—it's too busy producing heavier bolls, heavier seed, more lint per seed, better grade, longer staple and stronger fibers. Throughout this section, farmers are finding out that NV POTASH PAYS IN MANY WAYS!

Farmers May Get Benefit Payments Without Planting Cotton

Farmers who cooperate with the farm program may receive full benefit payments without being required to plant any cotton at all. Previously, to qualify for full benefit a farmer was required to plant at least 80 percent of the cotton acreage allotted him.

205 Families In Bulloch County Aided In March

The Commodity Division of the State Department of Public Welfare succeeded in distributing surplus commodities to 205 needy families of Bulloch county during March, having a total value of \$1,479.57.

Surpluses distributed are supplementary to supplies normally bought by these families and do not displace their usual purchases. The economic condition of each family is determined by investigation to be so low that surpluses distributed to them will be used over and above amounts they have been buying, so that there will be no waste nor interference with regular business of growers.

Before any family can receive any surplus commodity it must be investigated and certified as being in need by the County Welfare Department. Accepted by the family of surpluses is on the basis that there will be no curtailment in the regular purchases of that family. It is the intention of the Commodity Division that distribution of surpluses will not interfere with commercial growers and toward that end, it is considered sufficient reason for certified families to lose their eligibility when investigation will show reasonable improvement in their economic condition or when it is ascertained that the family has reduced its normal purchases as a result of receiving surpluses.

For example, a farm that had been allotted 10 acres of cotton was required to plant at least eight acres in order to qualify for full payments. Now, the same farm would not have to plant any cotton at all in order to get full payments and would not be penalized in the calculation of acreage allotments for next season.
